*Via Electronic Filing*

Ms. Renee Jenkins  
Docketing Division  
Public Utilities Commission of Ohio  
180 East Broad Street, 13<sup>th</sup> Floor  
Columbus, Ohio 43215-3793

Re: Case No. 08-0381-TP-ATA

Dear Ms. Jenkins:

The Chillicothe Telephone Company resubmits, via electronic filing, its application to Detariff Certain Tier 2 Services and make other changes related to the Implementation of Case No. 06-1345-TP-ORD.

This is a re-filing in a new case number. As directed by staff, I have changed the case number on this cover letter and on the first revised sheet of this filing; all other pages are to be filed in this case number likewise.

Source files for this filing are not readily available for electronic submission at this time. These documents are available upon request as individual sheets (per page reference at the top of each tariff.)

Please contact me if you have any questions regarding this filing.

Cordially,

/s/ Tammy Perry  
Regulatory Assistant

**AFFIDAVIT**

***Compliance with Commission Rules and Service Standards***

I am an officer/agent of the applicant corporation, \_\_\_\_\_, and am authorized to make this statement on its behalf.  
(Name)

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on (Date) \_\_\_\_\_ at (Location) \_\_\_\_\_

\*(Signature and Title) \_\_\_\_\_ (Date) \_\_\_\_\_

- *This affidavit is required for every tariff-affecting filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.*

---

**VERIFICATION**

I, \_\_\_\_\_  
verify that I have utilized the Telecommunications Application Form for Detariffing and Related Actions provided by the Commission and that all of the information submitted here, and all additional information submitted in connection with this case, is true and correct to the best of my knowledge.

\*(Signature and Title) \_\_\_\_\_ (Date) \_\_\_\_\_

*\*Verification is required for every filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.*

---

***Send your completed Application Form, including all required attachments as well as the required number of copies, to:***

HORIZON BASE RATE SERVICE

(N)

<b>A. DESCRIPTION</b>
-----------------------

Horizon Base Rate Service provides for the simultaneous two-way transmission of synchronous digital signals at speeds of 2.4, 4.8, 9.6, 19.2, 56, or 64 Kbps. The service is available in either two-point or multi-point configurations, except for 64 Kbps service which is available only in a two-point configuration. The service is available between:

- Customer-designated premises.
- Customer-designated or Other Telecommunications Carriers (OTC) premises to the premises of an OTC for connection to the services or facilities of the OTC.
- Company wire centers for interconnecting Horizon Base Rate Services, Horizon 128, 256 and 384 Services and Horizon DS1 Service via channel mileage and channel mileage terminations.
- Company wire centers for interconnection central office multiplexers.
- Customer-designated premise and a Company wire center where multiplexing, bridging, hubbing, or cross-connection functions are performed.

HORIZON BASE RATE SERVICE (cont'd.)

(N)

**A. DESCRIPTION (cont'd.)**

Multi-point bridging is an optional broadcast polling arrangement which consists of a single master station and two or more remote stations. Transmissions from the master station are received by all remote stations. Transmissions from the remote stations are received only by the master station.

For the optional secondary channel feature, the following transmission speeds as they relate to Horizon Base Rate Service apply:

Horizon Base Rate Service	Secondary Channel
2.4 Kbps	133.0 Bps
4.8 Kbps	266.0 Bps
9.6 Kbps	533.0 Bps
19.2 Kbps	1.066 Kbps
56.0 Kbps	2.66 Kbps

**B. DEFINITIONS**

**Multi-point Bridging**

This capability provides communications between three or more Horizon Base Rate Service locations.

**Secondary Channel**

Secondary channel provides a companion channel over the same facility used to provide the primary channel, but at a lower bit rate.

TARIFF P.U.C.O. NO. 1  
PRIVATE-LINE TARIFF

---

HORIZON BASE RATE SERVICE (cont'd.)

(N)

<b>C. TERMS AND CONDITIONS</b>
--------------------------------

1. Multi-point bridging for Horizon Base Rate Services at speeds of 2.4, 4.8, 9.6, 19.2 and 56 Kbps are only available from appropriately equipped wire centers. Customers must choose their bridging locations from those equipped offices. A service inquiry must be made to determine availability of service.
2. Multi-point bridging is not available for Horizon Base Rate Service at 64 Kbps.
3. For multi-point bridging, the mileage to be used in determining the monthly rate for the channel mileage is calculated on the airline distance between the serving wire center of each customer designated premises and a wire center bridging location, plus the airline distance between multiple bridging locations, where applicable. When a multi-point service is connected to a central office multiplexer, the mileage calculation will also include the airline distance between a bridging location and a central office multiplexer location.
4. Horizon Base Rate Service is provided at the option of the Company where facilities permit. If appropriate facilities are not available, *Special Construction* charges may apply.

HORIZON BASE RATE SERVICE (cont'd.)

(N)

<b>C. TERMS AND CONDITIONS (cont'd.)</b>
--

5. For optional Secondary Channel:

- Secondary channel is not available with 64 Kbps service.
- While the primary and secondary channels operate independent of each other, they must co-terminate in common customer equipment.
- When a multi-point circuit is provisioned to utilize secondary channel, all stations on the multi-point circuit must be equipped with secondary channel capability.
- The secondary and primary channels operate independently of each other, over the same facilities, and must be co-terminated in customer common equipment.

<b>D. FEATURES</b>
--------------------

1. **Optional Features**

**Central Office Multiplexing and Cross Connect Services**

These optional services are available with Horizon Base Rate Service. Refer to Central Office Multiplexing and Cross Connect Services in Section 8 of this tariff.

**Error Correction**

This feature is available in conjunction with a Horizon Base Rate Service channel operating at a speed of 2.4, 4.8, 9.6 or 19.2 Kbps. It is available in either point-to-point or multi-point configurations, except for 19.2 Kbps service which is available only in a point-to-point configuration.

**Multi-Point Bridging**

Provides for communications capability between three or more Horizon Base Rate Service locations.

**Secondary Channel**

This feature is available in conjunction with a Horizon Base Rate channel operating at a speed of 2.4, 4.8, 9.6, 19.2 or 56 Kbps (considered the primary channel) and provides a companion channel over the same facility used to provide the primary channel, but at a lower speed.

HORIZON DEDICATED DIGITAL COMMUNICATIONS SERVICE (DDCS) (N)

<b>A. DESCRIPTION</b>
-----------------------

DDCS 128, 256, and 384 Service provides for the simultaneous two-way transmission of a serial, bipolar, return-to-zero, isochronous digital signal at speeds of 128, 256 and 384 Kbps. The service is available in a two-point configuration only between:

- Two customer-designated premises.
- A customer-designated premise and a Chillicothe Telephone (Company) wire center where cross-connection or hubbing is performed.

<b>B. DEFINITIONS</b>
-----------------------

**DS1**

A service which provides for the simultaneous two-way transmission of a serial, bipolar, return-to-zero, isochronous digital signal at a terminating bit rate of 1.544 megabits per second (Mbps). Timing is provided by the Company through the Company's facilities to the customer in the receiving bit stream.

CENTRAL OFFICE MULTIPLEXING AND CROSS CONNECT SERVICES (N)

<b>A. DESCRIPTION</b>
-----------------------

Central Office Multiplexing is a wire center based optional service that either derives multiple transmission paths from a single transmission source or combines multiple transmission sources into a single transmission path. Central Office Multiplexing is available in the following configurations:

- DS1 (Analog, Company exchange rate service or Horizon DDCS 128, 256, 384 Service) is a serving arrangement that either converts a DS1 into twenty-four channels for use with Analog, Company exchange rate service or DDCS 128, 256, 384 Service or converts twenty-four Analog, Company exchange rate service or DDCS 128, 256, 384 Service channels into a DS1 channel.

