Storms are causing scattered outages across our service territory, especially in southern Ohio. Crews will restore power as soon as they safely can. More bad weather is expected overnight, with winds that could bring down trees and cause more outages. Stay away from downed lines!

Public Safety Reminder - Please refrain from clearing tree debris from roadways as energized downed wires may be hidden under the vegetation. Do not attempt to remove tree limbs or debris within 10 feet of a power line.

AEP Ohio consumers with power may help prevent grid overload this week by conserving electricity between noon and 7 pm. E.g., set thermostats higher, avoid the use of energy-intensive appliances, and close window coverings.
