TEMPORARY SUSPENSION OF SERVICE (VACATION SERVICE)

I. DESCRIPTION

- A. Upon request, a subscriber to business or residence service, where equipment arrangements permit, may arrange for the temporary suspension (temporary vacation) of their entire service.
- B. A subscriber to private branch exchange or key system service may suspend a portion of the service furnished. Such suspension is applicable only to attendant positions, trunks, stations and auxiliary station equipment that can be temporarily suspended without suspension of entire service.

II. GENERAL REGULATIONS

- A. Service may be suspended temporarily prior to the date the initial contract period expires. If service is terminated before full payment of the initial contract period, the suspension of service period shall not be used to reduce the total charges for the initial contract.
- B. During suspension of service, the subscriber's telephone number, directory listing and line facilities will be maintained.
- C. A minimum temporary suspension period is one month. When the period of suspension is less than one month, the regular charges for the full month of service shall apply.
- D. A maximum temporary suspension period in any one year is six months.
- E. A minimum period of two months will apply between periods of suspension.
- F. The Telephone Company reserves the right to refuse temporary suspension of service in the case of a subscriber whose account is delinquent.
- G. Temporary suspension of service is available to subscribers of any grade of residence or business service, except to foreign exchange service or local measured service, for which temporary suspension of service will not be provided. (C)
- H. The charge for the total suspension period may be collected in advance.

Issued: October 3, 1985

Effective: October 8, 1985

UNITED TELEPHONE COMPANY OF OHIO

GENERAL EXCHANGE TARIFF

TEMPORARY SUSPENSION OF SERVICE (VACATION SERVICE)

III. RATES AND CHARGES

A. Business and residence service

The charge for temporary suspension of service will be 50 percent of the monthly billing for service and facilities until service is restored.

B. Private branch exchange and key systems

The charge for temporary suspension of service will be 75 percent of the monthly rates regularly charged.

C. A reconnection charge will apply to service restored.

	<u>Nonrecurring Charge</u>
1. When premise visit is not required, per request	
(A) First line	\$15.50
(B) Each additional line	6.00
2. When premise visit is required, per request	
(A) First line	29.25
(B) Each additional line	6.00

TERMINATION OF SERVICE

I. *Termination of Service at the Subscriber's Request* (T)

A. General Regulations (T)

1. If service is discontinued within a period less than one month following the date of installation, the minimum charge for one month's use of service equipment and facilities at the rate in effect during the period of service plus any charges for toll service, service connection, nonrecurring and construction charges will apply. (T)
2. After the subscriber has received service for more than one month, the charges are for the period for which service or facilities are furnished. The charge for a fractional part of a month is the pro rata portion of the monthly charge based on a 30 day month. (T)
3. In cases when service and facilities terminate and the initial contract period is more than one month, the termination charges will be the charges due for the unexpired portion of the initial contract period as defined in the sections of this tariff set aside for each specific type of service or facility. (T)
4. When one service furnished the same subscriber within the initial month is superseded by another service at the same location, a pro rata charge is made for the actual amount of each of the services furnished. If service is discontinued within the initial month, the rate for the last furnished service is charged for the balance of the unexpired minimum period. (T)
5. If service is superseded by one service to another service during the initial month and if it is necessary to discontinue a part of the existing equipment and facilities, the minimum charge for one month will apply to the discontinued equipment and facilities. (T)

B. CHANGE OF NAME CONTRACT (T)

Minimum charges for service do not apply to service and facilities terminated when such service and facilities are contracted for in another name without lapse of charges for service and facilities and when no service connection charge is made for the transfer of service and facilities.

TERMINATION OF SERVICE

II. Termination of Service by the Company

A. General Regulations

1. The Telephone Company must notify, or attempt to notify, a subscriber before service is refused or disconnected when any of the following conditions exist:
 - (A) A violation of or noncompliance with the Commission's current regulations governing service supplied by the Telephone Company;
 - (B) A violation of or noncompliance with the Telephone Company rules or tariffs;
 - (C) A failure to comply with municipal ordinances or other laws pertaining to telecommunications services; or
 - (D) A refusal by the subscriber to permit the Telephone Company necessary accesses to its facilities or equipment.
2. The Telephone Company may not disconnect the local exchange or Interexchange service or a subscriber who pays the Company the total amount due (or an amount agreed upon between the Company and the subscriber to prevent disconnection) on the customer's account by the close of business on the disconnection date listed on the disconnection notice.
3. The Telephone Company may disconnect the subscriber's service without notice for emergency reasons, upon a court order, or if service was obtained in violation of Section 1, paragraph IX and X of this tariff.
4. If a subscriber or a member of the subscriber's household demonstrates that disconnection of service would be especially dangerous to the customer's health, the Telephone Company must consider the circumstances when offering extended payment arrangements to avoid disconnection. Payment arrangements shall be offered regardless of the credit class of the subscriber.
5. **Residential customers whose telephone services have been temporarily denied for nonpayment will continue to have access to 9-1-1 Service (outgoing service only) for 14 days.** (N)
|
(N)
6. Disconnection of a customer's service shall be made in accordance with the rules specified in this tariff as well as the Minimum Telephone Service Standards. (T)

VII HOMEBOUND STUDENT SCHOOL SERVICE

(D)

A. Description

Homebound student school service is an intercommunicating service designed for two-way conversation for schoolroom instruction to students who are unable to attend school. The school and home both have portable and/or permanent stations consisting of a combined speaker-microphone and amplifier.

B. General regulations

1. Subscriber is required to furnish commercial power outlets at convenient locations in the home and school.
2. Homebound student school service will be provided only within the same exchange area or between two exchanges within the same local calling area.
3. Intercommunication between location of the school and student's location is furnished with facilities similar to those used for local private line telephone service.
4. The initial contract period for homebound student school service is three months.
5. When additional equipment is necessary to provide transmission, additional charges based upon costs incurred by the Telephone Company will apply.
6. Application for homebound student school service will be accepted from schools only.

SUPPLEMENTAL EQUIPMENT

XVII. SUBSCRIBER TRANSFER SERVICE

(D)

A. Description

Equipment will be furnished that will automatically transfer subscriber's calls from one line to another by the operation of a key located at subscriber's station. When key is in normal position, both telephone lines are independent of each other and calls are received in the usual manner. When the key is operated, the calls are transferred automatically from the telephone where the key is located to another station designated by the subscriber.

B. General regulations

Both lines must be individual lines.

C. Rates and charges

The charge for subscriber Transfer Service is \$19.65 per month in addition to the individual line rates applicable to the class of service furnished at each location.

EMBARQ Smart Connect

(N)

A. GENERAL

EMBARQ Smart Connect is an optional business service that provides a customer with the ability to receive a simultaneous ring of an incoming call at up to three separate telephone numbers. EMBARQ Smart Connect is available with business individual lines or Direct Inward Dialing (DID) telephone numbers associated with Direct Inward Dialing (DID) Service. The telephone number associated with the Local Exchange Service for which EMBARQ Smart Connect is provided is designated as the "primary telephone number." The customer may designate up to two additional telephone numbers (referred to as "secondary telephone numbers") that will receive a simultaneous ring when a call is directed to the primary telephone number. The secondary telephone number(s) can be provided by a wireless carrier, another Local Exchange Carrier or the Telephone Company. Wireless telephone numbers can receive incoming text messages when utilized as a secondary telephone number.

B. REGULATIONS

1. When a call is directed to the primary telephone number, EMBARQ Smart Connect provides a simultaneous ring on the secondary telephone number(s). Establishment and subsequent changes to the primary telephone number will be programmed by the Telephone Company upon subscriber request and the number will be in the subscriber's Reach List. The Reach List, which is limited to three telephone numbers, includes the primary and secondary telephone numbers that simultaneously ring when the subscriber's primary telephone number is dialed. Initially, the Telephone Company must program at least one secondary telephone number into the subscriber's Reach List. The subscriber may make subsequent additions and changes to the secondary telephone numbers in the Reach List through an Internet-based management tool.
2. After an incoming call is answered, the call can be transferred between predetermined telephone numbers which reside in the subscriber's Call Pickup List. The Call Pickup List, limited to five telephone numbers, includes those telephone numbers which may receive transferred calls. The Call Pickup List must include all of the telephone numbers in the subscriber's Reach List. The subscriber may establish and change the telephone numbers in the Call Pickup List through an internet-based management tool. The Customer Provided Equipment (CPE) associated with the telephone numbers in the Call Pickup List must have speed dial functionality associated with that telephone number in order to invoke the transfer.
3. Incoming calls are transferred between telephone numbers through activation of speed dial code on the device to which the call is to be transferred. There is no limit to the number of transfers that can be made during a call.

Issued by Public Utilities Commission of Ohio

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF**

EMBARQ Smart Connect (continued)

B. REGULATIONS (continued)

4. All telephone numbers associated with a Reach List must be within the local calling area of the customer's primary telephone number, although telephone numbers associated with a Call Pickup List can be outside the local calling area of the customer's primary telephone number.
5. When the customer is not available to answer an incoming call, the call may forward to a customer provided voice messaging service associated with the primary telephone number unless one of the secondary telephone numbers supports a voice messaging service or answering device that is programmed to pick up the call on a shorter ring count.
6. The originator of a call to the EMBARQ Smart Connect subscriber is responsible for all charges (local, toll, surcharges, etc.) applicable from the originating location to the number dialed for the duration of the call, regardless of whether the call is subsequently transferred to another location/telephone number. The subscriber of the account/telephone number that picks up a transferred call is responsible for any charges (local, toll, etc.) that are applicable between the exchange from which the call is transferred and the exchange in which the call is answered.
7. Availability of EMBARQ Smart Connect is limited to those areas served by central offices arranged for EMBARQ Smart Connect and is subject to the availability of facilities. The Telephone Company does not guarantee the quality of service for incoming calls to a secondary telephone number which is provided by a wireless carrier or a Local Exchange Carrier other than the Telephone Company.

C. RATES AND CHARGES

1. The monthly rate applies in addition to the rates and charges for the Telephone Company provided Local Exchange Service associated with the primary telephone number.

	Monthly Rate
Per primary telephone number	\$19.95 ⁽¹⁾

2. A Subsequent Service Order Charge as set forth in Section 4 of this tariff will apply when establishing EMBARQ Smart Connect and when the Telephone Company makes a change to an existing primary or secondary telephone number. ⁽²⁾

⁽¹⁾ This monthly rate will be discounted to \$14.95 for customers who also subscribe to an Embarq Wireless service.

⁽²⁾ The Subsequent Service Order Charge applicable for the establishment of service will be waived through December 31, 2006.

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION

A. Call Forward Features

Call Forward Features permit the forwarding of incoming calls under a variety of conditions to another telephone number either by dialing an activation code or via pre-programming by the Company. Calls may be forwarded to any number subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. The customer subscribing to this service is responsible for applicable usage charges. Only one call forwarding arrangement, consisting of a single calling path, will be provided per exchange service line for which the customer subscribes to this feature, **unless the business customer is also subscribed to the Call Forward Additional Paths feature, in which instance one call path per Call Forward Additional Path feature subscribed to will be provided.** (N)
(N)

Call Forward Features shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of usage charges that would regularly be applicable between the station originating the call and the station to which the call is ultimately transferred. **If the Company determines that Call Forward Features are being used in manner not consistent with the intent of the service or in any other way violates the restrictions of the service, the business Subscriber will be determined ineligible for the service and the service will be removed from the business Customer's account.** (N)
(N)

1. Call Forwarding

This feature permits the manual forwarding of incoming calls to another telephone number. When activated, all calls will forward; calls cannot be answered from a line with Call Forwarding activated. Call Forwarding overrides Call Forward No Answer and Call Forward Busy, but those features resume functionality when Call Forwarding is deactivated.

(A) Call Forwarding (FCF1FLC) - Provides a customer the capability to control activation/deactivation and the forward-to number of the service by using dialing tones.

(B) Call Forward Fixed (FCF1FLC FIX) - Provides a customer the capability to control activation/deactivation of the service by using dialing tones. The customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.

Issued by the Public Utilities Commission of Ohio

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (Continued)

Custom calling service includes one or more of the following features: (Continued)

A. Call Forward Features (Continued)

2. Call Forward No Answer

This feature permits the automatic forwarding of an incoming call to another telephone number when the called telephone remains unanswered for a predetermined number of rings, usually four or five.

Where facilities are available, this feature also includes Call Forwarding of Call Waiting when the customer is also subscribed to Call Waiting or Enhanced Call Waiting. Call Forwarding of Call Waiting forwards unanswered waiting calls to a customer-designated telephone number using Call Waiting and Call Forward No Answer. An incoming call to a busy line first receives a Call Waiting tone. If the call is not answered within a set period of time, the incoming call is forwarded to a customer-designated telephone number.

(A) *Call Forward No Answer-Fixed (FCD1FLC) - This feature is activated and the customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.*

(B) *Call Forward No Answer-Customer Programmable (FCD1FLC PRG) - Provides a customer the capability to control activation/deactivation and the forward-to number of the service by using dialing tones.*

(C) *Call Forward No Answer-Customer Controlled (FCD1FLC CC) - Provides a customer the capability to control activation/deactivation of the service by using dialing tones. The customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.*

3. Call Forward Busy

This feature permits the automatic forwarding of an incoming call to another telephone number when the called telephone is already in use. Call Forward Busy shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment of Rotary Line/Hunting Service. Call Forward Busy-Customer Programmable and Call Forward Busy-Customer Controlled are not available to customers with multiple lines at the same premises.

(A) *Call Forward Busy-Fixed (FCB1FLC) - This feature is activated and the customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.*

(M) Material now appearing on this page previously appeared on Fifth Revised Sheet 2.

Overland Park, KS

In accordance with Order No.: 05-1200-TP-ZTA
Issued by the Public Utilities Commission of Ohio

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (Continued)

Custom calling service includes one or more of the following features: (Continued)

A. Call Forward Features (Continued)

3. Call Forward Busy (Continued)

- (B) **Call Forward Busy-Customer Programmable (FCB1FLC PRG)** - Provides a customer the capability to control activation/deactivation and the forward-to number of the service by using dialing tones.
- (C) **Call Forward Busy-Customer Controlled (FCB1FLC CC)** - Provides a customer the capability to control activation/deactivation of the service by using dialing tones. The customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.

4. Call Forward Remote Activation (FCG1FLC)

This feature allows subscribers to change the Call Forwarding status of their telephone line from a remote location using a touch-tone telephone. To redirect Call Forwarding from a remote location, the subscriber dials a remote-access directory number. Once the subscriber's authorization code is verified, the subscriber can activate, deactivate, or change call forwarding to a new destination.

5. Call Forward Additional Paths (FCF1FLC PTH)

Business customers who subscribe to Call Forward Fixed, Call Forward No Answer-Fixed, Call Forward No Answer-Customer Controlled, Call Forward Busy-Fixed or Call Forward busy-Customer Controlled may also subscribe to the Call Forward Additional Paths feature. This feature is not available with Call Forward Features that allow customers to remotely change the forward-to telephone number. Call Forward Additional Paths allows a business Call Forwarding subscriber the ability to specify the number of simultaneous calls that will be forwarded to the forward-to telephone number. Regulations for Call Forward features are also applicable for each Call Forward Additional Path.

- (A) **The forward-to telephone number must be a domestic telephone number.**
- (B) **The Call Forward Additional Paths customer must subscribe to sufficient paths to adequately handle incoming calls without impairing any service offered by the Company.**

(M)(N)

(M)(N)

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (Continued)

Custom calling service includes one or more of the following features: (Continued)

A. Call Forward Features (Continued)

5. Call Forward Additional Paths (FCF1FLC PTH) (Continued)

- (C) The number of paths may not exceed the terminating capability of the forward-to telephone number. In no case, shall the number of additional paths exceed 99.
- (D) Customers with a single (non-rotary) exchange line/trunk or a rotary (hunting) arrangement of 10 or less lines/trunks may purchase up to 10 additional paths.
- (E) For Customers with a rotary hunting arrangement of more than 10 lines/trunks, the number of additional paths cannot exceed the number of lines/trunks in the forwarding arrangement.
- (F) A subsequent Service Order Charge (Section 4 of this tariff) will be assessed when the number of paths is changed or when the forward-to telephone number is changed as the only change associated with a particular service request.

B. Speed Dial

Speed Dial provides the subscribers with the capability of placing local and message toll calls to frequently called numbers by dialing abbreviated codes. This arrangement is available in either eight or 30 repertoire.

C. Three-Way Calling

Three-way calling permits the subscriber to add a third party to an existing connection, thereby establishing a three-way conversation or conference. Due to transmission limitations, it is recommended that only one of the parties included in such a call be outside the local calling area of the subscriber initiating the call.

D. Enhanced Call Waiting

Enhanced Call Waiting provides the subscriber, already on an existing call, with a tone signal indicating that an unanswered call is waiting to be completed to the subscriber's number. The subscriber may then hold the existing call and alternately talk on both calls until one has been terminated. Enhanced Call Waiting also adds the option to cancel Call Waiting. Cancel Call Waiting can be activated before or during a call by dialing an access code and then stays in effect for the duration of the call. Incoming calls receive a busy signal while cancel call waiting is in effect.

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (Continued)

E. Intercom Service

Intercom service (sometimes referred to as revert calling) permits a subscriber to call the subscriber's own number, hang up and thereby ring all the telephones at that number.

F. Warm Line

Warm line service provides a signaling arrangement whereby a predetermined telephone number (local or toll) will be automatically called when the subscriber's telephone goes off-hook and no digits are dialed within a set number of seconds. The number that will be automatically called is determined by the subscriber and recorded in the serving central office. Toll charges are applicable to the warm line subscriber if the called number is not within the subscriber's local calling area. During the time interval between off-hook and the calling of the warm line number, the subscriber can use the telephone to make regular-dialed calls if desired.

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (Continued)

(M)

(M)

(D)

(D)

G. SignalRing Plus

(T)

SignalRing Plus - This arrangement enables an individual line customer to identify an incoming call by having up to three (3) additional directory numbers (Secondary Directory Number) assigned to their main access line (Primary Directory Number). Each Secondary Directory Number is assigned a distinctive ring in order to determine which number or person is being called. SignalRing Plus is associated with incoming calls only and does not provide a separate dial tone line to place outgoing calls.

If any customer requests a Secondary Directory Number as a business listing, the Primary Directory Number must be a business access line. Each Secondary Directory Number is entitled to one directory listing. Should the customer not desire the listing be published, the Telephone Company, in its directory listing process, shall designate the Secondary Directory Number as a No Charge Non-Pub. The customer would not be charged the Non-Pub recurring monthly charge as shown in Section 4. Non-List Service is not available for Secondary Directory Numbers.

Any Custom Calling Features assigned to the Primary Directory Number will also work with the Secondary Directory Numbers, i.e., Call Waiting, Call Forwarding, Call Forwarding Busy, Call Forwarding No Answer.

(M) Material previously appearing on this sheet now appears on Original Sheets 1.1 and 1.2.

Issued: September 30, 2005

Effective: September 30, 2005

UNITED TELEPHONE COMPANY OF OHIO
By Chad R. Eckhart, Vice President
Overland Park, KS

In accordance with Order No.: 05-1200-TP-ZTA
Issued by the Public Utilities Commission of Ohio

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (Continued)

H. Subscriber Activated Call Block

(T)

Subscriber Activated Call Block restricts access to certain types of outgoing calls, such as direct-dialed toll calls. Other types of calls, such as local, calls to 9-1-1, or calls to the operator can still be originated from the line. The subscriber dials an access code to activate the feature. While Subscriber Activated Call Block is in effect, the individual subscriber can override the restrictions by dialing a personal identification number (issued by the Telephone Company) before placing a call. Another code is used to deactivate Subscriber Activated Call Block.

I. Call Forwarding of Call Waiting

(T)

Call forwarding of Call Waiting, by combining Call Waiting with Call Forwarding - No Answer, provides the capability to forward unanswered waiting calls to a predetermined telephone number. An incoming call to a busy line first receives standard Call Waiting treatment in which an audible tone is heard by the called party and audible ringing is heard by the calling party. If the call is not answered after a predetermined number of rings, the incoming call is forwarded to a subscriber designated number. Only one call at a time will be forwarded; others will receive a busy tone.

J. Call Hold

(T)

Call hold allows the subscriber to place a call on hold, and then continue the conversation either from the same telephone set or from a more convenient location. Call Hold is activated by flashing the switchhook, dialing an access code, and then hanging up. The call is resumed when the handset of the same telephone, or another telephone on the same line, is picked up.