Multiplexer Cross-Connection (MCC) is an arrangement that allows one channel of a multiplexed Horizon DS1 Service to be connected to one channel of the same bit rate and like signaling of another multiplexed Horizon DS1 Service. The lesser speed channel may be either an analog channel or a DDCS channel provided at 64 Kbps of bandwidth between the two DS1 multiplexers. MCC will be provided at all, or between two, Company locations where multiplexing is performed.

TARIFF P.U.C.O. NO. 1

---

CENTRAL OFFICE MULTIPLEXING AND CROSS CONNECT SERVICES (cont'd.) (N)

<b>B. DEFINITIONS</b>
-----------------------

**Cascade Multiplexing**

Occurs when a higher speed channel is de-multiplexed to provide channels of a lesser capacity and one of the lesser capacity channels is further de-multiplexed.

**Hub Rearrangement**

Occurs when an existing channelized Company digital service between a customer premise and a hub location is multiplexed onto a new higher speed Company digital service at the hub.

CENTRAL OFFICE MULTIPLEXING AND CROSS CONNECT SERVICES (cont'd.) (N)

<b>F. PRICING (cont'd.)</b>
-----------------------------

2. **Payment Plans**

- **Month-to-Month**

Interconnection Central Office Multiplexing is available on a month-to-month basis.

- **Term Payment Plans**

Interconnection Central Office Multiplexing is available under the Term Payment Plan (TPP) whereby customers may elect to pay a fixed rate for a 12, 36 or 60 month period. After the minimum period is satisfied, the monthly rate will apply unless a new TPP is selected.

3. **Termination Charges**

Termination Charges will apply to service terminated prior to the contracted period. The termination charge for all TPP terms for Central Office Multiplexing and Cross Connect Services will be 50% of the remaining monthly obligation for the term selected.

P.U.C.O. approval of the above termination liability language is not intended to indicate that the P.U.C.O. has sanctioned any particular legal result should a dispute arise between the parties. In the event of a dispute, signatories to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

ACCESS LINE RATES

A. Class and Grade of Service

1. Business Access Line Service	Current Monthly Rate	Maximum Monthly Rate
Each individual access line (1) .....	\$ 39.80	\$ 39.80
*Each 2 party access line (1) .....	24.55	24.55
*Each 5 party access line (1) .....	18.05	18.05
Business Trunk line (2).....	80.00	160.00
Business Key System Trunk line (2) .....	60.00	120.00

\*NOTE: No application for service, regrades, moves and changes for 2 party or 5 party business service will be accepted.

\*NOTE: Only individual access line service will be available to business customers where facilities permit. In the areas where facilities are not available, the customers will pay the above rates. All Business customers must be one party or greater six months from the effective date of this tariff sheet.

2. Residence Access Line Service	Current Monthly Rate	Maximum Monthly Rate
Each individual access line (1).....	\$ 19.80	\$ 19.80
Each 2 party access line (1) .....	18.15	18.15
Each 4 party access line (1) .....	16.80	16.80

NOTE: No new applications for service and changes shall be accepted for:

- a. 2 or 4 party service six months after effective date of this sheet unless 1 party service is not available at service request location.

Applications for downgrade's will not be accepted six months from the effective date of this sheet.

NOTE: No more than 4 parties will be served on one line, and not more than two business customers will be served on any line serving residential customers.

(1) Denotes Tier 1 Core service.      (2) Denotes Tier 1 Non-core service.

Rates for Tier 1 Core services are capped at current rates. Rates for Tier 1 Non Core services are capped at current rates until September 24, 2006. After September 24, 2006, Tier 1 Non Core rates can be increased to a maximum cap of double the initial rate, other than the second local exchange access line and call waiting, which are limited to a ten percent increase per year until they cap at double the initial rate. This pricing flexibility is in accordance with O.A.C. 4901:1-4 and Alt Reg Case # 04-1253-TP-ALT effective September 24, 2004.

EXCHANGE SERVICES

1. Selective Call Screening Service  
(Originating Line Screening)

Selective Call Screening Service or Originating Line Screening (OLS) is a two-digit code passed by the Telephone Company's local central office switch with the Automatic Number Identification (ANI) at the beginning of a call that provides information about the line originating the call. The information provided in the two-digit code is designed to inform the exchange or interexchange and/or the operator service provider about certain service classes or special characteristics of the billing number associated with the line originating the call. Under this arrangement, operators accept only those originating toll calls that are made collect, billed to a third number, or billed to a calling card.

- A. Selective Call Screening is offered subject to the availability of suitable facilities and equipment.
- B. The minimum contract period for Selective Call Screening is one month.
- C. Customers subscribing to Selective Call Screening are responsible for all toll charges billed to their lines, which are not carried solely over the Telephone Company's facilities.
- D. This service is offered to single party residence and business lines and trunk lines.
- E. If a call originates with the Company but is not carried solely over the Company's facilities, the Company will send, with the ANI, the two-digit code that identifies the call as being selectively screened. The Company assumes no liability for calls completed by any other entity or carrier, as long as the two-digit code accompanies the ANI forwarded to the other carrier. The Company is responsible for properly handling calls which are selectively screened and are not carried over any other carrier's network or facilities.

	Nonrecurring	Monthly Rate
Selective Call Screening, per line	**	\$5.60

\*\* A Secondary Service Order charge applies as shown in Section 7 of P.U.C.O. 12, General Exchange Tariff. No installation charges apply for this service when ordered on an Initial Service Order.

2. Billed Number Screening Service (BNS)

(N)

A. General

Billed Number Screening Service is available to subscribers of the Company's local exchange services. This service is intended to prevent the charging of collect and/or third number billed calls to a customer's telephone number.

B. Regulations

- 1) The Company will place information required to utilize Billed Number Screening Service in the Line Information Database (LIDB) or other database necessary to implement Billed Number Screening Service. In the event a call is placed and charged to a number which should have been prevented by Billed Number Screening, the Company makes no guarantee and assumes no liability arising out of the use or misuse of Billed Number Screening Service by any other entities, including, but not limited to, Interexchange Carriers. The Company is fully responsible for calls charged to numbers which should have been prevented by Billed Number Screening Service, that originate and terminate within the Company's service territory, and are carried over no other carrier's network or facilities.
- 2) Billed Number Screening Service is offered subject to the availability of suitable facilities.
- 3) The minimum contract period for Billed Number Screening Service is one month.

CUSTOM CALLING SERVICE

A. General

1. The Telephone Company provides Custom Calling Service which includes one or more of the following features:

a. Speed Calling

Speed Calling permits the customer to place local and message toll calls to a preselected group of telephone numbers by dialing abbreviated codes. Speed Calling is provided in capacities of eight or thirty telephone numbers.

b. Three Party Conference

Three Party Conference permits the customer to add a third party to an existing connection thereby establishing a three-way conference call. If the customer wants the ability to hang up and let the remaining two parties continue talking, they must subscribe to Three Party Conference with Transfer. Both features are offered at the same monthly rate.

c. Three Party Conference with Transfer

Same as Three Party Conference except the originating party can hang up and the remaining parties can continue talking.

d. Call Waiting

Call Waiting permits the customer, upon receipt of a tone signal indicating that a call is waiting, to place the existing call on hold and answer the second waiting call. Cancel Call Waiting is an enhancement that is automatically provided to all Call Waiting customers at no additional cost. Cancel Call Waiting allows a customer to cancel the Call Waiting feature on a per call basis.

e. Hot Line

The Hot Line feature requires a non-dial telephone instrument and when placed in an off-hook condition the line is programmed to automatically route the call to a predetermined telephone number.

f. Warm Line

The Warm Line feature provides direct routing of a call to a predetermined telephone number without dialing. The Warm Line is programmed to automatically route a call to a predetermined telephone number when off-hook for a specified time period.

EXCHANGE SERVICES (cont'd.)

CUSTOM CALLING SERVICE (cont'd.)

