EXCHANGE SERVICES

(M)

1. Selective Call Screening Service
(Originating Line Screening)

Selective Call Screening Service or Originating Line Screening (OLS) is a two-digit code passed by the Telephone Company's local central office switch with the Automatic Number Identification (ANI) at the beginning of a call that provides information about the line originating the call. The information provided in the two-digit code is designed to inform the exchange or interexchange and/or the operator service provider about certain service classes or special characteristics of the billing number associated with the line originating the call. Under this arrangement, operators accept only those originating toll calls that are made collect, billed to a third number, or billed to a calling card.

- A. Selective Call Screening is offered subject to the availability of suitable facilities and equipment.
- B. The minimum contract period for Selective Call Screening is one month.
- C. Customers subscribing to Selective Call Screening are responsible for all toll charges billed to their lines, which are not carried solely over the Telephone Company's facilities.
- D. This service is offered to single party residence and business lines and trunk lines.
- E. If a call originates with the Company but is not carried solely over the Company's facilities, the Company will send, with the ANI, the two-digit code that identifies the call as being selectively screened. The Company assumes no liability for calls completed by any other entity or carrier, as long as the two-digit code accompanies the ANI forwarded to the other carrier. The Company is responsible for properly handling calls which are selectively screened and are not carried over any other carrier's network or facilities.

	Nonrecurring	Monthly Rate
Selective Call Screening, per line	**	\$5.60

(T)

** A Secondary Service Order charge applies as shown in the General Exchange Tariff. No installation charges apply for this service when ordered on an Initial Service Order.

EXCHANGE SERVICES

(M)

1. Billed Number Screening Service (BNS)

A. General

Billed Number Screening Service is available to subscribers of the Company's local exchange services. This service is intended to prevent the charging of collect and/or third number billed calls to a customer's telephone number.

B. Regulations

1. The Company will place information required to utilize Billed Number Screening Service in the Line Information Database (LIDB) or other database necessary to implement Billed Number Screening Service. In the event a call is placed and charged to a number which should have been prevented by Billed Number Screening, the Company makes no guarantee and assumes no liability arising out of the use or misuse of Billed Number Screening Service by any other entities, including, but not limited to, Interexchange Carriers. The Company is fully responsible for calls charged to numbers which should have been prevented by Billed Number Screening Service, that originate and terminate within the Company's service territory, and are carried over no other carrier's network or facilities.
2. Billed Number Screening Service is offered subject to the availability of suitable facilities.
3. The minimum contract period for Billed Number Screening Service is one month.

CUSTOM CALLING SERVICE

A. General

1. The Telephone Company provides Custom Calling Service which includes one or more of the following features:

- a. Speed Calling

Speed Calling permits the customer to place local and message toll calls to a preselected group of telephone numbers by dialing abbreviated codes. Speed Calling is provided in capacities of eight or thirty telephone numbers.

- b. Three Party Conference

Three Party Conference permits the customer to add a third party to an existing connection thereby establishing a three-way conference call. If the customer wants the ability to hang up and let the remaining two parties continue talking, they must subscribe to Three Party Conference with Transfer. Both features are offered at the same monthly rate.

- c. Three Party Conference with Transfer

Same as Three Party Conference except the originating party can hang up and the remaining parties can continue talking.

- d. Call Waiting

Call Waiting permits the customer, upon receipt of a tone signal indicating that a call is waiting, to place the existing call on hold and answer the second waiting call. Cancel Call Waiting is an enhancement that is automatically provided to all Call Waiting customers at no additional cost. Cancel Call Waiting allows a customer to cancel the Call Waiting feature on a per call basis.

- e. Hot Line

The Hot Line feature requires a non-dial telephone instrument and when placed in an off-hook condition the line is programmed to automatically route the call to a predetermined telephone number.

