TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. An asterisk designates all revisions made in a given filing (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

SECTION 1 - DEFINITIONS

For the purpose of this tariff, the following definitions will apply:

Access: Is connection to one carrier by a second carrier to obtain the services of any or all network facilities and services within the network, including unbundled elements.

Access Service Request ("ASR"): A written request for special access services executed by the Customer and the Company in the format devised by the Company. The signing of an ASR by the Customer and acceptance by the Company initiates the respective obligations of the parties as set forth therein and pursuant to this tariff, but the duration of the service is calculated from the Service Commencement Date. Should a Customer use the Company's access service without an executed ASR, the Company will then request the Customer to submit one.

Account Codes: Permits Centrex Stations and attendants to dial an account code number of up to eight digits. For use when placing calls over facilities arranged for Automatic Message Accounting (AMA) recording. The account or project number must be input prior to dialing the called number.

Advance Payment: Part or all of a payment required before the start of service.

Alternative Operator Services: Alternative Operator Services are those services provided by the carrier in which the customer and the End User are totally separate entities. The carrier contracts with the customer to provide the alternative operator services; however, the carrier does not directly contract with the End User to provide the services even though it is the End User who actually pays for the processing of the operator assisted calls.

Automatic Number Identification ("ANI"): Allows the automatic transmission of a caller's billing account telephone number to a local exchange company, interexchange carrier or a third party subscriber. The primary purpose of ANI is to allow for billing of toll calls.

Automatic Location Identification (ALI): An E911 feature that provides the name or address or both associated with the calling party's telephone number (identified by ANI as defined below) to the PSAP for display. Additional telephones with the same number as the calling party's (secondary locations, off-premise extensions, etc.) are identified with the address of the telephone number at the main location.

The Company will provide the Customer reasonable notification of service-affecting activities that may occur in normal operation of its business. Such activities may include, but are not limited to, equipment or facilities additions, removals or rearrangements and routine preventative maintenance. Generally, such activities are not specific to an individual Customer but affect many Customers' services. No specific advance notification period is applicable to all service activities. The Company will work cooperatively with the Customer to determine the reasonable notification requirements. With some emergency or unplanned service-affecting conditions, such as an outage resulting from cable damage, notification to the Customer may not be possible.

TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect. Consult the check sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).(1)
- D. Check Sheets** - When a tariff filing is made with the Commission an updated check sheet accompanies the filing. The check sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There shall be no other symbols used on this page if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

APPENDIX A, ATTACHMENT A-11

Documentation attesting to the applicant's technical expertise relative to the proposed service offering(s) and proposed service area.

See attached biographical and Attachment A-12.

APPENDIX A, ATTACHMENT A-12

Explanation of the applicant's managerial expertise relative to the proposed service offering(s) and proposed service area.

Cros.net, Inc. started as Computer Resources in July 1994 as a computer reseller. In June 1996, we installed our first Internet connection (which was a 56k frame-relay connection to First Internet Franchise Corporation) and eight analog dialup lines connected to a Wildcat Bulletin Board System.

About eight months later we had grown to a fractional T-1 connection from Toledo Internet and 48 digital lines connected to a Livingston Portmaster. During 1998 and 1999 we added three additional computer stores and five additional Points of Presence (POP) and our dialup line count reached 1000 lines.

In 2000 and 2001 we increased our line count to 1600 lines and installed nine T-1 lines to five different Tier-1 providers. We also started offering Frame-relay and DSL in selected POPs. We opened a fifth Computer Resources store and started offering national dialup service through Qwest and UU.net.

So far in 2002 our customer count and dialup line count have remained relatively flat. About 80% of our telco circuits are now run over fiber. We have discontinued six of our backbone T-1 lines and replaced them with a T-3 from Sprint. We are now offering ATM and ADSL throughout the Verizon service area in Northern Ohio.

APPENDIX A, ATTACHMENT A-13

Documentation indicating the applicant's corporate structure and ownership.

Ohio Telephone, Inc., is an Ohio corporation, which is owned by Michael Christiansen (100%).

APPENDIX A, ATTACHMENT A-15

Verification that the applicant will maintain local telephone records separate and apart from any other accounting records in accordance with the USOA.

The applicant hereby request of waiver of the requirement to maintain local telephone records separate and apart from any other accounting records in accordance with the USOA.

APPENDIX A, ATTACHMENT A-16

Verification of compliance with any affiliate transaction requirements.

The Company will comply with all affiliate transaction requirements.

APPENDIX A, ATTACHMENT A-17

Letters requesting negotiation pursuant to Sections 251 and 252 of the Telecommunications Act of 1996 and a proposed timeline for construction, interconnection, and offering of services to end users.

The applicant intends to request negotiation of an Interconnection/Resale Agreement with Verizon and Ameritech shortly after filing of this Petition. Applicant will notify and file for approval with the OHIO P.U.C. these documents upon their successful execution. No construction will be done since applicant is initially reselling services only. Services will be offered to end users upon approval of the final tariffs.