A. General (cont'd.)

g. Call Forwarding

Call Forwarding permits the customer to activate and deactivate a transfer of his incoming calls to another central office line. Remote Activation is an enhancement to Call Forwarding that allows customers to activate and deactivate their assigned Call Forwarding features from a remote location. Remote Activation is provided upon request at no additional cost.

(C)

h. Inquiry Only

Inquiry Only permits the customer to place a call on hold, originate a new call and then consult privately with the second party.

(C)

i. Customer Identified Number Assignment (CINA)/Special Ring

Customer Identified Number Assignment (CINA)/Special Ring permits a second directory number assigned to the same telephone line.

(T)

j. Denied Originating

This feature, which is not subscriber programmable, permits a subscriber to deny call origination, but still receive incoming calls. Subscribers with Denied Origination are not given a dial tone when going off-hook. This is a helpful reminder to the subscriber that calls cannot be originated from this particular line. This feature is available to business customers only.

(T)

(N)

k. Denied Terminating

This feature denies terminating calls to a line programmed to deny terminating calls. This feature is not subscriber programmable. A caller attempting to terminate to a line marked for Denied Termination will hear a recorded announcement. Calls routed to the announcement because of Denied Termination are not charged to the caller. The customer will not receive any indication of an attempted call. This feature is available to business customers only.

l. Selective Call Acceptance

The Selective Call Acceptance feature allows customers to screen incoming calls by creating a list of telephone numbers from which the customer is willing to accept calls. Selective Call Acceptance allows only those calls given importance by the customer to ring through.

CUSTOM CALLING SERVICE (cont'd.)

A. General (cont'd.)

m. Six Party Conference

The Six Party Conference feature allows customers to sequentially call up five parties and add them together to have a six (6) party telephone conference.

- B. The service is offered from central offices where the Telephone Company has arranged the equipment for custom calling and is furnished subject to the availability of facilities.

C. Monthly Rates

1. When one Custom Calling feature is provided on a line, the following monthly rates apply per line:

<u>Feature</u>	<u>Current Monthly Rate</u>	<u>Maximum Monthly Rate</u>
a. Speed Calling - 8 number capacity	\$ 2.50	-
- 30 number capacity	4.00	-
b. Three Party Conference	2.50	-
c. Three Party Conference with Transfer	2.50	-
d. Call Waiting (2)	4.00	8.00
e. Hot Line	1.85	-
f. Warm Line	1.85	-
g. Call Forwarding	3.00	-
h. Inquiry Only	2.50	-
i. Customer Identified Number Assignment (CINA)/Special Ring	1.55	-
j. Denied Originating	2.00	-
k. Denied Terminating	2.00	-
l. Selective Call Acceptance	1.00	-
m. Six Party Conference	3.00	-

2. When more than one Custom Calling feature is provided on a line, the following discounts apply:

2 features . . . . . \$ .25 per feature discount  
3 or more features . . . . . .50 per feature discount

(2) Denotes Tier 1 Non-core service.

(D)

Rates for Tier 1 Core services are capped at current rates. Rates for Tier 1 Non Core services are capped at current rates until September 24, 2006. After September 24, 2006, Tier 1 Non Core rates can be increased to a maximum cap of double the initial rate, other than the second local exchange access line and call waiting, which are limited to a ten percent increase per year until they cap at double the initial rate. This pricing flexibility is in accordance with O.A.C. 4901:1-4 and Alt Reg Case # 04-1253-TP-ALT effective September 24, 2004.

DIRECT INWARD DIALING

(N)

1. Direct Inward Dialing (DID) to Switching Systems Located on  
Customer Premises

A. General

- (1) DID service is furnished subject to the availability of facilities and numbers. This service is furnished from a Telephone Company central office on trunk lines (excluding FX and WATS) to customer premises switching equipment equipped for compatible DID operation.
- (2) This service includes the central office switching equipment necessary for inward dialing from the central office directly to stations associated with the customer premises switching equipment.
- (3) This service must be provided on all lines in a central office trunk group that are arranged for inward service. Each trunk group equipped with DID will be billed as a separate service.
- (4) The rates and charges specified in B following contemplate the use of equipment and serving arrangements considered standard by the Telephone Company. If non-standard equipment or service is requested and provided, rates and charges will be based on the costs involved.
- (5) When DID service is furnished in connection with customer premises equipment, regulations and charges for interconnection, regulations and charges for maintenance of service, and general regulations apply as specified in this tariff. Operational characteristics of interface signals between the Telephone Company provided interconnection and the customer provided switching equipment must conform to the rules and regulations the Telephone Company considers necessary to maintain proper standards.

DIRECT INWARD DIALING (Cont'd)

- (6) The Telephone Company shall not be responsible to the customer or authorized user if changes in the Telephone Company's protection criteria, facilities, operations, or procedure cause the facilities provided by a customer or authorized user to be obsolete, or to require modification.
- (7) One primary listing will be furnished without charge for each separate trunk group as specified in P.U.C.O. 12, Section 3 for PBX service. Rates and charges as specified therein shall apply for each regular additional listing desired for DID numbers furnished as part of this service.
- (8) Customer premises equipment must be arranged by the customer to provide for the interception of calls to vacant and non-working assigned DID numbers.
- (9) DID numbers in groups of 100 may be reserved for future use at rates specified herein. The Telephone Company does not guarantee to provide reserve numbers arranged in a consecutive manner. The Telephone Company will be responsible for interception and administration of these numbers.
- B. The following rates and charges apply in addition to the rates and charges applicable to any other service or equipment which this service is associated, e.g. trunk line rate:

DID service for:	MONTHLY RATE	
(a) 10 DID numbers	\$11.75	(N)
(b) 100 DID numbers	\$73.30	
(c) DID Trunk Termination in central office, each in addition to the Exchange Rate Tariff trunk line	\$47.00

LOCAL DIRECTORY ASSISTANCE AND OPERATOR ASSISTED CALLS

A. Local Operator Assisted Calls

1. Definition of Service – Local Operator Assisted Calls is a service which provides for an operator assisted or an automated operator when such assistance is requested by a calling party in completing a local call, and the calling party requests that the local call be billed collect, or billed to a calling card number, or billed collect station-to-station, or collect person-to-person.
2. Rates – The rates for the various services described in Paragraph (1) are contained on Sheet No. 7.1 – Section 2, Message Toll Telephone Service Tariff, P.U.C.O. No. 6.
3. In addition to the rates appearing in Paragraph (2) the appropriate tariffed local message charge will also be billed to the entity designated by the originating calling party.

B. Local Directory Assistance

Local Directory Assistance (DA) is a service that provides published telephone numbers or an indication of "non-published status" for the local serving area.

1. Regulation

- a. The number of telephone numbers furnished on each call is limited to two.
- b. Services furnished to the following are exempt from charges for Local Directory Assistance:

1. (D)
2. Long term care facility patients as detailed in Section 6, Sheet No. 1 of the Message Toll Telephone Service Tariff, P.U.C.O. No. 6. (T)
3. Persons with sight disability as detailed in Section 6, Sheet No. 2 of the Message Toll Telephone Service Tariff, P.U.C.O. No. 6; and
4. (D)

2. Rate \$ .95 per call

5. Block

A Local Directory Assistance (DA) block is available to residential and business customers upon request for a one time per line non-recurring charge.

This block will prevent access to local directory assistance.

Non-recurring charge \$9.95 per line

Issued: March 22, 2006

900 SERVICES CALL BLOCKING

900 SERVICES CALL BLOCKING

A. Description

900 services call blocking is an optional service providing residential and nonresidential customers with the capability to block the origination of direct dialed calls to all 900 services.