K. Wake-up

(T)

Wake-up service allows a subscriber to program from a telephone the time to be called by an automated wake-up service. The feature is activated and deactivated by an access code. When the feature is activated, the subscriber may program one "ring back" time within the succeeding 24-hour period, and must repeat this activation sequence for each succeeding 24-hour period. If a wake-up call is not answered or fails for any reason, two more attempts are made at approximately 5-minute intervals. After the third attempt is made, and the call is unanswered, the event is recorded and no further attempt is made.

CUSTOM CALLING SERVICE

I. GENERAL DESCRIPTION (Continued)

L. Three-Way Calling with Transfer

(T)

1. This feature allows a business user to hold an in-progress call and complete a second call while maintaining privacy from the first call, or to add on the previously held call for a three-way conference. Incoming calls may be transferred to another access arrangement on an inter- or intra-switch basis, except as specified in Section 24.I.Q.3. following.

The subscriber can transfer the caller to the secondary destination in one of three ways:

a. Blind Transfer

By placing the original caller on hold, dialing the secondary destination, and upon hearing the ring, hang up, resulting in the original caller being connected to the secondary destination.

b. Announced Transfer

By placing the original caller on hold, dialing the secondary destination, and upon the party at the secondary destination answering the phone, the subscriber announces the transfer of the call (on hold at the time) and hangs up (on hook), resulting in the original caller being connected to the secondary destination.

c. Three-Way Conferencing with Option to Transfer

By placing the original caller on hold, dialing the secondary destination, and upon the party at the secondary destination answering the phone, taking the original caller off-hold; resulting in a three way connection. The subscriber can then hang up; resulting in the original caller continuing to be connected to the caller at the secondary destination.

2. The subscriber of Three-Way Calling with Transfer can receive or originate the initial call. Three-Way Calling with Transfer allows the subscriber to originate both legs of a three way connection and subsequently disconnect, enabling the other parties to remain connected.
3. Where the subscriber originates both legs of a three-way call, those legs will remain bridged together when the subscriber goes on hook when at least one of the legs is a call for which both the originating and terminating points are served by the same switch. Where the subscriber originates two inter-switch legs of a three-way call, both legs remain bridged when the subscriber goes on hook where the serving switch is not a 5ESS switch. For such calls in a 5ESS switch, both inter-switch legs are disconnected when the subscriber goes on hook.

CUSTOM CALLING SERVICE

II. REGULATIONS

- A. The service is offered from only those central offices where the Telephone Company has arranged the equipment for "custom calling" and is furnished subject to the availability of facilities. In certain offices where equipment arrangements permit, all the calling features listed in I may be offered; in other offices equipment may not be available to offer all the features described in paragraph I, A-Q.
- B. Custom calling service will be furnished only with individual line service. The service is not available with Centrex, private branch exchange **ISDN-BRI II, ISDN-PRI or** payphone line services. Custom calling features are available with either dial or touch-tone service. (T)
- C. The normal quality of transmission may not be maintained on all calls for subscribers of these services.
- D. Call Forwarding (standard or fixed) and warm line service cannot be provided on the same line and cannot be provided on trunks. It is the responsibility of the warm line subscriber to inform the party to whom calls will be sent of this arrangement, and that party must consent to the arrangement. The Telephone Company assumes no liability for the use of the warm line service except for which the service is intended under the provisions described in this tariff section.
- E. Call Forwarding and Fixed Call Forwarding cannot be provided on the same line.
- F. Call Forwarding (standard or fixed) and personal alert line service cannot be forwarded to 911 or to other emergency service providers except for official providers of emergency service.
- G. Call Forwarding of Call Waiting will only be offered as a package with Call Waiting and Call Forward - No Answer.

TIME AND TEMPERATURE ANNOUNCEMENT SERVICE

I. DESCRIPTION

The Telephone Company will provide time or time and temperature announcement service when facilities are available to permit the subscriber to furnish time or time and temperature announcements by telephone to calling parties.

II. GENERAL REGULATIONS

- A. The Telephone Company will furnish all facilities required for time or time and temperature announcement services, including the time announcement equipment, announcement lines and associated equipment.
- B. Time or time and temperature announcement equipment shall be located on Telephone Company premises or at a location selected by the Telephone Company.
- C. Service will be furnished in any dial exchange where all the necessary facilities, as determined by the Telephone Company, are available or can be made available within a reasonable time at a reasonable expense.
- D. Service is furnished for use by the subscriber only and is not furnished for any party other than the subscriber for transmitting a message for which an amount will be or has been paid to any party other than the Telephone Company except as allowed by the rules and regulations of this tariff. (C)
- E. Facilities for time and temperature announcement service may be furnished to more than one subscriber in any one exchange.
- F. The subscriber is required by the Telephone Company to contract for as many announcement lines as are needed to handle the traffic satisfactorily without impairing the quality of telephone service to other subscribers of the exchange.
- G. Refusal to correct after notification of impairment to the quality of telephone service to other subscribers of the exchange by time or time and temperature facilities shall give the Telephone Company the right to discontinue such service without notification to the subscriber. (C)

TIME AND TEMPERATURE ANNOUNCEMENT SERVICE

II. GENERAL REGULATIONS (continued)

- H. The liability of the Telephone Company for damages arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission that occur by furnishing services and are not caused by negligence of the subscriber or of the Telephone Company shall not exceed an amount equivalent to the proportionate charge to the customer for the period of service during which the mistake, omission, interruption, delay, error or defect occurs. (S)
- I. The subscriber indemnifies and saves the Telephone Company harmless against claims for libel, slander or infringement of copyright arising from material transmitted over facilities for time or time and temperature. (S)
- J. Telephone users calling the time or time and temperature numbers are automatically disconnected after one full announcement period.
- K. One directory listing will be furnished with each service without charge, with the listing to appear under the caption "Time-of-Day" or "Time-and-Temperature" and with the name of the customer listed under the caption.
- L. Wording of the message announcement must be so arranged as to be, in the judgment of the Telephone Company, clearly deliverable.
- M. The initial contract periods for time or time and temperature equipment are as follows:
- | | |
|----------------------------|---------|
| Model STM-100XT | 2 Years |
| Models M12RSXT, M12RSX/TLP | 3 Years |
- N. When service is terminated at the subscriber's request before the expiration of the initial contract period, the subscriber is required to pay an amount equal to the charges for the unexpired portion of the initial contract period.
- O. Although time or time and temperature is designed to give the time accurately, the Telephone Company does not guarantee to furnish accurate time since the accuracy of time or time and temperature equipment is dependent upon the accuracy in frequency of the power source from which the equipment is supplied its power.

COMMUNITY FIRE REPORTING SERVICE

I. DESCRIPTION

- A. Community fire reporting and fire alerting service will be provided by the Telephone Company for the reporting of fires by dialing the number listed under fire department. The ringing of the listed fire alarm number will activate or ring the control operator or fireman telephones connected to the fire department line.
- B. When a fireman's line is busy, the line receives a warning signal which indicates that an alarm has been initiated; and when busy connection is released, the line is connected to the alarm for ringing or talking.
- C. After the alarm information is passed, the calling party may release, but the common talk circuit is held until the last fire alarm telephone disconnects.
- D. Community fire reporting and fire alerting service is available for individual line business and residence lines.

II. GENERAL REGULATIONS

- A. Members of a community fire department who are to be connected to the community fire reporting and fire alerting service unit must be regular subscribers of telephone service.
- B. The Telephone Company makes no guarantee and assumes no liability for damages except for allowance for interruption of service as contained in the Telephone Company's tariff.
- C. The community fire reporting service unit has a capacity of 50 lines.
- D. The community fire alerting service unit has a capacity of 30 lines.

III. RATES AND CHARGES

- A. The following rates and charges will apply to the community fire reporting and fire alerting service units and are in addition to the rates and charges applicable to the associated service and facilities.

Issued by the Public Utilities Commission of Ohio

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF**

CALL LINE IDENTIFIER

I. GENERAL

- A. Call Line Identifier is used to attempt to trace and identify, at the request of a subscriber, the source or origin of obscene, harassing, and/or other nuisance type of telephone calls. Call Line Identifier service is intended for situations where subscribers require extended trace for a specified length of time on a per line basis and proactively request the service as a precautionary tool. The Call Trace feature, as specified in Section 45 of this tariff, differs from Call Line Identifier service in that Call Trace is activated on a per call basis and subscribers proactively request the service as a precautionary tool.

II. REGULATIONS

- A. Subscribers initiate requests for Call Line Identifier service by contacting the Annoyance Call Center.
- B. Requests for Call Line Identifier service will be evaluated by the Annoyance Call Center. The Telephone Company will trace calls when requested based upon the availability of line identification equipment.
- C. Call Line Identifier service will apply per line upon request at the rates and for the time periods specified in Section 33.III.C. following.
- D. The Telephone Company does not guarantee successful call trace results when line identification equipment is placed. When call trace results are successful, the identity of the offending line subscriber will only be furnished to the appropriate law enforcement agency, pursuant to signed Disclosure Authorization by the offended subscriber.
- E. In the event a customer requested call trace is unsuccessful, the customer will be given the option of changing the telephone number at no charge.
- F. The Telephone Company will not be liable for any damages or injuries of whatever kind to property or to any individuals, which may, in any manner, result from the provision of this service, or from any mistakes, interruptions, delays, or errors by the Telephone Company in connection with Call Line Identifier service which were not caused by the Telephone Company's failure to maintain proper standards of maintenance and operation or by the Telephone Company's failure to exercise reasonable supervision (i.e., willful neglect).

GENERAL EXCHANGE TARIFF

CALL LINE IDENTIFIER

II. REGULATIONS (Continued)

- G. This tariff does not apply to trap and trace ordered by the state or federal courts, or to emergency situations, such as kidnapping, threatening of jurors, witnesses, or judicial officers, or similar emergencies, declared by a law enforcement agency within its legal powers. The tariffed rates reflected herein do not apply when Call Line Identifier is provisioned by the Company in response to a Customer having previously received threatening or harassing calls and having reported such calls to the Company's security department (Annoyance Call Bureau) and the appropriate law enforcement agency.
- H. Any Call Line Identifier conducted under this tariff shall be at the discretion of the Telephone Company and is subject to the availability of facilities.

III. RATES AND CHARGES

	<u>Nonrecurring Charge</u>
A. 30-Day Period (per line)	\$50.00
B. 12-Month Period (per line)	55.00
C. Renewal Request for 30- Day or 12- Month Period which involve the same telephone number(s) (per line)	20.00

REMOTE CALL FORWARDING

I. DESCRIPTION

Remote call forwarding (RCF) is a service whereby a call placed **from** a station (the originating station) to a customer's telephone number (the RCF customer) in one exchange (the call forwarding location) is automatically forwarded by Telephone Company central office equipment to another station designated by the RCF customer (the terminating station) in a different exchange.

(T)

II. GENERAL REGULATIONS

- A. Remote call forwarding service is offered subject to the availability of suitable central office facilities.
- B. Remote call forwarding service is not offered where the terminating station is a coin telephone.
- C. The Telephone Company will not provide identification of the originating number to the RCF customer.
- D. Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call.
- E. Remote call forwarding is not represented as suitable for satisfactory transmission of data.
- F. Call forwarding should not be offered as a feature at the terminating station due to transmission signal limitations.
- G. Remote call forwarding **can** be provided where the call forwarding number and the terminating station are both located in the same local calling area **provided that the Remote Call Forwarding is not used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part of message charges, toll or other charges, that would regularly be applicable between the stations bridged together by the subscriber.**
- H. Remote call forwarding is provided on the condition that the RCF customer subscribe to sufficient RCF access lines to adequately handle calls to the RCF customer without interfering with or impairing any services offered by the Telephone Company.
- I. Remote call forwarding can be used over message toll telephone, foreign exchange or WATS facilities.
- J. One directory listing furnished without charge for each RCF access line.

REMOTE CALL FORWARDING

III. RATES AND CHARGES

The following rates and charges apply to remote call forwarding.

- A. Nonrecurring charge \$30.00
- B. Monthly service charge \$19.45
- C. Facility charge

The facility charge applicable to remotely forwarded calls is comprised of two separate charges: (1) a charge for that portion of the call from the originating station to the call forwarding location and (2) a charge for that portion of the call from the call forwarding location to the terminating location. The respective charge for each such portion will be as follows:

- 1. Between the originating location and call forwarding location - The charge for this portion of a remotely forwarded call will be the charge applicable for the type of call involved (e.g., toll charge, local measured service charge or no charge when in a flat-rate calling environment) and will be billed to the originating station.
 - 2. Between the call forwarding location and terminating location - The RCF customer is responsible for the applicable monthly charges when the call uses foreign exchange facilities; customer-dialed, station-to-station charges when the call uses message toll facilities; the applicable usage charges when the call terminates on an intrastate WATS number; or the applicable usage charges when the call terminates on LMS or ELC facilities. These charges apply to all calls answered at the terminating station
- D. The charge to change the number of the terminating station at the customer's request is \$30.00.

SPECIAL PROMOTIONS

- I. *The Company may offer special promotions of new or existing services or products for limited periods, which may include reducing or waiving applicable charges for the promoted services. The Company will file a tariff for each promotion with the Commission prior to the beginning of the promotional period. These promotions will be offered on a non-discriminatory basis with each subscriber in the classification of service and area for which the promotion is offered having an equal opportunity for participation, subject to the availability of products, services and facilities.*

(C)

The company will also provide for resale promotions lasting more than 90 days on a per customer basis during a calendar year in accordance with 4901:1-6-18 O.A.C.

PRICING LIST**

SPECIAL PROMOTIONS

Beginning on November 15, 2001, and continuing through February 12, 2002, the Telephone Company will hold a special promotion for the purpose of increasing sales of Caller ID with Name and Call Forwarding to business customers with Key Trunks. The Telephone Company will waive the first three months of recurring charges for Caller ID with Name and Call Forwarding when purchased together.

Beginning on January 15, 2002, and continuing through April 15, 2002, the Telephone Company will hold a special promotion for the purpose of increasing sales of ISDN-PRI to business and residential customers. The Telephone Company will waive the first three months of recurring charges of Incoming Call Identification (Caller ID Name and Number) for customers who sign a 36-month or greater term contract for two-way ISDN-PRI Service and request the optional feature of Incoming Call Identification.

Beginning on February 18, 2002, and continuing through April 14, 2002, the Telephone Company will hold a special promotion for the purpose of increasing sales of Caller ID with Name to residential customers. The Telephone Company will waive the \$5.00 per order service charge if Express Touch (Caller ID with Name) is ordered subsequent to the initial order for service.

Beginning on May 2, 2002 and continuing through July 29, 2002, all tariffed nonrecurring installation and service connection charges will be waived for all services installed under the same order when customers establish a new business account and subscribe to any business local exchange service, Centrax or United Translink® Service, as long as the customer's total monthly billed amount is at least \$35.00. The total monthly billed amount does not include deregulated charges, taxes, late payment charges, charges billed pursuant to federal or state access service tariffs, charges collected on behalf of municipalities (including, but not limited to services for 911 services and dual party relay services), and charges for services provided by other companies.

Existing business customers who establish a new account at a new location are eligible for this promotion. This promotion does not apply to moves, changes, or additions to a customer's existing business account.

Beginning on May 6, 2002, and continuing through July 14, 2002, the Telephone Company will hold a special promotion for the purpose of increasing sales of Caller ID with Name to residential customers. The Telephone Company will waive the \$5.00 per order service charge if Express Touch (Caller ID with Name) is ordered subsequent to the initial order for service.

Beginning on June 3, 2002 and continuing through August 30, 2002, new and current business customers with four lines or fewer who subscribe to a Sprint SolutionsSM – Business Package and Sprint Privacy IDSM will have the first two months of the Sprint Privacy IDSM monthly recurring charge waived. A credit will be applied on each of the first two months of billing.

Beginning on August 3, 2002, and continuing through **December 31, 2002**, the Telephone Company will hold a special promotion for the purpose of increasing sales of Caller ID with Name to residential customers. The Telephone Company will waive the \$5.00 per order service charge if Express Touch (Caller ID with Name) is ordered subsequent to the initial order for service.

(C)

Issued: October 21, 2002

Effective: October 31, 2002

UNITED TELEPHONE COMPANY OF OHIO
By Chad R. Eckhart, Vice President
Overland Park, Kansas

In accordance with Order No. 86-1144-TP-COI
Issued by the Public Utilities Commission of Ohio

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF
PRICING LIST**

SPECIAL PROMOTIONS

From September 16, 2002 through and including December 1, 2002, Sprint will waive all regulated tariffed nonrecurring installation and service charges for all services installed under the same order when non-Sprint business customers establish a new account and subscribe to any business local exchange service, Centrex or Translink Service. Business local exchange service included in a Sprint Solutionssm Business Package is also included in the local exchange services that qualify customers for the waiver of nonrecurring charges.

The customer's total monthly billed amount must be at least \$50.00. That amount does not include deregulated charges, taxes, late payment charges, charges billed pursuant to federal or state access service tariffs, charges collected on behalf of municipalities, (including but not limited to services for 911 service and dual party relay services), and charges for services provided by other companies. If the customer's total monthly billed amount is less than \$50.00, they will be billed the appropriate nonrecurring and service charges associated with the services they have subscribed to.

Existing business customers who establish a new account at a new location are eligible for this promotion upon request. This promotion does not apply to moves, changes, or additions to a customer's existing business account.

Beginning October 1, 2002, and continuing through December 31, 2002, the Telephone Company will provide an Appointment Guarantee Credit to residential customers when an in-premise visit for installation or repair of Company owned equipment used to provide service under this Tariff is required. When an in-premise installation or repair visit is required, the Telephone Company shall specify the date and the approximate time of day, within a two-hour window, when Telephone Company personnel will be available for an in-premise installation or repair visit. When Telephone Company personnel cannot meet the in-premise installation or repair visit within the appointed time, the Telephone Company shall notify the customer. The Telephone Company shall then apply a credit to the subscriber's bill equal to \$20.00 or the amount applicable in compliance with the Minimum Telecommunications Service Standards of rule 4901:1-5-16 of the Administrative Code, whichever is greater.

The Appointment Guarantee Credit is not applicable when the Telephone Company cannot make the in-premise visit within the appointed time:

- 1. And provides the customer twenty-four hour notice of its inability to meet the in-premise installation visit.***
- 2. If the customer cancels or misses the scheduled in-premise installation or repair visit within the two-hour appointed window***
- 3. As a result of natural disasters, negligent or intentional acts of customers or third parties, events outside the control of the company, or circumstances that may endanger Sprint Employees' safety.***

SPECIAL PROMOTIONS

During the period November 1, 2002 through January 29, 2003, when a business customer subscribes to the Custom Calling Service feature package "Sprint Priority Package" or subscribes to Caller ID with Name or Enhanced Call Waiting, or Call Forwarding-Fixed as an individual feature, the monthly recurring charge for the feature package or individual feature will be waived for two months.

During the period February 3, 2003 through April 30, 2003, Sprint will waive all service connection charges that are otherwise applicable for the installation of a new access line when a business customer with existing local exchange service orders a Sprint SolutionsSM Business Package (bundle) as an additional line. Service connection charges will be waived for all bundles ordered under this promotion. If new business customers without existing local exchange service order one or more bundles during the promotion, all service connection charges otherwise applicable for the installation will be waived.

During the period March 3, 2003 through May 31, 2003, business customers with four or fewer access lines and zero or one Custom Calling/ExpressTouch Feature who subscribe to one or more single features (Three-Way Calling, Caller ID with Name, Call Forwarding and/or or Enhanced Call Waiting) and any Sprint Communications L.P. long distance service will receive a 25% discount on the highest rated feature ordered. The 25% discount will apply as long as the customer retains the feature(s) and Sprint Communications L.P. long distance service.

Beginning on March 7, 2003 and continuing through May 16, 2003, the Company will waive all regulated tariffed nonrecurring installation and service charges for all services installed under the same order when new business customers establish an account and subscribe to any business local exchange service, Centrex, United TransLinkSM, ISDN (BRI II or PRI), ATM Service or Enhanced Frame Relay Service. Eligible business local exchange service does not include Sprint SolutionsSM Business Packages. In addition, the first month's monthly recurring charges for all services installed under the same order will be waived. Thereafter, the customer will receive a credit equal to the monthly recurring charges for services ordered and retained under this promotion on the anniversary date of the installation for as long as the customer retains the services.

The customer's initial monthly charges must be at least \$50.00 to qualify for participation in this promotion. That amount does not include deregulated charges, taxes, late payment charges, charges billed pursuant to federal or state access service tariffs, charges collected on behalf of municipalities, (including but not limited to services for 911 service and dual party relay services), and charges for services provided by other companies.