(M)

TARIFF P.U.C.O. NO. 2
EXCHANGE RATE TARIFF

EXCHANGE SERVICES

(M)

CUSTOM CALLING SERVICE

A. General (Cont'd)

f. Warm Line

The Warm Line feature provides a direct routing of a call to a predetermined telephone number without dialing. The Warm Line is programmed to automatically route a call to a predetermined telephone number when off-hook for a specified time period.

g. Call Forwarding

Call Forwarding permits the customer to place a call on hold, originate a new call and then consult privately with the second party.

h. Inquiry Only

Inquiry Only permits the customer to place a call on hold, originate a new call and then consult privately with the second party.

i. Customer Identified Number Assignment (CINA)/Special Ring

Customer Identified Number Assignment (CINA)/Special Ring permits a second directory number assigned to the same telephone line.

j. Denied Originating

This feature, which is not subscriber programmable, permits a subscriber to deny call origination, but still receive incoming calls. Subscribers with Denied Origination are not given a dial tone when going off-hook. This is a helpful reminder to the subscriber that calls cannot be originated from this particular line. This feature is available to business customers only.

k. Denied Terminating

This feature denies terminating calls to a line programmed to deny terminating calls. This feature is not subscriber programmable. A caller attempting to terminate to a line marked for Denied Termination will hear a recorded announcement. Calls routed to the announcement because of Denied Termination are not charged to the caller. The customer will not receive any indication of an attempted call. This feature is available to business customers only.

CUSTOM CALLING SERVICE

A. General (Cont'd)

l. Selective Call Acceptance

The Selective Call Acceptance feature allows customers to screen incoming calls by creating a list of telephone numbers from which the customer is willing to accept calls. Selective Call Acceptance allows only those calls given importance by the customer to ring through.

m. Six Party Conference

The Six Party Conference feature allows customers to sequentially call up five parties and add them together to have a six (6) party telephone conference.

B. The service is offered from central offices where the Telephone Company has arranged the equipment for custom calling and is furnished subject to the availability of facilities.

LOCAL DIRECTORY ASSISTANCE AND OPERATOR ASSISTED CALLS (M)

A. Local Operator Assisted Calls

1. Definition of Service - Local Operator Assisted Calls is a service which provides for the assistance of an operator of The Chillicothe Telephone Company, or an automated operator when such assistance is requested by a calling party in completing a local call, and the calling party requests that the local call be billed collect, or billed to a calling card number, or billed collect station-to-station, or collect person-to-person.
2. Rates - The rates for the various services described in Paragraph (1) can be found in the Company's catalog at www.horizontal.com. (T)
3. In addition to the rates appearing in Paragraph (2), the appropriate tariffed local message charge will also be billed to the entity designated by the originating calling party.

B. Local Directory Assistance

Local Directory Assistance (DA) is a service that provides published telephone numbers or an indication of "non-published status" for the local serving area.

1. Regulations

- a. The number of telephone numbers furnished on each call is limited to two.
- b. Services furnished to the following are exempt from charges for Local Directory Assistance:

- (1) Long term care facility patients (T)
- (2) Persons with sight disability

2. Rate \$.95 per call

3. Block

A Local Directory Assistance (DA) block is available to residential and business customers upon request for a one time per line non-recurring charge. This block will prevent access to local directory assistance.

Non-recurring charge \$9.95 per line

(M)

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS)

A. General

1. The Telephone Company provides Custom Local Area Signalling Services (CLASS) which includes one or more of the following:

- a. Repeat Dialing

Automatically redials the last outgoing number after the customer activates the service by dialing an activation code. Repeat Dialing monitors the busy line and performs a call set-up when both the originating and terminating lines become idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Repeat Dialing service status. This service may also be used to recall a called party after the conversation has been terminated.

- b. Call Return

Enables a customer to return the last incoming call unless the call is from a private or blocked number, whether or not it was answered. The customer dials an activation code and the last incoming call is automatically dialed. If the line is busy when the customer activates the service, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next thirty minutes both the calling and called parties' lines are checked periodically. The call set-up is made when both the originating and terminating lines are idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Call Return service status. Up to ten calls may be held in queue for the customer's Call Return activation.

