AFFIDAVIT

Compliance with Commission Rules and Service Standards

I am an officer of the applicant corporation, AT&T Communications of Ohio, Inc., and am authorized to make this statement

(Name of Company)

on its behalf. I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

SECTION 4 - LOCAL SERVICE. CONT'D

4.6 PrimeXpress Network Service

4.6.1 Description

PrimeXpress Network Service is a digital service providing trunk connections from an end user's Private Branch Exchange, Key System, or other device to the TCG Switch Port. PrimeXpress Network Service is available as a DS1 (1.544 Mbps) connection providing 24 voice-grade (DS0) communications channels. A PrimeXpress facility may be provided as stand-alone service or provisioned over an existing or new AT&T ACCU-Ring DS3 facility. PrimeXpress Network Service is available on a 1, 2, or 3 year term commitment. (N)
(N)

The Customer may opt to utilize PrimeXpress Network Service for outgoing calls only (DOD), incoming calls only (DID) or a combination of both inbound and outbound calls. When the Customer elects to utilize PrimeXpress Network Service for both inbound and outbound calls, they may choose Combo service which allows incoming calls to an attendant only or they can elect to utilize DID/DOD service which allows incoming calls to be terminated directly to an End User behind a PBX or capable Key System. When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company.

PrimeXpress Network Service trunks configured for Inbound and Outbound calling functionality that, upon detection by the Company, exceed 90% utilization for inbound calling will be subject to the rates, terms and conditions for the PrimeConnect calling option listed below.

Customers who terminate a term commitment for a stand-alone PrimeXpress facility and purchase a PrimeXpress facility provisioned on a new or existing AT&T ACCU-Ring facility for a term equal or greater to the time remaining on their current PrimeXpress term commitment will not be liable for early termination charges. (N)
(N)

4.6.2 PrimeConnect Calling Option

Digital PrimeXpress Network Service can be configured to support high volumes of inbound calling. The PrimeConnect option is not available with wink start signaling. This option will support a maximum of two rate centers per facility or trunk group within the designated service area. Rates for the PrimeConnect option are listed in section 4.6.3, following.

Per subscribed Rate Center, the Customer is required to subscribe to a sufficient number of trunks so as to not degrade the TCG network below an incoming call completion rate of 99%. The call completion rate is based on an average of the busy hours occurring during the Customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the Customer to increase the number of PrimeXpress trunks to satisfy the call completion criteria above.

Subject to the availability of facilities, Customers may request the PrimeConnect option to be provisioned from a Rate Center other than

SECTION 4 - LOCAL SERVICE. CONT'D

4.10 TCG PrimePlex PRI Service (Cont'd.)

E) Conditions (Cont'd.)

- 11) At the Company's discretion, the Company may reconfigure the Customer's service from PrimePlex PRI to the PrimeConnect Calling Option if the Customer's PrimePlex PRI usage meets one or more of the following criteria: (1) equals or exceeds 90% utilization for inbound calling, (2) equals or exceeds an average call duration of 10 minutes per call, (3) equals or exceeds CCS loading of 32 CCS, and (4) equals or exceeds 300,000 minutes of use per PRI. The Customer will be charged rates for PrimeConnect Calling as shown in Section 4.6.3. The Company reserves the right to audit the Customer's PrimePlex PRI usage for the above conditions.

F) Features

- 1) Backup D Channel: Automatically takes over for a failed D channel in case of trouble. This is purchased as part of a 23B+Backup D PRI Arrangement.
- 2) Call-by-Call Service Selection (CBC): Provides an option to the Dedicated B Channel Configuration allowing B channels to be configured to access multiple services on a per-call basis. With this optional feature, separate facilities are not needed for individual services such as DID, DOD, and business dial tone lines. The customer premises equipment signals the local serving central office as to what type of services to access for each call.
- 3) Calling Party Number (CPN): Allows the user to have access to the directory number of the calling party. Provision of per-call and line blocking capabilities is a function of the customer premises equipment and is the responsibility of the customer.
- 4) Multiple Facility Signaling Control: Allows the D channel one PRI Arrangement to provide signaling for up to 20 PRIs terminating on a switch module. Requires Backup D channel.
- 5) Original Called Number (OCN): (must be ordered for specific PRI ISDN trunks) places the caller's original dialed digits into the OCN field of the selected ISDN message, for inbound calls which have been forwarded one or more times. These ISDN messages, containing OCN information, will be transmitted over the designated Data-Channels (D-Channels, primary, secondary, and back-up) on the ISDN trunk.
- 6) 2 B-Channel Transfer on PRI: allows a controller that is interfaced over an ISDN PRI to initiate the transfer of one of its calls to another call so that the two end-users are connected to each other within the switch and the two PRI B-channels to the controller are released.

