**RE: Columbia Gas of Ohio Southwest Delaware Project**  
**OPSB Case No. 06-0141-GA-BTX**

Dear Dr. Snyder:

Please find enclosed the Phase I Cultural Resources Survey for the above referenced project. The report recommends no further work for the project. URS requests you review the enclosed project and provide your review comments to the Ohio Power Siting Board.

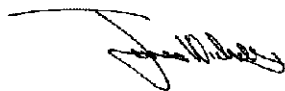

Columbia Gas is under some time pressure to begin staging for the project. The designated lay down areas are shown on Figures 2A and 2G of the report. The lay down area on Figure 2A is described as Quarry Staging Area and is a mostly graveled lot that forms part of a stone quarry on the west side of Section Line Road. This area was observed to be entirely disturbed. The second area on Figure 2G is described as Drilling Area A and will be used to stage drilling equipment for a bore that is planned at that location. This location was shovel tested with all pits negative for cultural resources.

URS therefore requests your permission to begin staging at these locations prior to your complete review of the Phase I survey.

If you have any questions or comments please feel free to contact me at 513-651-3440.

Sincerely,

URS Corporation

James Nicholas, Ph.D.
