Re: Grade Crossing Reconstruction Project
City of Cleveland, Cuyahoga County
East 93rd Street
AAR 475 980 Y

This letter is seeking approval for the relocation of warning devices associated with the above referenced crossing.

The existing devices are to be replaced with a newer set of devices obtained from a crossing in Canton, Ohio. The roadway was recently rebuilt by the City of Cleveland. This relocation is necessary to allow the devices to be in compliance with roadway clearance requirements of the PUCO.

The new warning device system will consist of 32 ft gates and associated 4 in gate lights and a cantilever light support, all of which will be mounted on new foundations.

New conduit and wiring will tie all the devices together to the existing relay housing.

The signal contractor is Railroad Traffic Control, Inc

The crossing rebuild contractor (who is furnishing the warning system conduit) is Wintrow Construction Corp.

A warning device layout plan will be furnished by Railroad Traffic Control directly to the PUCO.

Should you have any questions, I can be reached at 440 227 3780

Respectfully,

Michael J. Kole
President
