

**Duke Energy Ohio
Case No. 20-1411-GA-BTX
Staff Second Set Data Requests
Date Received: February 16, 2021**

STAFF-DR-02-001

REQUEST:

What is the anticipated approximate volume of water that would be used for hydrostatic testing of the pipeline?

RESPONSE: Hydrostatic testing of the preferred route is expected to require the temporary use of 483,000 gallons of water. Hydrostatic testing of the alternate route is expected to require the temporary use of 440,000 gallons of water.

PERSON RESPONSIBLE: Christopher Siok
