Subject: State Waiver Request for the RAVENNA-OH Rate Center

Time Warner Cable (TWC) requests that Sprint apply for a new TN block to fulfill a pending TWC-business customer order requesting the allocation of 200 native TNs in a sequential block, with specific PBX requirements (see attached client letter), in the RAVENNA rate center in Ohio.

Currently, the TWC available TN pool in RAVENNA-OH is less than 75% utilized. The 200 TNs referenced above will not cause TWC to exhaust its available TN pool in this rate center within six months. However, the specific client needs for sequential TNs that meet its PBX requirements cannot be met by the TNs currently in TWC inventory.

TWC has attached a .pdf copy of the client request letter on its letterhead to include with your request to the Ohio PUC.

Please keep the TWC TN Management team apprised of the progress of this request.

Sincerely,

R. Tucker Mostrom