B. Regulations

1. LEC-provided blocking of 900 services shall be provided where technologically feasible.
2. 900 services blocking is to be offered to residential customers at no charge for initial requests.
3. 900 services blocking is to be provided to nonresidential customers, free of charge, on a one-time basis, during a 60-day period after the inception of service.
4. Charges associated with nonresidential customers' initial requests (after the sixty-day free enrollment period has expired) and subsequent requests, and residential customers' subsequent requests, for 900 services blocking will not exceed the company's service order charge.
5. Residential customers obtaining service at a new location shall be afforded blocking of 900 services at no charge, even if they exercised an option to block services at a previous location at no charge.
6. Nonresidential customers obtaining service at a new location shall be afforded blocking of 900 services at no charge during a 60-day period after the inception of service, even if they exercised an option to block 900 services at a previous location at no charge.
7. Customers may elect to remove 900 services blocking free of charge. Requests by customers to remove 900 services blocking must be in writing.

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS)

A. General

1. The Telephone Company provides Custom Local Area Signalling Services (CLASS) which includes one or more of the following:

- a. Repeat Dialing

Automatically redials the last outgoing number after the customer activates the service by dialing an activation code. Repeat Dialing monitors the busy line and performs a call set-up when both the originating and terminating lines become idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Repeat Dialing service status. This service may also be used to recall a called party after the conversation has been terminated.

- b. Call Return

Enables a customer to return the last incoming call unless the call is from a private or blocked number, whether or not it was answered. The customer dials an activation code and the last incoming call is automatically dialed. If the line is busy when the customer activates the service, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next thirty minutes both the calling and called parties' lines are checked periodically. The call set-up is made when both the originating and terminating lines are idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Call Return service status. Up to ten calls may be held in queue for the customer's Call Return activation. (T)

- c. Call Return Block

Prohibits a customer who subscribes to Call Return from returning a call by activating the Call Return code. By dialing an activation code before placing a local call, a customer may "block" the called party from returning a call to them, using Call Return. This service is free to all customers who subscribe to a one-party line, and is available on a per call basis only. After activating the Call Return Block code and placing the call, the line reverts back to normal status and future calls will not be blocked from being returned by Call Return subscribers. The caller must activate the code before placing each call in order to have Call Return Block activated.

TARIFF P.U.C.O. NO. 2  
EXCHANGE RATE TARIFF

---

EXCHANGE SERVICES

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS) (cont'd.)

A. General (cont'd.)

d. Caller ID

Allows the customer to view the telephone number of the calling party when receiving a telephone call. The telephone number of the calling party is displayed on a customer-provided display device. However, the calling party may subscribe to services which will prevent the disclosure of their telephone number. In such instances, a privacy indication will appear on the customer-provided display device instead of the calling party's telephone number. Customers can either subscribe to this service or Caller ID Name and Number which delivers the name and number of the calling party. (See paragraph e. below.) (T)

e. Caller ID Name And Number (T)

Allows the customer to view the name and telephone number of the calling party before answering a call. A customer-provided special display telephone or call display unit is required. Calls from out of the local calling area will be shown as "out of the area" or "unavailable" if not connected by Signaling System 7 (SS7). Calls from customers who have used Select Line Blocking or Universal Per Call Blocking will be shown as "private" or "anonymous". Caller ID Name and Number (T) is available where facilities permit. If the customer only needs delivery of the telephone number, they would subscribe to Caller ID. (See paragraph d. above.)

f. Selective Call Reject

Provides the customer with a method of blocking calls from certain numbers, which may or may not be known to the customer. The customer may create a screening list of up to nine (9) telephone numbers, and place them in network memory through an interactive dialing sequence. The customer may also activate the service after receiving a call, and thus place the number associated with that call on the Selective Call Reject screening list. To activate the feature, the customer dials an activation code and the telephone number of each incoming call is checked against the customer's Selective Call Reject screening list.

g. Anonymous Call Rejection

Anonymous Call Rejection allows the customer to program their line to universally block all calls that arrive as a private or blocked number delivery call. By dialing an activation code, the blocking function will be activated and no private or blocked number delivery calls will get through. The customer will hear a confirmation recording that the feature is activated. Another code is dialed to deactivate. The customer will hear a confirmation recording that the feature has been deactivated. The calling party receives a denial announcement that the private call is being rejected and to hang up, do not block their number and call again.

EXCHANGE SERVICES

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS) (cont'd.)

A. General (cont'd.)

h. Selective Call Forwarding

Allows customers to create a special list of telephone numbers and a destination number through an interactive dialing sequence. By dialing an activation code, the customer activates the service. Only incoming calls from numbers appearing on the list will be forwarded to the predetermined remote station.

i. Selective Call Forwarding - Remote Activation

Allows customers who subscribe to Selective Call Forwarding to activate their feature from a remote location. By dialing a special seven digit telephone number, entering their own telephone number and an assigned four-digit PIN number, they can select the remote number to which the selected numbers may be forwarded or change the numbers on their selected list.

j. Distinctive Ringing / Call Waiting

Allows customers to designate several numbers that will be recognized immediately as important calls by means of distinctive alerting signal. Up to nine (9) numbers may be added to the screening list through an interactive dialing sequence. The customer then dials an activation code that activates the service. When the incoming call is identified as one of the numbers on the list, a distinctive ring will be produced in the customer's telephone to alert them that an important call is coming in. If the customer is using the phone and one of the selected numbers comes through on Call Waiting, the customer will receive a distinctive call waiting signal to let them know an important call is awaiting them.

k. Universal Per Call Blocking (per call blocking)

Allows the customer to prevent the disclosure of his name and/or telephone number to a called party. By dialing an activation code, the customer may block delivery of his name and/or telephone number. If the called party has a customer-provided display device, they will see a private status message in place of the calling name and/or number. This service is provided on a universal basis, where technically possible, at no monthly charge. All Payphone Service lines in the Chillicothe Telephone Company's service area will be equipped with Universal Per Call Blocking. (T)

TARIFF P.U.C.O. NO. 2  
EXCHANGE RATE TARIFF

---

EXCHANGE SERVICES

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS) (cont'd.)

A. General (cont'd.)

l. Select Per Line Blocking (per line blocking)

Prevents disclosure of the customer's name and/or telephone number on all outgoing calls, without the necessity of an activation code. If the called party has a display device, a private status message will be displayed instead of the calling party's name and/or telephone number. This service will be provided to all non-published customers, where technically possible, upon request from the customer. There will be no monthly charge for this service to the non-published customer. The service is also available to published customers, where technically possible, at a monthly charge of \$1.00. Deactivation of the blocking of their name and/or number is available to both published and non-published customers, at their discretion. To deactivate the privacy status, the customer would dial a deactivation code before placing a call. This will allow delivery of their name and/or telephone number to the calling party. After completion of the call, the line reverts back to the privacy status. Law Enforcement, Domestic Shelters and other special agencies will be offered free Select Per Line Blocking.

m. Call Trace

Call Trace allows customers to request an automatic trace of the last call received by dialing an activation code immediately following termination of the last incoming call. The customer will hear a recording explaining the charges and how to proceed with or terminate the trace. An announcement will also inform the customer if the trace has been successful and offers a number to call for further instructions.

n. Call Trace Removal

Call Trace Removal is available to customers at no cost if they find that the Call Trace procedures are being abused causing high monthly activation charges. A release form must be signed absolving the Telephone Company from non-availability of Call Trace activity. The \$6.55 non-recurring charge would apply to add Call Trace back to their line.

o. Toll Restriction with PIN

This feature gives the subscriber the option of denying toll access to all users from their line with the exception of those using a four digit PIN number. Only one PIN per line may be assigned. The subscriber may pick the initial PIN or the Telephone Company can assign the initial PIN. Thereafter the subscriber may dial an access code and change the PIN themselves.

p. Incoming Call Control

This feature is available to residential and business customers in all Chillicothe Telephone exchanges. Incoming Call Control intercepts calls that are marked "unavailable", "out-of-area", "unknown", or "anonymous" on Caller ID units. When unidentified callers dial the subscriber's number, they will receive an announcement informing them that, "the number you have reached does not accept calls from telemarketers. If you are a telemarketer, please add this number to your Do Not Call list and hang up now. Otherwise, please press '1' or stay on the line".

