Staff Investigation Report and Recommendation

Case No.: 07-1269-EL-BNR

Project: Montgomery Road 138 kV Transmission Line
Relocation Project Phase II

Applicant: Duke Energy Ohio

Report Date: 10 January 2008

Automatic Approval Date: 17 January 2008 (Construction Notice process)

Waiver Requests: None

Inspection Date(s): 2 January 2008

Staff Assigned: J. O'Dell

Summary of Staff Recommendations (see report text for discussion):

Application: ☒ Approval ☐ Disapproval ☐ Approval with Conditions
Waiver: ☐ Approval ☐ Disapproval ☒ Not Applicable

Summary of Staff Recommended Conditions (see report text for discussion):

- None

Projected Docket Closure Date (if automatically approved): 1 January 2011

Investigation Report

Project Description: This project involves the relocation of approximately 5,230 of single circuit 138 kV transmission line. The relocation is necessary to accommodate an Ohio Department of Transportation project to widen Montgomery Road. The current transmission line would be shifted from the north side of Montgomery Road to the south side of the road. No new easements would be required, as the relocated transmission line would be installed into the existing distribution circuit alignment which is within road r-o-w.

Site Description: Minimal vegetative clearing will be required and access to all structures will be from Montgomery Road. Land use consists of urban residential, commercial and road uses. The project is located in Symmes Township, Hamilton County.

Discussion/Comments/Concerns: The construction of this project should pose only minimal negative social and ecological impacts.
