who use modems or fax machines on their regular telephone lines so they will not be interrupted by call waiting tones during this call.

g. Wake Up Service

Allows a subscriber to program a time of day for his telephone to ring to wake him up or for any other purpose he may have.

h. Revertive Calling

Allows a subscriber to ring his own line. This service is used mostly by people with extension phones in garages, barns, etc.

i. Call Hold

Allows a subscriber to put any call on hold in order to initiate a second call, answer a second call, consult privately with another party or return to a previous call. This service is like having two lines.

j. Direct Connect Service

Allows a subscriber to automatically place a call to a preselected directory number by simply lifting the receiver off the hook. No dialing is required. This service is activated after a preselected time interval during which the customer can make a regular call.

k. Do Not Disturb

Allows a subscriber to prevent incoming calls from ringing his line by diverting him to a tone or recorded announcement. The subscriber is issued a personal identification number that he can give to selected parties so that their calls can be completed in spite of the Do Not Disturb feature.

l. Do Not Disturb – Telemarketing

(N)

Allows customers to intercept callers attempting to terminate to their lines with an announcement stating, "You have called a number which does not accept calls from telemarketers. All other callers may press "1" if they wish to complete the call."

Thomas J. Brockman, President

m. Restricted Number Service

Allows the Telephone Company to block calls to certain subscriber specified destinations.

n. Usage-Sensitive Call Forwarding

(N)

Allows a subscriber to pay for Call Forwarding on a per-use basis. At the request of a Customer who does not subscribe to this feature on a monthly basis, access to this feature on a usage-sensitive basis may be blocked, at no charge to the Customer.

o. Usage-Sensitive Call Waiting

(N)

Allows a subscriber to pay for Call Waiting on a per-use basis. The charge will apply anytime the customer accepts the call that is waiting.

p. Usage-Sensitive Three-Way Calling

(N)

Allows a subscriber to pay for Three-Way Calling on a per-use basis.

q. Toll Restriction with PIN Override

Allows a customer to dial a specific code (customer-defined) that would toggle the customer's line from "Toll Restricted" (i.e., 1 + not allowed) to "Toll Allowed" on a per call basis. This will enable the customer to control the origination of toll traffic from the customer's line.

2. Installation or Service Change Charge

3. Rates

Monthly Rate (\$)

a.	Call Forwarding	\$1.50
b.	Three-Way Calling	\$1.75
c.	Speed Calling	
	• Eight (8) code capacity, per line	\$1.00
	• Thirty (30) code capacity, per line	\$2.00
d.	Call Waiting	\$2.50
e.	Teen Service	\$3.50

---

d. Caller ID (Calling Number Delivery) with Name

This service will allow a customer to receive the calling party's name in addition to the date, time and number of the calling party during the first silent interval of the power ringing cycle, i.e., before the call is answered. However, the calling party may subscribe to services that will prevent the disclosure of such information as found in Section 9. In such cases a privacy indication will appear on the customer-provided display device instead of the calling party's name and number.

e. Call Trace

Call Trace allows customers to request an automatic trace of the last call received by dialing \*57 from a touch-tone phone or 1157 from a rotary dial phone immediately following termination of the last incoming call. The customer will hear a recording explaining the charges and how to proceed with or terminate the trace. An announcement will also inform the customer if the trace has been successful and offers a number to call for further instructions. The Call Trace feature must be activated before receiving another call so that the correct number will be recorded. If the customer subscribed to Call Waiting and the customer gets a Call Waiting signal while an annoying call is in progress, the annoyance call cannot be traced using this feature. The results of a successful trace will only be released outside the Company to legally constituted authorities with proper authorization.

Call Trace will be offered on a subscription basis only.

f. Usage-Sensitive Repeat Dialing

(N)

Allows a subscriber to pay for Repeat Dialing on a per-use basis. At the request of a Customer who does not subscribe to this feature on a monthly basis, access to this feature on a usage-sensitive basis may be blocked, at no charge to the Customer.

g. Usage-Sensitive Call Return

(N)

Allows a subscriber to pay for Call Return on a per-use basis. At the request of a Customer who does not subscribe to this feature on a monthly basis, access to this feature on a usage-sensitive basis may be blocked, at no charge to the Customer.

- B. Custom Local Area Signalling Services (CLASS) cannot be functional unless both the called and calling parties are served by, and the call is routed through, appropriately-equipped central offices, and routed over appropriately-equipped facilities for calls between such equipped central offices. When a service cannot be functional notification will be given that the call is outside the call area served by the service.

C. Rates and Charges

The following monthly rates and non-recurring charges apply to Custom Local Area Signalling Services (CLASS), and are in addition to the rates and charges applicable to any associated service, equipment and facilities.