SECTION 4 - LOCAL SERVICE. CONT'D

4.10 TCG PrimePlex PRI Service (Cont'd.)

(N)

G) Application of Rates

- 1) Business dial tone line functionality is included in the PrimePlex PRI Service rates and charges.
- 2) When DID numbers are ordered from the preceding, a DID line connection service charge applies for each B channel dedicated to DID service, or DID-simulated facility group member over which DID numbers are transmitted.
- 3) When a Customer converts existing DS1 facilities provided under PrimeXpress Service to Primary Rate Access Facilities, installation charges for the Primary Rate Access Facility are waived.
- 4) Hunting Service is included in PrimePlex PRI rates.

H) Payment Options

A PrimePlex PRI customer may select a month-to-month option or a two- or three-year term commitment. All PRI services and features at a given premises must be subscribed to the same payment option.

I) Additions to Service

During the term commitment period, the customer may add PRI services at the same monthly rate as specified in the initial order. The term commitment period for these additional services will end coterminous with the initial order.

J) Changes in Future Term Commitment Rates

If the Company reduces, in its tariffs, the monthly rates for term commitments for PrimePlex PRI services, the subscriber may be allowed to cancel the existing order without penalty, providing the subscriber signs up for a new term commitment of equal or greater monetary value. The subscriber will be subject to all terms, conditions, and prices of the new term commitment.

SECTION 4 - LOCAL SERVICE. CONT'D

4.6 PrimeXpress Network Service

4.6.1 Description

PrimeXpress Network Service is a digital service providing trunk connections from an end user's Private Branch Exchange, Key System, or other device to the TCG Switch Port. PrimeXpress Network Service is available as a DS1 (1.544 Mbps) connection providing 24 voice-grade (DS0) communications channels. A PrimeXpress facility may be provided as stand-alone service or provisioned over an existing or new AT&T ACCU-Ring DS3 facility. PrimeXpress Network Service is available on a 1, 2, or 3 year term commitment. The Customer may opt to utilize PrimeXpress Network Service for outgoing calls only (DOD), incoming calls only (DID) or a combination of both inbound and outbound calls. When the Customer elects to utilize PrimeXpress Network Service for both inbound and outbound calls, they may choose Combo service which allows incoming calls to an attendant only or they can elect to utilize DID/DOD service which allows incoming calls to be terminated directly to an End User behind a PBX or capable Key System. When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company.

PrimeXpress Network Service trunks configured for Inbound and Outbound calling functionality that, upon detection by the Company, exceed 90% utilization for inbound calling will be subject to the rates, terms and conditions for the PrimeConnect calling option listed below.

Customers who terminate a term commitment for a stand-alone PrimeXpress facility and purchase a PrimeXpress facility provisioned on a new or existing AT&T ACCU-Ring facility for a term equal or greater to the time remaining on their current PrimeXpress term commitment will not be liable for early termination charges.

SECTION 4 - LOCAL SERVICE. CONT'D

4.6 PrimeXpress Network Service (Cont'd)

4.6.2 PrimeXpress High Volume Inbound Calling Option: PrimeConnect

(C)

Digital PrimeXpress Network Service can be configured to support high volumes of inbound calling. PrimeConnect is the High Volume Inbound Calling Option that: 1) supports a maximum of two rate centers per DSI facility or T1 trunk, 24 DSOs, within the TCG designated service area, 2) supports inbound calling only, 3) equals or exceeds an average call duration of 10 minutes per call, 4) equals or exceeds CCS loading of 32 CCS, and 5) equals or exceeds 200,000 MOU per month. The customer will be charged rates for PrimeConnect Service as described in Section 8. The Company reserves the right to audit the customer's PrimeXpress usage for the above conditions.

