**Letter of Notification**  
**F7581/F7582/F5689– 138kV Garver Substation TLoop**

Dear Madam:

Please find below a link to an electronic copy of a Letter of Notification that Duke Energy Ohio, Inc., (Duke Energy Ohio) has filed with the Ohio Power Siting Board regarding its plan to construct and route three existing 138-kilovolt (kV) transmission lines into Garver substation, located at 3431 Cincinnati Dayton Road, in Middletown, Ohio. This project will support the area's growing energy needs.

The construction for three existing 138-kV transmission lines will involve the replacement of a lattice tower and 6 wood utility poles with steel poles. Construction also will include the installation of 11 new steel poles to route the transmission lines into the new 138-kV section of the substation. The poles have a height of 60-to-115 feet above ground. The base of the poles increases in diameter according to pole height, which makes the poles stronger and more reliable.

In accordance with O.A.C. 4906-1-01 Appendix A, we are required to prepare this Letter of Notification for the Ohio Power Siting Board and, in compliance with O.A.C. 4906-6-07, we are hereby providing you with a link to an electronic copy.

A copy of the application is available for public inspection at the main office of Duke Energy Ohio at 139 E. Fourth Street, Cincinnati, Ohio 45202, and at the offices of the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215. The Application is also available on the Duke Energy Ohio website, at: <https://www.duke-energy.com/our-company/about-us/electric-transmission-projects/garver-transmission-lines>, and on the Ohio Power Siting Board's website, at: <http://dis.puc.state.oh.us/CaseRecord.aspx?CaseNo=19-0049-EL-BLN>.
