Re: Case No. 01-3112-TP-ATA (Docket No. 90-5041-TP-TRF)

Dear Ms. Crockron:

Enclosed for filing are the original and three (3) copies of the following "final" revised tariff sheets:

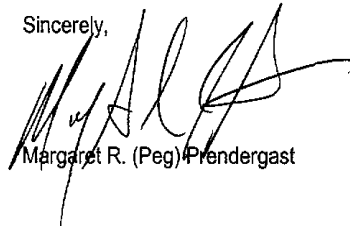

General Exchange Tariff, P.U.C.O. No. 5

Section 24, Fourth Revised Sheet 1
Section 24, Seventh Revised Sheet 3
Section 24, Seventh Revised Sheet 4
Section 24, Ninth Revised Sheet 6
Section 24, Seventh Revised Sheet 7
Section 24, Second Revised Sheet 8

This filing reflects compliance with the Commission's Order in Case No.01-3112-TP-ATA to revise tariff language in an effort to standardize tariffs on a corporate-wide basis.

Please return a date-stamped copy of this transmittal letter for our files. A copy is enclosed for that purpose. If you have questions or need additional information regarding this filing, you may call Becky Donahue at 614-220-8624.

Sincerely,

Margaret R. (Peg) Prendergast

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION

Custom calling service includes one or more of the following features:

A. Basic Call Forwarding

Call forwarding permits a subscriber to transfer all incoming calls to another telephone number by dialing a code and the telephone number of the service to which the calls are to be transferred. Due to transmission limitations, it is recommended that the calls be transferred only within the subscriber's local calling area.

B. *Speed Dial*

(T)

Speed Dial provides the subscribers with the capability of placing local and message toll calls to frequently called numbers by dialing abbreviated codes. This arrangement is available in either eight or 30 repertoire. (T)

C. Three-Way Calling

Three-way calling permits the subscriber to add a third party to an existing connection, thereby establishing a three-way conversation or conference. Due to transmission limitations, it is recommended that only one of the parties included in such a call be outside the local calling area of the subscriber initiating the call.

D. Enhanced Call Waiting

Enhanced Call Waiting provides the subscriber, already on an existing call, with a tone signal indicating that an unanswered call is waiting to be completed to the subscriber's number. The subscriber may then hold the existing call and alternately talk on both calls until one has been terminated. Enhanced Call Waiting also adds the option to cancel Call Waiting. Cancel Call Waiting can be activated before or during a call by dialing an access code and then stays in effect for the duration of the call. Incoming calls receive a busy signal while cancel call waiting is in effect.

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (cont'd)

I. Call Forward – Busy

Call Forward – Busy allows the subscriber to have calls forwarded to another station when the called station is busy. The subscriber can continue a conversation while incoming calls are answered elsewhere.

J. Call Forward - Remote Activation

Call Forward - Remote Activation allows the subscriber to change the call forwarding status of a home or business telephone from a remote location. To redirect call forwarding from a remote location, the subscriber dials a remote-access directory number. Once the subscriber's authorization code is verified, the subscriber can activate, deactivate, or change call forwarding to a new destination.

K. Enhanced Call Forwarding

Enhanced Call Forwarding is a packaged feature consisting of Call Forward - No Answer **and** Call Forward - Busy.

(T)
(D)

L. SignalRing® Plus

(T)

SignalRing® Plus - This arrangement enables an individual line customer to identify an incoming call by having up to three (3) additional directory numbers (Secondary Directory Number) assigned to their main access line (Primary Directory Number). Each Secondary Directory Number is assigned a distinctive ring in order to determine which number or person is being called. SignalRing® Plus is associated with incoming calls only and does not provide a separate dial tone line to place outgoing calls.

(D) (N)
(D)

If any customer requests a Secondary Directory Number as a business listing, the Primary Directory Number must be a business access line. Each Secondary Directory Number is entitled to one directory listing. Should the customer not desire the listing be published, the Telephone Company, in its directory listing process, shall designate the Secondary Directory Number as a No Charge Non-Pub. The customer would not be charged the Non-Pub recurring monthly charge as shown in Section 4. Non-List Service is not available for Secondary Directory Numbers.

Any Custom Calling Features assigned to the Primary Directory Number will also work with the Secondary Directory Numbers, i.e., Call Waiting, Call Forwarding, Call Forwarding Busy, Call Forwarding No Answer.

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (cont'd)

M. Subscriber Activated Call Block (T)

Subscriber Activated Call Block restricts access to certain types of outgoing calls, such as direct-dialed toll calls. Other types of calls, such as local, calls to 9-1-1, or calls to the operator can still be originated from the line. The subscriber dials an access code to activate the feature. While **Subscriber Activated Call Block** is in effect, the individual subscriber can override the restrictions by dialing a personal identification number (issued by the Telephone Company) before placing a call. Another code is used to deactivate **Subscriber Activated Call Block**. (T)

N. Call Forwarding of Call Waiting (T)

Call forwarding of Call Waiting, by combining Call Waiting with Call Forwarding - No Answer, provides the capability to forward unanswered waiting calls to a predetermined telephone number. An incoming call to a busy line first receives standard Call Waiting treatment in which an audible tone is heard by the called party and audible ringing is heard by the calling party. If the call is not answered after a predetermined number of rings, the incoming call is forwarded to a subscriber designated number. Only one call at a time will be forwarded; others will receive a busy tone.

O. Call Hold (T)

Call hold allows the subscriber to place a call on hold, and then continue the conversation either from the same telephone set or from a more convenient location. Call Hold is activated by flashing the switchhook, dialing an access code, and then hanging up. The call is resumed when the handset of the same telephone, or another telephone on the same line, is picked up.

P. Wake-up (T)

Wake-up service allows a subscriber to program from a telephone the time to be called by an automated wake-up service. The feature is activated and deactivated by an access code. When the feature is activated, the subscriber may program one "ring back" time within the succeeding 24-hour period, and must repeat this activation sequence for each succeeding 24-hour period. If a wake-up call is not answered or fails for any reason, two more attempts are made at approximately 5-minute intervals. After the third attempt is made, and the call is unanswered, the event is recorded and no further attempt is made.