The subscriber's Caller ID CPE (customer provided equipment) will still display the calling party's classification (e.g. unknown number or out-of-area). The subscriber must subscribe to a Caller ID service in order to subscribe to Incoming Call Control because the feature dips in to the Caller ID database to determine the caller's classification.

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS) (cont'd.)

B. Custom Local Area Signalling Services (CLASS) are central office-based telecommunications services capable of providing several optional service enhancements. These services will be offered from central offices where the equipment and facilities have been properly arranged. Custom Local Area Signalling Services (CLASS) cannot be functional unless both the called and calling parties are served by, and the call is routed through, appropriately equipped central offices, and routed over appropriately equipped facilities for calls between such equipped central offices. When a service cannot be functional, notification will be given that the call is outside the call area served by the service.

C. Rates and Charges

The following monthly rates and non-recurring charges apply to Custom Local Area Signalling Services (CLASS), and are in addition to the rates and charges applicable to any associated service, equipment and facilities.

1. Recurring Charges

Custom Local Area Signalling Services (CLASS)	Current / Maximum Monthly Rate Per Line Equipped
a. Repeat Dialing	\$ 6.00 / -
b. Call Return	6.00 / -
c. Call Return Block *	No Monthly Charge ++
d. Caller ID (delivers telephone no. only) (1)	6.00 / 6.00
e. Caller ID Name and Number	8.00 / -
f. Selective Call Reject	6.00 / -
g. Anonymous Call Rejection	1.00 / -
h. Selective Call Forwarding	6.00 / -
i. Selective Call Forwarding - Remote Activation*	.50 / -
j. Distinctive Ringing / Call Waiting	6.00 / -
k. Universal Per Call Blocking (per call blocking)*	No Monthly Charge ++
l. Select Per Line Blocking (per line blocking)* (2) (Customers with non-published numbers)	1.00 / 2.00 (No Additional Charge)
m. Call Trace * (2)	No Monthly Charge ++
	per activation 3.00 / 6.00
n. Call Trace Removal	None
o. Toll Restriction with PIN*	3.00 / -
p. Incoming Call Control*	3.00 / -

\* Not eligible for discount

INTEGRATED SYSTEMS DIGITAL NETWORK SERVICES (ISDN)  
BASIC RATE INTERFACE (BRI)

A. GENERAL DESCRIPTION

1. Integrated Systems Digital Network (ISDN) Services are a public network-based set of communications services that make it possible to send, receive, and modify information using regular telephone lines. These services are based on the National Integrated Services Digital Network (ISDN) standards. ISDN provides end-to-end digital communications and gives the ability to transmit data and voice over the same telephone line simultaneously (a user can send information from a personal computer and talk to the person on the other end of the line at the same time). This functionality is provided via channelized transport facilities. The ISDN architecture consists of digital central office switching systems which connect Basic Rate Interface (BRI) lines to customers' premises.
2. ISDN BRI is an optional service arrangement that can be used in conjunction with a customer's residential service, individual business line or Centrex service. It uses the ISDN architecture to provide the customer with the capability to transmit voice and data simultaneously over the same digital line. Under various optional arrangements, BRI provides the customer with access to Circuit-Switched Voice Services, and Circuit-Switched Data Services.
3. An ISDN BRI arrangement obtains its capabilities from an ISDN-capable, Telephone Company central office switch. The BRI ISDN arrangement provides two communications channels (but using only one physical line) between a telephone (or computer, fax machine or other equipment) and the digital central office. These channels are called Bearer, or B Channels. Another channel, called the Delta or D Channel, is used for signaling purposes and in some applications can be used for low speed packet data communications. The complete BRI ISDN line is known as 2B+D.

A. GENERAL DESCRIPTION (cont'd.)

3. (cont'd.)

(T)

- a. **B Channel** - The B Channel is a bi-directional synchronous channel capable of supporting digital transmission speeds of 64 kilobits per second (kbps). Each B Channel may be configured in one of the following ways:
    - (1) **Circuit-Switched Voice** - Allows the user to originate and receive only voice calls over a single circuit-switched B Channel.
    - (2) **Circuit-Switched Data** - Allows the user to originate and receive only data calls over a single circuit-switched B Channel.
    - (3) **Alternate Circuit-Switched Voice/Data** - Allows the user to originate and receive either voice calls or data calls over a single circuit-switched B Channel, but not simultaneously.
  - b. **D Channel** - The D Channel is a 16 kbps digital signaling channel that carries signaling and control for the B Channels.
4. All ISDN lines consist of central office facilities (including outside plant facilities) extended from the Telephone Company's switching equipment to the customer's demarcation point.
5. Directory Numbers
- a. **Primary Directory Number** - Each ISDN Line includes a single primary telephone directory number. On a given 2B+D ISDN line, calls are routed to the appropriate terminal device (voice telephone or computer/data terminal) based on the type of call (voice or data) presented to the ISDN line.
  - b. **Additional Directory Numbers** - An ISDN line may have additional telephone directory numbers. The additional telephone number(s) may originate or receive calls independent of the user's Primary Directory Number; however, each B Channel is allowed only one simultaneous circuit connection at a time.

B. CIRCUIT SWITCHING SERVICE DESCRIPTIONS

Circuit Switching is a switching arrangement in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of channels is dedicated to a given call. Circuit-Switched Service provides the ability to originate and receive circuit-switched voice and/or data calls over a 64 kbps B Channel. The customer may choose among the following Circuit-Switched features based upon application needs:

1. **Clear Channel Capability** - A characteristic of the transmission paths on the B Channels that allows the full bandwidth of 64 kbps to be available to the customer. It is also possible to bridge two B Channels together to achieve data transmission speeds of 128 kbps. However, ISDN interconnection to or through non-ISDN equipped central offices will potentially be subjected to analog transmission or sub-rated to 56 kbps per channel.
2. **Additional Call Offering** - This feature allows the user to be notified of an additional call when the telephone set is busy. Similar to conventional Call Waiting, multiple incoming calls to a directory number or secondary telephone number (if purchased) can be terminated to the telephone.
3. **Multiline Hunt Service** - This feature allows incoming calls to a busy directory number to search through a predetermined list of directory numbers. This may be another ISDN directory number on the same (or a different) B Channel or (for voice calls) an analog line. The hunting arrangement may be series completion, linear or circular.
4. **Call Pick-Up** - This feature allows the user to dial a special code (or depress a feature button) to answer calls directed to other stations.
5. **Custom Calling Services** - Applicable Custom Calling Services (except for those superseded by ISDN counterparts) are available at rates and charges specified in the Custom Calling Services section of the Company's tariff. The following Custom Calling features found specifically in this tariff will be charged at rates shown on the ISDN Rate Schedule:
  - a. **Call Hold** - This feature allows the user to place a call on hold by pressing the appropriate button on the telephone set.

C. TECHNICAL SPECIFICATIONS

1. **Transmission Specifications**

The standard transmission parameters for an ISDN line utilizing an ISDN Basic Rate Interface (BRI) consists of: A maximum of 38.5db loop loss at a 40Kz test tone terminated into a 135 ohm impedance. The 38.5db loss includes all central office facilities, outside plant facilities and inside wiring.

