8.7 Temporary Suspension of Customer Premises Equipment

A. Regulations

1. At the request of a customer and where equipment arrangements permit, a portion of a customer's equipment, as set forth below, will be suspended temporarily without termination of contract.
 - a. Temporary suspension is available in connection with the following items of equipment for a period not to exceed nine months:
 - (1) Attendant positions of automatic call distributors (ACDs)
 - (2) Attendant positions of Centrex and Exhibition Hall Services
 - (3) Cord switchboard positions for which the initial contract period is three years.
 - (4) Secretarial switchboard positions and associated additional equipment, including line terminations (jack strips).
 - b. At least one attendant position of a system shall be retained in service during a period of temporary suspension.
2. A portion of a customer's equipment may be suspended temporarily prior to the expiration of the initial contract period. When equipment is so suspended, such contract period shall not be extended by the length of the period of suspension.
3. Neither inward service nor outward service shall be provided during the period of suspension on the equipment suspended.
4. Temporary suspension and restoral are subject to the receipt of the customer's request in sufficient time to permit the Company to effect the necessary arrangements. (T)
5. The Company reserves the right to refuse temporary suspension in the case of a customer whose account is delinquent. (T)

8.7 Temporary Suspension of Customer Premises Equipment ((cont'd))

B. Rates and Charges

1. The monthly rate for temporarily suspended items is fifty percent of the monthly rate specified for such items in the appropriate Sections of this tariff.
2. An additional charge based on expense incurred by the Company applies to rearrangements of equipment required in connection with temporary suspension of a portion of equipment. (T)
3. In the event a portion of equipment which is subject to an initial contract period of one month is temporarily suspended prior to the expiration of that one month period and subsequently discontinued, a minimum charge of one month's tariff rate for the item involved will apply in addition to the charges for the period of suspension.
4. A minimum charge of one month's tariff rate for the provision of each item of equipment is applicable to each item of equipment between periods of suspension.

8.9 Optional Rate and Credit Plans

A. Nonrecurring Charge Options and Companion Rate and Charge Plan

1. Nonrecurring Charge Options

a. Description of Plan

- (1) Nonrecurring charge options (Plan 1) are available for specific items of service and equipment as covered in various Sections of this tariff.
- (2) Under this plan the customer has the option of paying the nonrecurring charges associated with the items as a single payment or of contracting for a specific number of months during which such nonrecurring charges will be paid. These charges will not change during the contract period. In addition, there is a specific monthly rate for each item of service and equipment which applies as long as it is provided.
- (3) The customer may select different nonrecurring charge options for items associated with the same system; and, when items are offered under nonrecurring charge options (i.e., Plan 1) and under a companion rate and charge plan (i.e., Plan 2), the customer may select different plans for items associated with the same system.

b. Contract Periods and Termination Charges

The contract period for items of service and equipment furnished at a given location on continuous property under a nonrecurring charge option, is the period of time for which the customer contracts to pay the nonrecurring charges associated with such items. The application of termination charges when such items are relocated on the same continuous property prior to the expiration of such period of time is covered in 1-c following. Except as otherwise provided in 1-d and e following, when such items are terminated or are transferred to a different premises on noncontinuous property prior to the expiration of such period of time, termination charges apply as covered in 1-h following.

Material formerly appeared in Customer Premises Equipment Tariff,

8.9 Optional Rate and Credit Plans ((cont'd))

A. Nonrecurring Charge Options and Companion Rate and Charge Plan ((cont'd))

1. Nonrecurring Charge Options ((cont'd))

c. Moves on the Same Continuous Property

- (1) Except as set forth in (2) below, where equipment furnished under a nonrecurring charge option (regardless of the number of months involved) is moved to a different location on the same continuous property, the existing contract is terminated and termination charges apply, subject to 1-h following. However, the customer may, in lieu of terminating the existing contract and paying all applicable move, nonrecurring and termination charges, elect to continue the existing contract and to pay the expense incurred by the Company in connection with such move. (T)

(2) Exceptions to move options set forth in (1) above are as follows.

- (a) For moves on continuous property of the common equipment or consoles of a Com Key 1434, the existing contract period remains in effect and the customer shall in all cases pay the nonrecurring charges specified for such moves.
- (b) For moves on continuous property of key equipped telephones furnished under nonrecurring charge options, the existing contract period remains in effect and the customer shall in all cases pay the move charges specified.
- (c) or moves of any portion of or an entire Answer Page, charges are based on the expense incurred by the Company. (T)

Issued: December 14, 2007

Effective: December 14, 2007

8.9 Optional Rate and Credit Plans ((cont'd))

A. Nonrecurring Charge Options and Companion Rate and Charge Plan ((cont'd))

1. Nonrecurring Charge Options ((cont'd))

d. Transfers of Service to Premises on Noncontinuous Property

- (1) On relocations of service to noncontinuous property locations within territory served by the Company, in lieu of paying all applicable nonrecurring and termination charges, a customer to a system being furnished under nonrecurring charge options may elect to pay the expense incurred for such relocation, subject to the following regulations: (T)
- (a) The existing equipment involved will be moved from the existing location to the new location with the understanding that the customer will not have continuous service at such locations.
 - (b) A new contract period does not apply when service is established at the new location. Only the unexpired portion of any existing nonrecurring charge options and their associated contract periods continue at the new location.
 - (c) Additions to such customer's service and equipment may be made according to applicable rate, charged, regulations and options, if selected by the customer, set forth in the tariff for such items.
 - (d) Any service or equipment not required at the new location, which is discontinued at the existing location, is subject to all applicable termination charges.
 - (e) Service connection charges set forth in Part 3, Section 1 of this tariff apply to items involved in such relocation which are not under a nonrecurring charge option.

Issued: December 14, 2007

Effective: December 14, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17821

8. CUSTOMER PREMISES EQUIPMENT ((cont'd))

8.9 Optional Rate and Credit Plans ((cont'd))

A. Nonrecurring Charge Options and Companion Rate and Charge Plan ((cont'd))

1. Nonrecurring Charge Options ((cont'd))

d. Transfers of Service to Premises on Noncontinuous Property ((cont'd))

(2) Lapse-in-service moves between exchanges of two Bell Operating Companies in the same or in different states will be provided to customers, on request, under the same conditions described in (1) preceding, except as follows:

- (a) A new written agreement will be required at the new location for the remaining months of the original agreement where nonrecurring charge options are the same in each location or for a new payment plan period, where nonrecurring charge options are different.
- (b) Monthly rates and nonrecurring charges, if still applicable, will apply at the original location through the date service is disconnected. Billing for the new location will be effective the next day. The rates and charges for the new location will be those currently applicable for new customers.

Customers moving service into territory served by the Company will have stability (T) against Company initiated changes in nonrecurring charges for the remainder of the period covered by the new written agreement. The first bill rendered after service is reestablished will contain advance and, if applicable, may contain retroactive billing; thus the application of monthly rates and progression of nonrecurring charges, if still applicable, will remain unaffected.

At the time of disconnect at the original location, payment in full of the present worth of all installation charges being paid concurrent with nonrecurring charges shall be required.

Issued: December 14, 2007

Effective: December 14, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003,
Case No. 02-3089-TP-ALT.

Tariff

PART 8 - Miscellaneous Services
SECTION 8 - Other Miscellaneous Services

Original Sheet No. 42

8. CUSTOMER PREMISES EQUIPMENT (Cont'd)

8.9 Optional Rate and Credit Plans (Cont'd)

A. Nonrecurring Charge Options and Companion Rate and Charge Plan (Cont'd)

1. Nonrecurring Charge Options (Cont'd)

d. Transfers of Service to Premises on Noncontinuous Property (Cont'd)

(2) (Cont'd)

(c) Tariffs for the same service and for nonrecurring charge option plans must exist in both companies at the time of the move. For the purposes of administering this condition, a tariff with a payment plan classified as obsolete shall be considered currently available. If tariffs exist for the same service, but the lengths of nonrecurring charge options filed are different, the customer will be required to select one of the periods filed at the new location. If required to select a new contract period, the actual number of months the customer will be required to pay under the new contract is determined as follows: (1) Compute the total of all nonrecurring option charges paid by the customer to the date of disconnect; (2) calculate the original company's present worth of said total as though the payments had been made under a theoretical contract having a fixed period equal to that of the new contract selected; (3) divide said total of all charges paid by the monthly rate determined for the theoretical contract; and (4) subtract the number of months derived in (3) from the number of months of the new contract period selected.

