**Construction Notice  
Duke Energy 2381 Line GLT Project**

Dear Sir or Madam:

Duke Energy Ohio requires the installation of four 3-pole structures located along the existing F2381 138 kV transmission line in support of the Duke Energy 2381 Line GLT Pole Replacement Project. These four 3-pole structures will require the removal of the existing direct embed wood structures (three 2-pole H-frame structures and one 3-pole structure to be removed) and the installation of steel structures at the same location. Three of the new steel structures will require concrete foundations; the fourth new steel 3-pole structure will be direct embed. These replacements are a part of the larger 2381 Line GLT Project, to replace a total of 41 deficient existing structures along the existing line that are at risk of failure. However, the remaining 37 structures are like-for-like replacements (i.e., direct embed) and the conductor is being transferred to the replacement structures; therefore, they are not subject to OPSB regulations. The Project is located within Harlan and Salem Townships near the village of Morrow, within Warren County, Ohio.

In accordance with O.A.C. 4906-1-01 Appendix A, we are required to prepare this Letter of Notification for the Ohio Power Siting Board and, in compliance with O.A.C. 4906-6-07, we are hereby providing you with a link to an electronic copy.

A copy of the application is available for public inspection at the main office of Duke Energy Ohio at 139 E. Fourth Street, Cincinnati, Ohio 45202, and at the offices of the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215. The Application is also available on the Duke Energy Ohio website, at:
