LOCAL EXCHANGE TELECOMMUNICATIONS SERVICES

Business Analog Trunk Service

Analog PBX Trunk Service provides a Customer with a single, voice grade communications channel that can be used to place or receive one call at a time. Analog PBX Trunk Service provides a connection of Customer-provided private branch exchanges (PBX) to the public switched telecommunications network.

Each Analog PBX Trunk can be configured as an Inward, Outward or Two-Way Trunk. Customers may order Individual Telephone Numbers Service for use with Inward and Two-Way Trunks for additional charges. This signaling enables a PBX to route an incoming call directly to an extension number without the need for an attendant.

Analog PBX Trunk Service is offered on a per message rate usage basis, which consists of a flat rate monthly rate component and a usage-sensitive rate component.

Each trunk corresponds to one or more telephonic communications channels that can be used to place or receive one call at a time.