(d) Transfer of service between two customers within four months of a lapse-in-service move is not permitted.

e. Re-use of Equipment

A customer with two separate services, both furnished under nonrecurring charge options, may, when disconnecting a portion of equipment being furnished under one service, elect to re-use such equipment on the other service, thereby continuing the existing nonrecurring charge options and associated contract periods for the items of equipment involved, subject to the following:

- (1) Disconnection and re-use is limited to (a) two visual display arrangements, (b) two Com Key systems with identical common equipment, or (c) individual components of a DIMENSION system when the item is compatible with the other service.
- (2) A nonrecurring charge based on the expense incurred for such disconnection and re-use of equipment is applicable.
- (3) The customer may not have continuous service on either of the two services involved.
- (4) Service connection charges, as covered in Part 3, Section 1 of this tariff, apply to any items of service or equipment associated with such disconnection and re-use and which are not under a nonrecurring charge option.

PART 8 - Miscellaneous Services
SECTION 8 - Other Miscellaneous Services

Original Sheet No. 43

8. CUSTOMER PREMISES EQUIPMENT (Cont'd)

8.9 Optional Rate and Credit Plans (Cont'd)

A. Nonrecurring Charge Options and Companion Rate and Charge Plan (Cont'd)

1. Nonrecurring Charge Options (Cont'd)

f. Installation Charge Payment Options

For service and equipment items furnished under nonrecurring charge options, any applicable installation charges may, at the customer's option, be paid (a) initially in a lump sum, or (b) as recurring monthly payments, payable over the same period of time as that selected by the customer under the nonrecurring charge options. Such recurring monthly payments will be based on the amount of the installation charge adjusted for the time value of money for the selected number of months. The following factors apply when converting the installation charge to recurring monthly charges (i.e., installation charge x factor = recurring monthly charge for number of months selected):

<u>Number of Monthly Payments</u>	<u>Factor</u>
12	.091666
24	.048015
35	.033509
48	.026289
60	.021983
84	.017117
120	.013562
144	.012230

g. Lump Sum Payment of Nonrecurring Charges

At the customer's option, a lump sum payment of the present worth of the nonrecurring charge balance due, at a 10% annual discount may be made any time during the contract period.

By J. F. Woods, President, Cleveland, Ohio

8. CUSTOMER PREMISES EQUIPMENT ((cont'd))

8.9 Optional Rate and Credit Plans ((cont'd))

A. Nonrecurring Charge Options and Companion Rate and Charge Plan ((cont'd))

1. Nonrecurring Charge Options ((cont'd))

h. Termination of All or a Portion of a Service

- (1) Except as set forth in (2) following, in the event all or a portion of a service being furnished under nonrecurring charge options is terminated, the customer will be required to pay an amount equal to the present worth of any nonrecurring charge balance due, at a 10% annual discount.
- (2) When only a portion of a service is terminated, the customer may, in lieu of (1) preceding, elect to continue to pay any unpaid balance of the nonrecurring charges in monthly payments through the period of the contract.
- (3) Where major rearrangements of the equipment left in service are required as a result of a partial discontinuance, the expense incurred by the Company for such rearrangements will be billed to the customer in addition to the nonrecurring charge balance due referred to in (1) preceding, or, at the option of the customer, the nonrecurring charge balance due for all of the service will be billed to the customer and a new initial contract period for the equipment as rearranged will commence. (T)

i. Assignment or Transfer of Service and/or Equipment

- (1) Service, including equipment being furnished under nonrecurring charge options, may be assigned or transferred under the provisions of Part 2, Section 2 of this tariff. The assignment or transfer of service charge included in Part 3, Section 1 of this tariff applies, except for those systems listed below for transfer fee specified applies in lieu of such Part 3, Section 1 charge.

	<u>Transfer Fee</u>

Original Sheet No. 45

8. CUSTOMER PREMISES EQUIPMENT (Cont'd)

8.9 Optional Rate and Credit Plans (Cont'd)

A. Nonrecurring Charge Options and Companion Rate and Charge Plan (Cont'd)

1. Nonrecurring Charge Options (Cont'd)

i. Assignment or Transfer of Service and/or Equipment (Cont'd)

(2) Equipment being furnished under nonrecurring charge options may be assigned or transferred to another individual, partnership, association or corporation with the consent of the customer who is terminating the associated service, provided there is no relocation or reconfiguration of such equipment and subject to the provisions of Part 2, Section 2 of this tariff. The charge treatment specified in (1) preceding also applies for the assignment or transfer of equipment only.

(3) Assignment or transfer of service and/or equipment between two customers either in anticipation of or incidental to a lapse of service move (A-1-d preceding) by either customer is not permitted.

j. Repricing of Equipment Furnished Under Nonrecurring Charge Options

On each occasion that items of equipment offered under nonrecurring charge options are repriced, existing customers to such items will continue to pay the nonrecurring charges in effect at the time such items were contracted for. All "vintage" nonrecurring charge options which are still in effect for customers as described in this paragraph are included in the Vintage Pricing Lists associated with this tariff.

2. Companion Rate and Charge Plan

a. Description of Plan

(1) The companion rate and charge plan (Plan 2) is available for specific items of service and equipment which are also available under nonrecurring charge options (Plan 1) as covered in various Sections of the tariff.

(2) Under this plan there is a specific monthly rate for each item of service and equipment which applies as long as the item is provided, plus a nonrecurring charge.

(3) The customer may select different plans, i.e., nonrecurring charge options and the companion rate and charge plan for items associated with the same system.

2. Companion Rate and Charge Plan (Cont'd)

b. Conversion from Plan 2 to Plan 1

A customer who, at the time of installation, had not elected Plan 1, may do so subsequently under the following conditions:

- (1) The customer will select an appropriate Plan 1 payment option from those available in the currently effective rate schedule and payment will commence at the date of conversion.
- (2) The customer will not be required to pay installation charges under Plan 1 for those items which are converted. No credit will be granted for monthly rates previously paid.
- (3) The customer will sign a memorandum of agreement acknowledging acceptance of the rates, charges and conditions of payment.
- (4) The customer will be liable for payment of any and all applicable tariff charges provided for under other tariff Sections.

3. Service Connections, Moves and Charges

The charges included in Part 3, Section 1 of this tariff for service connections, moves and changes of items furnished under Plan 1 and Plan 2 apply in addition to any nonrecurring and installation charges applicable for service connections, moves and changes under the provisions of this tariff.

B. PSAP Customer Premises Equipment For Use With E911

1. Rates and Charges

a. PSAP equipment

Automatic Number Identification
Feature

Minimum Nonrecurring Charge	Minimum Monthly Rate
-----------------------------------	----------------------------

-Master controller providing common equipment, wiring and trunk equipment for up to four incoming lines and/or four display units, (maximum one per system).....	\$7,300.00	\$365.00
-Auxiliary controller providing common equipment and wiring for next eleven incoming lines and/or display units (maximum one per system)...	1,825.00	93.00
-Additional trunk equipment (required with auxiliary controller) for up to four incoming lines units (maximum three per system).....	560.00	28.00
-Display and transfer unit (See Note) maximum fifteen per system).....	470.00	23.00
-Commercial power conversion unit (optional).....	1,095.00	55.00

Note: Display and Transfer Unit is a selector console and associated common equipment for displaying ANI numbers at the PSAP attendant position and used by the attendant to activate fixed and/or selective transfer functions.

-Fixed transfer enables a PSAP attendant to transfer incoming E911 calls to secondary PSAPs by use of a single button on the display and transfer unit.

-Selective transfer allows the PSAP attendant to transfer an incoming call to another agency by use of an appropriately labeled button. This type of transfer is available only when selective routing is provided.

Note: Retained equipment is used with 911 Service.

8.13 Private Line Service Regulations

A. Provision of Customer Premises Equipment

When a private line service is used for data transmission which requires terminal equipment (data sets) as specified under Series 3000 Channels in Part 15, Section 2 of this tariff, such data sets may be provided by the customer or the Company at the option of the customer, (T)
except that the Company shall furnish all data sets, as specified in 8.15, Equipment, following, (T)
located in Company central offices. Where the customer elects to provide his own data set(s) (T)
on a given private line, it shall be the responsibility of the customer to ensure the continuing
compatibility of such data set(s) with the facilities furnished by the Company. (T)

Issued: December 14, 2007

Effective: December 14, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003,
Case No. 02-3069-TP-ALT.

