Re: OEP/DG2E/Gas 2
Rockies Express Pipeline, LLC
Docket No. CP07-208-000
Comment on Filing

To Whom It May Concern:

As suggested in the information we received from your office dated January 30, 2008, we tried to "comment on filing" electronically. However, we received a message stating that there was a problem with the server and to try back later. In order to expedite my comments, I am sending this via United States mail service.

We live at 743 Todhunter Road in Monroe, Ohio. It is our understanding that the pipeline will physically go through the lot/land immediately to the west of our home, about 75' from our property line. We have been asked to allow temporary land use on a piece of our property during the installation of the pipeline which we are considering.

Although we do have environmental concerns regarding the pipeline being so close to our home, our major concern is what affect the new pipeline will have on the value of our home. I believe we are the only residential home that this will directly affect along this stretch of the pipeline. If any research has been done on this subject, we would like to see this information before construction begins. In addition to the decrease in home value, we would also like to see information regarding research of safety issues, leaking issues, environmental issues restrictions to adjacent homeowners, etc.

We look forward to your response.

Sincerely,

Ray and Suzanne Amburgey