2. **Customer Premise Equipment and Facilities**

Compatible customer premise equipment is required to utilize ISDN Services. All equipment used to interface with these services is required to conform with National ISDN guidelines as referenced in the following Bellcore specifications:

<u>Document Number</u>	<u>Description</u>
SR-NWT-002661	National ISDN Generic Guidelines for ISDN Terminal Equipment on Basic Rate Interface
SR-NWT-001953	Generic Guidelines for ISDN Terminal Equipment on Basic Access Interfaces

The Telephone Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provisioning of ISDN Services render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

D. REGULATIONS AND CONDITIONS

1. Unless specifically exempted, ISDN Services shall be subject to all general regulations applicable to the provision of service by the Telephone Company as stated in the general tariff.
2. ISDN Services are provided at the option of the Company. These services are furnished subject to central office switching capacity, capability, and the availability of outside plant facilities.

(T)

D. REGULATIONS AND CONDITIONS (cont'd.)

2. (cont'd.)

(T)

- a. The availability, functionality, and capabilities of ISDN Services may vary, or may not be available, dependent upon type of serving central office switch, related software controlling that switch, and associated outside plant.
  - (1) Where facilities are not available, or unusual expenditures are involved in making them available, the customer may be required to pay additional charges to cover the unusual expenditure, or to contract for services beyond the normal service term, or both.
  - (2) **Distance Extension Service:** ISDN Services may be provided to a customer's location served beyond the normal transmission range (18,000 Feet) of the serving central office. In such cases, in addition to the charges and rates for ISDN Services, Distance Extension Service rates and charges are applicable.

3. Payment for Service

- a. The minimum charge period for services provided under this tariff is for one month.
- b. The customer may choose to pay for the service on a month-to-month basis or under a service contract plan. A month-to-month customer may, at any time, convert to a service contract plan.
- c. The monthly rate for customers choosing the service period plan is guaranteed against Telephone Company initiated changes during the selected service contract period.
- d. Subsequent additions will be rated under a new contract or added to an existing contract, based upon the remaining period of the initial contract.
- e. Contract Renewals and Termination Liabilities
  - (1) At any time during their contract period customers may change to a new ISDN Services contract, provided that the new contract is for a term equal to or greater than the time period remaining on their current contract. The new contract becomes effective upon execution.

3. Payment for Service (cont'd.)

e. Contract Renewals and Termination Liabilities (cont'd.)

(T)

- (2) If the service is canceled by the customer after installation of the service, but prior to the completion of the service period, the customer shall be obligated to reimburse Chillicothe Telephone Company the amount of any discounts he/she received when application for service was originally made.

4. At the Telephone Company's discretion, the following nonrecurring service establishment charges may be reduced or waived during promotional campaigns and/or as a part of customer negotiations:

- a. Nonrecurring per B Channel and/or per D Channel service establishment charge.
- b. Nonrecurring EKTS service establishment charges.

5. Directory Listings: One directory listing is provided without charge for each ISDN Services customer. Additional listings may be provided as specified for Additional Listing Service in the Directory Listings section of the Telephone Company's tariff.

6. Billable Call Treatment

- a. Normal toll charges shall apply to calls that are made outside of the Local Service Area.
- b. ISDN Services customers who use the Call Forwarding or Call Transfer features are responsible for the payment of any applicable charges for each billable call connected via these features over the public network. The charge is applicable to each call answered, including the Call Forwarding set-up call. It also applies to collect and person-to-person calls, which may be refused at the answering station.

7. Customer Premise Equipment

- a. This tariff for ISDN Services does not include terminal equipment on the customer's premises. Terminal equipment may be covered under a separate tariff, sold or leased separately by the Telephone Company (under a separate contract), or may be provided by the customer.

D. REGULATIONS AND CONDITIONS (cont'd.)

7. Customer Premise Equipment (cont'd.)

(T)

- b. The customer is responsible for providing the power required for any and all customer premise equipment connected to an ISDN Services line.

8. Central Office Overlay Arrangements

ISDN Services are available only from central offices which have the necessary facilities to provide standard National ISDN. In the event that a customer is served from a central office that is not equipped with these services, the Telephone Company may, at its discretion, provide ISDN Services from an alternate serving central office at no additional charge to the customer. Such provisioning may be elected when, at the discretion of the Telephone Company, the service can be provided at a reasonable cost to the Company. The customer must accept the serving location assigned by the Company, and must agree to revert to service from the normal serving central office at such time as ISDN Services are available in that office.

- a. This arrangement may require that the customer accept a directory number change to a number associated with the alternate central office.
- b. Calls that are originated by and terminated to a customer using this service arrangement will be billed as if the calls were placed from the customer's normal serving central office.
- c. When ISDN Services subsequently become available from the customer's normal serving central office, the customer will be reconnected to the normal serving central office. This may also require a directory number change. If and when such changes occur, the non-recurring charge associated with the change will not be applicable. If the customer does not wish to take service from the normal central office after such service becomes available, but continues to utilize service from the alternate serving central office, charges for distance extensions (foreign exchange service or special outside facilities) will apply. If foreign exchange service is used, the rates for foreign exchanges will be applied in addition to the ISDN Services rates. Any other special outside plant facilities used to provide ISDN Services will be tarified on an individual case basis.

- d. The availability, functionality, and capabilities of ISDN Services may vary when a customer's serving central office is equipped to provide ISDN Services.

9. End User Common Line (EUCL) Charges: ISDN Services are subject to Federal Communications Commission (FCC) End User Common Line (EUCL) charges under the rates and application rules specified by the FCC. The customer shall be liable for all adjustments to the EUCL as mandated by the Federal Communications Commission (or by any regulatory body or commission or court of competent jurisdiction). This charge is on a per B channel basis.
10. The Telephone Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failure, or malfunctions of ISDN Services or associated equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Telephone Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.

(C)

Note 1: Current rates, charges, and multiple feature discounts for applicable Custom Calling and CLASS Services may be found in the Telephone Company's Tariff for these services. For analog lines, the rates and charges for these services are normally applied on a per line basis. For ISDN Service lines, the rates and charges for applicable services are applied on a per directory number basis (to each directory number to which these services are assigned).

CENTREX SERVICE

A. General

1. Centrex is a central office based business communications service which provides capabilities similar to those offered on a Private Branch Exchange, but without requiring switching equipment on the customer's premises. Centrex integrates all of a business customer's lines into a single telecommunications system.

2. All Centrex station lines will be equipped with the standard features as set forth in paragraph C.1. Additional optional features may also be selected and generally result in additional charges as specified in paragraph C.2, C.3 and C.4.

B. Centrex Lines and Pricing (2)

**Current Pricing:**

	Monthly Recurring Charges				Service	Programming
	M/M	12 Mos.	36 Mos.	60 Mos.	Initiation Charge*	Charge**
Centrex access:						
2 - 25 Lines	\$17.00/Line	\$15.00/Line	\$14.00/Line	\$13.00/Line	\$25.00/Line	\$15.00/Line
26 - 50 Lines	\$15.00/Line	\$13.00/Line	\$12.50/Line	\$12.00/Line	\$23.00/Line	\$14.00/Line
51 -150 Lines	\$13.00/Line	\$12.00/Line	\$11.50/Line	\$11.00/Line	\$21.00/Line	\$13.00/Line
151-500 Lines	N/A	\$11.00/Line	\$10.75/Line	\$10.50/Line	\$19.00/Line	\$12.00/Line
>500 Lines	N/A	\$10.50/Line	\$10.25/Line	\$10.00/Line	\$17.00/Line	\$11.00/Line

**Maximum Pricing:**

2 - 25 Lines	\$34.00/Line	\$30.00/Line	\$28.00/Line	\$26.00/Line	\$50.00/Line	\$30.00/Line
26 - 50 Lines	\$30.00/Line	\$26.00/Line	\$25.00/Line	\$24.00/Line	\$46.00/Line	\$28.00/Line
51 -150 Lines	\$26.00/Line	\$24.00/Line	\$23.00/Line	\$22.00/Line	\$42.00/Line	\$26.00/Line
151-500 Lines	N/A	\$22.00/Line	\$21.50/Line	\$21.00/Line	\$38.00/Line	\$24.00/Line
>500 Lines	N/A	\$21.00/Line	\$20.50/Line	\$20.00/Line	\$34.00/Line	\$22.00/Line

\*Does not include installation of CPE building wiring, does include all feature programming necessary for Centrex operation.

