The scores and ratings included in this report are designed as a tool to assist the user in making their own credit related decisions, and should be used as part of a balanced and complete assessment relying on the knowledge and expertise of the reader, and where appropriate on other information sources. The score and rating models are developed using statistical analysis in order to generate a prediction of future events. Dun & Bradstreet monitors the performance of thousands of businesses in order to identify characteristics common to specific business events. These characteristics are weighted by significance to form rules within its models that identify other businesses with similar characteristics in order to provide a score or rating.

Dun & Bradstreet's scores and ratings are not a statement of what will happen, but an indication of what is more likely to happen based on previous experience. Though Dun & Bradstreet uses extensive procedures to maintain the quality of its information, Dun & Bradstreet cannot guarantee that it is accurate, complete or timely, and this may affect the included scores and ratings. Your use of this report is subject to applicable law, and to the terms of your agreement with Dun & Bradstreet.

# **Risk Assessment**

The D&B Viability Rating uses D&B's proprietary analytics to compare the most predictive business risk indicators and deliver a highly reliable assessment of the probability that a company will go out of business, become dormant/inactive, or file for bankruptcy/insolvency within the next 12 months. The D&B Viability Rating is made up of 4 components:

# **Viability Score** Compared to All US Businesses within the D&B **Database:**

- Level of Risk:Low Risk
- Businesses ranked 3 have a probability of becoming no longer viable: 3 %
- Percentage of businesses ranked 3: 15 %
- Across all US businesses, the average probability of becoming no longer viable:14 %

# **Portfolio Comparison** Compared to All US Businesses within the same **MODEL SEGMENT:**

- Model Segment : Established Trade Payments
- Level of Risk:Low Risk
- Businesses ranked 2 within this model segment have a probability of becoming no longer viable: 3 %
- Percentage of businesses ranked 2 with this model segment: 16 %
- Within this model segment, the average probability of becoming no longer viable:5 %

# **Data Depth Indicator Data Depth Indicator:**

- ✓ Rich Firmographics
- ▼ Extensive Commercial Trading Activity

Accounts are sometimes placed for collection even though the existence or amount of the debt is disputed. Payment experiences reflect how bills are met in relation to the terms granted. In some instances payment beyond terms can be the result of disputes over merchandise, skipped invoices etc. Each experience shown represents a separate account reported by a supplier. Updated trade experiences replace those previously reported.
