

DIS Case Number: 16-0716-GA-AGG

## Section A: Application Information

### A-1. Provider type:

☒ Retail Natural Gas  
Broker

☒ Retail Natural Gas  
Aggregator

☐ Retail Natural Gas  
Marketer

### A-2. Applicant's legal name and contact information.

**Legal Name:** Good Energy, LP

**Country:** United States

**Phone:** 2127920222    **Extension (if applicable):**

**Street:** 232 Madison Ave Third Floor

**Website (if any):** www.goodenergy.com

**City:** New York

**Province/State:** NY

**Postal Code:** 10016

### A-3. Names and contact information under which the applicant will do business in Ohio

Provide the names and contact information the business entity will use for business in Ohio. This does not have to be an Ohio address and may be the same contact information given in A-2.

Name	Type	Address	Active?	Proof
Good Energy Consulting Services	DBA	232 Madison Avenue. Third Floor New York, NY 10016	Yes	File

### A-4. Names under which the applicant does business in North America

Provide all business names the applicant uses in North America, including the names provided in A-2 and A-3.

Name	Type	Address	Active?	Proof
Good Energy Consulting Services	DBA	232 Madison Avenue. Third Floor New York, NY 10016	Yes	File

#### A-5. Contact person for regulatory matters

#### A-6. Contact person for PUCO Staff use in investigating consumer complaints

#### A-7. Applicant's address and toll-free number for customer service and complaints

**A-8. Applicant's federal employer identification number**

### A-9. Applicant's form of ownership

**Form of ownership:** Partnership

**A-10. Identify current or proposed service areas**

Identify each service area in which the applicant is currently providing service or intends to provide service and identify each customer class that the applicant is currently serving or intends to serve.

**Service area selection**

Columbia Gas of Ohio  
 Dominion Energy Ohio  
 Duke Energy Ohio  
 CenterPoint Energy Ohio

**Class of customer selection**

Industrial  
 Residential  
 Small Commercial  
 Large Commercial

**A-11. Start date**

Indicate the approximate start date the applicant began/will begin offering services: 11-01-2007

**A-12. Principal officers, directors, and partners**

Please provide all contacts that should be listed as an officer, director or partner.

Name	Email	Title	Address
Javier Barrios	javier@goodenergy.com		232 Madison Ave New York, NY 10016 US
Maximilian Hoover	max@goodenergy.com	President	232 Madison Avenue Third Floor New York, NY 10016 US

Scott Health	scott@goodenergy.com	Managing Partner	3010 LBJ Freeway Suite #1256 Dallas, TX 75234 US

### **A-13. Company history**

Good Energy, LP has been in existence and active in a variety of different levels of the energy industry since before deregulation came into being in the State of Ohio. This includes Procurement for Electricity, Natural Gas, Heating Oil, Renewable Power, Lighting Management, Lighting Store: GoodMart.com, Demand Response (Energy Curtailment), Power Factor Correction, and Engineering Studies. As a result, Good Energy brings an enormous amount of experience from all areas of the energy industry, adding to the insights which guide our decision-making processes. Good Energy is active in all deregulated markets within the continental U.S. and Canada.

Good Energy's principal business interests are in serving as a consultant and/or broker and/or aggregator of electricity and natural gas in order to help our Public and Private sector clients achieve energy cost savings and maximize energy efficiencies. We also offer renewable energy strategies. With extremely strong relationships with over 50 national suppliers of energy, Good Energy is in a unique position for intelligence gathering, adding significantly to our negotiating strength with these suppliers. In addition, because of the ongoing affinity and aggregation programs now administered by Good Energy in several states, suppliers understand the extent of our footprint and are now far more likely to concede various contract terms and provide very competitive pricing.

In addition, Good Energy is certified by the center of Resource Solutions as a Green-e Energy Marketer selling retail and wholesale RECs (Renewable Energy Certificates) in all states. Good Energy also received partnership status with ENERGY STAR. As the government-backed, trusted symbol for energy efficiency, ENERGY STAR was created to help consumers easily identify products and practices that save energy and money, and help protect the environment.

