P.U.C.O. NO. 5

Section 10. INTEGRATED SERVICES DIGITAL NETWORK (ISDN) SERVICE

INDIVIDUAL LINE BUSINESS AND RESIDENCE BASIC RATE INTERFACE (BRI)

10.1 GENERAL

Effective July 10, 2007, ISDN-BRI service will be no longer offered to new customers. The service offering will be “grandfathered”, i.e., continued to be made available to those customers already receiving the service. Please contact the Customer Service department to discuss alternative forms of service. (N)

10.11 Integrated Services Digital Network (ISDN) describes the end-to-end digital telecommunications network architecture which provides for the simultaneous access, transmission, and switching of voice, data, and video services. These functions are provided via channelized transport facilities. The ISDN architecture consists of digital switching systems which connect Basic Rate Interface (BRI) lines to their serving central office. Caller ID – Number is included with this service.

10.12 BRI is an optional service arrangement which can be used in conjunction with a customer’s individual Line Business or Residence service. It uses the ISDN architecture to provide the customer with the capabilities of simultaneous access, transmission, and switching of voice, data, and video services via channelized transport. In addition, BRI provides the customer with access to Circuit Switched Voice Service and Circuit Switched Data Service.

10.13 A BRI arrangement obtains its capabilities from a properly equipped telephone company central office switch. The BRI arrangement may consist of up to two “B” channels and one “D” channel (2B+D).

a. **“B” Channel:** The “B” Channel is a bi-directional synchronous channel capable of supporting 64 kilobit per second (kbps) of digital transmission of information between users. One Primary Directory Number with one Primary Directory Listing for the first “B” Channel ISDN Service line is provided. Additional listings may be provided as specified for Additional Listing Service in the Directory Listings section of this Company’s tariff.

b. **“D” Channel:** The “D” Channel is a 16 kbps digital signaling channel that carries signaling and control for the “B” channel.

P.U.C.O. NO. 5

Section 10. INTEGRATED SERVICES DIGITAL NETWORK (ISDN) SERVICE

INDIVIDUAL LINE BUSINESS AND RESIDENCE BASIC RATE INTERFACE

10.1 GENERAL (Continued)

10.14 All ISDN Service lines consist of central office facilities, including the outside plant facilities, extended from the Company's switching equipment to the customer's demarcation point.

10.15 ISDN Service is provided at the option of the Company, and is furnished subject to central office switching capacity and the availability of outside plant facilities. The availability, functionality, and capabilities of the ISDN Service features may vary, or may not be available dependent upon type of serving central office switch, related software controlling that switch and associated outside plant.

10.16 The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of ISDN Service render any facilities provided to the customer obsolete or require modification or alteration of such customer's equipment or systems, or otherwise affect its use or performance.

10.2 SERVICE DESCRIPTION

Effective July 10, 2007, ISDN-BRI service will be no longer offered to new customers. The service offering will be "grandfathered", i.e., continued to be made available to those customers already receiving the service. Please contact the Customer Service department to discuss alternative forms of service. (N)

10.21 **CIRCUIT SWITCHING** – Circuit Switching is a switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call. Circuit Switched Service provides the ability to originate and receive circuit switched data calls over a 64 kbps "B" channel. The customer may choose among the following Circuit Switched features based upon application needs.

- a. **Electronic Key Telephone Service (EKTS) Features:** Electronic Key Features provide the customer with the ability to access the following features where available:

Issued: July 10, 2007

Effective: July 10, 2007

In accordance with Case No. 07-789-TP-ZTA
Issued by the Public Utilities Commission of Ohio