Existing business customers who establish a new account at a new location are eligible for this promotion upon request. This promotion does not apply to moves, changes, or additions to a customer's existing business account.

(N)

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF
PRICING LIST**

SPECIAL PROMOTIONS

Beginning March 3, 2003 and continuing through **December 31, 2003**, business customers in the Lebanon and Mason exchanges who subscribe to Individual Business Lines, Key Trunks, and/or PBX Trunks under a two-year or three-year term discount plan will receive a discount on the monthly rates for those services. The discount applies toward the rates specified in Section B of the company's P.U.C.O. No. 6 Local Exchange Tariff. (C)

Customers who subscribe to Business Individual Line local exchange service during the promotion period will receive a five percent discount on the monthly rate under a two-year agreement or a ten percent discount under a three-year agreement. Customers who subscribe to Business Key Trunk and/or PBX Trunk local exchange service will receive a fifteen percent discount on the monthly rate under a two-year agreement or a twenty percent discount under a three-year agreement. All discounts will apply each month for the entire length of the term agreement.

The customer may extend the term agreement at any time during the term of the agreement, up to a maximum of three years. In such instance, the number of months remaining under the original term agreement will become part of the total months remaining under the new term agreement. The customer may renew the term agreement upon written notice to the company prior to the expiration of the existing agreement. If the customer does not specify renewal terms in writing within 90 days prior to the expiration of the two year or three year service period, the commitment period and the rates in effect at the time of expiration will automatically be extended for an additional 12 months. However, the customer may terminate service at the end of the original term agreement with no penalty or obligation to continue the service.

Rate increases or decreases to the basic local exchange rates specified in the P.U.C.O. No. 6 Local Exchange Tariff will automatically be applied to the monthly rates for the remaining term of all term agreements under this promotion. If a company-initiated rate increase causes the services subscribed to under this promotion to increase by ten percent or more annually, the customer may cancel the term agreement within thirty days after the effective date of the rate increase without incurring any termination liability charges. Otherwise, if a customer disconnects all or a portion of the services subscribed to under this promotion prior to the end of the term agreement, termination liability charges equal to the sum of fifty percent of the payments remaining in the term agreement period will apply.

SPECIAL PROMOTIONS

The promotion will be offered from May 19, 2003 through and including November 30, 2003.

During the promotion, the Company will waive all regulated tariffed nonrecurring installation and service charges for Individual Voice Channels for Sprint Custom Access SolutionsSM as specified in Section 39.1.F, when new business customers subscribe to the service. In addition, the first month's monthly recurring charges will be waived. Thereafter, the customer will receive a credit equal to the monthly recurring charges for the Individual Voice Channels for Sprint Custom Access SolutionsSM service(s) ordered under this promotion on the anniversary date of the installation, for the duration of the Term Discount Plan under which the customer subscribed to the accompanying Sprint Custom Access Solutions service from Sprint Local Telephone Companies' F.C.C. Tariff No. 3. Customers who discontinue their services prior to the end of a Term Discount Plan will be assessed all charges waived under this promotion.

The customer's initial monthly charges must be at least \$50.00 to qualify for participation in this promotion. That amount does not include deregulated charges, taxes, late payment charges, charges billed pursuant to federal or state access service tariffs, charges collected on behalf of municipalities, (including but not limited to services for 911 service and dual party relay services), and charges for services provided by other companies.

Existing business customers who establish a new account at a new location or who upgrade their current services under an existing account are eligible for this promotion upon request. This promotion does not apply to moves, changes, or additions to a customer's existing business account.

SPECIAL PROMOTIONS

The promotion will be offered from December 1, 2003 through and including February 29, 2004.

(N)

During the promotion, when new business customers subscribe to Individual Voice Channels for Sprint Custom Access SolutionsSM as specified in Section 39.1.F., the first month's monthly recurring charges will be waived. Thereafter, the customer will receive a credit equal to the monthly recurring charges for the Individual Voice Channels for Sprint Custom Access SolutionsSM service(s) ordered under this promotion on the anniversary date of the installation, for the duration of the Term Discount Plan under which the customer subscribed to the accompanying Sprint Custom Access Solutions services from Sprint Local Telephone Companies' F.C.C. Tariff No. 3. Customers who discontinue their services prior to the end of a Term Discount Plan will be assessed all charges waived under this promotion.

The customer's initial monthly charges must be at least \$50.00 to qualify for participation in this promotion. That amount does not include deregulated charges, taxes, late payment charges, charges billed pursuant to federal or state access service tariffs, charges collected on behalf of municipalities, (including but not limited to services for 911 service and dual party relay services), and charges for services provided by other companies.

Existing business customers who establish a new account at a new location or who upgrade their current services under an existing account are eligible for this promotion upon request. This promotion does not apply to moves, changes, or additions to a customer's existing business account.

SPECIAL PROMOTIONS

During the period December 2 through December 31, 2003, existing residential customers who are subscribed to Sprint SolutionsSM Residence Package Core Solution or Sprint Personal II Solution and who are also subscribed to any Sprint Communications Company, L.P. long distance service, are eligible to enroll in a customer appreciation promotion. Customers who enroll in the promotion prior to December 31, 2003, will receive a \$20 voucher six months after the conclusion of the enrollment period and will receive another voucher twelve months after enrollment, as long as the customers retain the qualifying services to which they were subscribed upon enrollment. Customers who are subscribed to Sprint PCS or DSL in addition to the above qualifying services at the time of their enrollment, will receive a \$25 voucher instead of a \$20 voucher, as long as they retain all those services. Customers who discontinue the Sprint SolutionsSM Residence Package to which they were subscribed upon enrollment will still receive the voucher if they have discontinued that package and subscribed to a higher priced package subsequent to enrollment. Customers who qualify for the first voucher and retain the qualifying services will receive the second voucher. The voucher, payable to Sprint, may be used by the customer for payment of a Sprint local or long distance invoice or may be used towards the purchase of products or services at any Sprint retail location. Customers will be contacted by Sprint via outbound telemarketing channels. Customers not contacted who are subscribed to the qualifying services are eligible to enroll in the promotion upon request.

During the period December 29, 2003 through March 31, 2004, when existing residential customers who are not subscribed to any Custom Calling or ExpressTouch® features subscribe to Caller ID with Name, Call Waiting, or a Call Forwarding feature with MessageLine®, the Company will waive the service connection charges that are otherwise applicable.

SPECIAL PROMOTIONS

The promotion will be offered from March 25, 2004 through and including May 31, 2004.

During the promotion, the Company will waive all regulated tariffed nonrecurring installation and service charges for all services installed under the same order when new business customers establish an account and subscribe to any business local exchange service, Translink®, Interexchange Translink® Service, Enhanced Frame Relay Service, Asynchronous Transfer Mode (ATM) Service, ISDN (BRI or PRI) or Centrex. Eligible business local exchange service also includes the following Sprint SolutionsSM Business Packages: Sure Solution II, Standard Solution II, Classic Solution and Priority Solution.

In addition, the first month's monthly recurring charges for all services installed under the same order will be waived. Thereafter, the customer will receive a credit equal to the monthly recurring charges for services ordered and retained under this promotion on the anniversary date of the installation for four years or as long as the customer retains the services, whichever is shorter. Customers who discontinue their services prior to the end of a Term Discount Plan will be assessed all charges waived under this promotion in addition to any applicable termination liability charges.

The customer's initial monthly charges must be at least \$50.00 to qualify for participation in this promotion. That amount does not include deregulated charges, taxes, late payment charges, charges billed pursuant to federal or state access service tariffs, charges collected on behalf of municipalities, (including but not limited to services for 911 service and dual party relay services), and charges for services provided by other companies.

Existing business customers who establish a new account at a new location or who upgrade their current services under an existing account are eligible for this promotion upon request. This promotion does not apply to moves, changes, or additions to a customer's existing business account.

SPECIAL PROMOTIONS

This special promotion is to be offered from December 8, 2004 through and including March 1, 2005, for new or existing residential customers in the following exchanges:

(C)

Ada	Gomer
Beaverdam	Lafayette
Bluffton	Lima
Cairo	Newton Falls
Cortland	Ottawa
Delphos	Warren
Elida	Waynesfield

This special promotion will be offered from December 13, 2004 through and including March 1, 2005 for new and existing residential customers in the Bristolville exchange.

(C)

During this promotion, residential customers may subscribe to a Special Plan Bundle for \$43.00. This bundle includes the following: Local Exchange Service, Enhanced Call Waiting or Sprint Talking Call Waiting (Optional), Call Forwarding Busy, Call Forwarding No Answer, Caller ID with Name, Anonymous Call Rejection, Call Forwarding, Call Waiting ID, Selective Call Acceptance, Repeat Dial and Return Call.

When customers also subscribe to Sprint Communications Company, L.P. Sprint Solutions Unlimited Long Distance Plan - Option 1 and either Sprint DSL, Sprint Video (DishNetwork) or Sprint PCS under this promotion, the monthly recurring charge for the Special Plan Bundle will be \$29.95 instead of \$43.00. If the customer discontinues either of those services, the monthly recurring charge for the Special Plan Bundle will revert to \$43.00.

Sprint Privacy ID is available to subscribers of this Special Plan Bundle at the rate of \$4.00.

The Special Plan Bundle is not available with Residential ISDN-BRI service lines or to customers who are or become toll restricted. A customer may have no more than four residence lines enrolled with the Special Plan Bundle for each customer Billed Telephone Number account. Service charges will not apply when the Special Plan Bundle replaces existing Local Exchange Service or if the customer requests a change from the Special Plan Bundle back to regular Local Exchange Service. The Company will also waive all service charges that are otherwise applicable for the installation of the Special Plan Bundle when new residential customers subscribe to the Special Plan Bundle.

Special Plan Bundle customers are not eligible for promotional offerings associated with the Custom Calling and ExpressTouch Services included in the bundle, unless specifically provided for in a promotional offering. The Special Plan Bundle may not be combined with any other residence optional local calling plan service.

The Special Plan Bundle rates offered under this promotion are applicable for as long as the customer retains the qualifying services or until the Company notifies customers that the Special Plan Bundle rates will be revised in accordance with filed tariffs.

SPECIAL PROMOTIONS

This special promotion is to be offered from March 1, 2005 through and including May 29, 2005, for new or existing residential customers in the following exchanges:

Ada	Gomer
Beaverdam	Lafayette
Bluffton	Lima
Bristolville	Newton Falls
Cairo	Ottawa
Cortland	Warren
Delphos	Waynesfield
Elida	

During this promotion, residential customers may subscribe to a Special Plan Bundle for \$43.00. This bundle includes the following: Local Exchange Service, Enhanced Call Waiting or Sprint Talking Call Waiting (Optional), Call Forwarding Busy, Call Forwarding No Answer, Caller ID with Name, Anonymous Call Rejection, Call Forwarding, Call Waiting ID, Selective Call Acceptance, Repeat Dial and Return Call.

When customers also subscribe to Sprint Communications Company, L.P. Sprint Solutions Unlimited Long Distance Plan - Option 1 and either Sprint DSL, Sprint Video (DishNetwork) or Sprint PCS under this promotion, the monthly recurring charge for the Special Plan Bundle will be \$24.95 instead of \$43.00. If the customer discontinues either of those services, the monthly recurring charge for the Special Plan Bundle will revert to \$43.00.

Sprint Privacy ID is available to subscribers of this Special Plan Bundle at the rate of \$4.00.

The Special Plan Bundle is not available with Residential ISDN-BRI service lines or to customers who are or become toll restricted. A customer may have no more than four residence lines enrolled with the Special Plan Bundle for each customer Billed Telephone Number account. Service charges will not apply when the Special Plan Bundle replaces existing Local Exchange Service or if the customer requests a change from the Special Plan Bundle back to regular Local Exchange Service. The Company will also waive all service charges that are otherwise applicable for the installation of the Special Plan Bundle when new residential customers subscribe to the Special Plan Bundle.

Special Plan Bundle customers are not eligible for promotional offerings associated with the Custom Calling and ExpressTouch Services included in the bundle, unless specifically provided for in a promotional offering. The Special Plan Bundle may not be combined with any other residence optional local calling plan service.

The Special Plan Bundle rates offered under this promotion are applicable for as long as the customer retains the qualifying services or until the Company notifies customers that the Special Plan Bundle rates will be revised in accordance with filed tariffs.

Customers who subscribed to the Special Plan Bundle under the promotion that was offered from December 8, 2004 through March 1, 2005 may continue subscribing to that bundle and the associated services at the rates specified in this promotion.

SPECIAL PROMOTIONS

During the period May 2 through July 30, 2005, existing residential customers subscribing to the following service(s) who submit a referral via the Sprint Internet website will receive a \$25 bill credit if the referral results in the activation of a qualifying service by the referred customer within sixty days of the referral. The referred customer must be an existing Sprint residential customer who, upon referral, subscribes to one of the following:

- 1) Sprint Core Solution Package with Sprint Communications Company L.P. Sprint Solutions Unlimited Long Distance,
- 2) Sprint Core Solutions Plus Package with Sprint Communications Company L.P. Sprint Solutions Unlimited Long Distance,
- 3) Sprint Personal II Solution Package with Sprint Communications Company L.P. Sprint Solutions Unlimited Long Distance,
- 4) Sprint Home II Solution Package with one required Premium Enhanced Service (LineGuard/Data LineGuard, CPE Warranty Plus or VoiceMail) and Sprint Communications Company L.P. Sprint Solutions Unlimited Long Distance,
- 5) The Company's DSL service,
- 6) Dish Network Service offered through Sprint LTD.

The referring customer will receive the bill credit within 60 days of the referred customer subscribing to the service. Multiple credits may be received by the referring customer, with one credit rendered per bill cycle.

During the promotional period June 16, 2005 through September 13, 2005, Sprint will waive all nonrecurring installation and/or Service charges that are otherwise applicable when a business customer establishes a new account and subscribes to Basic Business Local Service (B1), Key Trunk, ISDN-BRI, ISDN-PRI, Centrex, Centrex Service II, Frame Relay, PBX Trunk or Translink under the same order.

Customers subscribing to services under this promotion who discontinue service within one year of installation will be assessed all charges originally waived under the promotion.

SPECIAL PROMOTIONS

Effective September 9, 2005 through December 31, 2005, the Company will waive all nonrecurring charges and service connection charges that are otherwise applicable for the installation of service when residential customers whose premises were destroyed or partially destroyed by Hurricane Katrina establish service in any location in the Company's serving territory.

During the period October 27, 2005 through January 24, 2006, business customers with four lines or fewer, who subscribe to a new Sure Solution II package with any Sprint Communications Company L.P. or **Embarq Communications, Inc.** long distance plan; Sprint Priority Solution with Sprint Communications Company L.P. or **Embarq Communications, Inc.** Sprint Small Business Unlimited Solutions II long distance plan; or Rotary Classic Solution will receive a \$25.05 credit on their next month's bill.

(T)
(T)

During the period October 27, 2005 through January 24, 2006, business customers with four lines or fewer, who subscribe to a new Economy Bundle II A package, or a Business Individual Line with rotary and the Sprint Classics Calling Package plus any Sprint Communications Company L.P. or **Embarq Communications, Inc.** long distance plan, will receive a \$15.05 credit on their next month's bill.

(T)
(T)

During the period October 27, 2005 through January 24, 2006, business customers who contact Sprint to request that the telephone number associated with their Business Individual Line (with or without rotary) or any Bundle be ported to another service provider, may receive a \$6.00 credit per line up to four lines per month for 3 months when customers agree to retain their service. The credit will be applied on the customer's next three invoices.

During the period October 27, 2005 through January 24, 2006, the Company will waive all nonrecurring installation and/or service charges that are otherwise applicable for installation of an access line when a business customer establishes a new account and subscribes to one of the following: Economy Bundle II A package, Sure Solution II package, Sprint Priority Solution package or Rotary Classic Solution package. This offer cannot be combined with any other promotional offer.

SPECIAL PROMOTIONS

During the period January 26, 2006 through April 24, 2006, business customers who contact the Company to request that the telephone number associated with one of the following services be ported to another service provider, will receive a \$5.50 credit per B1 line up to four lines per month for 3 months when customers agree to retain their access line service:

- 1) Business Individual Line (with or without rotary hunting);
- 2) Any Sprint Solutions Package

The credit will be applied to the customer's next three invoices.

During the period January 26, 2006 through April 24, 2006, when a business customer establishes a new account and subscribes to one of the following services, the Company will waive all nonrecurring installation and/or service charges that are otherwise applicable:

- 1) Economy Bundle II A package;
- 2) Sure Solution II package;
- 3) Sprint Priority Solution package;
- 4) Rotary Classic Solution package

This offer cannot be combined with any other promotional offer.

Effective March 1, 2006, in compliance with the FCC's Order, FCC 05-178, dated October 14, 2005, support under the federal Link-Up program will be provided to victims of Hurricane Katrina moving to temporary housing arrangements and to those who return to permanent residences in the affected areas. A federal credit in the amount of thirty dollars (\$30.00) per qualifying household will be available to subscribers upon request and certification by the applicants that they were residents of counties that are designated by FEMA as eligible for individual assistance. A signed letter with this certification will suffice. A maximum of two federal credits (one for the temporary location and one for a return to the permanent location) will be available for qualified subscribers. These credits will be available for customer orders through March 1, 2007. These subscribers will not necessarily be eligible for the Lifeline program as specified in this tariff.

During the period March 1, 2006 through May 31, 2006, residence customers who subscribe to Sprint Home II Solution bundle plus Sprint Communications Company L.P. or **Embarq Communications, Inc.** Sprint Solutions Unlimited Market Test – Option 2 or Sprint High Speed Internet, will receive an \$11.50 discount on the Home II Solution bundle for 12 months. Customers must be contacted by the Company or must contact the Company and request this promotion.

SPECIAL PROMOTIONS

During the period April 3, 2006 through December 31, 2006, the Company will waive all nonrecurring installation and/or service charges that are otherwise applicable when a business customer establishes a new account and subscribes to Business Individual Line, Key Trunk, PBX Trunk, ISDN-BRI, ISDN-PRI, Centrex Service, Enhanced Frame Relay, or Translink under the same order. The customer's initial monthly charges must be at least \$70 and the customer must commit to a minimum of a one year term in order to qualify for participation in this promotion. Charges for all regulated and non-regulated services, including all applicable taxes, surcharges and other fees, contribute towards the qualifying monthly charges. Customers subscribing to services under this promotion who discontinue service within one year of installation will be assessed all charges originally waived under the promotion.

During the period April 3, 2006 through December 31, 2006, the Company will waive all nonrecurring installation and/or service charges that are otherwise applicable when a business customer establishes a new account and subscribes to ATM, Digilink, or Lightlink under the same order. The customer's initial monthly charges must be at least \$70 and the customer must commit to a minimum of a three year term in order to qualify for participation in this promotion. Charges for all regulated and non-regulated services, including all applicable taxes, surcharges and other fees, contribute towards the qualifying monthly charges. Customers subscribing to services under this promotion who discontinue service within three years of installation will be assessed all charges originally waived under the promotion.

During the period April 3, 2006 through July 1, 2006, business customers may be eligible for a one-time invoice credit. To be eligible, customers must (1) be contacted by the Company or contact the Company and request this promotion and subscribe to any combination of business services for which the total monthly charges equal or exceed \$50 or (2) contact the Company to request that their service(s) be disconnected and agree to retain their service(s), with the customer's continued total monthly charges equal to or exceeding \$50. Charges for all regulated and non-regulated services, including all applicable taxes, surcharges and other fees, contribute towards the qualifying monthly charges.

A one-time credit amount, as specified below, will be reflected on the customer's first invoice.

<u>Total Monthly Charges</u>	<u>Credit Amount</u>
\$50 - \$100	\$ 50.00
Over \$100 - \$200	\$ 100.00
Over \$200 - \$300	\$ 200.00
Over \$300 - \$400	\$ 300.00
Over \$400 - \$500	\$ 400.00
Over \$500 - \$600	\$ 500.00
Over \$600 - \$700	\$ 600.00
Over \$700 - \$800	\$ 700.00
Over \$800 - \$900	\$ 800.00
Over \$900 - \$1,000	\$ 900.00
Over \$1,000	\$1,000.00

In accordance with Case No. 90-5041-TP-TRF
Issued by Public Utilities Commission of Ohio

SPECIAL PROMOTIONS

During the period of April 19, 2006 through May 31, 2006, the Company will waive all service connection charges for services installed under the same order when new residential customers who are contacted by the Company or who contact the Company and request this promotion establish an account for local exchange service. If more than one local exchange service access line is requested under the same (initial) order, all service connection charges otherwise applicable for the installation will be waived. This waiver is not applicable on additional lines ordered after service is established. In addition to the preceding eligibility criteria, customers must not have had service disconnected for non-payment and must not have any past due bills for regulated service owed to the Company. Customers who discontinue or have their service disconnected within 90 days of installation will be assessed all charges waived under this promotion.