- c. Call Return Block

Prohibits a customer who subscribes to Call Return from returning a call by activating the Call Return code. By dialing an activation code before placing a local call, a customer may "block" the called party from returning a call to them, using Call Return. This service is free to all customers who subscribe to a one-party line, and is available on a per call basis only. After activating the Call Return Block code and placing the call, the line reverts back to normal status and future calls will not be blocked from being returned by Call Return subscribers. The caller must activate the code before placing each call in order to have Call Return Block activated.

A. General (cont'd.)

d. Caller ID

Allows the customer to view the telephone number of the calling party when receiving a telephone call. The telephone number of the calling party is displayed on a customer-provided display device. However, the calling party may subscribe to services which will prevent the disclosure of their telephone number. In such instances, a privacy indication will appear on the customer-provided display device instead of the calling party's telephone number. Customers can either subscribe to this service or Caller ID Name and Number which delivers the name and number of the calling party. (See paragraph e. below.)

e. Caller ID Name And Number

Allows the customer to view the name and telephone number of the calling party before answering a call. A customer-provided special display telephone or call display unit is required. Calls from out of the local calling area will be shown as "out of the area" or "unavailable" if not connected by Signaling System 7 (SS7). Calls from customers who have used Select Line Blocking or Universal Per Call Blocking will be shown as "private" or "anonymous". Caller ID Name and Number is available where facilities permit. If the customer only needs delivery of the telephone number, they would subscribe to Caller ID. (See paragraph d. above.)

f. Selective Call Reject

Provides the customer with a method of blocking calls from certain numbers, which may or may not be known to the customer. The customer may create a screening list of up to nine (9) telephone numbers, and place them in network memory through an interactive dialing sequence. The customer may also activate the service after receiving a call, and thus place the number associated with that call on the Selective Call Reject screening list. To activate the feature, the customer dials an activation code and the telephone number of each incoming call is checked against the customer's Selective Call Reject screening list.

g. Anonymous Call Rejection

Anonymous Call Rejection allows the customer to program their line to universally block all calls that arrive as a private or blocked number delivery call. By dialing an activation code, the blocking function will be activated and no private or blocked number delivery calls will get through. The customer will hear a confirmation recording that the feature is activated. Another code is dialed to deactivate. The customer will hear a confirmation recording that the feature has been deactivated. The calling party receives a denial announcement that the private call is being rejected and to hang up, do not block their number and call again.

A. General (cont'd.)

h. Selective Call Forwarding

Allows customers to create a special list of telephone numbers and a destination number through an interactive dialing sequence. By dialing an activation code, the customer activates the service. Only incoming calls from numbers appearing on the list will be forwarded to the predetermined remote station.

i. Selective Call Forwarding - Remote Activation

Allows customers who subscribe to Selective Call Forwarding to activate their feature from a remote location. By dialing a special seven digit telephone number, entering their own telephone number and an assigned four-digit PIN number, they can select the remote number to which the selected numbers may be forwarded or change the numbers on their selected list.

j. Distinctive Ringing / Call Waiting

Allows customers to designate several numbers that will be recognized immediately as important calls by means of distinctive alerting signal. Up to nine (9) numbers may be added to the screening list through an interactive dialing sequence. The customer then dials an activation code that activates the service. When the incoming call is identified as one of the numbers on the list, a distinctive ring will be produced in the customer's telephone to alert them that an important call is coming in. If the customer is using the phone and one of the selected numbers comes through on Call Waiting, the customer will receive a distinctive call waiting signal to let them know an important call is awaiting them.

k. Universal Per Call Blocking (per call blocking)

Allows the customer to prevent the disclosure of his name and/or telephone number to a called party. By dialing an activation code, the customer may block delivery of his name and/or telephone number. If the called party has a customer-provided display device, they will see a private status message in place of the calling name and/or number. This service is provided on a universal basis, where technically possible, at no monthly charge. All Payphone Service lines in the Chillicothe Telephone Company's service area will be equipped with Universal Per Call Blocking.

