

**COLUMBIA GAS**  
of Ohio

December 21, 1995

The Hon. Craig A. Glazer, Chairman  
Ohio Power Siting Board  
180 East Broad Street  
Columbus, Ohio 43215

Re: Columbia Gas of Ohio, Inc.  
Columbus Northwest High-Pressure Extension, Phases 2 and 3  
Case No. 94-1620-GA-BTX

Dear Chairman Glazer:

Columbia Gas of Ohio, Inc. previously filed an Erosion and Sedimentation Control Plan in the above-referenced docket. Pursuant to discussions with the Board Staff, page 8 of that Plan should be amended to incorporate the following language:

- n. For access roads not requiring a U.S. Army Corps of Engineers permit, remove, upon completion of the facility, such access roads, including any material placed within the roadbed, constructed on land not owned in fee by Columbia or obtained by permanent easement by Columbia, unless otherwise requested by the property owner. All affected areas shall be restored to preconstruction conditions to the extent possible, unless otherwise requested by the property owner.
- o. For access roads requiring a U.S. Army Corps of Engineers permit, remove, upon completion of the facility, such access roads, including any material placed within the roadbed, constructed on land not owned in fee by Columbia or obtained by permanent easement by Columbia. All affected areas shall be restored to preconstruction conditions to the extent possible.

Please contact me if you or members of the Staff have any questions in this regard.

Very truly yours,

*Kenneth W. Christman*

Kenneth W. Christman  
Assistant General Counsel
