Re: United Telephone Company of Ohio d/b/a Embarq
Case Nos 06-1259-TP-ZTA
90-5041-TP-TRF

Dear Ms. Jenkins:

Enclosed for filing, please find a clarification to the United Telephone Company of Ohio d/b/a Embarq P.U.C.O. No. 5 General Exchange Tariff with regards to the above mentioned Case No. 06-1259-TP-ZTA. This tariff correction clarifies a specific Service Connection Charge associated with subsequent changes and will replace Section 24, Original Sheet 1.3 contained in the original application.

If you have any questions regarding this filing, please call Becky Donahue at 614-220-8624.

Sincerely,

Jean O. DiSalvo

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (Continued)

Custom calling service includes one or more of the following features: (Continued)

A. Call Forward Features (Continued)

5. Call Forward Additional Paths (FCF1FLC PTH) (Continued)

- (C) The number of paths may not exceed the terminating capability of the forward-to telephone number. In no case, shall the number of additional paths exceed 99.
- (D) Customers with a single (non-rotary) exchange line/trunk or a rotary (hunting) arrangement of 10 or less lines/trunks may purchase up to 10 additional paths.
- (E) For Customers with a rotary hunting arrangement of more than 10 lines/trunks, the number of additional paths cannot exceed the number of lines/trunks in the forwarding arrangement.
- (F) A subsequent Service Order Charge (Section 4 of this tariff) will be assessed when the number of paths is changed or when the forward-to telephone number is changed as the only change associated with a particular service request.

B. Speed Dial

Speed Dial provides the subscribers with the capability of placing local and message toll calls to frequently called numbers by dialing abbreviated codes. This arrangement is available in either eight or 30 repertoire.

C. Three-Way Calling

Three-way calling permits the subscriber to add a third party to an existing connection, thereby establishing a three-way conversation or conference. Due to transmission limitations, it is recommended that only one of the parties included in such a call be outside the local calling area of the subscriber initiating the call.

D. Enhanced Call Waiting

Enhanced Call Waiting provides the subscriber, already on an existing call, with a tone signal indicating that an unanswered call is waiting to be completed to the subscriber's number. The subscriber may then hold the existing call and alternately talk on both calls until one has been terminated. Enhanced Call Waiting also adds the option to cancel Call Waiting. Cancel Call Waiting can be activated before or during a call by dialing an access code and then stays in effect for the duration of the call. Incoming calls receive a busy signal while cancel call waiting is in effect.

(M) Material now appearing on this sheet previously appeared in Section 24, Original Sheet 1.2.

Issued: October 17, 2006
