Please do not allow
Ohio Edison to raise their
electric rates. They are
the highest now and
we cannot afford to
pay higher rates. You
should check into their
rates now and have
them reduced !!

Dear Commissioner,

This letter concerns First Energy's request for increase of water, sewer and gas rates.

As a long time customer, I feel we have more than paid for our water, sewer and gas. Why must the customers always pay for the company's poor management and poor maintenance? When First Energy is fined due to this, it is the

03-2144

Dear Sirs,

As two life-long residents of our state & of north-eastern vicinity that have participated in the C&H/C&S program for our utilities, we have long desired the opportunity to have had someone other than First Energy, i.e. Ohio Edison as the deliverer of our electricity. Because of jobs & now retirement plans our home is within the service area for Ohio Edison &, therefore, we must settle as their consumers. But, once again, as we are informed of the proposed plans of First Energy with regard to the public they serve, we urge you to consider the long-range ramifications of their plans/proposals. We are & have been stymied by the already excessive costs of delivery of electricity imposed by Ohio Edison, which nearly nullifies any savings made by choosing an electricity provider offering a fair rate.

It is common knowledge that First Energy (Ohio Edison's) charges supercedes those of other electricity conglomerates & is a mystery to us as to why & how they are allowed to continue to profit in excess. We would hope that someone, somehow will be able to respond to the average-income consumers' dilemma.

Thank you for your attention to our concerns. Say "no" to First Energy's rate plan.

Sincerely,

Phyllis Swartz

I do not want Ohio Edison to raise
their electric rates. They are higher
now than any other electric company.
They do not need to increase their
rates.

Gentlemen;

I would like to protest against First Energy's proposal to violate a PUCO order which froze its distribution rates, claiming they will improve reliability of service. I understood we were already paying for reliability of service.

They are also seeking a new rate stabilization charge - another excessive charge.

I would urge that the PUCO deny the above requests from 1st Energy which place further obstacles to electric share.

Sincerely, Muriel Carter
