**Letter of Notification
Dicks Creek Generation Station and Substation Separation Project**

Dear Sir or Madam:

Please find below a link to an electronic copy of a Letter of Notification that Duke Energy Ohio, Inc., (Duke Energy Ohio) has filed with the Ohio Power Siting Board regarding its proposed project to expand Dicks Creek substation and install a 210-foot long retaining wall, expand the existing substation lattice tower, and reconfigure the equipment to accommodate new equipment inside the substation. The project also involves the replacement of two transmission towers with four engineered monopoles to support two 138-kV transmission lines that will run in and out of the expanded substation. The new monopoles' above-ground height ranges from 110 to 115 feet. The installation of 138-kV transmission line comprises approximately 0.33 miles of new line in the same corridor, for each of the 2 new lines. The project will improve the reliability of service in the local community and will allow the substation to operate independently from the Dicks Creek Generating Station.

In accordance with O.A.C. 4906-1-01 Appendix A, we are required to prepare this Letter of Notification for the Ohio Power Siting Board and, in compliance with O.A.C. 4906-6-07, we are hereby providing you with a link to an electronic copy.

A copy of the application is available for public inspection at the main office of Duke Energy Ohio at 139 E. Fourth Street, Cincinnati, Ohio 45202, and at the offices of the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215.