TFA No. OH-07-17821

8. CUSTOMER PREMISES EQUIPMENT ((cont'd))

8.13 Private Line Service Regulations ((cont'd))

B. Obligations of the Customer

The customer shall be responsible for damage to or loss or destruction of all other equipment of the Company caused by the negligence or willful act of the customer, authorized users or joint users. The customer shall be required to pay the expense incurred by the Company in connection with the replacement of the equipment damaged, lost or destroyed or the expense incurred in restoring said equipment to its original condition. (T)
(T)

C. Initial Contract Periods

1. The initial contract period applicable to each item of equipment separately is one month on the same continuous property.
2. A new initial contract period does not apply to equipment retained by the customer when a channel termination is moved from one location to another on the same continuous property.
3. The application of termination charges for equipment furnished under the provisions of this tariff is as covered in Part 2, Section 2 of this tariff.

D. Minimum Level Pricing

The provisions relating to Minimum Level Pricing in Paragraph 8.2.A of this Section apply to the following items of equipment, the rates and charges for which are identified as "minimum."

Data Sets (paragraph 8.15)

8.14 Private Line Service Installations, Moves and Changes

A. General Provisions

The items of equipment in 8.15, Equipment, following are subject to the charges specified in Part 15, Section 2 of this tariff. In addition, certain of the items of equipment in 8.15, Equipment, following are subject to nonrecurring charges (NRCs) which apply in addition to the charges specified in Part 15, Section 2 of this tariff, subject however to the following:

1. Moves

NRCs reapply for moves of the items involved within the same building or on continuous property, except as otherwise specified below:

a. Only 50% of the NRCs apply for the move of:

- (1) Data sets, including all associated equipment

2. Changes

a. When, at the request of a customer, existing equipment is replaced by equipment of a different type or color, or both, the NRC applicable is the same as that for a new installation of the replacing equipment.

b. When a wiring option is established, changed or discontinued in an existing data set, 50% of the NRC specified for such data set applies.

9. CUSTOM NUMBER SERVICE

A. Description

Custom Number Service (CNS) allows business and residence customers to request a specific telephone number other than the one that would normally be assigned by the Company. These specifically requested numbers include, but are not limited to, numbers with a desired or particular alphabetic equivalent, "easy to remember" numbers because of repeating or sequential digits, or another numerical pattern preference.

B. Terms and Conditions

1. The Company will verify the availability of the requested number and, when feasible, assign the number.
2. The CNS charge does not give any customer a property right in the telephone number selected and assigned.
3. CNS is provided subject to the availability of facilities and telephone numbers.
4. The Company records, including directory services, will be maintained in numeric format.
5. The Company will not be responsible for the manner in which Custom Numbers are used for marketing, advertising, and other purposes by the customer.

C. Rates and Charges

A nonrecurring charge will apply when a requested Custom Number preference is assigned to the customer. Charges are not applicable when a customer's number assignment preference cannot be met and an assignment from the Company's normal assignment process is made.

Charges for Custom Number Service are in addition to any charges applicable to the service with which it is associated.

Description /Billing Code	Nonrecurring Charge
Per custom telephone number assigned /RNCSP/	\$40.00

13. NEIGHBORHOOD SELECT

(N)

A. DESCRIPTION

Neighborhood Select is a one-way optional calling plan. Neighborhood Select permits customers to expand their calling area by adding one or more exchanges from those available in the plan. The plan's additional exchanges consist of contiguous exchange(s), the exchange of the County Seat, and exchange(s) of school districts which are not included in the customer's local calling area. Neighborhood Select provides for calling on a flat rate basis from the customer's exchange to the exchange(s) selected by the customer.

B. TERMS AND CONDITIONS

1. Neighborhood Select is a pilot plan that is available to residence customers. Service will commence on the effective date of this tariff. It will be offered for not less than 12 months, at which time it may be extended, modified, or withdrawn by the Company.
2. Neighborhood Select customers may select exchanges on a one-at-a-time basis from those specified in d. following
3. Neighborhood Select cannot be combined with any other optional calling plan. Neighborhood Select will not be furnished with Foreign Central Office or Foreign Exchange Services.

(N)

Issued: February 11, 1999

Effective: February 14, 1999

In accordance with Case No. 97-1525-TP-ATA, issued November 20, 1997.

By J. F. Woods, President, Cleveland, Ohio

13. NEIGHBORHOOD SELECT (cont'd)

B. Terms and Conditions (cont'd)

4. Only direct dialed calls are included in the Neighborhood Select plan.
5. Neighborhood Select contains exchanges that may also be included under Local Calling Plus. In these instances the exchange will remain under the Local Calling Plus schedule unless the customer chooses to include it in the Neighborhood Select plan.
6. There will be no nonrecurring charge to establish Neighborhood Select. A maximum of three (3) changes to Neighborhood Select will be permitted per calendar year. There is no charge for these changes.
7. Customers must subscribe to the Company's intraLATA toll service if one or a combination (T) of the selected Neighborhood Select exchange(s) involves a toll route.

14. ENSEMBLE

A. Description

ENSEMBLE service will provide customers access to end users through an integrated hub in specific LATAs. ENSEMBLE is comprised of specific directory numbers and the Switched Redirect Network; a dedicated network of data optimized high usage one-way trunk groups to a centralized dedicated hub central office. (T)

ENSEMBLE customers can offer their end users, specific local directory numbers, which are routed over the Switched Redirect Network (SRN), to the centralized dedicated hub. The ENSEMBLE customers will then receive their end users hubbed traffic via existing, tariffed ISDN Prime Service. (T)

B. Definitions

Query Access

A specific directory number (DN) which in concert with the SRN recognizes calls placed to the DN and routes them over the SRN.

Switched Redirect Network (SRN)

An overlay network of data optimized high usage one-way trunk groups utilizing Intelligent Network (AIN) capabilities which link end offices in a selected LATA to a centralized dedicated hub central office. (T)

14. ENSEMBLE (cont'd)

C. Terms and Conditions

In addition to regulations set forth elsewhere in this tariff, the following terms and conditions apply to ENSEMBLE:

1. Service is available in the following selected LATAs:
 - Cleveland LATA
 - Hub location at CLEVOH6262F
2. ISDN Prime Service is necessary to receive the hubbed traffic. (T)
3. ENSEMBLE is offered only where facilities are available and properly provisioned.
4. ENSEMBLE will pass normal ANI information.
5. The minimum service period for ENSEMBLE is 36 months, with the exception of the Additional Query/Access rate element.

Issued: December 14, 2007

Effective: December 14, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003,
Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17821

14. ENSEMBLE (cont'd)

D. Features

1. Standard Features

Installation Charge

Installation charge per ISDN Prime trunk group, per order.

(T)

Query Access to Integrated Hub, Initial

Ability for end users to dial a local directory number which in concert with the SRN creates a query for routing instructions. This feature applies to the initial establishment of a query number.

Query Access to Integrated Hub, Additional

Ability for end users to dial a local directory number which in concert with the SRN creates a query for routing instructions. This feature applies to subsequent establishment of query numbers.

Transport to Integrated Hub

Transport from the originating end offices, where access occurs, to the integrated hub location over the SRN.

Issued: December 14, 2007

14. ENSEMBLE (cont'd)

(N)

E. PRICES (cont'd)

3. Payment Plans

• Term Payment Plans

ENSEMBLE service is available under the Term Payment Plan (TPP) whereby customers may elect to pay a fixed price for a 36, or 60 month period.

• Month to Month

ENSEMBLE is available on a month to month basis once the existing ENSEMBLE customer fulfills the terms and conditions of the customer's most recent term payment plan.

• Single Payment Option (SPO)

The monthly recurring price may be prepaid for periods that coincide with any term payment plan. The prepayment charges in no way constitute a purchase and the Company retains ownership of all equipment covered by prepayment. The following conditions apply:

Customers who prepay will have an allowance applied. The prepayment will be calculated using the loan amortization method at the annual rate specified in Part 2 Section 3 of this tariff. The allowance will be based on the number of months of the prepayment period. The prepayment amount (principal) is the total outstanding recurring charges less the payment allowance.

- Customers who prematurely disconnect the service will have termination charges deducted from the prepayment amount and any balances credited to their bill.

(N)

Issued: May 18, 1999

Effective: May 18, 1999

In accordance with Case No. 99-610-TP-ATA, issued May 18, 1999.

By J. F. Woods, President, Cleveland, Ohio

14. ENSEMBLE (cont'd)

E. PRICES (cont'd)

4. Termination Charges

Termination liability will apply to ENSEMBLE service disconnected prior to the expiration of the contracted Term Payment Plan period. The charge will be calculated from the remaining fixed monthly recurring charges or any minimum billing guarantees that would have been incurred by the customer if the service had been in service for the entire contract period.