### **A-14. Secretary of State**

Secretary of State Link:

### **A-15. Proof of Ohio Employee and Office**

Provide proof of an Ohio Office and Employee in accordance with Section 4929.22 of the Ohio Revised Code. List the designated Ohio employee's name, Ohio office address, telephone number and web site address

**Employee Name:** Incorp Services

## Section B: Applicant Managerial Capability and Experience

### **B-1. Jurisdiction of operations**

List all jurisdictions in which the applicant or any affiliated interest of the applicant is certified, licensed, registered or otherwise authorized to provide retail natural gas service or retail/wholesale electric service as of the date of filing the application..

Jurisdiction of Operation: California

Connecticut

Illinois

Maine

Maryland

Massachusetts

New Hampshire

New Jersey

New York

Ohio

Rhode Island

Texas

Virginia

### **B-2. Experience and plans**

Describe the applicant's experience in providing the service(s) for which it is applying (e.g., number and type of customers served, utility service areas, amount of load, etc.). Include the plan for contracting with customers, providing contracted services, providing billing statements and responding to customer inquiries and complaints in accordance with Commission rules adopted pursuant to Sections 4928.10 and/or 4929.22 of the Ohio Revised Code.

Application Experience and Plan Description: Good Energy has long experience working with commercial, industrial, and municipal clients to achieve energy cost savings goals through procurement and demand-side management. Whether the goals are budget certainty, long-term purchasing, flexibility, demand reduction, we create solutions to fit these objectives. Good Energy has shepherded many clients through the evolution of energy products with

special consideration to levels of risk tolerance. We develop graphs and charts profiling current and historic energy consumption prior to any meeting with a client and point out any anomalies outside of any usual seasonal changes. If during the term of our management we perceive any out-of-the-ordinary usage patterns we immediately notify the client.

By generating competition between qualified retail electricity providers, ensuring a level playing field, keeping a careful watch on wholesale energy prices and effectively finding and comparing the available rates and contracts, Good Energy can help Customers choose the retail energy provider or a wholesale market entry strategy and product structure most advantageous to customers. We offer an energy assessment designed to keep things simple. This assessment includes a detailed history of customers' existing energy consumption, a complete summary of the competitive supply offers and the necessary information needed to make an informed decision, including information about the capabilities of the qualified energy providers, current market conditions, historical trends, and more.

Upon election to switch providers, we will work with customers from start to finish, and ensure that the experience is a positive one for customers, although the process by no means ends with the consummation of the commodity contract. Good Energy will continue to monitor the monthly bills to ensure accuracy, and we monitor the wholesale market to identify opportunities to issue new and improved RFPs for contract renewal or extension.

We think it is critical to view energy procurement in a different way than other types of procurement because taking advantage of major market movements in wholesale energy supply can mean very significant savings for customers. For example, while it might be good practice to issue an annual RFP at the same time each year for employee health insurance, this would not be a good idea when procuring energy due to the fact that the market will dictate the best times to issue RFPs.

Properly armed with the buying tools provided by Good Energy, the financial risk associated with commodity procurement will be mitigated. For example, if the market is unseasonably high, but still yielding a price advantage over the standard offer, we might recommend a product consisting of a three-month block of energy to fix the near-term price, while floating the last nine months of the contract price, with the expectation that the market might soften between now and three months from now, permitting the later procurement of an additional block to fix the price for the latter part of the contract.

Good Energy can model scenarios for customers to assist in the evaluation of these complex product structures, which can have the effect of minimizing risk and price at the end of the final analysis. While we fully understand that many customers only want firm-fixed pricing, we want to demonstrate to them the myriad alternatives.

Good Energy currently buys energy products for many clients, nationally, with our strategy based on budgetary certainty. Our plans usually include a ratio of fixed and floating strategies

in order to maintain maximum flexibility. Good Energy takes an active approach when it comes to hedging. Our proprietary database-driven energy management system, [goodenergy.net](http://goodenergy.net), constantly notifies our staff as to changes in market conditions, which may influence strategies currently in place. Energy cost hedging is an everyday process at Good Energy.

