CP07-208-000 REX Pipeline East

As of 8 January, 2008, I have not seen or been offered a copy of any study or report that shows the need for the Rockies Express Pipeline East transporting natural gas to the United States East Coast. I have been privileged to information that the Eastern United States is having a surplus of natural gas at this time.

The state of California is begging for more natural gas resources for their energy consumption.

So is this a company that is going to make billions off of the people of the United States for something that county doesn't need? Will this show up on network television as a part of the "Fleecing of America" segment? The stigma of the astronomically priced hammer and toilet seat is still in the minds of America.
