For InterLATA signaling service, see Section 18, following.   (C)

                  There are three types of charges that apply for STP Access. They are recurring, usage and nonrecurring charges. Recurring and nonrecurring charges apply for each port that is established on an STP. Usage charges apply for each Initial Address Message (IAM) or Transaction Capabilities Application Part (TCAP) (excluding LIDB Access Service, 800 Access Service TCAP messages and LNP Database Access Query TCAP messages) message that is switched by the STP or switched by the STP and transported over SS7 facilities provided by the Telephone Company. ACCESS SERVICE

6. Switched Access Service (Cont'd)

   6.4 Data Base Services

      Data Base Services are those services provided using components of the Telephone Company's Common Channel Signaling, Signaling System 7 (CCS/SS7) network. Data Base Services can use application software in processing a CCS/SS7 call. Data Base Services can also be used to request and respond to call processing instructions.

      6.4.1 800 Service

         800 Service is a generic term for access services associated with toll free numbers.

         800 Service, which is available to all customers, is an originating offering which provides a carrier identification function for numbers using toll free service access codes (SACs) (e.g., 800 or 888-NXX-XXXX). The carrier identification function is performed using queries which are routed using the Telephone Company CCS/SS7 network to the Telephone Company Service Control Point (SCP). 800 Service may be provided with Call-Routing Capability or Carrier-ID-Only[1] options.   (C)

         The Federal Communications Commission (FCC) has concluded that hoarding, defined as the acquisition of more toll free numbers than one intends to use for the provision of toll free service, as well as the sale of a toll free number by a private entity for a fee, is contrary to the public interest in the conservation of the scarce toll free number resource and contrary to the FCC's responsibility to promote the orderly use and allocation of toll free numbers.

         (A) 800 Call-Routing Capability

            Call-Routing Capability is provided in conjunction with originating Switched Access Services. When a toll free call is originated by an end user, the Telephone Company will perform the carrier identification function based on the dialed digits to determine the customer location to which the call is to be routed. Once carrier identification has been established, the call will be routed to the customer.

            800 service will be provided in conjunction with Feature Group D service.

            For the Call-Routing carrier identification function, all traffic must be routed via a Service Switching Point (SSP) at which that function is available. It is the customer's responsibility to ensure that sufficient Switched Access facilities have been ordered to handle its toll free traffic.

---

[1] As of September 1, 2023, the Telephone Company has discontinued 800 Carrier-ID-Only, as the Telephone Company has no   (N)
customers subscribing to 800 Carrier-ID-Only and has received no reasonable requests for service within the prior 30 days.   (N)

ACCESS SERVICE

6.   **Switched Access Service (Cont'd)**

   6.4   **Data Base Services (Cont'd)**

   6.4.1800 Service (Cont'd)

   (B)   800 Carrier-ID-Only[1]   (C)

   Customers may choose to launch queries to the Telephone Company SCP using their own CCS/SS7 network to transport part of the signaling. When the carrier identification is provided, the customer may use the information to route toll free traffic using their own network. In these cases, Telephone Company Switched Access services are not used to deliver a call to a carrier.

   Customers must purchase Signal Transfer Point Access Service as described in 6.1.3(A)(4)(b) preceding. Customers with networks and/or SSPs located in LATAs not served by the Telephone Company, must order STP Access at the Regional STP in LATA 358 (Chicago, Illinois) for 800 Carrier-ID-Only service.