During the promotional period June 12, 2006 through **April 30, 2007**, the Company will waive all nonrecurring installation and/or service connection charges that are otherwise applicable for installation of a Solutions-Business Package. (C)

During the period June 19, 2006 through September 16, 2006, existing business customers with five or more lines or trunks (including T1 based voice channel services such as ISDN-PRI and Individual Voice Channels for Sprint Custom Access Solutions) who add ISDN-BRI II, Enhanced Frame Relay, ATM, Digilink, Translink, Lightlink, OptiPoint or Sprint SONET Ring to their account, will receive a bill credit for the first month's service for each qualified service added to the customer's account. There is no limit to the number of qualified services that a customer can add to their account nor is there a limit to the number of times a customer can qualify for the bill credit during the promotional period. The bill credit for qualified services installed during this promotional period will be reflected on the customer's first bill immediately following the installation of qualified services. The first month's service for which the customer is credited will count as the first month of service where a minimum service period or term commitment period are applicable. If a customer discontinues service for which credit was issued prior to the end of required service period, credits issued under this promotion will not be rescinded, and the customer is subject only to the applicable minimum service period or termination liability charges that are normally applicable for that service.

SPECIAL PROMOTIONS

During the period January 1, 2007 through December 31, 2007, business customers who subscribe to Business Individual Line, Key Trunk, and/or PBX Trunk service may be eligible for waiver of all service charges (excluding inside wire, construction, or CPE installation) that are otherwise applicable. To receive a waiver, customers who are contacted by the Company or who contact the Company and request this promotion must subscribe to one of the qualifying services, and the customer's total monthly charges must be \$100 or more. Charges for all regulated and non-regulated services (excluding taxes, surcharges and other fees) contribute towards the qualifying monthly charges. There is no limit to the number of times a customer can receive this promotion provided that the customer meets the required spend level with each subsequent order.

During the period January 1, 2007 through December 31, 2007, business customers who subscribe to Centrex and/or ISDN BRI service may be eligible for waiver of all nonrecurring installation and service charges (excluding inside wire, construction, or CPE installation) that are otherwise applicable. To receive a waiver, customers who are contacted by the Company or who contact the Company and request this promotion must subscribe to one of the qualifying services, and must commit to a minimum of a one year term. Customers subscribing to services under this promotion who discontinue service within one year of installation will be assessed all charges originally waived under the promotion. There is no limit to the number of times a customer can receive this promotion provided that the customer meets the required commitment level with each subsequent order.

During the period January 1, 2007 through December 31, 2007, business customers who subscribe to ISDN PRI, Frame Relay, ATM, Digilink, Translink, and/or Lightlink service may be eligible for waiver of all nonrecurring installation and service charges (excluding inside wire, construction, or CPE installation) that are otherwise applicable. To receive a waiver, customers who are contacted by the Company or who contact the Company and request this promotion must subscribe to one of the qualifying services, and must commit to a minimum of a three year term. Customers subscribing to services under this promotion who discontinue service within three years of installation will be assessed all charges originally waived under the promotion. There is no limit to the number of times a customer can receive this promotion provided that the customer meets the required commitment level with each subsequent order.

DERIVED CHANNEL SERVICES

I. INDIVIDUAL VOICE CHANNELS FOR SPRINT CUSTOM ACCESS SOLUTIONSSM

A. DESCRIPTION

1. Individual Voice Channels for Sprint Custom Access SolutionsSM is an intraexchange digital service designed to provide for the integration of multiple voice channels over Sprint Custom Access SolutionsSM as found in Sprint Local Telephone Companies' FCC Tariff No. 3, Section 8.7.
2. Individual Voice Channels are segregated from the data channels using a Digital Access and Cross-connect System (DACS) located in the Telephone Companies' central office. The DACS will route the voice traffic to the serving wire center switching equipment. **Individual Voice Channels may be provisioned with ISDN-PRI functionality upon request.**
3. Customers subscribing to Individual Voice Channels for Sprint Custom Access SolutionsSM are limited to a maximum of 20 Individual Voice Channels per 1.544 Mbps facility. Each channel is dedicated to the provisioning of Individual Voice Channels for Sprint Custom Access SolutionsSM. Channels not activated will not be used for purposes other than providing Individual Voice Channels for Sprint Custom Access SolutionsSM.
4. Customers subscribing to Individual Voice Channels for Sprint Custom Access SolutionsSM must also order data channels at the same time from either Sprint's Access Service Tariff P.U.C.O. No. 1, Section 8.7 or, for the purpose of transmitting Internet traffic, from Sprint Local Telephone Companies' FCC Tariff No. 3, Section 8.7 in one of the following combinations:

Individual Voice Channels ¹	Frame Relay Service			
	256 Kbps (4 Channels)	384 Kbps (6 Channels)	512 Kbps (8 Channels)	768 Kbps (12 Channels)
6	10	12	14	18
8	12	14	16	20
10	14	16	18	22
12	16	18	20	24
14	18	20	22	N/A
16	20	22	24	N/A
18	22	24	N/A	N/A
20	24	N/A	N/A	N/A

Shaded area reflects total channels utilized for each combination.

¹ A minimum of 12 Individual Voice Channels is required when provisioned with ISDN-PRI functionality and each configuration requires one D-channel. For example, when a customer subscribes to 12 Individual Voice Channels with ISDN-PRI functionality, the customer is provided with 11 B-channels and one D-channel.

I. INDIVIDUAL VOICE CHANNELS FOR SPRINT CUSTOM ACCESS SOLUTIONSSM (Cont'd)

A. DESCRIPTION (Cont'd)

5. *Individual Voice Channels may be equipped with the following features, where available:*

(N)

(T)(M)

a. *Incoming Call Identification (Caller ID) – Caller ID provides the customer with the telephone number of the calling party and is intended solely for the use of the Individual Voice Channels for Sprint Custom Access SolutionsSM subscriber.*

(M)

6. *Individual Voice Channels with ISDN-PRI functionality provides functionality equivalent to ISDN-PRI Service as described in Section 46 of this tariff. All standard features included with ISDN-PRI Service are standard for Individual Voice Channels with ISDN-PRI functionality. In addition, optional features available with ISDN-PRI Service are available with Individual Voice Channels with ISDN-PRI functionality, with the exception of D-Channel Backup and Circular Hunt. Optional features are provided at the rates and charges specified in Section 46 of this tariff on a per 1.544 Mbps facility basis.*

(N)

(N)

B. DEFINITIONS

1. *Digital Access and Cross-connect System (DACS) – A digital switching device for routing and switching T-1 lines, and DS0 portions of lines, among multiple T-1 ports. The DACS performs all the functions of a normal “switch” except connections are typically setup in advance of the call, not together with the call.*

2. *Sprint Custom Access SolutionsSM – Provides for the integration of multiple voice and data channels over the same 1.544 Mbps facility, as referenced in Sprint Local Telephone Companies' FCC Tariff No. 3, Section 8.7.*

C. GENERAL REGULATIONS

1. *The regulations and rates specified herein for Individual Voice Channels for Sprint Custom Access SolutionsSM are in addition to the applicable regulations and rates in other tariffs and other sections of this tariff. Unless specified, the regulations for Individual Voice Channels for Sprint Custom Access SolutionsSM apply in addition to the General Regulations set forth in Section 1 of this tariff.*

2. *Individual Voice Channels for Sprint Custom Access SolutionsSM are provided subject to the availability of appropriate facilities as determined by the Company. Service inquiries will be necessary to determine availability.*

(T)

3. *Customer Premise Equipment (CPE) that is compatible with Individual Voice Channels for Sprint Custom Access SolutionsSM is the customer's responsibility to provision.*

4. *The Company shall not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provisioning of Individual Voice Channels for Sprint Custom Access SolutionsSM render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.*

5. *Individual Voice Channels for Sprint Custom Access SolutionsSM are only available where facilities permit.*

(T)

(M) Material now appearing on this sheet previously appeared on Fifth Revised Sheet 1.

2. All other service components apply as found in Sprint Local Telephone Companies' FCC Tariff No. 3, Section 8.7.

E. APPLICATION OF RATES

1. The monthly rate per Individual Voice ***Channel includes*** all mandatory and applicable Extended Area Service (EAS) recurring charges. Individual Voice Channels receive the same local calling area as any other form of basic local exchange service. (T)
2. Optional toll and extended local calling plans are available as specified in this tariff at the applicable tariffed recurring rates and usage charges.
3. All federal and state surcharges apply per Individual Voice Channel, including, but not limited to, 9-1-1 surcharges and Telecommunications Relay Service (TRS) surcharges.
4. Federal monthly end user charges apply as described in Sprint Local Telephone Companies' FCC Tariff No. 3, Section 4. (e.g., End User Common Line (EUCL), Presubscribed Interexchange Carrier Charge (PICC), Line Port Charge (LPC), Local Number Portability (LNP), Federal Universal Service Fund (USF).
5. If applicable, state monthly end user charges apply.

CENTREX

I. DESCRIPTION

Centrex is a central office communications system package provided on individual business lines from digital central office equipment located on Telephone Company premises. Centrex lines may not be terminated on **payphone line service**.

(T)

II. GENERAL REGULATIONS

- A. Centrex is provided subject to the availability of facilities and central office equipment as determined by the Telephone Company.
- B. Temporary suspension of service (vacation service) is not allowed for Centrex lines.
- C. Centrex is normally provided on individual business lines from 5-40 lines per location, however, it may be provided on a special assembly basis to customers whose requirements exceed 40 lines per location subject to the availability of facilities and central office equipment. Centrex will be provided to locations with less than five lines at the **individual** business access line rate as found in the Local Exchange Tariff, P.U.C.O. No. 6, plus the Centrex system and station feature rate, in Paragraph IV.A.3 following.
- D. The quality of transmission for calls utilizing call forwarding or conferencing may vary depending on the distance and routing involved.
- E. Some features are incompatible with each other.
- F. Some features require customer-provided equipment, e.g., modems, terminals, etc.
- G. Other services requested by the customer will be provided in accordance with applicable tariff sections.
- H. Attendant features are offered in conjunction with customer-provided attendant consoles. Attendant console minimum number of Centrex lines is three.

(T)

Issued: September 21, 2001

CENTREX

II. GENERAL REGULATIONS (continued)

- I. All lines must have access to all chosen system features.
- J. When PBX and/or key systems are used in association with Centrex service, standard trunk rates will apply as found in the Local Exchange Tariff, P.U.C.O. No. 6, Section B. In addition, the Centrex system and station features rate in Paragraph IV.A.3 following will apply. (T)

III. FEATURES

A. Basic system features

Access - C.O. from PBX
Access - common control switching arrangement
Access - electronic tandem network
Access - enhanced private switched communication service
Access - special service facilities
Attendant service - local console
Attendant service - remote console
Attendant service - centralized, limited to host and remote line equipment
Class of service - fully restricted service
Class of service - semirestricted service
Class of service - toll restricted service
Class of service - unrestricted service
Code call access
Code restriction
Data call protection
Dial pulse conversion
Dial tone upon trunk seizure
Dictation access and control
Direct inward dialing
Direct outward dialing
End-to-end signaling
Feature - activation operational measurements
Flexible intercept
Foreign exchange (FX) line - analog
Foreign exchange (FX) line - digital two-way

III. FEATURES (continued)

A. Basic system features (continued)

- Hunting
- Immediate answer reporting for ABC
- Increase in number of customer groups
- Individual line business service - PBX application
- Loudspeaker and radio paging access
- Loudspeaker paging and line termination rewrite
- Multicustomer operation
- Night service - fixed
- Night service - flexible
- Night service - trunk answer from any station
- Off premises stations and extensions
- Operational measurements - ABC enhanced
- Outpulsing to telephone system trunks
- Quality control - 100 lines
- Service order system
- Simplified dialing
- Six-port conference circuit use control
- Special intercept through service order
- Station-to-station calling
- Storing of 24 dialed digits
- Tandem switching of special service circuits
- Uniform numbering plan capability

B. Basic standard station features

- Automatic line
- Call forward
- Call forward, all calls
- Call forward, busy
- Call forward, no answer
- Call pickup
- Call pickup data fill enhancements
- Call waiting
- Camp-on with music
- Consultation hold
- Customer group transparency
- Flash translator

III. FEATURES (continued)

B. Basic standard station features (continued)

Meet-me conference
Ring again and ring again on hunt groups
Speed calling - one short and one long list per station maximum
Speed calling group - long list
Speed calling individual - long list
Speed calling individual - short list
Station call park
Station controlled conference
Three-way conference/transfer

C. Basic attendant features

Attendant access to paging
Attendant autodial
Attendant call park recall timer
Attendant call selection
Attendant camp-on
Attendant conference - maximum of six conferences
Attendant console display
Attendant control of trunk group access
Attendant locked loop operation
Attendant release upon completion of dialing
Attendant speed calling
Attendant to recorded announcement
Attendant transfer
Automatic recall
Busy verification
Call hold
Call park
Code calling line termination
Console test
Delayed operation
Interposition calls and transfers
Lockout
Maintenance and administration position display for attendant operational measurements
Multiple console operation

GENERAL EXCHANGE TARIFF**

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE

I. BASIC 9-1-1 SERVICE

A. Description

When requested by local government authorities, and subject to the availability of facilities, the Telephone Company will provide a universal number "9-1-1" for the use of public safety answering points (PSAPs) engaged in assisting local governments in the protection and safety of the general public. Use of the 9-1-1 number will provide each caller with telephone access to the appropriate local PSAP.

B. General regulations

1. Basic 9-1-1 central office lines are classified as *individual* business, key, or PBX *trunks, as* appropriate, arranged for one-way incoming service to the appropriate PSAP from specified numbering plan areas and central office codes. (T)
2. Application for basic 9-1-1 service must be executed in writing by each participating local governmental authority or its duly appointed agent. If application is made through an agent of the local governmental authority, the Telephone Company must be provided with evidence, satisfactory to the Telephone Company, of the appointment and authority of the agent prior to acceptance of the application and establishment of service. As a minimum, both the police and fire departments in each local governmental authority must participate in any basic 9-1-1 offering. (T)
3. Each participating local governmental authority must furnish to the Telephone Company its written agreement, duly executed, by which it shall agree to:
 - (A) Provide and staff the PSAP on a 24-hour continuous basis.
 - (B) Accept responsibility for serving the entire geographic area served by the central office through which 9-1-1 calls are routed to the PSAP, even though such geographic area does not coincide with the community boundaries of the participating local governmental authority.

Issued: September 21, 2001

Effective: September 25, 2001

By Alan J. Sykes, Vice President - Regulatory
Overland Park, Kansas

In accordance with Order No. 00-2461-TP-ATA
Issued by Public Utilities Commission of Ohio

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE

I. BASIC 9-1-1 SERVICE (continued)

B. General Regulations (continued)

- (C) Subscribe to a minimum of two central office lines in each central office handling incoming 9-1-1 calls and to further subscribe to such additional central office lines as are necessary to sufficiently handle the projected volume of incoming 9-1-1 calls, as determined by the Telephone Company.
 - (D) Accept responsibility for dispatching, or referring, forwarding or transferring 9-1-1 calls to other participating local governmental authorities for the dispatch of police, fire, ambulance or other emergency services to the extent such services are reasonably available.
 - (E) Subscribe to additional local exchange service at the PSAP location for administrative purposes, for placing outgoing calls and for receiving other emergency calls, including calls which might be relayed by Telephone Company operators.
4. Basic 9-1-1 service is furnished subject to the following conditions:
- (A) This offering is limited to the use of central office number 9-1-1 as the universal emergency number; and once basic 9-1-1 service has been established in any given area, whether consisting of one or a combination of more than one participating local governmental authority, no other 9-1-1 service will be provided within such area.
 - (B) The 9-1-1 emergency number is not intended to replace the telephone service, described in 3 (E) preceding, of the various public safety agencies which may participate in the use of this number.
 - (C) The Telephone Company's liability to any person, whether arising out of mistakes, omissions, interruptions, delays, errors, or defects in transmission or from any other cause occurring in the course of furnishing basic 9-1-1 service under this tariff, shall be limited to the terms set forth in Section 1 of this tariff.

Issued: December 17, 1990

Effective: December 20, 1990

UNITED TELEPHONE COMPANY OF OHIO

Issued by the Public Utilities Commission of Ohio
November 29, 1990

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE

I. BASIC 9-1-1 SERVICE (continued)

B. General regulations (continued)

5. Basic 9-1-1 central office lines

(A) At the Telephone Company's option, basic 9-1-1 central office lines will be provided for incoming emergency calls via one or a combination of arrangements below. Such arrangements will be subject to change at the Telephone Company's option.

(1) Dedicated arrangements:

- where basic 9-1-1 central office lines are furnished on a dedicated basis from the central office serving the PSAP.
- where basic 9-1-1 central office lines are routed on a dedicated basis from the originating central office through the central office serving the PSAP to the PSAP.

(2) Nondedicated arrangements:

- where basic 9-1-1 calls are routed via normal exchange facilities to the central office serving the PSAP or to the PSAP.

(B) A dedicated arrangement is required when the originating central office is in an exchange which is not in the local calling area of the exchange in which the PSAP is located.

6. Basic 9-1-1 service features

Basic 9-1-1 lines provide the following service feature only when the required equipment is available.

Forced disconnect - enables the PSAP attendant to release a connection on a 9-1-1 call, even if the calling party has not hung up.

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE

I. BASIC 9-1-1 SERVICE (continued)

C. Rates and Charges

1. Monthly rates for individual business lines, key or PBX trunks, as appropriate, will apply for basic 9-1-1 central office lines terminated at the PSAP plus the appropriate equipment charge following. The monthly rate for a basic 9-1-1 central office line is the rate applicable for the exchange in which the central office originating the basic 9-1-1 line is located.

(A) The monthly rate for a trunk without ringback capability *is*: (T)

<i><u>Current</u></i>	<i><u>Maximum</u></i>	
<i><u>Monthly Rate</u></i>	<i><u>Monthly Rate</u></i>	(N)
\$6.30	\$6.30	(N)

(B) The monthly rate for a trunk with ringback capability *is*: (T)

<i><u>Current</u></i>	<i><u>Maximum</u></i>	
<i><u>Monthly Rate</u></i>	<i><u>Monthly Rate</u></i>	(N)
\$14.95	\$14.95	(N)

2. Foreign central office charges do not apply to basic 9-1-1 lines; however, where appropriate, the provisions for foreign exchange service as set forth in Section 4 of the Private Line Service Tariff, P.U.C.O. No. 1 are applicable.

II. ENHANCED 9-1-1 SERVICE (E-9-1-1)

A. Description

1. Enhanced 9-1-1 service (E-9-1-1) is a telephone exchange communications service whereby a public safety answering point (PSAP) designated by the participating local governmental authority may receive and answer calls that have been placed by dialing the number 9-1-1.
2. E-9-1-1 service includes the services provided by the lines and equipment associated with the service arrangement for the answering, transferring and dispatching of public emergency telephone calls dialed to 9-1-1.
3. E-9-1-1 service consists of: (A) automatic number identification (ANI); (B) selective call routing; and (C) automatic location identification (ALI).

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE

II. ENHANCED 9-1-1 SERVICE (E-9-1-1) (continued)

A. Description (continued)

- (A) ANI provides for the telephone number of the calling party to be forwarded to the PSAP. ANI is only available for calls placed from *individual* lines. (T)
- (B) Selective call routing is available when an E-9-1-1 system is served by more than one PSAP. This service routes the call to the correct PSAP based on the caller's telephone number. Selective call routing is available only for calls placed from *individual* lines. (T)
- (C) ALI provides the name and address associated with the calling party's telephone number to the PSAP for display. Additional telephones with the same number as the calling party's (secondary locations, off-premises, etc.) will be identified with the address of the telephone number at the main location. (T)

B. General Regulations

- 1. The service is limited to the use of central office telephone number 9-1-1 as the emergency telephone number. Only one E-9-1-1 service will be provided within any government agency's locality.
- 2. The service is furnished to the customer only for the purpose of receiving reports of emergencies by the public.
- 3. E-9-1-1 service is a telephone exchange communications service and is arranged for one-way incoming service to an appropriate PSAP.
- 4. E-9-1-1 service is provided solely for the benefit of the local governmental unit. The provision of such service shall not be interpreted, continued, or regarded as being for the benefit of, or creating any Telephone Company obligation toward, or any right of action on behalf of, any third person or other legal entity.