Commission approval of the above termination language is not intended to indicate that the Commission has sanctioned any particular legal result should a dispute arise between the parties. In the event of dispute, signatories to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

5. Credit Allowance

Credit allowances will be granted when service is interrupted due to Company failure. The credit allowance will be based upon the ratio of the duration of the service interruption measured from the time the interruption is reported to or detected by the Company, whichever occurs first, and expressed in multiples of 30 minutes to the total time in a 30 day month. That ratio, multiplied by the monthly charge for the service affected, shall determine the amount of the credit allowance. No other liability shall attach to the Company in consideration of such interruption to service. (T)

14. ENSEMBLE (cont'd)

E. PRICES (cont'd)

6. Changes

With the written permission of the Company, consistent with other regulations of this tariff, the obligation to pay the TPP charges may be assumed by another customer, if the service has not been terminated, and if the other customer intends to continue using the service at the present location and actually continues such use. Such assumption of service does not relieve or discharge the original customer from remaining jointly or severally liable with the transferee for any and all obligations existing at the time of the transfer.

During a customer's TPP term, conversion may be made to a new TPP period of the same or different length, if the expiration date for the new service or TPP period is the same as or greater than the original TPP period. The new TPP becomes effective upon execution. In all situations described in this paragraph (6) the customer incurs no liability for the remaining months of the original TPP, since the change is not considered a termination of service.

Changes to ENSEMBLE service will create a subsequent change charge as reflected in the ISDN Prime Service tariff.

TFA No. OH-07-17821

15. HIGH VOLTAGE PROTECTION SERVICE

(N)

A. DESCRIPTION

This service provides special, high voltage protection equipment for customers who purchase company exchange and private line services to be located at or near electric power generating stations, co-generating stations, substations, distributing power stations, and other similar locations. This equipment isolates or neutralizes the hazardous voltages that could appear at telephone network terminating equipment due to Ground Potential Rise (GPR) and/or induction resulting from faults in the electric power system.

B. TERMS AND CONDITIONS

1. In addition to the terms and conditions set forth in this Tariff schedule, terms and conditions for the underlying exchange or private line service will apply.
2. The Company shall determine from data furnished by the customer the proper level and method of protection to isolate or neutralize electrical hazards at each location, and will provide the facilities to meet that level of protection.

If extraordinary costs are incurred in providing facilities, Special Construction charges may apply. Terms and conditions for these charges may be found in Part 2, Section 5 of this Tariff.

3. The high voltage protection equipment will be located at the Network Interface (NI) or demarcation point at customer locations requiring high voltage protection which is either the output termination of the high voltage protection equipment or the output termination of the channel's terminating equipment if present. The Company will be responsible up to this point for provisioning tariffed channels and/or services. Additional high voltage protection equipment may also be required on the serving telephone facilities at the Company's Central Office and/or on the right of way at remote locations.

(N)

Issued: July 11, 2002

Effective: August 12, 2002

In accordance with Case No. 02-2035-TP-ATA, issued July 11, 2002.

By James C. Smith, President, Columbus, Ohio

PART 8 - Miscellaneous Services
SECTION 8 - Other Miscellaneous Services

Original Sheet No. 90

15. HIGH VOLTAGE PROTECTION SERVICE (cont'd)

(N)

B. TERMS AND CONDITIONS (cont'd)

4. The customer may request to have high voltage equipment moved within the same premises or to a different premise within the area covered by this tariff. All costs incurred due to rearrangement of circuits or equipment associated with special protection will be billed to the customer. Applicable monthly rates will continue for the duration of the move.

5. As a condition to receiving service, those customers described in 15., (A) shall provide the Company, in writing, the technical data necessary to determine the high voltage requirements, at the time of initial application for the initial service, additions to, or changes in the existing service.

In addition, the customer shall notify the Company, in writing, prior to making any changes in the electric supply, which will increase the GPR at the location.

6. The customer will provide the Service Type and the Service Performance Objective (SPO), as described in E (1.) and E (2.) following, along with a forecast of the type and quantity of each telecommunications service required at a given location.

7. The technical data for the High Voltage Protection Location shall include, but not be limited to the following:

- Ground grid area in square feet
- Ground grid impedance in ohms
- X/R ratio at worst case fault location
- Maximum fault current in amperes RMS

8. Minimum protection standards as specified by the Company will be established in accordance with the Service Performance Objectives stated in C (2.) below. The customer may select a higher degree of protection depending on the need for minimum service interruptions.

(N)

Issued: July 11, 2002

Effective: August 12, 2002

In accordance with Case No. 02-2035-TP-ATA, issued July 11, 2002.

By James C. Smith, President, Columbus, Ohio

15. HIGH VOLTAGE PROTECTION SERVICE (cont'd)

(N)

B. TERMS AND CONDITIONS (cont'd)

9. All special protection equipment must be provided entirely by the Company. Special High Voltage equipment furnished by a High Voltage Protection Customer prior to August 12, 2002 may continue to be utilized at its present location on the power utilities premises.
10. If at any time during the specified period following installation of high voltage protection equipment, such equipment is permanently disconnected as a result of a request by the customer or disconnection of the customer's telephone service in accordance with Companies applicable tariffs, the customer shall pay to the Company, upon demand, the Basic Termination Charge for said equipment, less a credit for each full month between installation and disconnect. Except as otherwise provided in the Local Competition Guidelines (Case No. 95-845-TP-COI), Commission approval of contracts does not constitute a determination of the reasonableness of termination liability provisions.
11. The customer releases, indemnifies and holds harmless the Company from any and all loss, claims, demands, suits or other action or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or by any other party or person, for any personal injury to or death of any person or persons, or for any loss, damage or destruction of any property whether owned by the customer or others, caused or claimed to have been caused directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence, condition, location or use of such equipment and services associated therewith.
12. The minimum service period is twelve (12) months.
13. Basic termination charge will apply if customer does not keep special protection arrangement in place as provisioned for the minimum service period. Basic termination charge will be reduced by 1/12 for each month of service.

(N)

Issued: July 11, 2002

Effective: August 12, 2002

By James C. Smith, President, Columbus, Ohio

15. HIGH VOLTAGE PROTECTION SERVICE (cont'd)

(N)

C. TECHNICAL FEATURES (cont'd)

2. Service Performance Objective Classifications

Interruptions or outages of telecommunications circuits serving high voltage protection locations may occur for physical reasons such as cable damage due to extraordinarily heavy storm loading, a vehicle striking and breaking a utility pole, a direct lightning strike, or acts of God. Circuit failures caused by such events cannot be prevented and the Company expressly states that provision of the equipment provided in this tariff cannot prevent such service outages as may normally occur due to the preceding circumstances. It is the responsibility of the customer to provide sufficient protection to prevent damage caused by such events.

Interruptions or outages due to the effects of faults at the customer's location or in the customer's power generating, transmission, and/or distribution systems are minimized through the installation and maintenance of high voltage protection service which is designed to operate in an electrical environment experiencing a fault condition.

Because of the customer's need for service continuity during power system faults on some types of telecommunication service provided to high voltage protection locations, the following system of Service Performance Objective Classifications has been established for the purpose of permitting the customer to specify the performance objectives for these types of telecommunication services provided to power stations.

Class A - Non-interruptible service performance (must function before, during, and after a fault condition).

Class B - Self-restoring interruptible service (must function before and after the power fault condition). Class B service can tolerate a service interruption for the duration of a power system fault but service continuity must be restored immediately after the fault without requiring any repair personnel to restore service.

1. CHARTER NUMBER SERVICE

A. Description

Charter Number is a service that allows a customer to retain and port their current telephone number to another wire center within the same Rate Center when the customer is faced with either changing locations and/or changing types of service. Charter Number Service will allow customers to maintain their existing telephone numbers and eliminate the confusion and expense associated with changing telephone numbers. As indicated above, this service will only provide for the porting of telephone numbers within the same Rate Center.

B. Regulations

1. Charter Number Service will be available to POTS, PBX and ISDN service customers. (C)
2. Charter Number Service will only provide for the porting of a working, in-service telephone number within the same Rate Center.
3. InterLATA porting will not be allowed with this service. All numbers ported must be within the geographical boundaries of same area code (NPA).
4. No porting is allowed outside of MSA's as defined in FCC Tariff No. 2.
5. Once a telephone number is ported using Charter Number Service, subsequent telephone numbers (i.e. Additional Lines) will be issued from the switch in which the ported main telephone number resides not from the original switch.
6. Charter Number Service is available where facilities and operating conditions permit.
7. The ported number will only function from one location.

