Let me close with these immortal words of a progressive Ohio mayor over a century ago. Quote, "The public utility corporations are a bunch of thieves. I believe in the municipal ownership of waterworks, of parks, of schools, of utilities. I believe in the municipal ownership of these monopolies because if you do not own them, they in turn will own you. They will rule your parties, corrupt your institutions, and finally, destroy your liberties." This message from Tom Johnson rings truer today than ever before. Do the right thing. Refuse the rate hike proposed by this bunch of thieves. Thank you.

LANGE: My name is Werner Lange, a senior citizen resident in a century-old house in Cincinnati, which requires window air conditioners for cooling on days like today to save the exorbitant electric charges imposed by Duke Energy. My elderly wife and I use air conditioning very sparingly and try to get through the day and night as best we can. We're senior citizens living largely on annual social security payments of about 24,000 a year; a fixed income that can ill afford higher electrical rates. Now compare that to the annual compensation of Duke Energy's CEO, Lynn Good, which comes to over 20,000,000. 168 times the median pay for Duke employees and enough to support 856 workers	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	shareholders and enhance the bloated incomes of their overpaid executives. Make no mistake. This rate hike has nothing to do with improving service. It is, like the previous one, a sheer money grab at the expense of hard-pressed consumers. Perhaps not as corrupt as what FirstEnergy did with its massive bribery of state officials, but nevertheless, one that clearly places private profit over public welfare and the common good.
