EXECUTIVE BOARD

Honorable Alan R. Schriber
Chairman
Ohio Power Siting Board
180 East Broad St.
Columbus, OH 43215-3793

Dear Chairman Schriber:

I write today in support of American Municipal Power-Ohio's (AMP-Ohio) recent application for a certificate of Environmental Compatibility and Public Need for an Electric Power Generating Station and Related Facilities (docket number 06-1358-EL-BGN) in Meigs County. Please enter this letter into the record.

This American Municipal Power Generating Station is extremely important to my district, and in fact all of Ohio, because it is a positive advance for my constituents, for our economy and for the energy needs of Ohio. AMP-Ohio's proposed project represents a significant investment in our area and recognizes the availability of a skilled labor force ready for the work this project will create. Early estimates indicate that this project would bring approximately \$20 million into the local economy on an annual basis. This injection into our economy would provide significant financial support for the local community and the Southern Local School District.

I was pleased to hear that AMP-Ohio has committed to the use of Powerspan emissions control technology on the proposed plant. It is my understanding that once on-line this plant will be among the cleanest in the nation.

Again, I would like to express my strong support for AMP-Ohio's application. If you have any questions please feel free to contact Joan Gregory of my staff at 202-225-5705. Thank you again for your attention to this application.

Sincerely,

Charles Wilson
Member of Congress