2.1. General Provisions

(C)

- A. Effective January 1, 1983, in accordance with the orders of the Federal Communications Commission (FCC) in Docket 20828, customer premises equipment, as defined by the FCC, will no longer be provided by the Company.

The Company will continue to provide maintenance for Company provided customer premises equipment subject to the availability of replacement parts and/or equipment.

Coin telephone service and 911 Public Safety Answering Point Equipment are excluded from the provisions of Docket 20828. Therefore, the Company will continue to own and provide terminal equipment associated with these services.

2.2 Establishment and Furnishing of Service

(C)

A. Minimum Level Pricing for Communications Systems and for Terminal Equipment

1. For certain communications systems and terminal equipment offered under the provisions of this tariff, the rates and charges are identified as a minimum level only. The maximum level of such rates and charges is two times the minimum level. The present applicable rates and charges which may be anywhere within the range of the minimum and the maximum levels are covered in a pricing list furnished to the Public Utilities Commission of Ohio (PUCO) by the Company.
2. No less than twenty days prior to the effective date of any changes in the rates and charges for such systems and equipment, the Company will furnish to the PUCO a new list reflecting such changed rates and charges. Any change to a rate or charge below the maximum level shall not be construed as an application to increase rates.
3. The provisions of this Paragraph 2.2.A apply to the following:

Alarm reporting telephones
Buzzers
COM KEY package systems
Cut-off arrangements
Emergency Reporting, Alerting and Dispatching Services
Extension bells, including loud ringing bells,
Jack equipped telephones,
Key telephone systems,
Noise canceling transmitters,
Outdoor telephones,
Press to talk and press to listen features,
Selective dial restriction units

(C)

A. General

An initial contract period applies to all equipment provided for a customer. Initial contract periods date from the day following the completion of the installation of the equipment involved.

B. Application of Initial Contract Periods

Except as hereinafter provided, the initial contract period for all equipment is one month on the same continuous property:

1. Nonrecurring Charge Items

The initial contract period for equipment furnished at a nonrecurring charge only, is the period for which the service is rendered.

2. Nonrecurring Charge Option

The contract period for an item furnished under a nonrecurring charge option is as set forth in Paragraph 2.9 following.

3. Special Equipment

The initial contract period for special equipment, and for other equipment furnished at rates or charges based upon costs incurred, will be governed by the circumstances of each case.

2.4 Termination Charges

(C)

A. Application of Termination Charges

When equipment is terminated by the customer, or by the Company for any reason for which it may terminate such items under the provisions of this tariff, prior to the expiration of the initial contract period, the following termination charges apply in addition to all charges due for the service which has been furnished:

1. Special Equipment

In the case of special equipment, as defined in Part 2, Section 7 of this tariff, and other equipment or facilities furnished at rates or charges based upon costs incurred, termination charges apply as follows:

- a. Where the initial contract period is one year or less, the termination charges will be the charges due for the unexpired portion of the initial contract period applicable to such special equipment
- b. Where the initial contract period is in excess of one year, the termination charges will be such portion of the expense incurred by the Company for the equipment and for its installation and removal, less the salvage value of the equipment removed, as the unexpired portion of the initial contract period bears to the full initial contract period.

2. Contract Periods of Two Years or Less

In the case of equipment for which the initial contract period is two years or less, the termination charges will be the charges due for the unexpired portion of such initial contract period, except for those items for which a termination liability, or a minimum total charge is set forth in various sections of this tariff.

2.4 Termination Charges (cont'd)

(C)

A. Application of Termination Charges (cont'd)

3. Contract Periods in Excess of Two Years

In the case of equipment for which the initial contract period is in excess of two years, the termination charges will be an amount equal to fifty per cent of the charges for the unexpired portion of such initial contract period, at the rate in effect at the time the equipment is discontinued, except for those items for which a termination liability or a minimum monthly billing charge is set forth in various sections of this tariff.

4. Termination Liability Items

In the case of items of equipment for which a termination liability is included with the rates and charges for such items in various sections of this tariff, the termination charges will be an amount equal to such termination liability, reduced by a proportionate amount for each month within the applicable contract period that the monthly rate has been collected.

5. Nonrecurring Charge Option

In the case of items of equipment being furnished under a nonrecurring charge option, the termination charges are as set forth in Paragraph 2.9 following.

6. Discontinuance of a Portion of a Service

Where only a portion of a service is discontinued, the termination charges will be as set forth in A-1 through A-5 preceding. In addition, the following provisions apply:

- a. For those items of equipment covered in A-2 through A-4 preceding and for which the initial contract period is six months or more, where major arrangements of the equipment left in service are required as a result of the partial discontinuance, the expense incurred by the Company for such rearrangements will be billed to the customer in addition to the termination charges specified or, at the option of the customer, termination charges on the entire installation will be billed to the customer and a new initial contract period for the equipment as rearranged will commence.
- b. For those items of service and equipment covered in A-5 preceding, the provisions of A-6-a above apply, regardless of the length of the initial contract period which was selected by the customer.

2.4 Termination Charges (cont'd)

(C)

B. Conditions Under Which Termination Charges Do Not Apply

1. Assignment or Transfer of Service

Termination charges do not apply

- a. when the service of a customer (including any outstanding indebtedness to the Company and the unexpired portion of the initial contract period, if any) is transferred to a new customer without interruption of the service; or
- b. when the service of a customer (including the unexpired portion of the initial contract period, if any) is transferred, without interruption of the service, to a receiver, trustee or other person appointed by a court or acting pursuant to law in bankruptcy, receivership, reorganization, insolvency, liquidation or other similar proceeding.

2. Termination of Service In Disaster Cases

Termination charges do not apply to equipment which is terminated due to fire, flood or other like disaster.

3. Withdrawal of Experimental Offerings

Termination charges do not apply to equipment which is terminated due to the withdrawal by the Company of an experimental offering of such equipment.

2.5 Dual Element Charges

(C)

A. Description

Dual Element Charges as defined in Part 3, Section 1 of this tariff consists of a Service and Equipment (S&E) Charge and a Premises Work Charge (PWC). These charges are applicable to establish or change customer premises equipment associated with simple residence or non-residence service. Simple service is defined in Part 3, Section 1 of this tariff.

1. The PWC increments are those specified in Part 3, Section 1 of this tariff.
2. The S&E Charges are these specified in B. following.

B. Application of S&E Charges to Establish Service

1. Telephone

The following charge applies to non-key rotary or Touch-Tone telephones, including operator type attendant telephones, as provided in various section of this tariff.

S&E Charge, per telephone.....\$6.80

(C)

A. Regulations

1. At the request of a customer and where equipment arrangements permit, a portion of a customer's equipment, as set forth below, will be suspended temporarily without termination of contract.
 - a. Temporary suspension is available in connection with the following items of equipment for a period not to exceed nine months:
 - (1) Attendant positions of automatic call distributors (ACDs)
 - (2) Attendant positions of Centrex and Exhibition Hall Services
 - (3) Cord switchboard positions for which the initial contract period is three years.
 - (4) Secretarial switchboard positions and associated additional equipment, including line terminations (jack strips).
 - b. At least one attendant position of a system shall be retained in service during a period of temporary suspension.
2. A portion of a customer's equipment may be suspended temporarily prior to the expiration of the initial contract period. When equipment is so suspended, such contract period shall not be extended by the length of the period of suspension.
3. Neither inward service nor outward service shall be provided during the period of suspension on the equipment suspended.
4. Temporary suspension and restoral are subject to the receipt of the customer's request in sufficient time to permit the Company to effect the necessary arrangements.
5. The Company reserves the right to refuse temporary suspension in the case of a customer whose account is delinquent.

B. Rates and Charges

1. The monthly rate for temporarily suspended items is fifty percent of the monthly rate specified for such items in the appropriate Sections of this tariff.
2. An additional charge based on expense incurred by the Company applies to rearrangements of equipment required in connection with temporary suspension of a portion of equipment.
3. In the event a portion of equipment which is subject to an initial contract period of one month is temporarily suspended prior to the expiration of that one month period and subsequently discontinued, a minimum charge of one month's tariff rate for the item involved will apply in addition to the charges for the period of suspension.
4. A minimum charge of one month's tariff rate for the provision of each item of equipment is applicable to each item of equipment between periods of suspension.

