## **Customer Notice Provided to Customers**

MCImetro Access Transmission Services LLC d/b/a Verizon Access Transmission Services ("Verizon Access"), a Competitive Local Exchange Carrier (CLEC), is modifying the default Percent Interstate Usage (PIU) in several of its intrastate and interstate switched access tariffs. This change will bring uniformity to the Verizon Access tariffs and switched access billing.

This change will occur in each state where a former Brooks Fiber Communications company or former WorldCom company's tariff exists, harmonizing these tariffs with their corresponding interstate tariffs. The effective date proposed for these tariffs and billing modifications is December 1, 2007.

The default PIU factor applies only in situations where the access customer has chosen not to provide a PIU report based on its own usage records. The proposed change will impact only those customers who have chosen not to provide a customer-specific PIU report and who choose not to file a PIU report as a result of this notification.

If you have questions regarding this matter, please contact us at the following email address: [CCABSDisputes@verizonbusiness.com](mailto:CCABSDisputes@verizonbusiness.com).

REGULATIONS (cont'd.)2.3 Obligations of the Customer (cont'd.)2.3.3 Jurisdictional Report Requirements (cont'd.)A) (cont'd.)

If the Customer has no originating traffic within the end office for which sufficient call detail exists to develop a PIU factor, and the Customer has not supplied a PIU factor on either the quarterly update report or the Access Service Request, the Company will designate a PIU factor of 75% for Feature Group B or Feature Group D terminating access minutes. For originating Toll Free access minutes, where the call detail is insufficient to determine the jurisdiction of the call, the Customer shall provide the Company with a projected PIU factor. If such a PIU has not been provided for Toll Free access minutes, the Company will designate the default PIU factor of 75%. This factor will be applied to the next billing cycle and continue until the Customer provides a PIU factor. When the Customer does provide the PIU factor, the Company will update the customer's PIU factors within fifteen (15) business days.

B) For purposes of developing the projected interstate percentage, the Customer shall consider every call that enters the Customer's network at a point within the same state as the state where the called station is located to be intrastate and every call that enters the Customer's network at a point in a state different from the state in which the called station is located to be interstate.

C) These whole number percentages will be used by the Company to apportion the use, rates, and/or nonrecurring charges between interstate and intrastate until a revised report is received.

If a Customer has never provided the Company a Quarterly PIU Report or the Customer is a new customer, the Company will assume the PIU factor to be the same as specified in the Access Service Request, except, if the Company can reasonably determine jurisdiction by the Customer's monthly call detail, the Company will determine the Customers' PIU on a monthly basis. Alternatively, if a Customer has never provided the Company a Quarterly PIU Report and has never provided a PIU factor in an Access Service Request, the Company may elect to set the Customer's PIU factor on a default basis as 50 percent interstate and 50 percent intrastate traffic for the next calendar quarter.