\*\*This charge applies when feature program changes are requested subsequent to the initial installation.

(2) Denotes Tier 1 Non-core service

Rates for Tier 1 Core services are capped at current rates. Rates for Tier 1 Non Core services are capped at current rates until September 24, 2006. After September 24, 2006, Tier 1 Non Core rates can be increased to a maximum cap of double the initial rate, other than the second local exchange access line and call waiting, which are limited to a ten percent increase per year until they cap at double the initial rate. This pricing flexibility is in accordance with O.A.C. 4901:1-4 and Alt Reg Case # 04-1253-TP-ALT effective September 24, 2004.

d. Cost Control Features

Toll Restriction

Pricing: Included with Centrex line.

e. Simulated Facility Group (SFG) Charge

1. A charge applied to Centrex service users for the provision of central office trunking to the Centrex access lines per the table below. SFGs are sometimes referred to as Virtual Facility Groups (VFGs) or Network Access Registers (NARs). SFGs restrict the number of simultaneous calls between a Centrex group and the public network. For example, a 100-line Centrex group could be limited to 14 simultaneous calls to/from the public network if 14 simulated facilities are used. This emulates the physical connections (trunks) that would be used between a PBX and Central Office. The following table is used to apply SFGs using average traffic estimates. Subscribers may choose fewer or additional SFGs to meet calling requirements based on no cost traffic studies provided by Chillicothe Telephone on a per request basis with a maximum of four per year at no charge.

- g. Voice Message Waiting - Stutter Dial tone or Visual Indicator
- h. Music-on-hold Interface
- i. Voice Paging Interface

**Pricing:** Each item in C.4.a-i is \$.50 per line per month

5. FCC Access Charge

The FCC Customer Access Line Charge (CALC) will be assessed based upon the total number of centrex lines to which the customer subscribes. This amount will be collected by the Telephone Company and forwarded to the National Exchange Carrier Association. However, the Telephone Company will credit the customer for the CALC times the total number of centrex lines minus the number of Simulated Facilities (including OutWATS Simulated Facilities) to which the customer subscribes. The customer's net CALC assessment will therefore be based upon the number of simulated facilities used.

CENTREX SERVICE (cont'd.)

(N)

D. Regulations and Conditions

1. The minimum charge period for services provided under this tariff shall be for one month.
2. Centrex is offered subject to the availability of outside plant and/or central office facilities.
3. One directory listing is provided without charge for each Centrex customer.
4. The customer may choose to pay for the service on a month-to-month basis or under a service contract plan. A month-to-month customer may, at any time, convert to a service contract plan by paying the applicable service period plan rate currently in effect.
5. Each Centrex line may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option chosen by the customer at the time the line is installed. When a change in the operation is requested by the customer, the appropriate service charges as specified in this tariff apply per line affected.
6. Subsequent line additions/deletions to the original service contract period are stipulated as follows:
  - a. Subsequent additions will be rated under a new contract or added to an existing contract, based upon the remaining period of the initial contract. If the line addition causes the customer's total Centrex line count to exceed the threshold of the line count previously contracted, all lines will be billed at the rate for the larger line count.
  - b. Subsequent line deletions, resulting in reductions causing the total number of lines to fall into a different line size group, all remaining lines will be billed at rates for the smaller line size group.
7. If service is canceled by the customer after installation of the service, but prior to the completion of the service period, the customer shall be obligated to pay a termination liability charge. The charge is calculated by multiplying the monthly rate by the remaining months in the contract period times fifty percent. This penalty applies only to customers abandoning Centrex service altogether. A customer who reduces the quantity of Centrex lines under contract will not be liable for termination liability charges for the duration of the contract period.
8. Reduction/waiver of service establishment charges may be offered as follows:

At the Telephone Company's discretion, nonrecurring service initiation and/or programming charges may be reduced or waived during promotional campaigns and/or as a part of customer negotiations.

CENTREX SERVICE (cont'd.)

D. Regulations and Conditions (cont'd.)

9. When used with Call Forwarding or Call Transfer, the Centrex customer is responsible for the payment of the applicable toll charge for each billable call connected over the public network between the Centrex station and the station at which the call is answered. The charge is applicable to each call answered, including the Call Forwarding set-up call. It also applies to collect and person-to-person calls, which may be refused at the answering station.
10. This tariff Centrex service does not include terminal equipment on the customer's premises. Terminal equipment may be covered under a separate tariff, contract, or may be provided by the customer.
11. Touch-tone dialing is a standard feature for Centrex service.
12. Unless specifically exempted, Centrex service shall be subject to all general regulations applicable to the provision of service by the Telephone Company as stated in the company's tariffs.

CENTREX SERVICE (cont'd.)

E. Definitions

(N)

1. Attendant Call Transfer

This feature allows the subscriber to transfer calls with the aid of an attendant. With Attendant Call Transfer, the subscriber may transfer only incoming calls, and only to the attendant. The attendant can transfer incoming calls to another station within the Centrex group only.

2. Attendant Console

The Centrex Attendant Console provides the power of advanced data and voice communications to a Centrex business group. The attendant console is a personal computer equipped with user-friendly, menu-driven software that allows an attendant to efficiently handle and distribute calls. The attendant console can handle incoming, outgoing and intercom calls for any size ISDN or analog Centrex group or any combination of the two.

3. Auto Call Back Inside Centrex Group Only

Auto Call Back is an outgoing call management feature that enables a subscriber to call back the last party dialed, whether the station called by the subscriber was idle or busy.

4. Busy Lamp Field

Trunk Group Busy Lamps indicate on a private facility group basis when the facility group is totally in use. The screen display on the Centrex Attendant Console indicates when all trunks of a specified facility group are busy.

5. Call Accounting Monthly Detail Report

The Call Accounting Monthly Detail Report is a monthly detailed listing of all station call activity associated with customer dialed account records.

6. Call Forwarding Busy Line

Call Forwarding Busy Line causes all calls to be redirected to an alternate station when the called station is busy.

7. Call Forwarding Don't Answer

Call Forwarding Don't Answer allows all calls that terminate to a user's station to be redirected to an alternate station after a predetermined number of rings.

CENTREX SERVICE (cont'd.)

E. Definitions (cont'd.)

8. Call Forwarding Variable - All Calls

Call Forwarding Variable enables a station user to divert all incoming calls to another directory number. Activation, deactivation and the forward-to destination are controlled by the station user.

9. Call Hold

Call Hold allows a station user to place a call on hold in order to initiate a second call, answer a waiting call, consult privately with another party, or return to the previously held call.

10. Call Pick-Up

Call Pick-Up permits a station user to answer incoming calls directed to another station within the same pick-up group by dialing an access code.

11. Call Transfer

Call Transfer allows a station user to transfer calls to another station by flashing the switchhook and dialing the transfer-to number.

12. Call Waiting

Call Waiting provides a burst of tone to inform a station user with a call already in progress that another call is waiting to be answered. The station user may answer the waiting call by hanging up or flashing the switchhook.

13. Cancel Call Waiting

Cancel Call Waiting allows a station user, on a per-call basis, to deactivate Call Waiting by dialing an access code.

14. Circle Hunting

Circle Hunting allows calls directed to busy stations in the middle of the hunt group to search through to the end of the hunt group and then return to the beginning of the hunt list in search of an idle station. The caller is connected to the first idle station encountered.

CENTREX SERVICE (cont'd.)

E. Definitions (cont'd.)

(N)

15. Code Restriction

Code Restriction blocks the completion of calls that are directed to customer specified area codes (NPAs) and/or central office codes (NXXs). A Code Restriction list may be assigned to either an individual line or shared by multiple lines.

