Please provide comments on the Draft Environmental Impact Statement (EIS). Please provide any edits, changes, or additions for the Final EIS. Please be as specific as possible in referencing the Draft EIS.

13 Jan 08

*I did attend the Free meeting Free evening  
8 Jan 08 in Pittsfield. My thoughts have brought  
me to write this now.*

*There seems to be several different burying  
depths for the Free pipeline. I am concerned  
that it be at least 5 ft. deep for the  
following reasons:*

- 1.) It is to have a higher pressure than the  
Pan Handle lines.*
- 2.) It is much larger than the Pan Handle  
lines.*
- 3.) The line changes some direction on my land  
several times.*

*With this higher pressure and larger diameter.*

This is to certify that the images appearing are an  
accurate and complete reproduction of a case file  
document delivered in the regular course of business

REGULATORY COMMISSION

will raise the temperature of the gas causing  
a greater temperature variation around this pipe.  
As the line changes some direction several times  
on my land the chance for a pressure problem is present.

Don Handle Gas had to use concrete in some places  
to stabilize their lines for safety. This has not occurred  
on my land so far.

Thank you for your consideration

Sincerely,  
John Harold
