 OPSB Case No. 21-348-EL-BNR

Dear Ms. Troupe:

The following supplemental information is provided to update the application filed in the above-referenced proceeding on June 8, 2021.

On page 1, the first paragraph under “Brief Description of the Project” should be revised to read as follows:

Duke Energy Ohio proposes to remove and replace six existing monopole structures and one H-frame structure (comprising two single poles), and to install three new, permanent structures. Specifically, the Project will include two self-supporting engineered steel poles, seven direct embed steel monopoles, and one h-frame structure, along with approximately 950 feet of new conductor per phase. The Project is located entirely within an existing Duke Energy Ohio right of way (ROW) and easement.
