Construction Notice
State Route 63 Transmission Line Relocation Project

Dear Madam:

The Ohio Department of Transportation (ODOT) plans to widen State Route 63 in Turtle Creek Township, Warren County, Ohio. As a result of that road project, an existing 69 kV line will be relocated and rebuilt, using poles that will be taller than the ones currently in place. The Project for consideration by the Ohio Power Siting Board is based on the need to allow for appropriate electrical clearances where two transmission lines cross the 69 kV line. Specifically, the Project involves replacing two transmission line lattice tower structures along circuit F5485 (138 kV) and circuit F4515 (345 kV) with three new steel monopole structures with foundations. The existing circuits will be transferred to the new poles. New conductor work is not planned. The work will be completed within existing right-of-way (ROW).

In accordance with O.A.C. 4906-1-01 Appendix A, we are required to prepare this Letter of Notification for the Ohio Power Siting Board and, in compliance with O.A.C. 4906-6-07, we are hereby providing you with a link to an electronic copy.

A copy of the application has been placed at the main office of Duke Energy Ohio at 139 E. Fourth Street, Cincinnati, Ohio 45202, and at the offices of the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215. The Application is also available on the Duke Energy Ohio website, at: www.duke-energy.com/SR63relo and on the Ohio Power Siting Board's website, at: [DIS - Case Record for 22-0011-EL-BNR \(state.oh.us\)](http://DIS - Case Record for 22-0011-EL-BNR (state.oh.us)).
