Re: Case No. 16-253-GA-BTX
Ohio Department of Transportation Permit No. 08-299-20 State Route 126 /
Confirmation

Dear Ms. Troupe:

On May 13, 2020, Duke Energy Ohio, Inc., (Duke Energy Ohio or Company) filed the above-referenced permit from the Ohio Department of Transportation (ODOT), together with a cover letter indicating that a confirmation would be forthcoming. Today, Duke Energy Ohio is filing, herewith, an email confirmation from ODOT stating that the Company is permitted to directly bury the pipe under State Route 126 as the work is not impacting the ODOT roadway.

Please contact me if you have any questions.

Sincerely,

Emily A. Olive, CP
Paralegal

Hi Nick,

The previously issued permit did indeed have a typo. We are fine with the direct burying of the line within the L/A as the work is not impacting the ODOT roadway.

Sorry for the confusion.

Thanks,

Chris Bass

Chris – Please confirm the typo on the permit that says we are directional drilling, when in fact we are direct burying the pipe under the SR 126 overpass.

We need the confirmation email because we have to turn everything in to the Ohio Power Siting Board.

Thanks,

Nick Weil, PMP