Issued: September 21, 2001

Effective: September 25, 2001

P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE

II. ENHANCED 9-1-1 SERVICE (E-9-1-1) (continued)

B. General regulations (continued)

5. The Telephone Company does not undertake to answer and forward E-9-1-1 service calls but furnishes the use of its facilities to enable the participating local governmental authority personnel to accept such calls on the participating local governmental authority designated premises.
6. E-9-1-1 service information consisting of the names, addresses, and telephone numbers of customers who subscribe to nonpublished telephone service is confidential and the PSAP agency agrees to use such information only for the purpose of responding to emergency E-9-1-1 service calls.
7. Any party residing within the E-9-1-1 service area forfeits the privacy afforded by nonpublished telephone service to the extent that the customer's name, address, and telephone number associated with the originating station are furnished to the PSAP.
8. The Telephone Company's entire liability to any person for interruption or failure of E-9-1-1 service shall be limited by the terms set forth in this section and other sections of this tariff.
9. The participating local governmental authority will have the responsibility to determine whether the system is functioning properly for its use and shall promptly notify the Telephone Company in the event the system is not functioning properly.
10. The Telephone Company shall not be liable for any loss or damages arising out of errors, interruptions, defects, failures or malfunctions of E-9-1-1 service, including any and all equipment and data processing system associated therewith. Damages arising out of such interruptions, defects, failures or malfunctions of the system after the Telephone Company has been notified, and has had a reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the participating local governmental authority until service is restored.

P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE

II. ENHANCED 9-1-1 SERVICE (E-9-1-1) (continued)

B. General regulations (continued)

11. E-9-1-1 service will be designed by the Telephone Company to provide at least the same level of service reliability and quality as local exchange telephone service in the exchanges where E-9-1-1 service is offered.
12. Because the Telephone Company serving boundaries and political subdivision boundaries may not coincide, the participating local governmental authority must make arrangements to handle all calls received on its E-9-1-1 service lines that originate from all telephones served by central offices within the E-9-1-1 service area whether or not the calling telephone is situated on property within the geographical boundaries of the participating local governmental authority's public safety jurisdiction.
13. Application for E-9-1-1 service must be executed in writing by each customer and must be accomplished by satisfactory proof or authorization to provide E-9-1-1 service in the exchanges where service is requested. If application for service is made by an agent, the Telephone Company must be provided in writing with satisfactory proof of appointment of the agent by the participating local governmental authority.
14. In addition to all other terms and conditions, the following customer requirements will apply:
 - (A) The participating local governmental authority will answer all E-9-1-1 service calls on a 24-hour, seven-day week basis.
 - (B) The participating local governmental authority has the responsibility for dispatching the appropriate emergency service within the E-9-1-1 service area, or will undertake to transfer all E-9-1-1 service calls received to the governmental agency with responsibility for dispatching such services, to the extent that such services are reasonably available.
 - (C) The participating local governmental authority will develop an appropriate method for responding to calls for nonparticipating agencies which may be directed to an E-9-1-1 service PSAP by calling parties.

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE

II. ENHANCED 9-1-1 SERVICE (E-9-1-1) (continued)

B. General regulations (continued)

15. The participating local governmental authority will agree to release, indemnify and hold harmless the Telephone Company for any infringement or invasion of the right of privacy of any person or person, caused or claimed to have been caused, directly or indirectly, by the installation, operation, failure to operate, maintenance, removal, presence, condition, occasion or use therewith, or by any services furnished by the Telephone Company in connection therewith, including but not limited to, the identification of the telephone number, address or name associated with the telephone used by the party or parties accessing E-9-1-1 service.
16. The Telephone Company and its officers, directors, employees, and agents are not liable in damages in a civil action for injuries, death or loss to persons or property incurred by any person resulting from the Telephone Company's, its officers', directors', employees', or agents' participation in a 9-1-1 system, whether such system is established pursuant to Sections 4931.40 to 4931.50 of the Ohio Revised Code or otherwise in accordance with the Telephone Company's schedules regarding 9-1-1 systems filed with the Public Utilities Commission pursuant to Section 4905.30 of the Ohio Revised Code.
17. The rates and charges contained in this tariff section contemplate the use of standard configurations and quantities of facilities. When excess facilities are ordered by the participating local governmental authority, the rates and charges for those facilities will be billed to the participating local governmental authority, when deemed appropriate by the Public Utilities Commission.

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (911)

III. Wireless E911 Phase 2

A. Description of Service

Wireless E911 Phase 2 is only available in combination with E911 as specified in this section of the tariff and is subject to the regulations specified herein.

In accordance with the FCC's Report and Order 94-102, Wireless E911 Phase 2 provides PSAPs with the wireless E911 caller's location and callback number (CBN) information, as specified by the FCC. The FCC has adopted specific handset-based and network-based location accuracy and reliability solutions standards for the Wireless Service Providers (WSPs).

B. General Regulations

1. The Telephone Company is not responsible for the location determination technology, the accuracy of the location determination technology, or the investigation or maintenance of said technologies. Only the data required and specified by the FCC in its Report and Order 94-102 will be delivered by the Telephone Company to the PSAP. This required data includes the cell site or sector location, the callback number, and the latitude/longitude of the caller. Each customer agrees that delivery, or lack of delivery, of additional data elements which may be provided by the WSP will not be the responsibility of the Telephone Company and the Telephone Company assumes no responsibility or liability for such information.
2. PSAPs must have all required elements of Wireless E911 Phase 1, utilizing p-ANI routing and cell site/sector location based information, in place before implementing Phase 2. This is necessary to accommodate loading of the respective p-ANIs also known as Emergency Service Routing Key/Emergency Service Routing Digit into the Telephone Company's Database Management System. In addition, the following requirements must be met for Phase 2 implementation:
 - a. PSAPs must order both the Telephone Company's Extended ALI Display Format and the ALI Database Upgrade for Wireless Phase 2 to accommodate the x/y data provided by Wireless E911 Phase 2 Service. See rates in III.F. following.
 - b. WSPs must have Position Determining Entity (PDE) and a Mobile Position Center (MPC)/Gateway Mobile Location Center (GMLC) in their network.
 - c. WSPs or their designated database provider must have obtained an interface to the Telephone Company's ALI database that complies with the Telephone Company's existing operating standard. This interface will be used by the WSP to provide the Phase 2 data.

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF**

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (911)

III. Wireless E911 Phase 2 (Cont'd)

C. Definition of Terms

1. Callback Number (CBN)

The wireless caller's 10-digit handset telephone number. The CBN is used by the PSAP to reestablish a call in the event the call was prematurely disconnected.

2. Interface

A reference point for a data path that exists between an MPC/GMLC and an ESME (the ALI database). The data that traverses the interface is made up of an Emergency Services Position Request and the response. The interface is not provided by and is not the responsibility of the Telephone Company.

3. Emergency Services Message Entity (ESME)

An entity in the emergency services network which serves as the point of interface to an MSC for common channel emergency services messaging. ESME is another term for the ALI database.

4. Enhanced MF Signaling (EMFS)

A signaling protocol for sending 10 or 20 digits of ANI from the 911 Tandem to the PSAP. EMF signaling is required when an interconnecting WSP selects Phase 2 NCAS mode without WLS911.

5. Mobile Position Center (MPC)

The interface between the wireless network and the Telephone Company's ALI database. The MPC serves as the wireless network entity which retrieves, forwards, stores, and controls position data within the wireless location network. The MPC is not provided by and is not the responsibility of the Telephone Company. Global System for Mobile (GSM) communication Gateway Mobile Location Centers (GMLCs) will be treated as MPCs by the Telephone Company.

6. Mobile Switching Center (MSC)

The wireless equivalent of a Central Office, which provides switching functions for wireless calls. The MSC is not provided by and is not the responsibility of the Telephone Company.

Issued by Public Utilities Commission of Ohio

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF**

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (911)

III. Wireless E911 Phase 2 (Cont'd)

C. Definition of Terms (Cont'd)

7. Phase 2 NCAS

In this mode the p-ANI and the CBN both are sent to the Selective Router. The trunk between the Selective Router and the PSAP must support transport of at least two 10-digit numbers.

8. Position Determining Entity (PDE)

The PDE determines the geographic location of a wireless handset when the wireless caller places a 911 call or while the call is in process. The PDE is not provided by and is not the responsibility of the Telephone Company.

9. Pseudo-ANI (P-ANI)

A pseudo, non-dialable telephone number assigned to a cell site or a sector of a cell site to provide location identification for wireless E911 calls.

10. WLS911

The Company solution that sends either eight or ten digits of ANI to the PSAP and dynamically updates the static cell site or sector information with the CBN as provided by the WSP. This solution when used in conjunction with a WSP's interface allows WSPs to comply with the FCC's order without requiring PSAPs to upgrade their PSAP equipment to utilize Enhanced MF signaling.

11. Wireless Service Provider (WSP)

A person or entity that provides Commercial Mobile Radio Service (CMRS). The term wireless includes service provided by any wireless real-time, two-way voice communication device, including radio-telephone communications used in cellular telephone service, personal communication service (PCS), or functional or competitive equivalent. The term *does not include* service providers whose customers do not have access to 911 or 911-like services.

12. Wireline Compatibility Mode

Occurs when the WSP sends only p-ANI to the Telephone Company E911 tandem and the PSAP receives eight or ten digits of ANI.

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF**

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (911)

III. Wireless E911 Phase 2 (Cont'd)

C. Definition of Terms (Cont'd)

13. X,Y Coordinates

The latitude and longitude of the 911 wireless caller's location.

D. Enhanced MF

Enhanced MF (EMF) is a new signaling protocol from the 911 Tandem to the PSAP. Enhanced MF accommodates either ten or 20 digits of ANI. Enhanced MF is not a requirement of Wireless Phase 2 implementation but EMF must be used by PSAPs when an interconnecting Wireless Service Provider chooses the Phase 2 NCAS Mode (as defined in J-STD-036 Annex D, Table D.1.2. and/or D.2.), without WLS911. If an interconnecting WSP chooses a Phase 2 NCAS solution without WLS911, the PSAP's equipment must be 20-digit Enhanced MF capable. The PSAP must request the Telephone Company convert them to EMF signaling when preparing to accept Phase 2 calls from a WSP utilizing Phase 2 NCAS without WLS911. Once a PSAP has been converted to 20 digit EMF Signaling the functionality of WLS911 is disabled for all WSPs serving that PSAP.

E. Wireless E911 Phase 2 Service

This service is comprised of two components, Extended ALI Display Format and ALI Database Upgrade for Wireless Phase 2. Both components are required for implementation of this service.

1. Extended ALI Display Format

The PSAP's Automatic Location Identification (ALI) display format must be changed to the Telephone Company's Extended ALI Display Format to accommodate the latitude and longitude, or x,y coordinates. The provision and delivery of the x,y information to the PSAP requires an interface between the ALI database and the WSP's Mobile Position Center (MPC)/Gateway Mobile Location Center (GMLC). The provisioning of the interface is the responsibility of the WSP.

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (911)

III. Wireless E911 Phase 2 (Cont'd)

E. Wireless E911 Phase 2 Service (Cont'd)

2. ALI Database Upgrade for Wireless Phase 2

The ALI Database Upgrade for Wireless Phase 2 enables the PSAP to query and retrieve wireless caller location information from the Telephone Company's Automatic Location Identification (ALI) database. Location information may include cell site sector location, longitude and latitude of the wireless caller's location, and the wireless caller's callback number (CBN). This upgrade will enable the necessary interfaces, software, and databases to permit the wireless caller's location information to be populated in the Telephone Company's ALI database and/or retrieved when queried by the customer's PSAP equipment.

F. Rates and Charges

	<u>Nonrecurring Charge</u>	<u>Monthly Rate</u>	<u>SAE Code</u>
1. Enhanced MF signaling, per PSAP	\$0.00	\$0.00	-
2. Extended ALI Display Format, per PSAP	\$3,500.00	\$0.00	-
3. ALI Database Upgrade for Wireless Phase 2, per PSAP	\$0.00	\$250.00	AEMDATA (WLS)

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (911)

IV. Private Switch Database Service

A. Description of Service

1. Private Switch Database Service is available to companies that use a Private Branch Exchange (PBX) or Centrex to manage their individual telephones and want to provide specific location information for each of these telephones to the Public Safety Answering Point (PSAP) responsible for responding to an emergency.
2. Private Switch Database Service allows a customer with a multi-line private switch to facilitate reception of either (1) Automatic Number Identification (ANI) or (2) a combination of ANI and Automatic Location Identification (ALI) information by a (PSAP) for emergency "9-1-1" calls originating from the location served by the customer's multi-line private switch. A private switch is customer premises equipment (CPE) at the end user customer's location.

B. General Regulations

1. The customer is responsible for validating address information through Master Street Address Guide (MSAG) and for coordinating with the Telephone Company to provide the National Emergency Number Association (NENA) standard format of telephone numbers and address data. The Telephone Company will allow the customer to update records no more frequently than on a daily basis. The data may originate from the customer's private switch, when technically feasible, or from a manually created list.
2. The Telephone Company will:
 - a. Be responsible for uploading a NENA formatted data file to its ALI database;
 - b. Hold the information in confidence and protect it in accordance with state and federal rules applicable to emergency 911 services; and
 - c. Use the information only in connection with providing emergency services to PSAPs.
3. The Telephone Company may immediately terminate a customer's use of Private Switch Database Service if, in the Telephone Company's sole judgment, the customer falsifies the information provided or fails to comply with any other provisions of this tariff.
4. The Telephone Company will only provide Private Switch Database Service where the Telephone Company is the primary 911 database provider for the PSAP serving the customer's location.

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF**

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (911)

IV. Private Switch Database Service (Cont'd)

B. General Regulations (Cont'd)

5. The Telephone Company will provide a software package that will allow the customer to load the database information in the appropriate NENA format for transmission to the Telephone Company's data center.
6. The Telephone Company will charge the private switch customer a monthly recurring charge for maintenance of the data in the national ALI database for delivery upon a 911 call to the PSAP.

C. Limitations

1. The Telephone Company offers no warranty or representation with respect to the accuracy or completeness of the Private Switch Database Service. The Telephone Company relies on its customers for all private switch information placed in the Telephone Company's database management system.
2. The Telephone Company does not warrant or represent that its database management system will be compatible with every type of private switch equipment. Customers who wish to provide automated updates to the Telephone Company's database management system are responsible for acquiring their own private switch equipment and for testing the compatibility of that equipment with the Telephone Company's database management system.

D. Obligations of the Customer

1. When implementing Private Switch Database Service, the customer must contact the Telephone Company's E-911 representative to negotiate trunking, hardware and software requirements associated with the Private Switch Database Service.
2. The customer will be responsible for loading address information into the Private Switch Database Service software package and transmitting that information to the Telephone Company.

UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (911)

IV. Private Switch Database Service (Cont'd)

E. Rates and Charges

1. Private Switch Database Service rates:

a. Installation	<u>Nonrecurring Charge</u>	<u>Maximum Nonrecurring Charge</u>
(1) Initial Installation	\$900.00	\$1,800.00
(2) Subsequent addition of Station Records	0.00	
b. Monthly Rate ¹	<u>Monthly Recurring Charge (MRC)</u>	<u>Maximum Monthly Recurring Charge (MRC)</u>
(1) Up to 1000, per 1000 Station Records	\$100.00	\$200.00
(2) 1001 - 4000, per 1000 Station Records	70.00	140.00
(3) Over 4000, per 1000 Station Records	60.00	120.00

2. Separate charges, not specified in this section of the tariff, are applicable for network connectivity from the customer's private switch to the Telephone Company's central office facilities.
3. Each Private Switch Database Service customer's Installation Charge and Monthly Rate is calculated at the time Private Switch Database Service is established and is based on the number of station records in service for the customer. The total number of station records are audited annually by the Telephone Company and applied to the account.

¹ The Monthly Rate is calculated based on the total number of station records submitted by the customer at installation or at the time of the annual audit. For example, 900 station records = \$100 MRC; 3900 station records = \$70 X 4 = \$280 MRC; 4500 station records = \$60 X 5 = \$300 MRC.

CALL BLOCKING AND SCREENING SERVICES

I. 500 and 900 CALL BLOCKING (C)

500 and 900 Call Blocking is a service which allows Information Providers (Sponsors), Interexchange Carriers (IXCs) who provide billing and collection service for sponsors and residence and business subscribers to request the Telephone Company to block the origination of all 500 and 900 direct dialed "Pay-Per-Call" type services provided by sponsors. A 500 and 900 blocked call will be diverted to a company-provided intercept announcement. (C)

A. 500 and 900 Call Blocking is available only where facilities and conditions permit and where necessary modification to provide the service can feasibly be made at the Telephone Company's central office. (C)

B. 500 and 900 Call Blocking is permitted from all residence and business individual and trunk lines, subject to limitations in "A" above. (C)

C. 500 and 900 Call Blocking is available only for customer-dialed, station-to-station calls. (C)

D. 500 and 900 Call Blocking is available only to block all "Pay-Per-Call" type services and cannot be implemented to block specific programs. 500 and 900 Call Blocking blocks all calls to "Pay-Per-Call" type services from that line. (C)

E. Customer requested 500 and 900 Call Blocking will be removed from a residential or business individual and trunk line only after receipt of written letter from person responsible for the service. (C)

F. The sponsor or IXC must certify to the Telephone Company that notification was given to the customer of possible blocking of "Pay-Per-Call" type services for non-payment before the Telephone Company will provide Sponsor or IXC requested 500 and 900 Call Blocking. (C)

G. Upon proof by the customer of payment or other satisfactory resolution of his or her residence or business account, or upon notice by the sponsor or IXC, sponsor-requested blocking will be removed by the Telephone Company. (C)

II. CHARGES

A. Sponsor/IXC's-Requested 900 Call Blocking

The following rates and charges are applicable to Sponsor/IXCs-requested 500 and 900 Call Blocking: (C)

		Nonrecurring Charge	
1. Residence Service			
500 and 900 Call Blocking, per line	\$64.00		(C)
2. Business Service			
500 and 900 Call Blocking, per individual or trunk line		\$64.00	(C)
3. A.B.C. Service			
500 and 900 Call Blocking, per A.B.C. line		\$64.00	(C)

CALL BLOCKING AND SCREENING SERVICES

III. BILLED NUMBER SCREENING SERVICE

(N)

Billed Number Screening Service is available to subscribers of the Company's local exchange services. This service is intended to prevent the charging of collect and/or third number billed calls to a customer's telephone number.

A. The Telephone Company will place information required to utilize Billed Number Screening Service in the Line Information Database (LIDB) or other database necessary to implement Billed Number Screening Service. In the event a call is placed and charged to a number which should have been prevented by Billed Number Screening, the Company makes no guarantee and assumes no liability arising out of the use or misuse of Billed Number Screening Service by any other entities, including, but not limited to, interexchange carriers. The Company is fully responsible for calls charged to numbers, which should have been prevented by Billed Number Screening Service, that originate and terminate within the Company's service territory, and are carried over no other carrier's network or facilities.

B. Billed Number Screening Service is offered subject to the availability of suitable facilities.

C. The minimum contract period for Billed Number Screening Service is one month.

CALL BLOCKING AND SCREENING SERVICES

**V. SELECTIVE CALL SCREENING SERVICE
(ORIGINATING LINE SCREENING)**

Selective Call Screening service or Originating Line Screening (OLS) is a two-digit code passed by the Telephone Company's local central office switch with the Automatic Number Identification (ANI) at the beginning of a call that provides information about the line originating the call. The information provided in the two-digit code is designed to inform the exchange or interexchange and/or the operator service provider about certain service classes or special characteristics of the billing number associated with the line originating the call. Under this arrangement, operators accept only those originating toll calls that are made collect, billed to a third number, or billed to a calling card.

- A. Selective Call Screening is offered subject to the availability of suitable facilities and equipment.
- B. The minimum contract period for Selective Call Screening is one month.
- C. Customers subscribing to Selective Call Screening are responsible for all toll charges billed to their lines, which are not carried solely over the Telephone Company's facilities.
- D. This service is offered to *individual* residence and business lines, *trunks and* payphone lines. (T)
- E. If a call originates with the Company but is not carried solely over the Company's facilities, the Company will send, with the ANI, the two-digit code that identifies the call as being selectively screened. The Company assumes no liability for calls completed by any other entity or carrier, as long as the two-digit code accompanies the ANI forwarded to the other carrier. The Company is responsible for properly handling calls which are selectively screened and are not carried over any other carrier's network or facilities.