2.9 Optional Rate and Credit Plans

(C)

A. Nonrecurring Charge Options and Companion Rate and Charge Plan

1. Nonrecurring Charge Options

a. Description of Plan

- (1) Nonrecurring charge options (Plan 1) are available for specific items of service and equipment as covered in various Sections of this tariff.
- (2) Under this plan the customer has the option of paying the nonrecurring charges associated with the items as a single payment or of contracting for a specific number of months during which such nonrecurring charges will be paid. These charges will not change during the contract period. In addition, there is a specific monthly rate for each item of service and equipment which applies as long as it is provided.
- (3) The customer may select different nonrecurring charge options for items associated with the same system; and, when items are offered under nonrecurring charge options (i.e., Plan 1) and under a companion rate and charge plan (i.e., Plan 2), the customer may select different plans for items associated with the same system.

b. Contract Periods and Termination Charges

The contract period for items of service and equipment furnished at a given location on continuous property under a nonrecurring charge option, is the period of time for which the customer contracts to pay the nonrecurring charges associated with such items. The application of termination charges when such items are relocated on the same continuous property prior to the expiration of such period of time is covered in 1-c following. Except as otherwise provided in 1-d and e following, when such items are terminated or are transferred to a different premises on noncontinuous property prior to the expiration of such period of time, termination charges apply as covered in 1-h following.

c. Moves on the Same Continuous Property

- (1) Except as set forth in (2) below, where equipment furnished under a nonrecurring charge option (regardless of the number of months involved) is moved to a different location on the same continuous property, the existing contract is terminated and termination charges apply, subject to 1-h following. However, the customer may, in lieu of terminating the existing contract and paying all applicable move, nonrecurring and termination charges, elect to continue the existing contract and to pay the expense incurred by the Company in connection with such move.
- (2) Exceptions to move options set forth in (1) above are as follows:
 - (a) For moves on continuous property of the common equipment or consoles of a Com Key 1434, the existing contract period remains in effect and the customer shall in all cases pay the nonrecurring charges specified for such moves.
 - (b) For moves on continuous property of key equipped telephones furnished under nonrecurring charge options, the existing contract period remains in effect and the customer shall in all cases pay the move charges specified.
 - (c) or moves of any portion of or an entire Answer Page, charges are based on the expense incurred by the Company.

d. Transfers of Service to Premises on Noncontinuous Property

- (1) On relocations of service to noncontinuous property locations within territory served by the Company, in lieu of paying all applicable nonrecurring and termination charges, a customer to a system being furnished under nonrecurring charge options may elect to pay the expense incurred for such relocation, subject to the following regulations:
 - (a) The existing equipment involved will be moved from the existing location to the new location with the understanding that the customer will not have continuous service at such locations.
 - (b) A new contract period does not apply when service is established at the new location. Only the unexpired portion of any existing nonrecurring charge options and their associated contract periods continue at the new location.
 - (c) Additions to such customer's service and equipment may be made according to applicable rate, charged, regulations and options, if selected by the customer, set forth in the tariff for such items.
 - (d) Any service or equipment not required at the new location, which is discontinued at the existing location, is subject to all applicable termination charges.
 - (e) Service connection charges set forth in Part 3, Section 1 of this tariff apply to items involved in such relocation which are not under a nonrecurring charge option.

(C)

A. Nonrecurring Charge Options and Companion Rate and Charge Plan (cont'd)

1. Nonrecurring Charge Options (cont'd)

d. Transfers of Service to Premises on Noncontinuous Property (cont'd)

- (2) Lapse-in-service moves between exchanges of two Bell Operating Companies in the same or in different states will be provided to customers, on request, under the same conditions described in (1) preceding, except as follows:

- (a) A new written agreement will be required at the new location for the remaining months of the original agreement where nonrecurring charge options are the same in each location or for a new payment plan period, where nonrecurring charge options are different.
- (b) Monthly rates and nonrecurring charges, if still applicable, will apply at the original location through the date service is disconnected. Billing for the new location will be effective the next day. The rates and charges for the new location will be those currently applicable for new customers.

Customers moving service into territory served by the Company will have stability against Company initiated changes in nonrecurring charges for the remainder of the period covered by the new written agreement. The first bill rendered after service is reestablished will contain advance and, if applicable, may contain retroactive billing; thus the application of monthly rates and progression of nonrecurring charges, if still applicable, will remain unaffected.

At the time of disconnect at the original location, payment in full of the present worth of all installation charges being paid concurrent with nonrecurring charges shall be required.

1. Nonrecurring Charge Options (cont'd)

d. Transfers of Service to Premises on Noncontinuous Property (cont'd)

(2) (cont'd)

- (c) Tariffs for the same service and for nonrecurring charge option plans must exist in both companies at the time of the move. For the purposes of administering this condition, a tariff with a payment plan classified as obsolete shall be considered currently available. If tariffs exist for the same service, but the lengths of nonrecurring charge options filed are different, the customer will be required to select one of the periods filed at the new location. If required to select a new contract period, the actual number of months the customer will be required to pay under the new contract is determined as follows: (1) Compute the total of all nonrecurring option charges paid by the customer to the date of disconnect; (2) calculate the original company's present worth of said total as though the payments had been made under a theoretical contract having a fixed period equal to that of the new contract selected; (3) divide said total of all charges paid by the monthly rate determined for the theoretical contract; and (4) subtract the number of months derived in (3) from the number of months of the new contract period selected.

- (d) Transfer of service between two customers within four months of a lapse-in-service move is not permitted.

e. Re-use of Equipment

A customer with two separate services, both furnished under nonrecurring charge options, may, when disconnecting a portion of equipment being furnished under one service, elect to re-use such equipment on the other service, thereby continuing the existing nonrecurring charge options and associated contract periods for the items of equipment involved, subject to the following:

- (1) Disconnection and re-use is limited to (a) two visual display arrangements, (b) two Com Key systems with identical common equipment, or (c) individual components of a DIMENSION system when the item is compatible with the other service.
- (2) A nonrecurring charge based on the expense incurred for such disconnection and re-use of equipment is applicable.

(C)

A. Nonrecurring Charge Options and Companion Rate and Charge Plan (cont'd)

1. Nonrecurring Charge Options (cont'd)

e. Re-use of Equipment (cont'd)

(3) The customer may not have continuous service on either of the two services involved.

(4) Service connection charges, as covered in Part 3, Section 1 of this tariff, apply to any items of service or equipment associated with such disconnection and re-use and which are not under a nonrecurring charge option.

/1/

f. Installation Charge Payment Options

/2/

For service and equipment items furnished under nonrecurring charge options, any applicable installation charges may, at the customer's option, be paid (a) initially in a lump sum, or (b) as recurring monthly payments, payable over the same period of time as that selected by the customer under the nonrecurring charge options. Such recurring monthly payments will be based on the amount of the installation charge adjusted for the time value of money for the selected number of months. The following factors apply when converting the installation charge to recurring monthly charges (i.e., installation charge x factor = recurring monthly charge for number of months selected):

<u>Number of Monthly Payments</u>	<u>Factor</u>

g. Lump Sum Payment of Nonrecurring Charges

At the customer's option, a lump sum payment of the present worth of the nonrecurring charge balance due, at a 10% annual discount may be made any time during the contract period.

/1/

h. Termination of All or a Portion of a Service

/2/

- (1) Except as set forth in (2) following, in the event all or a portion of a service being furnished under nonrecurring charge options is terminated, the customer will be required to pay an amount equal to the present worth of any nonrecurring charge balance due, at a 10% annual discount.
- (2) When only a portion of a service is terminated, the customer may, in lieu of (1) preceding, elect to continue to pay any unpaid balance of the nonrecurring charges in monthly payments through the period of the contract.
- (3) Where major rearrangements of the equipment left in service are required as a result of a partial discontinuance, the expense incurred by the Company for such rearrangements will be billed to the customer in addition to the nonrecurring charge balance due referred to in (1) preceding, or, at the option of the customer, the nonrecurring charge balance due for all of the service will be billed to the customer and a new initial contract period for the equipment as rearranged will commence.

i. Assignment or Transfer of Service and/or Equipment

- (1) Service, including equipment being furnished under nonrecurring charge options, may be assigned or transferred under the provisions of Part 2, Section 2 of this tariff. The assignment or transfer of service charge included in Part 3, Section 1 of this tariff applies, except for those systems listed below for transfer fee specified applies in lieu of such Part 3, Section 1 charge.

