Other* This filing makes various non-material textural changes to Part 17 of Tariff No. 20 in a pre-detariffing clean-up effort and impacts only non-residential tier 2 services.

**NOTE: During the interim period between the effective date of the rules and an Applicant’s Detariffing Filing, changes to existing business Tier 2 and all toll services, including the addition of new business Tier 2 and all new toll services, will be processed as 0-day TRF filings, and briefly described in the “Other” section above.*

All Section I and II applications that result in a change to one or more tariff pages require, at a minimum, the following exhibits. Other exhibits may be required under the applicable rule(s). ACN, ACO, AMT, ATC, ATR, and CIO applications see the 4901:1-6-14 Filing Requirements on the Commission’s Web Page for a complete list of exhibits.

Exhibit	Description:
A	The tariff pages subject to the proposed change(s) as they exist before the change(s)
B	The Tariff pages subject to the proposed change(s), reflecting the change, with the change(s) marked in the right margin.
C	A short description of the nature of the change(s), the intent of the change(s), and the customers affected.
D	A copy of the notice provided to customers, along with an affidavit that the notice was provided according to the applicable rule(s).

Section III. – Attestation

Registrant hereby attests to its compliance with pertinent entries and orders issued by the Commission.

AFFIDAVIT

Compliance with Commission Rules and Service Standards

I am an officer/agent of the applicant corporation, AT&T Ohio _____, and am authorized to make this statement on its behalf.

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission’s rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on November 16, 2007 _____ at Cleveland, Ohio

*/s/ Maryann H. Mackey
Sr. Director, Regulatory Affairs

November 16, 2007

- *This affidavit is required for every tariff-affecting filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.*

VERIFICATION

I, Maryann H. Mackey verify that I have utilized the Telecommunications Application Form for Routine Proceedings provided by the Commission and that all of the information submitted here, and all additional information submitted in connection with this case, is true and correct to the best of my knowledge.

* /s/ Maryann H. Mackey Sr. Director, Regulatory Affairs

November 16, 2007

**Verification is required for every filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.*

Send your completed Application Form, including all required attachments as well as the required number of copies, to:

**Public Utilities Commission of Ohio
Attention: Docketing Division
180 East Broad Street, Columbus, OH 43215-3793**

Or

Make such filing electronically as directed in Case No 06-900-AU-WVR

EXHIBIT A

1. ISDN DIRECT (cont'd)
C. Regulations (cont'd)

1. (cont'd)

b. Termination charges are not applicable to changes in the physical location of the customer's ISDN Direct Services as long as the service originates in the same serving central office area.

2. Standard configurations of services are listed in the ISDN Technical Reference Specifications. On request non-standard configurations may be provided at an additional charge based on costs incurred. All customer-provided equipment used to interface with ISDN Direct is required to conform with the Technical Reference Specifications as used by the Company Technical References and found in:

/1/

<u>Subject</u>	<u>Technical Reference</u>
Ameritech ISDN Interface Specifications	AM-TR-NIS-000068

The Technical References can be obtained from:

SBC Help Desk and Document Center
(517) 788-6872

3. Distance Extension Charges, as set forth in Paragraph E. will apply for customers who are within the serving central office and who are served beyond the normal transmission range specified in the interface specifications.

/1/

4. ISDN Direct is offered only from central offices where the Company has arranged facilities for such service.

(C)

5. When the customer's premises and the central office providing ISDN Direct service are located in different Service Areas, Base Rate Service, contained in Part 15, Section 3, rates and charges will apply. Customers provided this service arrangement will require three Interexchange Mileage component charges and six Channel Mileage Termination charges for each ISDN direct line they purchase.

(T)/2/
(T)

6. In cases where the customer's premises are in Independent Telephone Company (ITC) serving areas, the Company will assess Base Rate Interexchange Mileage charges only to the point of meet with the ITC or intermediate ITC. Charges for ITC services will be assessed by the ITC.

PART 17 - ISDN Services
SECTION 2 - ISDN Prime Services

5th Revised Sheet No. 1
Cancels
4th Revised Sheet No. 1

1. ISDN PRIME SERVICE

A. DESCRIPTION

ISDN (Integrated Services Digital Network) Prime is a digital business service that provides PBX equipment and host computer access to a wide variety of switched services. These switched services include Circuit Switched Voice (local calling, Message Toll Service, Wide Area Telephone Service (WATS), and Success 800) and Circuit Switched Data. Each ISDN Prime will allow connection of the aforementioned services via a single central office connection. This service allows PBX equipment and host computer type devices to connect to central office services in bulk quantity, rather than on a line by line or service by service basis. (T)

Each ISDN Prime connection provides access from a customer premises to the Company's Circuit Switched Voice, and Circuit Switched Data services via a 1.544 Mbps central office termination and a 1.544 Mbps Local Distribution Channel to the customer's premises. The Local Distribution Channel must be an SBC Ohio provided facility. It may be a DS1 Local Distribution Channel, ProtectPath 1.5 or part of a DS3, ProtectPath 45, OC-3, OC-12, or other suitable Company facility with Clear Channel Capability. The rates and charges for the channel are in addition to those for the ISDN Prime connection. The central office connection is provided in base capacities of twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D). The "D" channel is used for out-of-band signaling and control of the "B" channels. Where technology permits, "D" channels can be shared by multiple ISDN Primes for the same customer. "B" channels can be dedicated to each Circuit Switched Voice and Circuit Switched Data service by type or they can be shared among service types by using the call by call feature.

