TARIFF FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the top center of the sheet. Sheets are numbered sequentially. However, occasionally, when a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the top center of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their Tariff approval process, the most current sheet number on file with the Commission is not always the sheet in effect. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are four levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.1.
- D. **Check Sheets** - When a Tariff filing is made with the Commission, an updated Check Sheet accompanies the Tariff filing. The Check Sheet lists the sheets contained in the Tariff with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The Tariff user should refer to the latest Check Sheet to find if a particular sheet is the most current on file with the Commission.

2.5.12. With respect to Directory Listing Service (Cont'd):

2.5.12.5. As part of providing any private listing or semi-private listing Services, Company will not be liable for failure or refusal to complete any call to such telephone when the call is not placed by dialing a number which includes the number of the party called. Company will try to prevent the disclosure of unpublished listings, but will not be liable in any manner should such a number be divulged.

2.5.12.6. When a Customer with a non-published telephone number places a call to the Emergency 911 Service, Company will release the name and address of the calling party, where such information can be determined, to the appropriate local governmental authority responsible for the Emergency 911 Service. By subscribing to Service under this Tariff, the Customer agrees to the release of such information under the above provision.

2.5.14. Approval of limitation of liability language by the PUCO does not constitute a determination by the Commission that the limitation of liability imposed by the Company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of the exculpatory clause.

The Company does not bill for incomplete calls.
- 3.1.8. **Auto Busy Redial**
Auto Busy Redial enables the Customer to redial automatically the last outgoing telephone number. If that telephone number is busy, the service will make call attempts to the telephone number for a maximum of thirty (30) minutes beginning with the Customer's activation of Auto Busy Redial, in an effort to establish the call. The Customer will be signaled with a distinctive ring when the call can be completed. Customers access Auto Busy Redial by dialing *66 and can cancel an Auto Busy Redial activation by dialing *86.