(C)

A. Nonrecurring Charge Options and Companion Rate and Charge Plan (cont'd)

1. Nonrecurring Charge Options (cont'd)

i. Assignment or Transfer of Service and/or Equipment (cont'd)

- (2) Equipment being furnished under nonrecurring charge options may be assigned or transferred to another individual, partnership, association or corporation with the consent of the customer who is terminating the associated service, provided there is no relocation or reconfiguration of such equipment and subject to the provisions of Part 2, Section 2 of this tariff. The charge treatment specified in (1) preceding also applies for the assignment or transfer of equipment only.
- (3) Assignment or transfer of service and/or equipment between two customers either in anticipation of or incidental to a lapse of service move (A-1-d preceding) by either customer is not permitted.

j. Repricing of Equipment Furnished Under Nonrecurring Charge Options

On each occasion that items of equipment offered under nonrecurring charge options are repriced, existing customers to such items will continue to pay the nonrecurring charges in effect at the time such items were contracted for. All "vintage" nonrecurring charge options which are still in effect for customers as described in this paragraph are included in the Vintage Pricing Lists associated with this tariff.

2. Companion Rate and Charge Plan

a. Description of Plan

- (1) The companion rate and charge plan (Plan 2) is available for specific items of service and equipment which are also available under nonrecurring charge options (Plan 1) as covered in various Sections of the tariff.
- (2) Under this plan there is a specific monthly rate for each item of service and equipment which applies as long as the item is provided, plus a nonrecurring charge.
- (3) The customer may select different plans, i.e., nonrecurring charge options and the companion rate and charge plan for items associated with the same system.

A customer who, at the time of installation, had not elected Plan 1, may do so subsequently under the following conditions:

- (1) The customer will select an appropriate Plan 1 payment option from those available in the currently effective rate schedule and payment will commence at the date of conversion.
- (2) The customer will not be required to pay installation charges under Plan 1 for those items which are converted. No credit will be granted for monthly rates previously paid.
- (3) The customer will sign a memorandum of agreement acknowledging acceptance of the rates, charges and conditions of payment.
- (4) The customer will be liable for payment of any and all applicable tariff charges provided for under other tariff Sections.

3. Service Connections, Moves and Charges

The charges included in Part 3, Section 1 of this tariff for service connections, moves and changes of items furnished under Plan 1 and Plan 2 apply in addition to any nonrecurring and installation charges applicable for service connections, moves and changes under the provisions of this tariff.

3. CUSTOM NUMBER SERVICE

(D)
(C)/1/

A. Description

Custom Number Service (CNS) allows residence customers to request a specific telephone number other than the one that would normally be assigned by the Company. These specifically requested numbers include, but are not limited to, numbers with a desired or particular alphabetic equivalent, "easy to remember" numbers because of repeating or sequential digits, or another numerical pattern preference.

(C)

B. Terms and Conditions

1. The Company will verify the availability of the requested number and, when feasible, assign the number.
2. The CNS charge does not give any customer a property right in the telephone number selected and assigned.
3. CNS is provided subject to the availability of facilities and telephone numbers.
4. The Company records, including directory services, will be maintained in numeric format.
5. The Company will not be responsible for the manner in which Custom Numbers are used for marketing, advertising, and other purposes by the customer.

C. Rates and Charges

A nonrecurring charge will apply when a requested Custom Number preference is assigned to the customer. Charges are not applicable when a customer's number assignment preference cannot be met and an assignment from the Company's normal assignment process is made.

Charges for Custom Number Service are in addition to any charges applicable to the service with which it is associated.

4. NEIGHBORHOOD SELECT

(D)
(C)/1/

A. Description

Neighborhood Select is a one-way optional calling plan. Neighborhood Select permits customers to expand their calling area by adding one or more exchanges from those available in the plan. The plan's additional exchanges consist of contiguous exchange(s), the exchange of the County Seat, and exchange(s) of school districts which are not included in the customer's local calling area. Neighborhood Select provides for calling on a flat rate basis from the customer's exchange to the exchange(s) selected by the customer.

B. Terms and Conditions

1. Neighborhood Select is a pilot plan that is available to residence customers. Service will commence on the effective date of this tariff. It will be offered for not less than 12 months, at which time it may be extended, modified, or withdrawn by the Company.
2. Neighborhood Select customers may select exchanges on a one-at-a-time basis from those specified in d. following
3. Neighborhood Select cannot be combined with any other optional calling plan. Neighborhood Select will not be furnished with Foreign Central Office or Foreign Exchange Services.

(D)
(C)/1/

B. Terms and Conditions

4. Only direct dialed calls are included in the Neighborhood Select plan.
5. Neighborhood Select contains exchanges that may also be included under Local Calling Plus. In these instances the exchange will remain under the Local Calling Plus schedule unless the customer chooses to include it in the Neighborhood Select plan.
6. There will be no nonrecurring charge to establish Neighborhood Select. A maximum of three (3) changes to Neighborhood Select will be permitted per calendar year. There is no charge for these changes.
7. Customers must subscribe to the Company's intraLATA toll service if one or a combination of the selected Neighborhood Select exchange(s) involves a toll route.

1. GENERAL REGULATIONS

A. Application of Tariff

1. This Part 9 applies to intraLATA Message Toll Telephone service furnished or made available by AT&T Ohio, hereinafter, referred to as the Company and for intraLATA or interLATA Message Toll Telephone Service furnished or to be furnished by other connecting carriers concurring in Part 9 of this tariff. Message Toll Telephone Service includes Message Toll Mobile Telephone and IntraLATA 1+ Service as defined in Paragraphs 3 and 4 following. (T)
2. Where reference is made in this tariff to regulations, rates and charges specified in other tariffs of the Company, such tariffs as they now exist, or as they may be revised, added to or supplemented, are hereby adopted and made a part of this tariff. (T)

B. Regulations

1. Definition

Message Toll Telephone Service provides for the furnishing of facilities, other than facilities for exchange service as defined in Part 4 of this tariff and other than facilities for mobile telephone service as defined later in this Section, for telephone communication between local service areas, or between a local service area and a mobile service area, or between two mobile service areas, in accordance with the regulations and system of charges specified in this Part 9. (T)

2. Abuse or Fraudulent Use of Service

See Part 2, Section 2 of this tariff

3. Advance Payments

See Part 2, Section 2 of this tariff

4. Authorized Attachments or Connections

- a. Customer-provided equipment and facilities may be attached to or connected with facilities furnished by the Company for message toll service, subject to the provisions of Part 2, Section 9 of this tariff. (T)

/1/

/1/ Material now appears on 1st Revised Sheet 2 in this Section.

18. Emergency Calls Offered at No Charge

Message toll telephone calls, to governmental emergency service agencies as set forth in a. following, having primary or principal responsibility with respect to the provision of emergency services to persons and property in the area from which the call is made, meeting the definition and criteria of an emergency call as set forth in b. following, are offered at no charge to customers.

- a. Governmental fire fighting, police, Ohio State Highway Patrol and emergency squad service (as designated by the appropriate governmental agency) qualify as governmental emergency service agencies provided they answer emergency service calls on a personally attended (live) twenty-four (24) hour basis, 365 days a year, including holidays.
- b. An emergency is an occurrence or set of circumstances in which conditions pose immediate threat to human life and/or property and necessitate that prompt action be taken. An emergency call is an originated call of short duration to a governmental emergency service agency in order to seek assistance for such an emergency.
- c. If a call from a locality to an emergency agency is included in a functioning 911 system, then calls from that locality to that emergency agency will be excluded from the provisions of this Paragraph 18.

19. Use of Service

The Company will permit resale or sharing of message toll telephone service under the terms (T) and regulations of Part 2, Section 2 of this tariff and subject to the provisions of this Part 9.

2. TWO POINT SERVICE

A. Definition

Two point message toll telephone service is that of furnishing toll connections between two main stations or PBX trunk lines, or a combination thereof.

B. Classes of Service

1. Two classes of two point message toll telephone service are offered, namely, customer dialed service and operator handled service. Operator handled service is offered for station-to-station calls and person-to-person calls as described in Part 11.

2. Rates Applicable on Certain Holidays

On Christmas Day (December 25), New Year's Day (January 1), Independence Day (July 4), Thanksgiving Day and Labor Day, the rate applicable is the Evening rate, unless a lower rate would normally apply.

