Issues of Integrity with the REX Pipeline Corporation

At the Barnesville Meeting with the Rocky Mountain Express Corporation, the spokes person said to the crowd that the company had a federal permit.

Then at the Somerset Township meeting on 1 Nov 2007, a representative of the REX Pipeline said that the "FERC permit will be issued", when called upon that statement and asked to put it in writing and sign it, the REX people then back tracked from their original statement.

So were these statements misspoken words or a lap in judgment or just a lie to be used as leverage?

In my area integrity has a lot of value and people can be trusted because of their integrity. As that this is a company that may have a federal permit issued, are they not to be held to the local standards of doing business?