### **B-3. Disclosure of liabilities and investigations**

For the applicant, affiliate, predecessor of the applicant, or any principal officer of the applicant, describe all existing, pending or past rulings, judgments, findings, contingent liabilities, revocation of authority, regulatory investigations, judicial actions, or other formal or informal notices of violations, or any other matter related to competitive services in Ohio or equivalent services in another jurisdiction..

Liability and Investigations Disclosures: Good Energy Consulting Services, LP. (Good Energy, LP) does not have any existing, pending or past due rulings, judgments, contingent liabilities, revocation of authority, regulatory investigations, or any other matter that could adversely impact the applicant's financial or operational status or ability to provide the services it is seeking to provide.

### **B-4. Disclosure of consumer protection violations**

Has the applicant, affiliate, predecessor of the applicant, or any principal officer of the applicant been convicted or held liable for fraud or for violation of any consumer protection or antitrust laws within the past five years?

**No**

### **B-5. Disclosure of certification, denial, curtailment, suspension or revocation**

Has the applicant, affiliate, or a predecessor of the applicant had any certification, license, or application to provide retail natural gas or retail/wholesale electric service denied, curtailed, suspended, revoked, or cancelled or been terminated or suspended from any of Ohio's Natural Gas or Electric Utility's Choice programs within the past two years?

**No**

## Section C: Applicant Financial Capability and Experience

### C-1. Financial reporting

Provide a current link to the most recent Form 10-K filed with the Securities and Exchange Commission (SEC) or upload the form. If the applicant does not have a Form 10-K, submit the parent company's Form 10-K. If neither the applicant nor its parent is required to file Form 10-K, state that the applicant is not required to make such filings with the SEC and provide an explanation as to why it is not required.

Does not apply

### C-2. Financial statements

Provide copies of the applicant's two most recent years of audited financial statements, including a balance sheet, income statement, and cash flow statement. If audited financial statements are not available, provide officer certified financial statements. If the applicant has not been in business long enough to satisfy this requirement, provide audited or officer certified financial statements covering the life of the business. If the applicant does not have a balance sheet, income statement, and cash flow statement, the applicant may provide a copy of its two most recent years of tax returns with **social security numbers and bank account numbers redacted**.

If the applicant is unable to meet the requirement for two years of financial statements, the Staff reviewer may request additional financial information.

Preferred to file this information confidentially

### C-3. Forecasted financial statements

Provide two years of forecasted income statements **based solely on the applicant's anticipated business activities in the state of Ohio**.

Include the following information with the forecast: a list of assumptions used to generate the forecast; a statement indicating that the forecast is based solely on Ohio business activities only; and the name, address, email address, and telephone number of the preparer of the forecast.

The forecast may be in one of two acceptable formats: 1) an annual format that includes the current year and the two years succeeding the current year; or 2) a monthly format showing 24 consecutive months following the month of filing this application broken down into two 12-

## Public Utilities Commission

month periods with totals for revenues, expenses, and projected net incomes for both periods. Please show revenues, expenses, and net income (revenues minus total expenses) that is expected to be earned and incurred in **business activities only in the state of Ohio** for those periods.

If the applicant is filing for both an electric certificate and a natural gas certificate, please provide a separate and distinct forecast for revenues and expenses representing Ohio electric business activities in the application for the electric certificate and another forecast representing Ohio natural gas business activities in the application for the natural gas certificate.

Preferred to file confidentially

### C-4. Credit rating

Provide a credit opinion disclosing the applicant's credit rating as reported by at least one of the following ratings agencies: Moody's Investors Service, Standard & Poor's Financial Services, Fitch Ratings or the National Association of Insurance Commissioners. If the applicant does not have its own credit ratings, substitute the credit ratings of a parent or an affiliate organization and submit a statement signed by a principal officer of the applicant's parent or affiliate organization that guarantees the obligations of the applicant. If an applicant or its parent does not have such a credit rating, enter 'Not Rated'.