The Customer is required to subscribe to a sufficient number of DSI trunks at a maximum usage of 400,000 MOU so as not to degrade the TCG network below an incoming call completion rate of 99%. The call completion rate is based on an average of the busy hours occurring during the customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the customer to increase the number of PrimeConnect trunks to satisfy the call completion criteria listed above.

(C)

A. PrimeConnect Customer Access Requirements

(N)

PrimeConnect supports inbound calling only, and does not include outbound calls to Operator Assisted Services, Special Service Codes, Special Access Codes or Carrier Access Codes. The customer is responsible for securing individual business lines, or other appropriate facilities, to access these services and/or codes, including:

- Conference Calls,
- Calls to Special Service Codes including 500, 700, 900, 976, Nil (where N = 2-9) or other special service codes that may be created, or
- Calls to 0 and 00

- B. PrimeConnect is intended solely for the purpose of providing local and intraLATA non-toll access into a customer's location. In the event that local and intraLATA non-toll calls placed into a customer's location become subject to additional charges imposed by connecting carriers or by regulation, the Company reserves the right to modify the facility rate charges for traffic into the location upon 30 days written notice to the customer. The customer has the option to accept the rate change(s) or terminate the contract without penalty, unless specifically bound to specific commitments associated with capital recovery, special construction, or other issues written into the customer's contract or agreement with the Company over and above the normal terms and conditions of the contract or agreement.

(N)

F) Features

- 1) Backup D Channel: Automatically takes over for a failed D channel in case of trouble. This is purchased as part of a 23B+Backup D PRI Arrangement.
- 2) Call-by-Call Service Selection (CBC): Provides an option to the Dedicated B Channel Configuration allowing B channels to be configured to access multiple services on a per-call basis. With this optional feature, separate facilities are not needed for individual services such as DID, DOD, and business dial tone lines. The customer premises equipment signals the local serving central office as to what type of services to access for each call.
- 3) Calling Party Number (CPN): Allows the user to have access to the directory number of the calling party. Provision of per-call and line blocking capabilities is a function of the customer premises equipment and is the responsibility of the customer.
- 4) Multiple Facility Signaling Control: Allows the D channel one PRI Arrangement to provide signaling for up to 20 PRIs terminating on a switch module. Requires Backup D channel.

SECTION 4 - LOCAL SERVICE. CONT'D

4.10 TCG PrimePlex PRI Service (Cont'd.)

F) Features (Cont'd)

- 5) Original Called Number (OCN): (must be ordered for specific PRI ISDN trunks) places the callers original dialed digits into the OCN field of the selected ISDN message, for inbound calls which have been forwarded one or more times. These ISDN messages, containing OCN information, will be transmitted over the designed Data-Channels (D-Channels, primary, secondary, and back-up) on the ISDN trunk.
- 6) 2 B-Channel Transfer on PRI: allows a controller that is interfaced over an ISDN PRI to initiate the transfer of one of its calls to another call so that the two end-users are connected to each other within the switch and the two PRI B-channels to the controller are released.

G) Application of Rates

- 1) Business dial tone line functionality is included in the PrimePlex PRI Service rates and charges.
- 2) When DID numbers are ordered from the preceding, a DID line connection service charge applies for each B channel dedicated to DID service, or DID-simulated facility group member over which DID numbers are transmitted.
- 3) When a Customer converts existing DSI facilities provided under PrimeXpress Service to Primary Rate Access Facilities, installation charges for the Primary Rate Access Facility are waived.
- 4) Hunting Service is included in PrimePlex PRI rates.

H) Payment Options

A PrimePlex PRI customer may select a month-to-month option or a two- or three-year term commitment. All PRI services and features at a given premises must be subscribed to the same payment option.

I) Additions to Service

During the term commitment period, the customer may add PRI services at the same monthly rate as specified in the initial order. The term commitment period for these additional services will end coterminous with the initial order.

J) Changes in Future Term Commitment Rates

If the Company reduces, in its tariffs, the monthly rates for term commitments for PrimePlex PRI services, the subscriber may be allowed to cancel the existing order without penalty, providing the subscriber signs up for a new term commitment of equal or greater monetary value. The subscriber will be subject to all terms, conditions, and prices of the new term commitment.