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS) (cont'd)

(M)

A. General (cont'd)

l. Select Per Line Blocking (per line blocking)

Prevents disclosure of the customer's name and/or telephone number on all outgoing calls, without the necessity of an activation code. If the called party has a display device, a private status message will be displayed instead of the calling party's name and/or telephone number. This service will be provided to all non-published customers, where technically possible, upon request from the customer. There will be no monthly charge for this service to the non-published customer. The service is also available to published customers, where technically possible, at a monthly charge of \$1.00. Deactivation of the blocking of their name and/or number is available to both published and non-published customers, at their discretion. To deactivate the privacy status, the customer would dial a deactivation code before placing a call. This will allow delivery of their name and/or telephone number to the calling party. After completion of the call, the line reverts back to the privacy status. Law Enforcement, Domestic Shelters, and other special agencies will be offered free Select Per Line Blocking.

m. Call Trace

Call Trace allows customers to request an automatic trace of the last call received by dialing an activation code immediately following termination of the last incoming call. The customer will hear a recording explaining the charges and how to proceed with or terminate the trace. An announcement will also inform the customer if the trace has been successful and offers a number to call for further instructions.

n. Call Trace Removal

Call Trace Removal is available to customers at no cost if they find that the Call Trace procedures are being abused by causing high monthly activation charges. A release form must be signed absolving the Telephone Company from non-availability of Call Trace activity. The \$6.55 non-recurring charge would apply to add the Call Trace back to their line.

o. Toll Restriction with PIN

This feature gives the subscriber the option of denying toll access to all users from their line with the exception of those using a four digit PIN number. Only one PIN per line may be assigned. The subscriber may pick the initial PIN or the Telephone Company can assign the initial PIN. Thereafter the subscriber may dial an access code and change the PIN themselves.

p. Incoming Call Control

This feature is available to residential and business customers in all Chillicothe Telephone exchanges. Incoming Call Control intercepts calls that are marked "unavailable", "out-of-area", "unknown", or "anonymous" on Caller ID units. When unidentified callers dial the subscriber's number, they will receive an announcement informing them that, "the number you have reached does not accept calls from telemarketers. If you are a telemarketer, please add this number to your Do Not Call list and hang up now. Otherwise, please press '1' or stay on the line".

The subscriber's Caller ID CPE (customer provided equipment) will still display the calling party's classification (e.g. unknown number or out-of-area). The subscriber must subscribe to a Caller ID service in order to subscribe to Incoming Call Control because the feature dips in to the Caller ID database to determine the caller's classification.

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS) (cont'd.)

B. Custom Local Area Signalling Services (CLASS) are central office-based telecommunications services capable of providing several optional service enhancements. These services will be offered from central offices where the equipment and facilities have been properly arranged. Custom Local Area Signalling Services (CLASS) cannot be functional unless both the called and calling parties are served by, and the call is routed through, appropriately equipped central offices, and routed over appropriately equipped facilities for calls between such equipped central offices. When a service cannot be functional, notification will be given that the call is outside the call area served by the service.

C. Rates and Charges

The following monthly rates and non-recurring charges apply to Custom Local Area Signalling Services (CLASS), and are in addition to the rates and charges applicable to any associated service, equipment and facilities.

3. Non-Recurring (cont'd)

Customers ordering more than one Custom Local Area Signalling Service (CLASS), on the same line, at the same time and at the same address, will only be billed one non-recurring charge.

* If a customer requests Call Trace Removal then later decides to activate Call Trace, the \$6.55 NRC will apply.

(T)

4. Customers enrolling in or changing a regulated service not provided by contract shall be allowed to change or switch the service ordered at least one time after that service is initiated without incurring any charge to make that change or switch, so long as the change or switch is made within thirty days of the postmark of the welcome letter corresponding to the customer's original service order. This does not preclude the company from charging for the original service establishment charges for the period such service was used, and special construction charges and usage charges.