Issued: September 8, 2005

Effective: September 8, 2005

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

1. ISDN PRIME SERVICE (cont'd) (T)

D. FEATURES

1. Standard Features

Alternate Routing

Allows a customer's incoming ISDN Prime traffic to be directed to a predetermined alternate route when all B Channels in the ISDN Prime trunk group are busy. The incoming traffic will be route advanced to another ISDN Prime Trunk Group or to an analog DID trunk group as long as the alternate route is within the same switch, is billed to the same customer of record, and is billed usage on the same rate basis. Calls may not route between trunk-side services and line-side services. All incoming calls will automatically alternate route on both an out of service and overflow basis to the alternate ISDN Prime Trunk Group or an analog DID trunk group. Multiple Alternate Routes may be linked together although the total number of Alternate Routes may be limited due to technical restrictions.

Call by Call for Trunk Groups

Allows the Circuit Switched Voice and Data services enabled on the ISDN Prime to share "B" channels and arrange them as a single trunk group. (T)
This allows incoming and outgoing Circuit Switched Voice and Data calls to utilize "B" channels on a call by call basis. Without this capability, each service will have a dedicated "B" channel. (T)
(D)
(D)

Caller ID

All calling numbers presented to the services working on ISDN Prime can be delivered to the customer's CPE, including calls made to Direct Inward Dialing Service telephone numbers. This feature is optioned on a per trunk group basis only and is offered in appropriately equipped central offices. (T)

Blocked Caller ID will be delivered to certain qualifying customers as described in FCC Memorandum Opinion and Order, CC Docket No. 91-281, adopted January 4, 2002. Such customers must certify to SBC compliance with the waiver order's eligibility requirements.

Clear Channel Capability

The "B" channels on the ISDN Prime are clear, since all signaling and control functions are handled by the "D" channel. This allows all 64 kbps on each "B" channel to be used for customer information over the ISDN Prime connection. Calls over the network may either by 56 kbps or 64 kbps depending on the public network in place between the ISDN Prime and the distant end of the call. (T)

1. ISDN PRIME SERVICE (cont'd) (T)

D. FEATURES (cont'd)

1. Standard Features (cont'd)

"D" Channel Control of Multiple ISDN Primes (T)
Provides capability for a single "D" channel to provide signaling and control for one or more ISDN Prime connections. The twenty-fourth channel on one or more ISDN Prime connections is then made available for incoming and outgoing calls.

Dedicated Trunk Groups (T)
Allows all 23 channels (24 where technology permits), or a subset thereof, to be used as stand alone trunk groups. Each channel is capable of handling incoming or outgoing Circuit Switched Voice, or Circuit Switched Data. (T)

Digital Voice Transmission
All voice calls are transmitted using digital signaling.

Direct Inward Dialing Signaling
Permits incoming dialed calls from the exchange network to reach a specific number served by customer premises equipment (CPE) without the assistance of an attendant. It also provides for the unique identification of the call based on digits sent to the CPE by the central office. The central office will outpulse digits to the CPE which can further process the calls as desired.

Equal Access for InterLATA Calling (T)
Allows the customer to preselect an Interexchange Carrier for each Circuit Switched Voice or Circuit Switched Data trunk group. The carrier designation can be changed for charges shown in SBC Operating Companies Access Service Tariff, F.C.C. No. 2, Section 4.2(C). (T)

PBX Station ID Capability (T)
Allows the station user's number (calling party) to be transmitted over the ISDN Prime "D" channel from Direct Inward Dialing equipped CPE PBXs that use ISDN Prime. This number is provided by the originating station and must have an associated Direct Inward Dialing telephone number working in the central office.

(T)
(T)

3. Distance Extension Charges, as set forth in Paragraph E. will apply for customers who are within the serving central office and who are served beyond the normal transmission range specified in the interface specifications.
4. ISDN Direct is offered only from central offices where the Company has arranged facilities for such service.
5. When the customer's premises and the central office providing ISDN Direct service are located in different Service Areas, Base Rate Service, contained in Part 15, Section 3, rates and charges will apply. Customers provided this service arrangement will require three Interexchange Mileage component charges and six Channel Mileage Termination charges for each ISDN direct line they purchase.
6. In cases where the customer's premises are in Independent Telephone Company (ITC) serving areas, the Company will assess Base Rate Interexchange Mileage charges only to the point of meet with the ITC or intermediate ITC. Charges for ITC services will be assessed by the ITC.

1. ISDN PRIME SERVICE

A. Description

ISDN (Integrated Services Digital Network) Prime is a digital business service that provides PBX equipment and host computer access to a wide variety of switched services. These switched services include Circuit Switched Voice (local calling, Message Toll Service, Wide Area Telephone Service (WATS), and Success 800) and Circuit Switched Data. Each ISDN Prime will allow connection of the aforementioned services via a single central office connection. This service allows PBX equipment and host computer type devices to connect to central office services in bulk quantity, rather than on a line by line or service by service basis.

