RECEIVED-DOCKETING DIV

Dear Sir

This is a letter about two cases

First case NOD-20-08 US Air

This is a rate increase O'H's American  
Water Co. that is in Ill. wants.

They got a raise last year and now  
they want another raise this year and  
then they want another raise every year  
after that.

We pay \$35. dollars a month now for  
water, if you have a meter or not, or if  
your not at home much or if there is two  
or four or eight, every body pays the same.

Up the road a couple of miles there  
is another water Co, they pay \$10. dollar a  
month. but they don't drive new trucks  
with snow blades on or own the homes where  
the wells are at.

So if you live on one side of the  
road you pay \$10. dollars a month and the other  
side of the road with O'H's American Water  
you pay \$35. dollars and what more.

This is to Case no 07-551-EL Air.

This is the rate increase Electric Cos.  
want.

Do you know how much this is  
going to hurt every body in Ohio,  
From business to people paying a  
lot more.

I know if you watch T.V. or read  
the newspaper, everybody is saying  
(Recession) why because the price of  
oil that cost you more to drive more at  
the grocery store to get the food to you,  
and so people have less to spend that  
is going to hurt everything.

Are you going to ~~keep~~ keep this recession  
along or are you going to help the people.

If you want to hear more call  
or write

Thank you
