

**Duke Energy Ohio**  
**Case No. 20-0134-EL-BLN**  
**STAFF First Set of Data Requests**  
**Date Received: May 1, 2020**

**STAFF-DR-01-003**

**REQUEST:**

As this case is similar to the 19-1471 case, in terms of ODOT wanting you to relocate due to I-75 improvements, and in light of the residential issues we are dealing with for that one, can you lay out the proximity of the closest structures to homes?

- a. If there are any stub poles?
- b. And how you will handle complaints from residents if they have them as it relates to this project please?

**RESPONSE:** The poles are located either behind an old police station, between the highway and railroad, or between an existing substation, which is next to a car dealership and the Mill Creek Greenway and Mill Creek.

- a. There are no stub poles associated with this project.
- b. There are no residents that are directly affected by the replacements. If a resident complains, the process will be the same as what was done in the Elmwood Place complaint resolution process.

**PERSON RESPONSIBLE:** Dustin Giesler