This does not apply

### C-5. Credit report

Provide a copy of the applicant's credit report from Experian, Equifax, TransUnion, Dun and Bradstreet or a similar credit reporting organization. If the applicant is a newly formed entity with no credit report, then provide a personal credit report for the principal owner of the entity seeking certification. At a minimum, the credit report must show summary information and an overall credit score. **Bank/credit account numbers and highly sensitive identification information must be redacted.** If the applicant provides an acceptable credit rating(s) in response to C-4, then the applicant may select 'This does not apply' and provide a response in the box below stating that a credit rating(s) was provided in response to C-4.

File(s) attached

### C-6. Bankruptcy information

Within the previous 24 months, have any of the following filed for reorganization, protection from creditors or any other form of bankruptcy?

- Applicant
- Parent company of the applicant
- Affiliate company that guarantees the financial obligations of the applicant
- Any owner or officer of the applicant

No

### **C-7. Merger information**

Is the applicant currently involved in any dissolution, merger or acquisition activity, or otherwise participated in such activities within the previous 24 months?

No

### **C-8. Corporate structure**

Provide a graphical depiction of the applicant's corporate structure. Do not provide an internal organizational chart. The graphical depiction should include all parent holding companies, subsidiaries and affiliates as well as a list of all affiliate and subsidiary companies that supply retail or wholesale electricity or natural gas to customers in North America. If the applicant is a stand-alone entity, then no graphical depiction is required, and the applicant may respond by stating that it is a stand-alone entity with no affiliate or subsidiary companies.

Stand-alone entity with no affiliate or subsidiary companies

## **Section D: Applicant Technical Capacity**

### **D-1. Operations**

Retail natural gas brokers/aggregators: Include details of the applicant's business operations and plans for arranging and/or aggregating for the supply of natural gas to retail customers.

Retail natural gas brokers/aggregators: Include details of the applicant's business operations and plans for arranging and/or aggregating for the supply of natural gas to retail customers.

## Public Utilities Commission

Operations Description: Good Energy has long experience working with commercial and industrial (C&I) clients to achieve energy cost savings goals through procurement and demand-side discipline. Whether the goals are budget certainty, long-term purchasing, flexibility, demand reduction, we create solutions to fit these objectives. Good Energy has shepherded many clients through the evolution of energy products with special consideration to levels of risk tolerance. We develop graphs and charts profiling current and historic energy consumption prior to any meeting with a client and point out any anomalies outside of any usual seasonal changes. If during the term of our management we perceive any out-of-the-ordinary usage patterns we immediately notify the client.

By generating competition between qualified retail electricity providers, ensuring a level playing field, keeping a careful watch on wholesale energy prices and effectively finding and comparing the available rates and contracts, Good Energy can help Customers choose the retail energy provider or a wholesale market entry strategy and product structure most advantageous to customers.

We offer an energy assessment designed to keep things simple. This assessment includes a detailed history of customers' existing energy consumption, a complete summary of the competitive supply offers and the necessary information needed to make an informed decision, including information about the capabilities of the qualified energy providers, current market conditions, historical trends, and more.

Upon election to switch providers, we will work with customers from start to finish, and ensure that the experience is a positive one for customers, although the process by no means ends with the consummation of the commodity contract. Good Energy will continue to monitor the monthly bills to ensure accuracy, and we monitor the wholesale market to identify opportunities to issue new and improved RFPs for contract renewal or extension.

We think it is critical to view energy procurement in a different way than other types of procurement, because taking advantage of major market movements in wholesale energy supply can mean very significant savings for customers. For example, while it might be good practice to issue an annual RFP at the same time each year for employee health insurance, this would not be a good idea when procuring energy due to the fact that the market will dictate the best times to issue RFPs.

Properly armed with the buying tools provided by Good Energy, the financial risk associated with commodity procurement will be mitigated. For example, if the market is unseasonably high, but still yielding a price advantage over the standard offer, we might recommend a product consisting of a three month block of energy to fix the near-term price, while floating the last nine months of the contract price, with the expectation that the market might soften between now and three months from now, permitting the later procurement of an additional block to fix the price for the latter part of the contract.