Each ISDN Prime connection provides access from a customer premises to the Company's Circuit Switched Voice, and Circuit Switched Data services via a 1.544 Mbps central office termination and a 1.544 Mbps Local Distribution Channel to the customer's premises. The Local Distribution Channel must be an AT&T Ohio provided facility. It may be a DS1 Local Distribution Channel, ProtectPath 1.5 or part of a DS3, ProtectPath 45, OC-3, OC-12, or other suitable Company facility with Clear Channel Capability. The rates and charges for the channel are in addition to those for the ISDN Prime connection. The central office connection is provided in base capacities of twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D). The "D" channel is used for out-of-band signaling and control of the "B" channels. Where technology permits, "D" channels can be shared by multiple ISDN Primes for the same customer. "B" channels can be dedicated to each Circuit Switched Voice and Circuit Switched Data service by type or they can be shared among service types by using the call by call feature. (T)

Issued: November 16, 2007

Effective: November 16, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17689

1. ISDN PRIME SERVICE (cont'd)

D. Features

1. Standard Features

Alternate Routing

Allows a customer's incoming ISDN Prime traffic to be directed to a predetermined alternate route when all B Channels in the ISDN Prime trunk group are busy. The incoming traffic will be route advanced to another ISDN Prime Trunk Group or to an analog DID trunk group as long as the alternate route is within the same switch, is billed to the same customer of record, and is billed usage on the same rate basis. Calls may not route between trunk-side services and line-side services. All incoming calls will automatically alternate route on both an out of service and overflow basis to the alternate ISDN Prime Trunk Group or an analog DID trunk group. Multiple Alternate Routes may be linked together although the total number of Alternate Routes may be limited due to technical restrictions.

Call by Call for Trunk Groups

Allows the Circuit Switched Voice and Data services enabled on the ISDN Prime to share "B" channels and arrange them as a single trunk group. This allows incoming and outgoing Circuit Switched Voice and Data calls to utilize "B" channels on a call by call basis. Without this capability, each service will have a dedicated "B" channel.

Caller ID

All calling numbers presented to the services working on ISDN Prime can be delivered to the customer's CPE, including calls made to Direct Inward Dialing Service telephone numbers. This feature is optioned on a per trunk group basis only and is offered in appropriately equipped central offices.

Blocked Caller ID will be delivered to certain qualifying customers as described in FCC Memorandum Opinion and Order, CC Docket No. 91-281, adopted January 4, 2002. Such customers must certify to AT&T Ohio compliance with the waiver order's eligibility requirements. (T)

Clear Channel Capability

The "B" channels on the ISDN Prime are clear, since all signaling and control functions are handled by the "D" channel. This allows all 64 kbps on each "B" channel to be used for customer information over the ISDN Prime connection. Calls over the network may either by 56 kbps or 64 kbps depending on the public network in place between the ISDN Prime and the distant end of the call.

1. ISDN PRIME SERVICE (cont'd)

D. Features (cont'd)

1. Standard Features (cont'd)

"D" Channel Control of Multiple ISDN Primes

Provides capability for a single "D" channel to provide signaling and control for one or more ISDN Prime connections. The twenty-fourth channel on one or more ISDN Prime connections is then made available for incoming and outgoing calls.

Dedicated Trunk Groups

Allows all 23 channels (24 where technology permits), or a subset thereof, to be used as stand alone trunk groups. Each channel is capable of handling incoming or outgoing Circuit Switched Voice, or Circuit Switched Data.

Digital Voice Transmission

All voice calls are transmitted using digital signaling.

Direct Inward Dialing Signaling

Permits incoming dialed calls from the exchange network to reach a specific number served by customer premises equipment (CPE) without the assistance of an attendant. It also provides for the unique identification of the call based on digits sent to the CPE by the central office. The central office will output digits to the CPE which can further process the calls as desired.

Equal Access for InterLATA Calling

Allows the customer to preselect an Interexchange Carrier for each Circuit Switched Voice or Circuit Switched Data trunk group. The carrier designation can be changed for charges shown in Ameritech Operating Companies Access Service Tariff, F.C.C. No. 2, Section 4.2(C). (T)

PBX Station ID Capability

Allows the station user's number (calling party) to be transmitted over the ISDN Prime "D" channel from Direct Inward Dialing equipped CPE PBXs that use ISDN Prime. This number is provided by the originating station and must have an associated Direct Inward Dialing telephone number working in the central office.

1. ISDN PRIME SERVICE (cont'd)

E. Technical References

Customer provided equipment compatibility requirements are listed in the Company ISDN Interface Specifications. The availability and functions of the features and capabilities may vary by serving central office. All customer provided equipment used to interface with ISDN Prime is required to conform with the Technical Reference Specifications as used by the Company and found in Technical Reference:

<u>Subject</u>	<u>Technical Reference</u>
Ameritech ISDN Interface Specification	AM-TR-NIS-000068
