EXHIBIT C

McLeodUSA Telecommunications Services, Inc. ("McLeodUSA")

Description:

Adding Non-Standard Report Request:

Non-Standard Report Request applies to customer requests for non-standard reports. The standard Order Charge (which is described and listed in Sections 5.1.9 and 5.1.13 of the tariff), will apply per report when a customer makes a non-standard report request, such as, but not limited to, Traffic Reports (identifies how many calls are getting busy signals; and is used to determine if an additional line or features are needed) and Local Measured Service ("LMS") Detail Requests (which require local calling detail for a given billing period). An individual Order Charge will be applied for each report. Separate reports are required for each month or invoice, location and account.

This is not a duplicate or additional bill request, nor is it a standard report, such as the summary for the Federal Excise Tax refund on paid long distance service that McLeodUSA provided free via the website. Rather, these customer requests usually require accessing the data in the archives, drafting a report or summary, and then providing the information to the customer. Completing an order request is an internal requirement for each month/invoice we access in the archives, since these are not readily available. Accordingly, without incurring costs for additional system development, McLeodUSA is proposing to use the Order Charge for responding to the requests and applying the rate for our internal services.

Rationale:

McLeodUSA's rationale for the changes noted above are to help McLeodUSA be competitive within the market place.