Good Energy can model scenarios for customers to assist in the evaluation of these complex product structures, which can have the effect of minimizing risk and price at the end of the final analysis. While we fully understand that many customers only want firm-fixed pricing, we want to demonstrate to them the myriad alternatives.

Good Energy currently buys energy products for many clients, nationally, with our strategy based on budgetary certainty. Our plans usually include a ratio of fixed and floating strategies in order to maintain maximum flexibility. Good Energy takes an active approach when it comes to hedging. The scores and ratings included in this report are designed as a tool to assist the user in making their own credit related decisions, and should be used as part of a balanced and complete assessment relying on the knowledge and expertise of the reader, and where appropriate on other information sources. The score and rating models are developed using statistical analysis in order to generate a prediction of future events. Dun & Bradstreet monitors the performance of thousands of businesses in order to identify characteristics common to specific business events. These characteristics are weighted by significance to form rules within its models that identify other businesses with similar characteristics in order to provide a score or rating.

Dun & Bradstreet's scores and ratings are not a statement of what will happen, but an indication of what is more likely to happen based on previous experience. Though Dun & Bradstreet uses extensive procedures to maintain the quality of its information, Dun & Bradstreet cannot guarantee that it is accurate, complete or timely, and this may affect the included scores and ratings. Your use of this report is subject to applicable law, and to the terms of your agreement with Dun & Bradstreet.

Risk Assessment

D&B RISK ASSESSMENT

OVERALL BUSINESS RISK

Dun & Bradstreet thinks...

- Overall assessment of this organization over the next 12 months: **STABILITY CONCERNS**
- Based on the predicted risk of business discontinuation: **HIGHER-THAN-AVERAGE-RISK-OF-DISCONTINUED-OPERATIONS-OR-BUSINESS-INACTIVITY**
- Based on the predicted risk of severely delinquent payments: **HEIGHTENED POTENTIAL FOR SEVERELY DELINQUENT PAYMENTS**

MAXIMUM CREDIT RECOMMENDATION

US\$ 10,000

The recommended limit is based on a moderately high probability of severe delinquency or business failure.

D&B VIABILITY RATING SUMMARY

The D&B Viability Rating uses D&B's proprietary analytics to compare the most predictive business risk indicators and deliver a highly reliable assessment of the probability that a company will go out of business, become dormant/inactive, or file for bankruptcy/insolvency within the next 12 months. The D&B Viability Rating is made up of 4 components:

Viability Score

Compared to All US Businesses within the D&B Database:

- Level of Risk:**Moderate Risk**
- Businesses ranked **6** have a probability of becoming no longer viable: **13 %**
- Percentage of businesses ranked **6**: **30 %**
- Across all US businesses, the average probability of becoming no longer viable:**14 %**

Portfolio Comparison

Compared to All US Businesses within the same MODEL SEGMENT:

- Model Segment :**Established Trade Payments**
- Level of Risk:**High Risk**
- Businesses ranked **8** within this model segment have a probability of becoming no longer viable: **11 %**
- Percentage of businesses ranked **8** with this model segment: **13 %**
- Within this model segment, the average probability of becoming no longer viable:**5 %**

Placed for collections	0	US\$ 0
Total in D&B's file	13	US\$ 10,750

Accounts are sometimes placed for collection even though the existence or amount of the debt is disputed. Payment experiences reflect how bills are met in relation to the terms granted. In some instances payment beyond terms can be the result of disputes over merchandise, skipped invoices etc. Each experience shown represents a separate account reported by a supplier. Updated trade experiences replace those previously reported.

## **D-2. Operations Expertise**

**Applicant: Good Energy Consulting Services, LP. (Good Energy, LP)**

### **ENERGY PROCUREMENT: HOW IT WORKS**

Good Energy will obtain the key data, including Letters of Authorization, (“LOA”), for each of the accounts. LOA forms will be filled out by Good Energy, requiring only customers review and signature.