16. Customer Dialed Account Record - Forced/Non-Forced

Account Codes for Customer Dialed Account Recording assist in making client billing of phone charges hassle free. The Account Code features allow the customer to add an account code to a Message Detail Recording (MDR) record. An account code can be optional or required, and is entered either before or after dialing the Private Facility, Public Network, or Automatic Flexible Routing access code depending on the Account-Code-Access-Code (ACAC) being used.

17. Delay Announcements for Queued Calls

Delay Announcements can optionally be used to inform a caller that his or her call has been placed in a queue. The delay announcement can be repeated at regular intervals until an idle station becomes available.

18. Direct Access to Private Facilities

Direct Access to Private Facilities allows Centrex subscribers to dial a code to gain access to lower cost private facilities.

19. Direct Connect Service - Hot Line

Direct Connect Service allows a station user to automatically place a call to a preselected directory number by lifting the receiver off the switchhook. No dialing is required for the calling party to reach the specified destination.

20. Direct Connect Service - Warm Line

Warm Line provides a time-out option. The time-out interval may be set at 1 to 14 seconds. During the time-out interval, a station user will receive normal dial tone and can originate calls. However, after the time-out interval expires, a call is automatically set up and routed to the specified destination.

21. Direct Inward Dialing

Direct Inward Dialing allows Centrex station users to directly receive incoming calls without the assistance of an attendant.

CENTREX SERVICE (cont'd.)

E. Definitions (cont'd.)

(N)

22. Direct Outward Dialing

Direct Outward Dialing enables Centrex station users to call outside the Centrex group directly without the assistance of an attendant.

23. Direct Station Selection

Direct Station Selection is an optional Attendant Console feature that permits the attendant operator to push a single key to extend a call to a station.

24. Directed Call Pick-Up

Directed Call Pick-Up enables a station user to answer a call that is ringing at another station within the Centrex group by dialing an access code and the ringing station number.

25. Distinctive Ringing/Call Waiting Tones

Distinctive Ringing/Call Waiting Tones allow a Centrex station user to determine the source of incoming calls (from within or outside the business) by the Distinctive Ringing pattern or the Call Waiting tone. Normal ringing and Call Waiting Tones are used to identify intra-Centrex group calls. Calls which originate from outside the Centrex group are identified by either two short rings and/or Call Waiting tones.

26. Do Not Disturb

Do Not Disturb allows a station user to prevent incoming calls from ringing at his/her station by diverting them to a tone or recorded announcement. This feature can be offered with a Personal Identification Number (PIN) override option that selected callers can dial to override Do Not Disturb.

27. Fully-Restricted Line

A Fully-Restricted Line is prevented from making calls to and/or receiving calls from stations outside the Centrex group. It is also prevented from making calls to and/or receiving calls from the attendant, thereby denying it indirect access to/from outside the Centrex group.

28. Intercom Dialing

Intercom Dialing allows Centrex station users to call other stations within their Centrex groups by dialing abbreviated codes.

CENTREX SERVICE (cont'd.)

E. Definitions (cont'd.)

(N)

29. Message Detail Recording

Message Detail Recording (MDR) provides a customer with the capability to receive detailed information about certain types of calls.

30. Music On Hold Interface

The Music On Hold feature provides music or an announcement for calls that are put on hold. The music source can be provided by the customer or the Operating Company with the connection made via a Centrex trunk. The music is administered as a Centrex intercept and the capability of defining a certain sequence of announcements and music is provided.

31. Night Service

Night Service allows calls directed to the attendant to be re-routed to predesignated station lines within the same Centrex group when the attendant position is not staffed (i.e., evening hours, weekends).

32. Off-Premises Stations

Off-Premises Stations enable a secondary business location to access the same Centrex features and services as the main business location. The secondary locations must be served by the same Digital Central Office as the primary location.

33. OutWATS

OutWATS is a form of Direct Distance Dialing service that allows a station user to place long distance calls to specified geographical areas at reduced rates. Each OutWATS call is screened to ensure that the call destination is within the band limits of the OutWATS station user.

34. Preferential Hunting

Preferential Hunting allows any station in a Multiline Hunt Group to have its own (preferential) hunting list. If a call is made to a station with a Preferential Hunting list assigned to it, and that station is busy, the preferential list is first hunted until an idle station is found. If an idle station is not found on the preferential list, the hunt will proceed to the entire hunt group.

CENTREX SERVICE (cont'd.)

E. Definitions (cont'd.)

(N)

35. Queueing

Queueing may optionally be used when all stations in a hunt group are busy. When this occurs, a call is placed into a queue. The call remains in the queue until an idle station is located. Up to ten calls can be in queue for a Multiline Hunt Group. Queueing cannot be provided for Preferential Hunt groups.

36. Regular Hunting

Regular Hunting or Linear Hunting is performed in a sequential fashion across all members of a Multiline Hunt Group. The search for an idle station starts with the pilot number. If the first station is busy, the group is sequentially hunted until an idle station is found. If there are no idle stations available, the caller receives a busy signal.

37. Semi-Restricted Line

A Semi-Restricted Line is prevented from making calls to and/or receiving calls from stations outside the Centrex group. It may, however, make and/or receive outside calls indirectly via the attendant, Call Forwarding, Call Transfer, and Call Pick-Up features.

38. Simulated Facility Groups

Simulated Facility Groups restrict the number of simultaneous calls between the Centrex group and the public network. For example, a 100 line Centrex group could be limited to 20 simultaneous calls to/from the public network. This emulates the physical trunks to a similarly sized PBX.

39. Speed Calling 8

Speed Calling 8 enables a station user to call a list of up to 8 preselected directory numbers by dialing one-digit codes instead of the directory numbers.

40. Speed Calling 30

Speed Calling 30 enables a station user to call a list of up to 30 preselected directory numbers by dialing two-digit codes instead of the directory numbers.

41. Three-Way Calling

Three-Way Calling allows a station user to add a third party to an existing call, and thus enables a simultaneous conference between parties at multiple locations

42. Tie Facility Access

Tie Facility Access allows the stations in a business to dial a special code to gain access to outgoing Tie Facilities. Access to Tie Facilities can be controlled or restricted by Simulated Facilities Groups.

43. Toll Restriction

Toll Restriction blocks the completion of calls that are directed to the outside operator or to numbers outside the local calling area. A Toll Restriction list may be assigned to either an individual line or shared by multiple lines.

44. Uniform Call Distribution

Uniform Call Distribution is intended to distribute calls evenly among the stations in a Multiline Hunt Group. When a caller is connected to an idle station, the location of the next station is marked as the starting point for hunting when the next incoming call is received. Once hunting begins, it proceeds in a circular manner until an idle station is found.

45. Voice/Data Protection

Voice/Data Protection allows a station user to inhibit intrusion features such as Call Waiting and Operator Verification which are directed to that line when it is busy.

46. Voice Message Waiting - Stutter Dial tone or Visual Indicator

These features allow subscribers to benefit from Voice Mail capabilities. Unanswered or busy calls are delivered to the Voice Message System. An audible indication (stutter dial tone) or a visual indicator is provided when messages are waiting to be retrieved.

47. Voice Paging Interface

Voice Paging Interface allows a caller in a Centrex group to dial an access code in order to reach a customer-provided on premise loudspeaker paging device

48. Denied Originating

This feature, which is not subscriber programmable, permits a subscriber to deny call origination, but still receive incoming calls. Subscribers with Denied Origination are not given a dial tone when going off-hook. This is a helpful reminder that calls cannot be originated from this particular line.

49. Denied Terminating

This feature denies terminating calls to a line programmed to deny terminating calls. This feature is not subscriber programmable. A caller attempting to terminate to a line marked for Denied Termination will hear a recorded announcement. Calls routed to the announcement because of Denied Termination are not charged to the caller. The customer will not receive any indication of an attempted call.
