Docket No: CP07-208-000
Follow up to Accession No: 200709205093

To Whom It May Concern:

We are writing in regard to the REX East Project Draft Environmental Impact Statement dated November, 2007 which we just recently received in the mail.

The attached letter was submitted September 19, 2007. One additional concern that we have is that our main well and water source is within very close range of the proposed excavation site for the new pipeline. We hope the water source will not be affected.

Our property is mentioned several times in the Draft Environmental Impact Statement as follows:

Page 3-39: 3.5.14 - Route variation

Page 3-49: Route Alternatives

J-12: Map Route Variation

Page 5-21: 36 - Route Variation

We appreciate and agree with the recommendation of the route variation through our homestead that FERC has proposed. In addition to avoiding our homestead, seventeen less tiles would be damaged and the water source would no longer be of concern.

At this point in time, Rockies Express Pipeline has shown no interest in your recommendations. If Rockies Express continues to ignore your recommendations with no detailed explanations, we are depending on FERC to step in and enforce your proposed recommendations. When individual landowners are approached by large corporations such as Rockies Express, FERC becomes our only voice to be heard.

If Rockies Express declines your recommendation of the route variation, we want a detailed explanation as to why.

Thank you in advance for any help in this matter.

Sincerely,

David and Ronald Kile