Upon receipt of the LOAs, Good Energy will immediately request historical data from the utility and verify that the data received matches the account profile, service address, etc. The electronic format of historical usage data will be uploaded to goodenergy.net. Armed with this data, Good Energy will be perfectly positioned to make intelligent recommendations with quantifiable benefits to advice customers.

We look at trends on a year over year basis and on an increasing/decreasing slope basis. Either way these consumption patterns influence our final decision regarding purchasing strategies. Each month, usage data is loaded into our goodenergy.net, our proprietary database from which detailed reports can be produced.

The consolidation of this pricing is a critical first step to negotiating with suppliers. Armed with a clear understanding of the contents of the various offers, we are best prepared to achieve customers’ desired goals.

Good Energy participates actively with energy suppliers at every level. Goodenergy.net is used to assemble historical usage data from multiple accounts in preparation for pricing requests to be sent to multiple retail electricity providers. This means that Good Energy can very quickly act on buying opportunities and RFPs.

Below is a sample report showing usage trends and patterns.

Charge Profile

Good Energy is proud to be an ENERGY STAR partner. ENERGY STAR was created to help consumers easily identify products, homes, and buildings that save energy and money, and help protect the environment. ENERGY STAR is a government-backed, trusted symbol for energy efficiency. Contact your Good Energy representative to learn more about ENERGY STAR products and services.

Good Energy: A Smarter Way to Buy Energy

Good Energy has contracts in place with over three dozen of the most reliable and responsible retail energy providers servicing customers within the United States, including AEP Energy, AP Gas & Electric, Champion Energy Services, Constellation Energy, Continuum Energy, Direct Energy, Dynegy Energy Services, FreePoint Energy Solutions, Tiger Natural Gas, Plymouth Rock Energy, Volunteer Energy and many more. Good Energy communicates with these retail energy providers on a daily basis, and we are constantly soliciting pricing, expediting contract execution, facilitating meter readings for supplier change, handling customers' billing concerns and performing other tasks that permit us regularly to exceed our customers' and our suppliers' expectations. Good Energy's excellent business relationships with these retail energy providers and our first-class technology solutions will enable us to handle the entire energy procurement process for customers, while maintaining absolute process transparency and constant access to detailed electricity account and other information. Importantly, customers will benefit from Good Energy's economy of scale and excellent relationships with the key retail electricity providers because Good Energy will be able to extract pricing proposals from these and other retail electricity providers chosen by customers **quickly** and **accurately**.

Upon contract execution, Good Energy will upload the signed contract to goodenergy.net, and the winning retail electricity provider will be asked to confirm back to Good Energy that the contract has been accepted and hedged. Good Energy will verify that original documents are circulated between the retail electricity provider and customers, and Good Energy will follow up with the retail electricity provider to make sure the meters are switched on a timely basis pursuant to the

contract. Goodenergy.net has built-in features that will make it easy for Good Energy personnel to follow up with the retail electricity provider chosen to serve customers accounts to ensure that each account has been switched on a timely basis.

## WRITING THE RFP

### Develop and write energy (electric and natural gas) bid specifications

Good Energy has written RFPs for many C&I clients nationally and several municipalities with a population over 1,000,000 persons, with great overall success in this area. We tailor RFPs to suit a client's needs and will not hesitate to throw away existing stale versions and start over from scratch. There are so many different types of bids to choose from. We tailor procurement protocols to the organizational behavior of our clients. We clearly understand the importance of organization timelines, policies, and practices, and make our best recommendations on how to accommodate them into efficient procurement processes.

Good Energy's experience in contract negotiations will benefit customers because we are aware of a broad array of contract concessions available from various retail electricity providers upon request. While the retail electricity providers never volunteer these concessions, Good Energy routinely extracts retail electricity provider contract concessions for the benefit of an end-user, including for example, **contract termination right** upon facility sale or closure, (ideally without potential economic burden of mark-to-market calculation and penalty), removal of **bandwidth** penalty, (permitting the end-user to use as much or as little power as they wish, without economic penalty), and **blend & extend** provisions, (permitting extension of contract term at an overall reduction in price upon market decline).

