Dear Ohio Power Siting Board:

~~In the matter of Case No. 03-132-EL-BTX~~ my husband James Freeman and I, Nola Freeman, do not want the 345 kilovolt Transmission Interconnect lines and the structures that support them crossing our property. If the area of Logan Gap Road is chosen as the right-of-way for these lines we believe it will have a negative impact and will not be compatible with the environment. Thank you for listening to my concerns in this matter.

Sincerely, Nola Freeman

RE: East Kentucky Power Cooperative, Inc.
345 Kilovolt Transmission Interconnection Project

Dear Ms. Freeman:

Thank you for expressing your concerns for the proposed East Kentucky Power Cooperative, Inc. 345 Kilovolt Transmission Interconnection Project. As with the consideration of all generating facilities, local and surrounding businesses, residents, municipalities and officials were invited to discuss the present and long-term economical and environmental feasibility of such a project.

On January 26, 2004, the PUCO staff issued our Staff Report of Investigation which took into consideration all potential impacts associated with the siting of this project and contains therein, our findings and recommendations. As a result, neither the Ohio Power Siting Board or staff are at liberty to make comments. However, appreciative of all input into the siting process, we have placed your letter in the official docket for this case.

Please note that the adjudicatory hearing will reconvene on February 12, 2004, at 10:00 a.m. in Hearing Room 11-D, at the offices of the Public Utilities Commission of Ohio, 11th Floor, 180 East Broad Street, Columbus, Ohio 43215. Should you wish to view or our Staff Report of Investigation or activity involving this application, visit our web site at www.puc.state.oh.us.

Again, the Board thanks you for your interest.

Very truly yours,

Klaus Lambeck, Chief
Ohio Power Siting Board