CALL BLOCKING AND SCREENING SERVICES

VII. TOLL RESTRICTION

Toll restriction is a central office service arrangement whereby calls dialed over residence and business lines or *trunks to* other than the local toll free service area, receive a recorded restriction announcement or are automatically routed to the PBX customer's attendant position.

(T)

A. Toll restriction is available only where facilities and conditions permit and where necessary modification to provide the service can feasibly be made at the Telephone Company's central office.

B. Toll restriction is only available for *individual* residence and business services subject to limitations in "A" above.

(T)

C. Toll restriction will not allow 1+, 0+, 0-, 101XXXX, 500 service code, 900 service code, 700 code toll calls, 1 + 411 Local Information or 555 Toll Information calls and any 1+ Local Calling Plan Calls.

D. Subscribing to toll restriction does not relieve customers of responsibility for calls charged to their telephone number(s).

E. Toll restriction does not provide restriction of nonchargeable calls to numbers such as repair service, 911 or 1+800.

F. Toll restriction will not be provided payphone line service.

G. The Company shall not be liable to the customer or any other person or entity for damages of any nature or kind arising out of, resulting from, or in connection with the provision of the service, including without limitation, the inability to access the operator, Directory Assistance or any non toll free number and any 1+ Local Calling Plan Numbers for any purpose.

CALL BLOCKING AND SCREENING SERVICES

IX. TOLL AND CASUAL DIALING RESTRICTION

A. CONDITIONS

1. Where central office facilities permit, Toll and Casual Dialing Restriction prevents the completion of certain types of calls. Toll and Casual Dialing Restriction may be provided with individual line residence and business exchange services in exchanges equipped to program Toll and Casual Dialing Restriction without alteration of the central office equipment.
2. Toll and Casual Dialing Restriction Options 1 and 2 restrict access to 1+, 0+ 0-, and 00-, and restrict access to 01/011+ numbers outside of the North American Numbering Plan. Access to 900, 976, 500 and 700 numbers is also restricted in addition to Directory Assistance and the casual dialing of toll calls (by preceding the telephone number with 101XXXX+). Option 1 additionally restricts access to Toll Free Code numbers. Option 3 only restricts access to 01/011+ numbers outside of the North American Numbering Plan.
3. Restriction of access to operator services prevents the customer from dialing an operator for all purposes, including emergencies, assistance and the placing of toll calls. Operator Services will not be accessible from a line with Toll and Casual Dialing Restriction Option 1 or 2. The customer indemnifies and saves harmless the Company from any and all claims, losses, or damages caused by restriction of access to operator services.
4. Directory Assistance (411, 1411, 555-1212, 1-555-1212, or 1-NPA-555-1212) will not be accessible from a line with Toll and Casual Dialing Restriction Option 1 or 2.
5. All local calls and non-chargeable calls to Company numbers (such as repair service) will be permitted.
6. Where facilities allow, N11 (except 411) will only be restricted with Option 1 and 2 if the call terminates outside the local calling area or to a non-toll-free number.
7. Toll and Casual Dialing Restriction does not restrict calls to 911 emergency reporting service or to 1+710 Government Emergency Telecommunications Service Calls.
8. Customers are responsible for calls charged to their number via third number billing, collect or credit card.

IX. TOLL AND CASUAL DIALING RESTRICTION (Cont'd)

A. CONDITIONS (Cont'd)

Listed following are the Toll and Casual Dialing Restriction options as determined by the Company. These options may be changed or new options added as determined appropriate by the Company. A customer may select one of the following Toll and Casual Dialing Restriction options:

Option 1: 1+ DDD
0-, 0+, 00-
01/011+DDD to numbers outside the
North American Numbering Plan
Directory Assistance (411, 1411, 555-1212,
1-555-1212, 1-NPA-555-1212)
101XXXX access to toll numbers
Toll Free Code numbers (1 + 800, 1 + 888, etc.)
N11, 500, 700, 900, 976
(Allows 1+710 and 911 calls)

Option 2: 1+ DDD
0-, 0+, 00-
01/011+DDD to numbers outside the
North American Numbering Plan
Directory Assistance (411, 1411, 555-1212,
1-555-1212, 1-NPA-555-1212)
101XXXX access to toll numbers
N11, 500, 700, 900, 976
(Allows toll free, 1+710 and 911 calls)

Option 3: 01/011 +DDD to numbers outside
the North American Numbering Plan

SIMPLIFIED MESSAGE DESK INTERFACE (SMDI)

(N)

I. GENERAL

- A. Simplified Message Desk Interface (SMDI) is a feature that provides an integrated, automated interface to a customer-provided voice message system. SMDI furnishes call-related information about the origin and destination of a message that has been forwarded to an Enhanced Service Provider's (ESP) Uniform Call Distribution (UCD) or multi-line hunt group. This data includes the called station number, the calling station number and the type of Call Forwarding feature used by the called station number (Call Forwarding, Busy or No Answer). This call related information is passed to the Enhanced Service Provider's message system via a data link from the central office to the Provider's premises.

"Enhanced Service Provider" (ESP) in this context refers to any entity that furnishes answering and/or voice messaging service to end-users.

- B. SMDI provides the ESP's end-users with the capability of receiving a message waiting indication. Message waiting indication can be provided by Audible Message Waiting Indicator (stuttered dial tone) and by a Visual Message Waiting Indicator. A Visual Message Indicator allows end-users with CPE display sets or adjuncts to see when messages have been left for them. Upon receipt of a message waiting indication, the end-user may either retrieve the message or ignore the signal and place a call in the usual manner. A message waiting indication will continue until the message has been retrieved and a signal has been received from the voice messaging equipment.
- C. SMDI with Audible Message Waiting Indicator (stuttered dial tone) is available to Enhanced Service Providers at the rates specified in Section III.A.(1) following.
- D. SMDI with Audible Message Waiting Indicator and Visual Message Waiting Indicator is available to Enhanced Service Providers at the rates as specified in Section III.A.(2) following.
- E. Where facilities are available, Visual Message Waiting Indicator (message lamp) is an optional end-user feature when the end-user's Enhanced Service Provider subscribes to SMDI with Audible Message Waiting Indicator only. The rates are specified in Section III.B.(1) following.

SIMPLIFIED MESSAGE DESK INTERFACE (SMDI)

(N)

II. REGULATIONS

- A. A full duplex RS232 format data channel is required to provide signaling between the central office and the ESP's messaging equipment. A data channel is required to each central office providing SMDI capability. Customer provided terminal equipment including, but not limited to, a modem to interface with the Company's central office is required.
- B. All CPE must be compatible with the Company's central office and voice data lines.
- C. SMDI service requires the ESP to have an UCD Group or Multi-line hunt group arrangement in the same central office where the data channel originates, and Centrex lines or comparable voice grade lines for voice transmission. The UCD Group and Centrex lines will be provided according to provisions in Section 40 of this tariff and the voice grade (hunt) lines will be provided according to provisions in Section B of the Local Exchange Tariff P.U.C.O. No. 6.
- D. In addition to the rates and charges associated with SMDI service, each line must be equipped with at least one (1) of the following Call Forwarding features:
- (1) Basic Call Forwarding
 - (2) Call Forward - Busy
 - (3) Call Forward - No Answer
 - (4) Enhanced Call Forwarding
- Rates, charges and regulations for these services are listed in Section 24 of this tariff.
- E. SMDI is furnished only from central offices that have been arranged to provide this feature. The feature is provided subject to availability of facilities.
- F. The telephone numbers transmitted via SMDI are intended solely for the use of the Enhanced Service Provider. Resale of the telephone numbers to any party is prohibited.

III. RATES AND CHARGES

- A. Rates and Charges applicable to the Enhanced Service Provider (ESP) are as follows:

	Installation Charge	Monthly Rate	S&E Code
(1) SMDI with Audible Message Waiting Indicator, common equipment, per data channel, per central office equipped:	\$1,400.00	\$275.00	FCEVFMI
(2) SMDI with Audible Message Waiting Indicator and Visual Message Waiting Indicator, common equipment, per data channel, per central office equipped:	\$1,500.00	\$350.00	FCEVFMI (BUN)

- B. Rates and Charges applicable to end-users are as follows:

(1) Message Waiting Indicator (MWI) Options*			
(a)	ESP to supply end-user		
lines with capability for a message waiting lamp to alert end-users when a message is waiting (per line):		.60	FCEVFML (SET) (N)
(b) If power source required for lamp (per line):		2.75	FCEVFML (PWR) (M)

*Note - When the ESP subscribes to SMDI with Audible Message Waiting Indicator only, end-users may subscribe to Visual Message Waiting Indicator as a separate feature and will be charged for that feature at the rate specified. The Visual Message Waiting Indicator is not guaranteed to work on all network serving facilities. (N)

- C. Non recurring service connection charges as found in Section 4 of this tariff apply for service establishment, moves and changes.

BASIC TELEPHONE ASSISTANCE

I. SERVICE CONNECTION ASSISTANCE

(N)

A. General

Service Connection Assistance is a telephone assistance program which provides certain eligible residential customers requesting local exchange service with the following benefits:

1. Waiver of applicable deposit requirements under Section 3 of this tariff.
2. Full or partial waiver of applicable service connection charges for establishing or re-establishing local exchange service as described in Section 4 of this tariff (Service Connection Assistance does not apply to network wiring charges).

B. Regulations

1. Service Connection Assistance is a basic local exchange residential service offering available to customers who are currently participating in one of the following assistance programs:
 - (A) Home Energy Assistance Program (HEAP);
 - (B) Supplemental Security Income (SSI) under Title XVI of the Social Security Act;
 - (C) Food Stamps;
 - (D) Federal public housing assistance/Section 8; or
 - (F) Medical Assistance under Chapter 5111 of the Ohio Revised Code (Medicaid).

I. SERVICE CONNECTION ASSISTANCE (continued)

(N)

B. Regulations (continued)

2. The Telephone Company shall require, as proof of eligibility for Service Connection Assistance, a document signed by the customer, certifying under penalty of perjury that the customer is receiving benefits from one of the programs identified in Paragraph B.1., above; identifying the specific program or programs from which the customer receives benefits.
3. Customers of Service Connection Assistance cannot be a dependent (as defined by the Federal Income Tax Code) under the age of 60.
4. Service Connection Assistance is available for all grades of residential service.
5. Service Connection Assistance is available for a single telephone line at the customer's principal place of residence.
6. Service Connection Assistance shall be available to eligible customers not more than once in a one-year period at the same address. Customers must pay or make arrangements to pay to the Telephone Company any outstanding bills for regulated telephone services in the customer's name, and no other member of the household may owe money for such services previously provided at the customer's current address.
7. Service Connection Assistance customers are not restricted on the optional services to which they may subscribe.

II. LINK UP

(N)

A. General

Link Up is a federal assistance program that provides eligible residential customers with the following benefits:

1. A reduction of the Telephone Company's applicable service connection charges equal to one-half of such service connection charges, or \$30.00, whichever is less.
2. A deferred payment plan for service connection charges, for which the customer does not pay interest, where such service connection charges do not exceed \$200.00 and the payment plan does not exceed 12 months duration. (Service Connection charges do not include the Company's applicable security deposit requirements.)

B. Regulations

1. Link Up Assistance is available to residential customers who are currently participating in one of the following assistance programs:
 - (A) Medical Assistance under Chapter 5111 of the Ohio Revised Code (Medicaid);
 - (B) Food stamps;
 - (C) Supplemental Security Income (SSI) under Title XVI of the Social Security Act;
 - (D) Federal public housing assistance/Section 8,
 - (E) Home Energy Assistance Program (HEAP),
 - (F) National School Lunch Program's free lunch program (NSL),
 - (G) Temporary Assistance for Needy Families (TANF) a/k/a Ohio Works First; or
 - (H) Household income at or below 150 percent of the poverty level.
2. A customer eligible for Link Up may choose one or both of the Link Up benefits identified in paragraph II.A., above.

II. LINK UP (continued)

(N)

B. Regulations (continued)

3. The Telephone Company shall require, as proof of eligibility for Link Up Assistance, a document signed by the customer, certifying under penalty of perjury that the customer is receiving benefits from one of the programs identified in paragraph II.B.1, above; identifying the specific program or programs from which the customer receives benefits. Self-certification does not apply for income eligibility.
4. The Telephone Company shall require, as proof of eligibility if customer is enrolling under the poverty level, documentation such as 1) a copy of your most recent federal or state income tax return; 2) three consecutive months worth of the most current pay stubs; 3) the most recent Social Security statement of benefits; 4) the most recent Veteran's Administration statement of benefits; 5) the most recent retirement/pension statement of benefits; 6) the most recent Unemployment/Workmen's Compensation statement of benefits; or 7) any other legal document that would show your current income (such as a divorce decree or child support document).
5. The Telephone Company's Link Up program shall allow a qualifying low-income consumer to receive the benefit of the Link Up program for a second or subsequent time only for a principal place of residence with an address different from the residence address at which the Link Up assistance was provided previously.
6. Link Up customers are not restricted on the optional services to which they may subscribe.

BASIC TELEPHONE ASSISTANCE

I. SPRINT OHIO LIFELINE

A. General

Sprint Ohio Lifeline is a basic support program that provides eligible customers requesting local exchange service, including touch-tone, with the following benefits:

1. A waiver of the Federal Subscriber Line Charge.
2. A credit of the Intrastate Access Fee (IAF) as found in United Telephone Company of Ohio's P.U.C.O. No. 1, Access Service Tariff.
3. A waiver of the Federal Universal Service Fund End User Charge.
4. A credit of one hundred percent (100%) of all nonrecurring service order charges for commencing service.
5. A deduction of \$7.00 off the customer's monthly basic local service charges.
6. A waiver of the Telephone Company's service deposit requirement.
7. Free blocking of toll and 900/976 dialing patterns.
8. The availability of optional features is governed by applicable Commission Orders including Case No. 00-1532-TP-COI.

BASIC TELEPHONE ASSISTANCE

III. SPRINT OHIO LIFELINE (Cont'd)

B. Regulations

1. Sprint Ohio Lifeline is available to residential customers who are currently participating in one of the following assistance programs:

(A) Home Energy Assistance Program (HEAP);

(D)

(B) Food stamps;

(T)

(C) Supplemental Security Income – blind and disabled (SSDI);

(T)

(D) Supplemental Security Income – aged (SSI)

(T)

(E) General Assistance (including disability assistance (DA);

(C)

(F) Medical Assistance (medicaid), including any state program that might supplant medicaid;

(T)

(G) Federal public housing/section 8;

(T)

(H) Ohio Works First (formerly AFDC) *aka Temporary Assistance for Needy Families (TANF)*

(C)

(I) *National School Lunch Program's free lunch program (NSL); or*

(N)

(J) Household income at or below 150 percent of the poverty level.

2. Customers qualifying for Sprint Ohio Lifeline with past due bills for regulated local service charges will be offered special payment arrangements with the initial payment not to exceed \$25.00 before service is installed, with the balance for regulated local charges to be paid over six equal monthly payments. Sprint Ohio Lifeline customers with past due bills for toll service charges will be required to have toll restricted-service until such past due toll service charges have been paid or until the customer establishes service with a subsequent toll provider pursuant to the minimum telephone service standards.

3. Until automatic enrollment of customers is possible, The Telephone Company shall require, as proof of eligibility for Sprint Ohio Lifeline, a document signed by the customer, certifying under penalty of perjury that the customer is receiving benefits from one of the programs identified in paragraph III.B.1., above; identifying the specific program or programs from which the customer receives benefits, and agreeing to notify the Telephone Company if the customer ceases to participate in such program or programs. ***Documentation, as described in III.D.1, is required if qualifying under income based eligibility.***

III. SPRINT OHIO LIFELINE (Cont'd)

B. Regulations (Cont'd)

4. The Telephone Company shall automatically enroll customers who participate in a qualifying program as contained in paragraph III.B.1.in Sprint Ohio Lifeline. The automatic enrollment will be implemented when the necessary procedures have been established with the appropriate state agencies.
5. The Telephone Company will also enroll customers who participate in a qualifying program by using on-line company to agency verification or self-certification. (T)
6. **Documentation** will be **required** to enroll customers in Sprint Ohio Lifeline for customers who qualify through household income-based requirements, **as described in III.D.1.** (T)
(T)
7. At no time will the monthly access line discounts cause the local service rates to be less than zero.
8. The Telephone Company reserves the right to perform a verification audit of a customer receiving Sprint Ohio Lifeline.
9. Restrictions: The discounts and waivers found in this tariff apply to only one access line per household.
10. The availability of optional features is governed by applicable Commission Orders including Case No. 00-1532-TP-COI.

C. Enrollment Process

1. New or existing customers who indicate that they are interested in lifeline will be sent a lifeline application form to either self-certify the program under which they qualify or to apply under the income based criteria with the appropriate documentation. The customer must return the application, with appropriate documentation, if required, within 30 days of the request in order to receive benefits back to the original request date. If the customer does not return the application with the appropriate documentation, if required, within 30 days, the lifeline benefits will commence upon the receipt of the application by the Telephone Company as long as the documentation is verified by the Telephone Company. In either case, the Telephone Company shall have a maximum of 60 days to verify the application and documentation.

III. SPRINT OHIO LIFELINE (Cont'd)

(N)

C. Enrollment Process (Cont'd)

2. Should the Company determine that a customer does not qualify for Lifeline Assistance, or if the customer fails to submit the necessary documentation, the Company will provide written notification to the customer and give the customer 30 days to prove eligibility. The written notification will include contact information for the Company in the event of a dispute and if the customer disagrees with the Company's findings regarding Lifeline Assistance eligibility, the notice will inform the customer that the Public Utilities Commission of Ohio may be contacted, in order that an informal/formal complaint may be filed. If the corrected application is received within 30 days, credits will be applied to the account on the date that service was established by a new customer or on the date that Lifeline Service was requested by an existing customer. If the corrected application is received after 30 days, the Lifeline Assistance will begin on the date the corrected application is received by the Company

D. Income Eligibility

1. At the time of certification, customers are required to submit supporting documentation that accurately reflects the customer's total household income. Acceptable supporting documentation will be one of the following:
 - a. A copy of the most recent federal or state income tax return;
 - b. Three consecutive months worth of the most current pay stubs;
 - c. The most recent Social Security statement of benefits;
 - d. The most recent Veteran's Administration statement of benefits;
 - e. The most recent retirement/pension statement of benefits;
 - f. The most recent Unemployment/Workmen's Compensation statement of benefits;
or
 - g. Any other legal document that would show the customer's current income (such as a divorce decree or a child support document).
2. Within 60 days of service establishment, the Telephone Company will verify the customer's Sprint Ohio Lifeline eligibility. Regardless of when the Telephone Company completes the verification process, Sprint Ohio Lifeline benefits will go back to the date the customer requested Lifeline service as long as the customer has satisfied the requirements shown in III.C.1.

(N)

D. Income Eligibility (Cont'd)

3. *If a customer disagrees with the Telephone Company's findings regarding eligibility for Lifeline Assistance, the customer may file an informal/formal complaint with the Public Utilities Commission of Ohio.*

E. Verification for Continued Eligibility

1. The Telephone Company will notify customers at least 60 days prior to the Telephone Company's pending termination of the customer's Lifeline Assistance if the customer fails to submit acceptable documentation for continued eligibility for benefits. Such notice will be separate from the bill and will include: 1) the earliest date termination of lifeline benefits would occur; 2) the reason(s) for termination of lifeline benefits and any actions which the customer must take to demonstrate continued eligibility; 3) disconnect notice requirements outlined in the MTSS Chapter 4901:1-5, O.A.C., explaining who the customer should contact in the event of a dispute.
2. Should a customer fail to submit proper documentation within the 60 day period, the Company will discontinue lifeline benefits on the date noticed in the letter. If the customer responds after the date noticed in the letter, the customer will be required to submit a new application for lifeline benefits.
3. *If a customer disagrees with the Telephone Company's findings regarding eligibility for Lifeline Assistance, the customer may file an informal/formal complaint with the Public Utilities Commission of Ohio.*

EXPRESSTOUCH®

I. GENERAL DESCRIPTION

ExpressTouch® is the Company's trademark for a set of advanced custom calling features. These features are also commonly known as custom local area signaling services (CLASS) and consist of one or more of the following features:

A. Return Call

Return Call permits the subscriber to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the telephone number is known. If the called line is available, the call is immediately completed. If the called line is not available, a queuing process, which may last up to thirty minutes, takes place. When both lines are available, the calling subscriber is notified via a distinctive ring that the network is ready to place the call. When the subscriber picks up the telephone, the call is automatically placed.