Good Energy with the input of customers will come up with the best policies and procedures to facilitate timely purchasing through a disciplined process.

Good Energy has identified the action-related waypoints on the path to energy supply contract execution, and we have built goodenergy.net to help us navigate from one waypoint to the next. The key waypoints in the process are:

1. Account List Assembly.
2. LOA Completion.
3. Historical Usage Data Compilation.
4. Pricing Analysis.
5. Approval of an Energy Supply Contract, Price and Term.
6. Execution of the Contract.
7. Follow Up.
8. Renewal – Repeat the Process when market conditions warrant.

The dates of every waypoint completion for are recorded in goodenergy.net, along with a future follow-up date. When the follow-up date is reached, the Good Energy account manager will receive a reminder, triggering a phone call, fax or email designed to solicit a response from

customers, and movement of the process to the next waypoint. Every communication with customers is recorded in [goodenergy.net](http://goodenergy.net), and [goodenergy.net](http://goodenergy.net) continually prompts the Good Energy user to enter a follow-up date to *keep the process moving forward*.

1. Account List Assembly.  
Deliverable: Account list will be accessible at all times on [www.goodenergy.net](http://www.goodenergy.net)  
Account list can be transmitted in Excel format for review and manipulation
2. Letter of Authorization Completion.  
Deliverable: Letters of Authorization will be completed by Good Energy and submitted to customers for signature. Signed Letters of Authorization will be transmitted to customers, and filed on [www.goodenergy.net](http://www.goodenergy.net). Letters of Authorization will be accessible 24/7/365 by authorized parties.
3. Historical Usage Data Compilation.  
Deliverable: Historical energy usage data for electricity and natural gas will be drawn from the utility. Historical energy usage data will be gathered by a review of the customers' billing statements. All of the historical usage data will be input into [www.goodenergy.net](http://www.goodenergy.net) and will be accessible at all times by authorized parties.
4. Pricing Analysis.  
Deliverable: After qualified suppliers are vetted for customers, historical energy usage data will be transmitted to the suppliers, and bids for future energy supply will be solicited in the form of RFP issuance. All qualified suppliers will be actively encouraged to participate in the RFP process.
5. Approval of an Energy Supply Contract, Price and Term.  
Deliverable: All Energy Supply Contracts proposed by the qualified suppliers will be complied by Good Energy and presented to customers. Suppliers with the most attractive products, contract pricing and other terms will be focused on, and the contract forms provided by those suppliers will be vetted by Good Energy and customers to advance the process. Upon selection of the most desirable product and term, the leading suppliers will be asked to refresh their price offers until a target execution date is set. All pertinent documents and price offers will be recorded in [www.goodenergy.net](http://www.goodenergy.net).
6. Execution of the Contract.  
Deliverable: Good Energy will circulate hard copies of all final approved contracts for execution between customers and the winning supplier(s). Good Energy will ensure final contract documents are delivered to all authorized parties, and the contracts themselves will be stored on [www.goodenergy.net](http://www.goodenergy.net), with access granted to authorized parties at all times.
7. Follow Up.  
Deliverable: Good Energy will follow up with the winning suppliers to ensure that the accounts are in fact being switched to the new service on a timely basis. After the contracts go into effect, the monthly bills will be input into [www.goodenergy.net](http://www.goodenergy.net) and monthly reports will be delivered to customers.
8. Renewal – Repeat the Process when market conditions warrant.

## DEVELOPMENT OF SUPPLIER CRITERIA

In most cases, Good Energy will require that all suppliers meet minimum standards fiscally, professionally, and have proven track record with large C&I clients.

Good Energy will assist customers in obtaining an uninterrupted COST for supply of electricity, where full or partial hedges are required, (notwithstanding grid failures), by pre-qualifying the financial wherewithal of retail energy suppliers invited to quote customers' energy supply needs. Because retail electricity and natural gas contracts are purely financial instruments, the price guarantee afforded by the contract itself is only as strong as the supplier behind the contract. Financial statements of all suppliers will be made available to customers.

Good Energy will also develop a chart of the energy supplier's criteria (matrix) so it may assist customer's decision making while determining the strength of each competitive energy bid.

Upon receipt of pricing from the various retail electricity providers, the pricing is input into goodenergy.net. Each of the pricing proposals must match a pre-authorized product, and the products themselves are meticulously verified for consistency. For example, if Supplier A's offer does not include congestion charges, while offers from Supplier B do include congestion charges, then Supplier A will be required to modify their quote to include congestion to allow for a true **apples-to-apples** price comparison. This comparison including full detail of price components for each proposal will be generated by goodenergy.net, and can then be presented to each customer, along with draft contract forms as appropriate and summary analysis of savings when compared to other available prices and the price to beat.

Good Energy has over 50 ESCO partners nationally and often suppliers from one region will open for business in a new territory with great initial pricing. We are often asked by suppliers to take them into emerging markets. We are on the executive boards of TEPA (Texas Electricity Professionals Association) and ILEPA (Illinois Electricity Professionals Association) where we serve on the ethics committee in the former and on the new membership committee in the latter. We are also a RIP (responsible interface party) for the NYISO (New York Independent System Operator). The energy suppliers are also members of these organizations which gives us instant access to the national executives of these ESCOs.

We negotiate every day for clients against suppliers and employ various strategies apropos to the current situation and client. We keep our clients abreast of the updates regarding on-going negotiations. This is our core competency.

## **OTHER SERVICES: POST COMMODITY PURCHASING**

### **Budgeting and Tracking**

- All data collected will be input into [goodenergy.net](http://goodenergy.net) as it is received. For quality control purposes, one Good Energy point of contact will be responsible for all data entry.
- We develop management reports that measure the variation between actual performance and goals.
- We create progress reports which are given to our current client base on a regular basis. Again through [www.goodenergy.net](http://www.goodenergy.net) we are able to generate variation reports among many other reports and analyses.
- We provide analytical and quantitative support in the development of tools, reports, and procedures for use in customers' energy management process.
- The [goodenergy.net](http://goodenergy.net) features a reporting section which will permit us to generate dynamic reports at any time showing key energy usage data and costs, among other things.

## **D-2. Key Technical Personal**

### **CHARLES DE CASTEJA – MANAGING PARTNER AND DIRECTOR OF MASS MARKETS AND AGGREGATION**

Phone: (212) 691-9467

Email: Charles@GoodEnergy.com

Mr. de Casteja is responsible for strategic acquisition and management of all Good Energy's aggregations across US deregulated energy markets. He is a recognized expert on government energy aggregation in the United States and is frequently a panelist at retail energy conferences and a guest on industry conference calls. In 2011, Mr. de Casteja and his team successfully entered the Illinois market with an aggressive campaign to pool municipalities seeking municipal electricity aggregation into a formidable buying group. These efforts have resulted in Good Energy's municipal aggregations having more communities than any other company of its kind. Mr. de Casteja is a decorated Marine of the Gulf War with a BA in East Asian Studies from George Washington University. He currently serves as Secretary of Safe and Reliable Energy Future, Inc. and Board Secretary of the United States Court Tennis Preservation Foundation.

### **JAVIER BARRIOS – MANAGING PARTNER**

Phone: (212) 741-3052

Email: Javier@GoodEnergy.com

Mr. Barrios brings over 20 years of experience in Business Strategy and Marketing. As one of the original founders, he has developed the firm's commodity products and offerings of electricity, natural gas, renewable energy, and demand response across 21 states. He has solidified over 60 wholesale energy supplier relationships throughout the U.S., Canada, and Europe. Mr. Barrios is involved in the management of all strategic, financial, and operational functions of the company. Mr. Barrios is a graduate of the Zicklin School of Business at Bernard Baruch College in New York City and lives in Oyster Bay, Long Island with his wife and three children. Mr. Barrios also serves as President of TEPA: The Energy Professionals Association Northeast region. TEPA is a 300-member organization that helps promote a standardized code of conduct for energy aggregators, brokers, and consultants nationwide.