B. Caller ID

Caller ID allows the subscriber, with the use of a display phone or adjunct display device, to view the directory number of an incoming call before answering. If the caller's number is not part of the ExpressTouch® network, is a multi-party line, or is blocked, the premise equipment will display an indicator for "out of area" or for "private". Caller ID includes anonymous call rejection, which allows the subscriber to reject calls from parties who have blocked the delivery of their number.

C. Caller ID Block

Caller ID block allows the subscriber to prevent the delivery of the subscriber's directory number on a per call basis (per call block) or per line basis (per line block). Per call block will block the delivery of the subscriber's number for one call only and may be activated from all *individual* access lines (except those with per line block and as noted in General Regulations below) by dialing an activation code prior to placing a call. Per line block will automatically block delivery of the subscriber's telephone number on all calls and will be provided, upon request, at no charge to subscribers of non-published telephone number service, and at a monthly charge to customers not subscribing to non-published telephone service.

Overland Park, Kansas

In accordance with Order No. 00-2461-TP-ATA
Issued by Public Utilities Commission of Ohio

EXPRESSTOUCH®

I. GENERAL DESCRIPTION (continued)

D. Call Trace

(T)

Call trace permits a subscriber to initiate a trace of a harassing or obscene call without first having to obtain legal authorization or telephone company assistance. Upon activation by the subscriber, the network automatically sends information (if available) to the Company's annoyance call bureau indicating the calling number, the time the call was received, and the time the trace was activated.

(T)

E. Repeat Dialing

(T)

Repeat dialing allows the subscriber to automatically redial the last number dialed from the subscriber's telephone regardless of the completion status of the last number dialed. If the called line is available, the call will be placed immediately. If the redialed called line is busy, the network will queue the request for thirty minutes and process the call when both the called and calling party lines are idle. When the call can be completed, a distinctive ring will be provided to the caller's line to alert the subscriber that the requested callback is ready. When the subscriber picks up the telephone, the call is automatically placed.

(T)

F. Selective Call Acceptance

Selective call acceptance allows a subscriber to accept calls from up to twelve calling parties whether or not the number is known. The subscriber can create a screening list by entering known numbers or activating the addition of the number of the last call received. Unaccepted callers will be connected to an announcement indicating that the called party is not accepting calls from that number.

G. Selective Call Rejection

Selective call rejection allows the subscriber to prevent incoming calls from a pre-selected list of up to twelve numbers whether or not the number is known. The subscriber can create a screening list by entering known numbers or activating the addition of the number of the last call received. Incoming rejected calls are routed to an announcement indicating that the called party is not accepting calls from that number.

Issued: April 15, 1996

Effective: April 16, 1996

UNITED TELEPHONE COMPANY OF OHIO
By Randy W. Osler, President
Mansfield Ohio

In accordance with Order No.: 95-771-TP-ATA
Issued by the Public Utilities Commission of Ohio
April 11, 1996

I. GENERAL DESCRIPTION (continued)

H. Selective Call Ring

Selective call ring permits the subscriber to designate up to twelve specific telephone numbers, whether or not the number is known, so that calls from those numbers may be identified by a distinctive ring. The subscriber can create a screening list by entering known numbers or activating the addition of the number of the last call received.

I. Caller ID with Name

Caller ID with name allows the subscriber, with the use of a display phone or adjunct display device, to view the directory number, and the name associated with that number, of an incoming call before answering. If the caller's number is not part of the ExpressTouch® network, is a multi-party line, or is blocked, the premise equipment will display an indicator for "out of area" or for "private". Caller ID with name includes anonymous call rejection, which allows the subscriber to reject calls from parties who have blocked the delivery of their number.

J. Selective Call Forward

Selective call forward permits the subscriber to have only calls from up to twelve selected telephone numbers forwarded. If a call is placed from a number on the screening list, the call will be forwarded to the subscriber-programmed number. Calls not on the screening list will terminate in the normal manner.

K. Call Waiting ID

Call waiting ID allows the subscriber, with the use of a display phone or adjunct display device, to view the directory number, and the name associated with that number, of an incoming call while engaged in another call. The subscriber receives a tone signal to indicate that another call is waiting to be completed to the subscriber's number. This feature is available only in the Sprint Essentialssm package.

Issued by the Public Utilities Commission of Ohio

EXPRESSTOUCH

I. GENERAL DESCRIPTION (continued)

L. Call Waiting with Options

Call waiting with options allows the subscriber, with the use of a compatible display phone or adjunct display device, to manage an incoming call while being connected with an initial call. When notified of an incoming call, the subscriber may choose one of the following handling options: answer the call while putting the original call on hold; answer the call and disconnect the original call; forward the incoming call; connect to a "please hold" or a "busy" announcement; or conference the incoming party with the original party. This feature is available only in the Sprint Elite package.

II. GENERAL REGULATIONS

- A. ExpressTouch is available to subscribers of individual business or residence service, compatible PBX/Key equipment (Caller ID only), *and* Centrex *service*. ExpressTouch cannot be provided on payphone lines, *ISDN-BRI, or ISDN-PRI*. (T)
- B. ExpressTouch features cannot be functional unless both the called and calling parties are served by, and the call is routed through, appropriately equipped central offices, and routed over appropriately equipped facilities for calls between such equipped central offices. Not all features are available in all central offices.
- C. ExpressTouch is available from central offices where the Telephone Company has arranged the equipment for ExpressTouch features and is furnished subject to the availability of facilities.
- D. Return call and repeat dialing cannot be activated for calls originating from a line that is forwarded.
- E. Return call cannot be activated for calls originating from within multi-line hunt groups.
- F. Caller ID block is not intended for use by telemarketers. Upon receiving complaints that a telemarketer is blocking the disclosure of its telephone number, the Company will investigate the complaints and permanently unblock the number delivery where appropriate. (T)

II. GENERAL REGULATIONS (continued)

- G. By subscribing to call trace, the customer automatically authorizes the Telephone Company to disclose the identity of the source of annoying calls to law enforcement officials engaged in conducting, at the customer's request or otherwise, any investigation with respect to such calls. The results of a successful trace will only be released outside the Company to legally constituted authorities and only upon the presentation of proper authorization.

In situations where the Call Trace functionality is activated by a subscriber, information pertaining to non-published numbers will be provided to the authorized law enforcement agency upon request of the agency.

(N)
|
(N)

- H. The provision of ExpressTouch® by the Telephone Company is subject to the availability of facilities and the requirements of the local network. In no event will the Telephone Company be liable for any losses or damages of any kind resulting from the unavailability or failure of its equipment or facilities unless caused by the gross negligence or willful misconduct of the Company. Nor will the Company be liable for losses or damages arising out of any act, omission or failure to perform by the Telephone Company, its employees or agents in connection with this service, unless caused by the gross negligence or willful misconduct of the Company, its employees, or agents. The Telephone Company will not be responsible for calls that cannot be completed as a result of repair or maintenance difficulties on Telephone Company facilities and equipment nor on equipment provided by the customer.
- I. Subscribers to selective call forward will be responsible for any applicable usage charges associated with the forwarded-to telephone number.
- J. The ExpressTouch® customer will be liable for, and will indemnify, protect, defend and save harmless the Telephone Company against all suits, actions, claims, demands and judgments, and all costs, expenses and counsel fees incurred on account thereof, arising out of and resulting directly or indirectly from the service or in connection therewith including but not limited to, any loss, damage, expense or liability resulting from any claim of libel or slander.

Approval of the above tariff language by the PUCO does not constitute a determination by the Commission that the limitation of liability imposed by the company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of the exculpatory clause.

IV. ACCESS TO MESSAGING SERVICE

(N)

A. GENERAL

1. *Access to Messaging Service works with a voice messaging system (VMS). This feature and the VMS allow the Company to provide callers with voice messaging service. The Company offers this service when called lines are not answered in a specified length of time or are busy. When the caller accepts the offer, by pressing a key specified by the Company, the call is directed to the VMS for message recording. The VMS then attempts to deliver the message for the caller periodically for a specified length of time. (Periodical and delivery expiration timers are set by the Company.) When the VMS calls the called party to deliver the message, the called party is prompted to either listen to the message, delete the message, or hang up to have the message delivered again at a later time. (These options may vary by service provider.)*

B. REGULATIONS

1. *Access to Messaging Service is available only to CLECs and Alternative Service Providers who have their own voice messaging platform.*
2. *This feature does not have hardware requirements. Access to Messaging Service uses standard DMS hardware components to offer services.*
3. *Digital Recorded Announcement Machine cards are required to record Announcements for Access to Messaging Service. Access to Messaging Service uses the NT6X92AA Universal Tone Receiver (UTR) during digit collection. Series 2 peripherals (XPM) must host the subscriber lines.*
4. *Customers using Access to Messaging Service are required to provide the end user customer a minimum of 5 rings before the announcement will be triggered in order to allow time for answering machines or other voice mail platforms to respond. The called party number must continue to ring for an additional 2 rings allowing additional time for the called party to answer while the calling party considers using the voice messaging service.*
5. *The recording that the end user customer receives must be branded to indicate what company is offering the voice messaging service.*
6. *The recording that the end user customer receives must indicate that there is a charge to the end user for the use of the recording service.*
7. *The CLEC or Alternative Service Provider must offer free removal of the voice messaging service upon the request of the end user customer.*

IV. ACCESS TO MESSAGING SERVICE

(N)

B. REGULATIONS

8. *A single slot Enhanced Digital Recorded Announcement Machine (EDRAM) circuit pack provides the capabilities of a fully configured DRAM shelf. The DRAM is a stand-alone peripheral module (PM) with its own DS30 link interface. It is plugged into one of the trunk slots (5 through 16) of the maintenance trunk module (MTM) or service trunk module (STM) with the DS30 cable connected directly to the back plane pins of the associated slot. EDRAM hardware integrates MTM and DRAM control and memory. Central-control PM loader software is based on existing XMS-based peripheral module (XPM) utilities that permits the downloading of data (load files from either a tape or disk) using the message channel of the DS30 link on both network planes.*

C. RATES AND CHARGES

	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>	<u>SAE Code</u>
1. <i>EDRAM Track</i>	\$105.00	\$ 43.50	FCEEDRM
2. <i>Software per Central Office Switch</i>	\$300.00	\$ 0.00	FCEACMS

INTEGRATED SERVICES DIGITAL NETWORK

I. BASIC RATE INTERFACE (BRI)**

(T)

A. DESCRIPTION

1. Individual Line Basic Rate Interface (BRI) Service is a stand alone service arrangement which uses the integrated services digital network (ISDN) Architecture to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data, and imaging services via channelized transport.
2. BRI provides three channels commonly described as 2B+D (two bearer channels and one data channel). A bearer channel (B channel) is up to 64 kbps in bandwidth. Each B channel can be used for circuit switched voice or circuit switched data. The data channel (D channel) is 16 kbps in bandwidth and is used for transmitting signaling information between the central office and the customer's premise equipment.
3. A standard set of ISDN capability packages has been defined by the North American ISDN Users' Forum and given a letter designation. Each of the capability packages describes a specific interface configuration, as well as the features and capabilities on that interface. These capability packages have been established to help simplify the ordering, provisioning, and installation of BRI-ISDN. Customers subscribe to BRI-ISDN by ordering one of the following capability packages (all packages include the D channel):
 - (A) Package B – provides one B channel configured for circuit switched data. Data capabilities include calling number identification. No voice capabilities are provided.
 - (B) Package C – provides one B channel configured for alternate voice/circuit switched data. Data and voice capabilities include calling number identification.
 - (C) Package G – provides one B channel for voice only and one B channel for circuit switched data only. This package provides voice features including flexible calling, additional call offering, and calling number identification. Data capabilities include calling number identification.
 - (D) Package I – provides two B channels configured for circuit-switched data only. Data capabilities include calling number identification. No voice capabilities are provided.

****Effective March 25, 1999, Basic Rate Interface (BRI-ISDN) is grandfathered. Existing customers may continue to receive BRI-ISDN service under the conditions and rates as specified in Section 46, I. as long as there is no change to the customer's account.**

INTEGRATED SERVICES DIGITAL NETWORK

I. BASIC RATE INTERFACE (BRI) (Continued)**

(T)

A. DESCRIPTION (Continued)

3. (Continued)

- (F) Package K - provides one B channel for alternate voice/circuit-switched data and one B channel for circuit-switched data only. This package provides voice features including flexible calling, additional call offering, and calling number identification. Data capabilities include calling number identification.
- (G) Package M - provides both B channels configured for alternate voice/circuit-switched data. Data and voice capabilities include calling number identification.

4. Optional Services

BRI-ISDN provides the customer with the option to access the following features (with appropriate customer equipment) where available. The optional services are assigned to the directory number (DN) associated with the voice channel. The customer must choose which DN is the voice DN and which features will be assigned to that DN.

- (A) Flexible Calling - This option provides one or more of the following features:

- Hold/Retrieve
- B Channel Reservation
- Three-way Conference Calling
- Add-on (previously held conference call)
- Drop Last Call
- Transfer
- No Transfer Restriction
- Consultation Hold

- (B) Additional Call Offering - This feature allows multiple call appearances per telephone number (B channel) per telephone set.
- (C) Directory Number - Each B channel is assigned one DN. Additional DNs can be assigned to the B channels at an additional monthly rate.
- (D) Call Forwarding - This feature allows basic call forwarding for voice.

****Effective March 25, 1999, Basic Rate Interface (BRI-ISDN) is grandfathered. Existing customers may continue to receive BRI-ISDN service under the conditions and rates as specified in Section 46, I. as long as there is no change to the customer's account.**

INTEGRATED SERVICES DIGITAL NETWORK

I. BASIC RATE INTERFACE (BRI) (Continued)**

(T)

B. REGULATIONS

1. BRI-ISDN is available only on single-line residence or single-line business service. It is not available on Centrex lines or key system or PBX trunks.
2. BRI-ISDN is offered only where facilities and appropriate technology exists. The service is available only from central offices that have the necessary software and hardware to provide ISDN on the standard network platform.
3. BRI-ISDN is available only where the customer's service location is within the provisioning limitation and normal transmission range as determined prior to installation of the service. The normal transmission range is 40db loop loss at 40 kHz or approximately 24,000 feet from the central office. If the customer's service location exceeds this limitation, service may be provided where the existing facilities can be made compatible, but Distance Extension Charges will apply.
4. Distance Extension charges will apply for customers who are within the serving central office and who are served beyond the normal transmission range specified not to exceed a 78db loop loss at 40 kHz (approximately 36,000 feet from the central office).
5. Compatible customer premises terminal equipment is required for proper operation. All equipment used to interface with these services is required to conform with National ISDN/NT-1 guidelines. The Company shall not be responsible if changes in any of the equipment, operation, or procedures of the Company utilized in the provisioning of ISDN render any equipment provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.
6. Temporary suspension of service (vacation service) as provided in Section 20 of this tariff is not available for BRI-ISDN service.
7. Packet switching is not available with BRI-ISDN.

****Effective March 25, 1999, Basic Rate Interface (BRI-ISDN) is grandfathered. Existing customers may continue to receive BRI-ISDN service under the conditions and rates as specified in Section 46, I. as long as there is no change to the customer's account.**

C. RATES AND CHARGES (Continued)

7. Each capability package nonrecurring charge provides for one configuration group to be established at the initial implementation of service. Subsequent changes to the configuration will be charged a nonrecurring charge of \$50.00.
8. When circuit-switched data or voice calls are made outside of the subscriber's flat-rate calling area, applicable calling charges (toll, ELC, or LMS, as applicable) will be assessed. ISDN customers who use call forwarding to transfer features are responsible for the payment of any applicable charges for each call connected via these features.
9. In addition to the above monthly charges, the customer will be assessed the applicable End User Common Line Charge (EUCL) and Presubscribed Interexchange Carrier Charge (PICC) as provided for in Section 4 of the Sprint Local Telephone Companies Tariff, F.C.C. No. 3. (Note 1); **plus the Intrastate Access Fee (IAF) as found in United Telephone Company' of Ohio's P.U.C.O. No. 1, Access Service Tariff.**

(N)
(N)

Note 1. The EUCL & PICC Charge as specified in F.C.C. No. 3, is not an intrastate charge.

(T)

P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. BASIC RATE INTERFACE II (BRI II)

(N)

A. General

1. Integrated Services Digital Network - Basic Rate Interface II (ISDN-BRI II) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI II service supports the simultaneous transmission of circuit switched voice and circuit switched data over a single exchange access line.

ISDN-BRI II provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides switched communication paths providing end user access to a variety of circuit-switched services and features including data, voice and video, which conform to internationally developed, published and recognized standards generated by the International Telecommunications Union.

2. Service Capabilities

- (a) ISDN-BRI II consists of three distinct channels delivered to the customer's premises: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI II is not available in other channel configurations of 1B+D or 0B+D.
- (b) The B-channel carries circuit-switched voice and/or circuit-switched data communications at speeds up to 64 Kbps, from the customer's premises, over the loop facility, to the central office. Packet data services are not available over the B-channel.
- (c) The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B-channel call on the ISDN-BRI II line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.
- (d) Customers subscribing to ISDN-BRI II must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface II is comprised of a limited set of standard user-network interfaces. The BRI II customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

(N)

A. General (Continued)

3. Standard Features

- (a) Closed User Group -- allows the user to establish subnetworks within which the members of the Closed User Group can communicate. Each data terminal in a Closed User Group can be arranged in one of the following modes:
 - (1) Outgoing Access -- The data terminal originates outgoing calls only.
 - (2) Incoming Access -- The data terminal receives incoming calls only.
 - (3) Incoming Calls Barred -- The data terminal originates outgoing calls only to the data terminals in the Closed User Group with which it is associated.
 - (4) Outgoing Calls Barred -- The data terminal receives incoming calls only from the data terminals in the Closed User Group with which it is associated.
 - (5) Unrestricted Access -- The data terminal receives and originates both incoming and outgoing calls.
- (b) Configuration Group -- Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.

4. Service Capability Packages*

- (a) Customers shall subscribe to one of the following Service Capability Packages specifying the assignment of each B-channel. Through the North American ISDN Users' Forum, a set of ISDN Service Capability Packages have been defined and given a letter designation. Each of the Service Capability Packages describes a specific interface configuration as well as the features and capabilities of that interface. Detailed technical specifications are defined for each of the Service Capability Packages. These packages have been established to help simplify the ordering, provisioning, and installation of ISDN.

*ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

1-B Alternate circuit-switched voice/circuit-switched data

1-B Alternate circuit-switched voice/circuit-switched data

Key Telephone Systems

ISDN may be purchased for a key system from this tariff in the place of Rotary Access Service (for ISDN-capable key systems). If terminating an ISDN-BRI II line into key system, the customer shall order one of the following Service Capability Packages:

(2) Package H:
1-B Voice Only
1-B Circuit-switched data only
(Includes Additional Call Offering)

(3) Package L:
1-B Circuit-switched data only
1-B Alternate voice/circuit switched data
(Includes Additional Call Offering)

5. Optional Services and Features*

(a) The ISDN-BRI II offering provides the customer with the following features, where available.

(1) Call Pickup – Originating and Terminating – This feature allows a station user to answer any call within an associated predesignated pickup group. If more than one line within the pickup group has an unanswered incoming call, the call to be answered is selected by the central office switching system.

(2) Flexible Calling - This feature includes:
Hold/Retrieve*
B-Channel Reservation
Three-Way Conference Calling
Add-on (previously held conference call)
Drop Last Call
Transfer
No Transfer Restriction
Consultation Hold

*ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

5. Optional Services and Features* (Continued)

- (3) Six-Way Conference Calling, Drop, Hold, Transfer – This feature allows the customer to add up to five parties to an existing call. This feature is for voice calls only.
- (4) Automatic Callback (Repeat Dial) – This feature provides automatic callback to the last dialed number.
- (5) Additional Call Offering (ACO) – This feature allows multiple call appearances per telephone number (B-channel) per telephone set. Example: A customer can put up to 3 calls on hold and receive another call on the phone, with all calling parties dialing the telephone number associated with voice on B-channel.
- (6) Call Forwarding – This feature provides the customer with Call Forwarding Variable, Call Forward – Busy and Call Forward - No Answer with Message Waiting Indicator, either Visual or Audible.
- (7) Calling Number Identification - This feature permits the customer to receive and display the calling party telephone number for calls placed to the customer.
- (8) Calling Name Identification – This feature permits the customer to receive and display the calling party name for calls placed to the customer.
- (9) Additional Directory Numbers – Additional directory numbers are available on each B-channel in addition to the primary directory number assigned to the B-channel. Additional Directory Numbers are purchased separately.
- (10) Multi-line Hunt Group – This feature is limited to hunting within ISDN-BRI II lines and on an individual customer location basis. Directory numbers within the multi-line hunt group may not have multiple call appearances.

*ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

A. General (Continued)

5. Optional Services and Features* (Continued)

- (11) Feature Package 1 - This package includes:
Calling Number ID/Calling Name ID
Call Forwarding
Flexible Calling
Automatic Callback
Additional Call Offering
- (12) Loop Extension – ISDN-BRI II is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Individual Line Loop Extension and will extend the loop to approximately 36,000 feet.

B. Regulations

- 1. This service is offered only where facilities and appropriate technology exist.
- 2. Local circuit-switched voice and data calls will be billed on a flat-rate basis, as shown in Section 46, II.C. Toll charges shall apply when circuit-switched data or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer.
- 3. In exchanges where IntraLATA Presubscription has been implemented, only one InterLATA and one IntraLATA Carrier may be selected for all B-channels associated with the same ISDN-BRI II Service. Access via 101XXXX to other Interexchange Carriers is available.
- 4. A minimum service period of three months is required.

*ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. BASIC RATE INTERFACE II (BRI II) (Continued)

(N)

B. Regulations (Continued)

5. The Company shall terminate ISDN-BRI II Services at the Company Network Interface Device (NID) located at the customer's premises.
6. Two Primary Directory Numbers will be included with an ISDN-BRI II Service, one for each B-Channel. If Additional Directory Numbers are required on either channel, an additional charge, as specified in Section 46, II.D. of the Pricing List, will apply for each additional number.
7. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment.
8. The provisions for temporary suspension of service, as defined in Section 20 of this tariff, do not apply to ISDN-BRI II Service.
9. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI II on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-BRI II Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a foreign NXX.

When a foreign NXX is required, mileage charges for Foreign Exchange Service, as specified in the Private Line Service Tariff, P.U.C.O. No. 1, Section 2, will apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a unique NXX, the local calling area may change.

Emergency 911 calls placed over ISDN-BRI II lines provisioned via this arrangement will be identified as the foreign service central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from emergency calls placed from ISDN-BRI II lines provisioned via a foreign serving central office.

10. One directory listing will be provided with ISDN-BRI II. Additional listings are available as specified in Section 2 of this tariff.

II. BASIC RATE INTERFACE II (BRI II) (Continued)

B. Regulations (Continued)

11. ISDN-BRI II Service will be assessed the appropriate interstate charges (e.g. End User Common Line and Presubscribed Interexchange Carrier Charge), as defined in the Company's Interstate Tariff – F.C.C. No. 3.
12. ***ISDN-BRI II Service will be assessed the Intrastate Access Fee (IAF) as found in United Telephone Company of Ohio's P.U.C.O. No. 1, Access Service Tariff.*** (N)
(N)
13. ISDN-BRI II does not provide for the transmission of packet data on either the D-channel or one of the B-channels. (T)
14. ISDN-compatible terminal equipment is a requirement for operation and is the customer's responsibility. ISDN customer-premise equipment is dependent upon commercial power and not power from the Company central office. For their safety and well being, all ISDN customers are encouraged to maintain a non-ISDN access line on the premises for emergency calls in the event of a loss of commercial electrical power. In the event a subscriber elects to disconnect or not maintain a non-ISDN access line, the customer assumes full responsibility for telephone service in the event of an emergency. (T)
15. ISDN-BRI II Service is available only with single line residence and business service. (T)
16. ISDN-BRI II lines may be purchased out of this tariff to be associated with Centrex Service, as defined in Section 40 of this tariff. Terms and conditions for Centrex Service will apply to these ISDN-BRI II lines except as otherwise stated in this section. Optional features compatible with ISDN-BRI II may be purchased from the Centrex Optional Features section of the tariff as well as features unique to ISDN lines from the Optional Features in this section. (T)

ISDN-BRI II lines associated with Centrex Service may be purchased only for those features from the Centrex section of the tariff. ISDN-BRI II can be provisioned in the same Centrex customer group if, and only if, the customer group is resident in an ISDN equipped host or remote office. All other Centrex customers can subscribe to ISDN-BRI II, however, the service will be provisioned as a stand-alone service and will not be included in the customer group.
17. ISDN-BRI II Service may be terminated in key telephone systems in lieu of Rotary Access Service; however, the key telephone system must be ISDN compatible. (T)
18. ISDN-BRI II Service for customers subscribing to Rotary Access Service will be provisioned outside the existing hunt group. (T)
19. Verification and Emergency Interrupt service is not available for ISDN-BRI II Service. (T)

Issued by the Public Utilities Commission of Ohio

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF**

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. BASIC RATE INTERFACE II (BRI II) (Continued)

C. Application of Rates

1. ISDN-BRI II Service is offered on an unlimited use basis. All applicable state and federal charges will apply. Extended Area Service (EAS) charges, if applicable as defined in the Local Exchange Tariff, P.U.C.O. No. 6, apply per ISDN-BRI II B-Channel. Toll charges apply when circuit-switched data or voice calls are completed outside the customer's designated local calling area.
2. The monthly rates for Service Capability Packages are applied on a per package basis.
3. The ISDN-BRI II monthly rates are in addition to the applicable ***individual residence line, individual business line or Centrex access line rate***. These rates vary by service area and can be found in Section B of the Company's P.U.C.O. No. 6 tariff, and Section 40 of this tariff. (T)
4. The Non-Recurring Charge for ISDN Service Capability Package installation will be discounted 50% when a customer commits to a 12-month service period or 100% when a customer commits to a 24-month service period. If termination of service prior to the end of the commitment occurs, the customer is responsible for payment of the discounted amount of the Non-Recurring Charge, which represents the installation charge initially waived. (T)

However, this termination requirement will not apply when the customer converts to a next generation service offering of a separately tariffed service, provided that:

The service period for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater;

The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service; and

The service orders are for the same customer at the same location.

ISDN-BRI to: ISDN-PRI, TransLink, LightLink, Frame Relay Service (FRS), or Asynchronous Transfer Mode (ATM) are a few examples of a Next Generation Service Offering.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI)

A. General

1. Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) Service is a local exchange offering supported by the ISDN architecture.
2. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service provides connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. After purchasing the original 23 B-Channel plus one D-Channel configuration, the customer may purchase another Primary Rate Access Line and another Primary Rate Interface as well as additional B-Channels in increments of 12.

These channels may be used to connect the customer's CPE to the Public Circuit Switched Network (i.e., outward, inward, and two-way trunks, and WATS/800/866/877/888 Service access lines).

(T)

3. ISDN-PRI Service provides circuit switched communication paths providing the end user with access to a variety of circuit switched services and features including data, voice and video which conforms to internationally developed, published, and recognized standards generated by the International Telecommunications Union (ITU).
4. Unless specified, the regulations for ISDN-PRI Service apply in addition to the General Regulations set forth in Section 1 of this tariff.
5. ISDN-PRI Service **and its optional features and functions are provided within a LATA** from central offices where appropriate ISDN facilities are available as determined by the Telephone Company. Service inquiries will be necessary to determine availability. Special Types of Construction or Facilities may apply as specified in Section 5 of this tariff.
6. **The Initial Service Order Charge in Section 4 of this tariff applies in addition to the Service Connection Charges stated in Section 46.111.G.7.**

(T)

(T)

(N)

(N)

B. Regulations

1. Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service is the customer's responsibility to provision.
2. The Telephone Company shall not be responsible if changes in any of the equipment, operations or procedures of the Telephone Company utilized in the provisioning of ISDN-PRI Service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.

Issued by the Public Utilities Commission of Ohio

P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

(N)

III. **PRIMARY RATE INTERFACE (PRI) (Continued)**

B. **Regulations (Continued)**

3. Digital transmission rates at speeds less than those indicated may be accomplished as a function of the particular CPE furnished by the user.
4. Temporary Suspension of Service (Vacation Service) at the customer's request, as defined in Section 20 of this tariff, does not apply to ISDN-PRI Service.
5. Service Connection, Changes and Moves specified in Section 4 of this tariff apply if the charge is not specified in this tariff.
6. The minimum service period for ISDN-PRI Service is six months.
7. Telephone numbers transmitted via the Optional or Standard Incoming Call Identification feature are intended solely for the use of the ISDN-PRI Service subscriber. Resale of this call identification information is prohibited by this tariff.
8. Non-Facility Associated Signaling (NFAS) provides the capability to serve multiple DS1's via a single D-Channel. This feature can be ordered where switch capabilities exist as determined by the Telephone Company. When NFAS is selected, the customer will order one ISDN-PRI Service arrangement with 23 B-Channels and 1 D-Channel. Additional ISDN-PRI Services arrangements are ordered with 24 B-Channels as specified in Section 46.III.F. The D-Channel activated on the initial arrangement serves the additional ISDN-PRI arrangements.

After the first 23B + D PRI is purchased, a customer can purchase additional B-Channels in increments of 12. Additional Primary Rate Access Lines may be ordered in a 24B configuration. However, the Telephone Company recommends that the quantity of Primary Rate Access Lines supported by one (1) D-Channel not exceed four (4). The Telephone Company recommends the use of a backup D-Channel for the support of signaling beyond four (4) facilities.

Issued by the Public Utilities Commission of Ohio

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) (Continued)

B. Regulations (Continued)

9. This service is available only from central offices, which have the necessary facilities to provide ISDN-PRI on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Telephone Company will provide ISDN-PRI Service from an alternative serving central office, as designated by the Telephone Company. *In such cases*, the subscriber may be required to accept a foreign NXX. When a foreign NXX is required, mileage charges applicable to Interexchange United TransLink® Service, as defined in Section 5 of United Telephone Company's Private Line Service Tariff, apply in addition to the rates and charges included in this section. Due to the nature of *the architecture* and the use of a foreign NXX, the local calling area (e.g., Extended Area Service) may change. (T)

When ISDN functionality becomes available from the central office that normally serves this subscriber, ISDN-PRI Service will be provided from that office and the subscriber may be required to accept a different NXX. If the subscriber chooses to continue ISDN-PRI Service from the alternative serving central office, all charges applicable to Interexchange United TransLink® Service as defined in Section 5 of United Telephone Company's Private Line Service Tariff, will apply in addition to the rates and charges included in this section.

Similarly, if a subscriber requests ISDN-PRI Service from an alternative serving central office other than that designated by the Telephone Company, all charges applicable to Interexchange United TransLink® Service, as defined in Section 5 of United Telephone Company's Private Line Service Tariff, will apply in addition to the rates and charges included in this section.

Emergency 911 calls placed over ISDN-PRI Primary Rate Access Lines provisioned via this arrangement will be identified as the alternative serving central office NXX and not the non-ISDN compatible central office NXX. The Telephone Company shall not be liable for any loss or damages arising from the emergency calls placed from ISDN-PRI Primary Rate Access Lines provisioned via an alternative serving central office.

10. This service is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. Should the customer's service location exceed said limitations, service will be provided where the Telephone Company has electronically compatible facilities available, or where existing facilities can be made electronically compatible.

Issued by the Public Utilities Commission of Ohio

**P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF**

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) (Continued)

B. Regulations (Continued)

11. Rotary hunt functionality, at no additional charge, is available with ISDN-PRI Service. This functionality increases the likelihood of an incoming call being completed over an ISDN-PRI B-channel. The functionality is exclusively within the B-channels of a single ISDN-PRI service arrangement or between multiple ISDN-PRI service arrangements and is not allowed between ISDN-PRI service arrangements and other services, including but not limited to, Business Individual Line Service.
12. ISDN-PRI Service is not offered in conjunction with Local Measured Service.
13. In order to maintain the quality of ISDN-PRI Service, the Telephone Company reserves the right to perform preventative maintenance and software updates to the network. The Telephone Company has classified this maintenance as indicated below:

Scheduled Maintenance

Scheduled maintenance is used to perform such functions as hardware and software upgrades and network optimization. The Telephone Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Telephone Company will provide advance notice of all scheduled maintenance.

Demand Maintenance

Demand Maintenance may occur as a result of unexpected events and is used when ISDN-PRI network elements are in jeopardy. The Telephone Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance prior notification may not be possible, however, the customer will be informed when the maintenance has been completed.

14. ***One Directory Listing will be provided per D-Channel. Additional Directory Listings are available as specified in Section 2 of this tariff.***

(N)
(N)

C. Definitions

1. **B-Channel** – A bi-directional synchronous channel capable of supporting 64 Kbps of digital transmission.
2. **D-Channel** – A 64 Kbps digital signaling only channel for call establishment when used with Primary Rate Access.

D. Features

1. **Standard Features**

Dynamic Allocation of Bandwidth

Allows the circuit switched voice and data services to share B-Channels and arrange them as a single trunk group. This allows incoming and outgoing circuit switched voice and data calls to utilize B-Channels on a call by call basis. Without this capability, each service will have a dedicated B-Channel.

Issued: August 26, 2003

GENERAL EXCHANGE TARIFF

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

(N)

III. PRIMARY RATE INTERFACE (PRI) (Continued)

D. Features (Continued)

1. Standard Features (Continued)

Incoming Call Identification (Caller ID)

Provides the customer with the telephone number of the calling party. Incoming call identification is provided via the D-Channel associated with the incoming calls on a B-Channel to a PBX.

Clear Channel Capability

The B-Channels on ISDN-PRI are clear, since all signaling and control functions are handled by the D-Channel. This allows all 64 Kbps on each B-Channel to be used for customer information.

Digital Voice Transmission

All voice calls are transmitted using digital signaling.

Direct Inward Dialing (DID) Signaling

Permits incoming dialed calls from the exchange network to reach a specific number served by customer premises equipment (CPE) without the assistance of an attendant. It also provides for the unique identification of the call based on digits sent to the CPE by the central office. The central office will outpulse digits to the CPE that can further process the calls as desired. The rates and charges for DID telephone numbers are in addition to the ISDN charges and are provided in Section 10 of this tariff.

PBX Station ID Capability

Allows the station users number (calling party) to be transmitted over the ISDN-PRI D-Channel from Direct Inward Dialing equipped CPE PBXs that use ISDN-PRI. This number is provided by the originating station and must have an associated Direct Inward Dialing telephone number working in the central office.

2. Optional Features

D-Channel Backup

Provides backup for the D-Channel for a customer with multiple PRI lines by automatically switching signaling capability over to another D-Channel if service to the primary D-Channel is interrupted.

Network Ring Again

Enables the customer to complete calls to a busy station without continually redialing. Certain equipment restrictions may apply.

(N)

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) (Continued)

D. Features (Continued)

2. Optional Features (Continued)

Call-by-Call/Integrated Service Access Feature Capability

Allows the customer to dynamically allocate the use of channels for ISDN-PRI Service. The customer may also choose voice or data transmission on a per call basis. In addition, the customer may also choose to subscribe to more services than channels. The Customer Premises Equipment signals the local central office as to which type of service (inward/outward trunk, WATS Lines, 800/888 Service) to access for each call.

Incoming Call Identification (Caller ID Name and Number)

Provides the customer with the telephone number and name of the calling party. Incoming call identification is provided via the D-Channel associated with incoming calls on a B-Channel to a PBX. **The customer's equipment must be compatible with this service.**

2 B-Channel Transfer

If a call terminates at a given location, but is then forwarded to another location, two trunks between the Central Office and the original device are typically employed for the duration of the forwarded call. 2 B-Channel Transfer allows the central office switch to establish the call directly to the final destination and release the trunks going in and out of the forwarding device. This saves the customer PRI facilities and provides for more efficient use of the network. A common use of 2 B-Channel Transfer is illustrated below.

UNITED TELEPHONE COMPANY OF OHIO
By Chad Eckhart, Vice-President – State Regulatory
Overland Park, Kansas

In accordance with Order No. 02 -2822-CT-ZTA
Issued by the Public Utilities Commission of Ohio

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) (Continued)

D. Features (Continued)

2. Optional Features (Continued)

Circular Hunt

Circular Hunt provides the most efficient hunting sequence available, plus allows for much larger trunk groups than the standard ISDN-PRI packages. With circular hunt, an incoming call is completed to the next available trunk (bearer) in sequence starting from the last trunk selected. This can occur across multiple PRI facilities. The feature can support up to 220 Primary Rate Interfaces in a single hunting configuration. The standard limit is 50.

National ISDN-2 Protocol

National ISDN-2 Protocol is a communication protocol that governs interactions between the customer's equipment and the telephone network. This protocol is more advanced than the standard ISDN-PRI protocol. Most CPE is capable of using the ISDN-2 Protocol.

E911 Call Screening

E911 Call Screening provides for the transmission of PBX or Key System station information via the ISDN-PRI facility to local emergency services authorities. This provides for the possible identification of the specific location on a customer's premises where a 911 call originated. This option is available only in communities where local emergency authorities support the service in conjunction with the Company's Private Switch Automatic Location Identification (PSALI) Service, associated with E911 Service. This service is only available in conjunction with National ISDN-2 Protocol.

Internet Service Provider (ISP) Hubbing

Selected Telephone Company central offices will serve as hubbing locations for One-Way Incoming ISDN-PRI facilities. ISPs may order One-Way Incoming ISDN-PRI facilities for a designated set of remote central offices. An ISP is an entity that provides direct access to the Internet for its customers. ISP Hubbing will only occur between the remote central offices and the selected Telephone Company host central office. This feature enables a subscriber located in an exchange served from a remote central office to call an ISP located in a host central office by dialing a local telephone number in the remote central office.

The ISP Hubbing arrangement is intended to allow ISPs the ability to consolidate their equipment in the vicinity of the Telephone Company's host central office serving the ISP.

(N)

(N)

Overland Park, Kansas

In accordance with Order No.: 03-1177-TP-ZTA
Issued by the Public Utilities Commission of Ohio

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) (Continued)

D. Features (Continued)

(N) (M)

2. Optional Features (Continued)

Internet Service Provider (ISP) Hubbing (Continued)

When an ISP subscribes to ISP Hubbing, all One-Way Incoming Primary Rate Interfaces in the Telephone Company's host central office must be part of the ISP Hubbing arrangement. In addition, a minimum of one (1) One-Way Incoming Primary Rate Interface must be ordered for the host central office, and a minimum of one (1) One-Way Incoming Primary Rate Interface must be ordered in the host for each remote central office for which a local telephone number is provided.

The ISP Hubbing arrangement is only available for customers subscribing to One-Way Incoming ISDN-PRI Service under a 36-59 month or a 60-84 month term discount plan. ISP Hubbing will be provided for customers who sign a new term contract for One-Way Incoming ISDN-PRI Service, or who have a minimum of 12 months remaining on their existing term discount plans.

The customer has the option to dedicate the One-Way Incoming Primary Rate Interfaces to their respective remotes, or to share ISDN-PRI Channels among the various remote central offices and the host central office in a hubbing arrangement. This division of capacity is determined at the initiation of the ISP Hubbing arrangement. Subsequent changes to the division of capacity or routing is subject to a Service Change Charge (programming) as specified in Section 46.III.G.7.(d)(1)(b) following.

(M)

This service must not be employed in any way to provide unauthorized toll service between any two exchanges. ISP Hubbing is designed to provide local one-way incoming dialing to the ISP and this feature is restricted to the transfer of electronic data. Voice traffic in conjunction with this feature is prohibited.

The ISP agrees to effectively limit the holding times of end-user calls by either economic means (by charging for minutes of use) or technical means (by automatically disconnecting customers after a period of inactivity and/or any other predetermined time). Should network congestion occur, the Telephone Company reserves the right to limit holding times through any means at the Telephone Company's disposal, including the disconnection of active calls.

III. PRIMARY RATE INTERFACE (PRI) (Continued)

E. Service Components

1. The components for ISDN-PRI Service will be as follows:

- Primary Rate Access Line
- Primary Rate Interface
- Primary Rate Channels

(a) Primary Rate Access Line - Will provide a four-wire access loop from the customer premises to the serving central office. The transmission via this loop supports Clear Channel Capability.

(b) Primary Rate Interface - Provides the multiplexing to support up to twenty-three (23) B-Channels at 64 Kbps and one (1) D-Channel for signaling also at 64 Kbps. When NFAS is ordered, the Primary Rate Interface can provide up to twenty-four B-Channels at 64 Kbps.

(c) Primary Rate Channels - Will provide unlimited usage of channel that will allow either voice or data transmission up to 64 Kbps.

(1) Voice calls may be completed to both ISDN and non-ISDN lines.

(2) Data Transmission on the B-Channels will be circuit switched at 64 Kbps within the switch and between ISDN-PRI compatible central offices. ISDN-PRI interconnection to non-ISDN-PRI equipped central offices may be potentially subjected to analog transmission or sub-rated to 56 Kbps.