- C. Customer-Dialed service** is that service where the person originating the call, dials the telephone number desired without the assistance of the Company operator, or when facilities are not available for dial completion, gives to a Company operator the telephone number of the desired telephone, private branch exchange system, or private branch exchange station which is reached directly rather than through a private branch exchange attendant; or gives the telephone number assigned to the MCC for interconnected service. (T) (T)

D. Collect Call (Reversed Charge), or Calling Card

1. Subject to the provisions in E. following, station-to-station and person-to-person calls (including messenger charges, if applicable) may, upon request, be:
 - a. Collect, i.e., charged against the called telephone number provided the charges are accepted at the called telephone number, and completed to other than public or semi-public telephones;
 - b. Calling Card, i.e., calls placed using a billing arrangement by which a call may be charged to an authorized Company calling card number. (T)

Issued: November 9, 2007

Effective: November 9, 2007

PART 9 - Message Toll Services
SECTION 1 - Message Telecommunications
Services and Schedules

Original Sheet No. 8

2. TWO POINT SERVICE (Cont'd)

E. Initial Minute, Additional Minutes, Service Charges and Discounts

1. Two point message toll service rates are quoted in terms of initial minute, additional minutes and service charges in the Schedule of Rates in I. following and Part 11, Section 1.

- a. Initial Minute

Initial minute rates are for connections of one minute or any fraction thereof.

- b. Additional Minutes

Additional minute rates are for each additional minute or any fraction thereof that the connection continues beyond the initial minute.

- c. Customer Dialed Station-to-Station

Only initial minute and additional minute rates apply.

- d. Automated Calling Card Station-to-Station, Customer Dialed - Operator Assisted - Calling Card Station-to-Station, Operator Handled Station-to-Station and Person-to-Person.

Initial minute and additional minute rates apply in addition to a service charge as set forth in Part 11, Section 1.

2. Discounts for the Evening and Night & Weekend reduced rate periods in the Schedule of Rates are expressed as a percent reduction of the charge calculated at the rates for initial minute and additional minutes, and are applied to that portion of the messages occurring within the rate discount periods stated in the Schedule of Rates.

- a. For all classes of service the discount is applied only to the sum of the initial minute and additional minute charges. The discount is computed separately for charges in each rate period and the results are then totaled.

- b. When application of the discount results in a fractional charge, the amount will be rounded down to the lower cent.

F. Timing of Messages

1. With respect to customer-dialed, automated calling card station-to-station, customer-dialed operator assisted and operator-handled station-to-station and third number billed calls, a message is considered as starting at the time telephone communication is established between the calling station and the called telephone number, MCC operator, PBX system, or PBX station reached directly rather than through a PBX attendant.

SECTION 1 - Message Telecommunications Services and Rate
Schedules

1st Revised Sheet 9
Cancels Original Sheet 9

2. TWO POINT SERVICE (cont'd)

F. Timing of Messages (cont'd)

2. With respect to operator-handled person-to-person calls, a message is considered as starting at the time telephone communication is established between the person calling and (1) the particular person called, (2) another party acceptable to the person calling, (3) the PBX station reached through a PBX attendant, or (4) the particular MCC mobile station called, or another MCC mobile station acceptable to the calling party.
3. Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator. (T)
4. Chargeable time does not include time lost because of faults or defects in the service.

G. Time of Day

1. The time legally or commonly in use at the rate center of the calling station determines the rate period for customer-dialed calls.
2. In cases where a message begins in one rate period and ends in another, the discount is computed in accordance with E-2 preceding.

H. Method of Applying Rates

1. Two point message toll telephone service rates between points are based on the rate distance between rate centers.
2. Message toll telephone service rates between points in Ohio are based on the airline distance between rate centers.
3. The rate centers and central offices for the State of Ohio are arranged alphabetically by rate center and numerically by central office in Section 3 and Section 4 of this Part 9, respectively.

Under the list of rate centers the columns headed "V" and "H" contain the vertical and horizontal coordinates for each rate center.

Schedules

Original Sheet 9.1

2. TWO POINT SERVICE (cont'd) (N)

H. Method of Applying Rates (cont'd) (N)

4. For the purpose of determining airline mileage, vertical and horizontal grid lines have been established across the State of Ohio. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in statute miles. A vertical (V) and a horizontal (H) coordinate is computed for each rate center from its latitude and longitude location by use of appropriate map-projection equations. A pair of V-H coordinates locates a rate center, for determining airline mileage, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed as explained in Section 2 of this Part 9. /1/

I. Schedule of Rates (cont'd)

1. All Classes of Service - Schedule A, B and C (cont'd)

- a. For customer dialed station-to-station calls, only initial minute and additional minute rates apply.
- b. Schedule A rates apply to calls terminating in an Independent Telephone Company exchange (unless Schedule B rates are available for such Independent Telephone Company exchange).
- c. Schedule B rates apply for customer-dialed station-to-station calling.
- d. Schedule C is available only to customers who subscribe to Minute Line Service as set forth in Part 4, Section 2 of this tariff and only for customer-dialed station-to-station calling.
- e. Operator assisted rates apply for all operator handled/assisted calls and all sent paid coin calls and automated calling card station to station calls. Operator assisted rates/Inmate service apply to Inmate Calling Service. (T)
- f. The rates for two-point Message Toll Telephone Service (MTTS) are those which would produce aggregate revenues commensurate with the costs incurred by the Company in providing two-point MTTS service at the rates. For the purposes of this regulation, the Company's costs will be measured by its access payments where applicable, and its intrastate access rates (as set forth in its Access Service Tariff), except where the PUCO has deemed the Company's intrastate access service to be competitive for certain customers and/or geographic areas.

Schedule B is available between the exchange areas designated below:

AT&T Ohio (T)

- All exchange areas as set forth in Part 4, Section 1 of this tariff.

The rate center of mobile stations served by a MCC, with whom the Company has made arrangements for the interchange of telephone traffic, is the wire telephone rate center of the Company exchange in which is located the point of connection of the system of the particular MCC, used by the mobile station on the particular toll message, with the system of the Company. (T)
(T)
(T)

4. Messages Placed by Hearing and/or Speech Impaired Persons

The regulations and rate discounts set forth in a. and b. following will apply to direct distance dialed messages placed by a hearing and/or speech impaired person.

a. Regulations

- (1) For purposes of this tariff, the definition of impaired refers to those persons with communication impairments, including those hearing impaired, deaf, deaf/blind, or speech impaired persons who have an impairment that prevents them from communicating over the telephone without the aid of a telecommunications device for the deaf.
- (2) Residential impaired customers or impaired members of a customer's household, upon written application and upon certification of their impaired status, which is evidenced by either a certificate from a physician, health care official, or state agency, or a diploma from an accredited educational institution for the impaired, are eligible to receive a discount off their message toll service rates, and, if they utilize telebraille devices, they are eligible to receive free access to local and intrastate long distance directory assistance. Additionally, TDD lines maintained by nonprofit organizations and governmental agencies, upon written application and verification that such lines are maintained for the benefit of the impaired are eligible to receive a discount off their message toll services rates.

b. Rate Discounts

Upon receipt of the appropriate application, and certification or verification, the following discounts off basic message toll service shall be made available for the benefit of the impaired:

Off the Schedule A day rates: a 40 percent discount off the intrastate, interexchange, customer-dialed, station-to-station calls occurring between 8:00 a.m. and 4:59 p.m. Monday through Friday; a 60 percent discount off the intrastate, interexchange, customer-dialed, station-to-station calls occurring between 5:00 p.m. and 10:59 p.m. Sunday through Friday, and on New Year's Day, Independence Day, Labor Day, Thanksgiving, and Christmas; and a 70 percent discount off the intrastate, interexchange, customer-dialed, station-to-station calls occurring between 11:00 p.m. and 7:59 a.m. any day, 8:00 a.m. and 4:59 p.m. Sunday, and all day Saturday; provided that, where the rates in the evening and night/weekend periods are the same, a 70 percent discount applies to both. (T)

Off the Schedule B day rates: a 40 percent discount off the intrastate, interexchange, customer-dialed, station-to-station calls occurring between 8:00 a.m. and 4:59 p.m. Monday through Friday; and a 70 percent discount off the intrastate, interexchange, customer-dialed, station-to-station calls occurring between 5:00 p.m. and 7:59 a.m. Monday through Friday, all day Saturday, all day Sunday and on New Year's Day, Independence Day, Labor Day, Thanksgiving, and Christmas. (T)

5. Message Toll Calls Placed through the Telephone Relay Service (TRS)

All message toll service calls placed through the Telephone Relay Service (TRS) are eligible to receive a discount off the message toll service rates. The rate discounts are the same as those set forth in paragraph 4.b. preceding. The discount shall not apply to sponsor charges associated with calls placed to pay-per-call services, such as 900, 976, or 900-Like services.

3. MOBILE TELEPHONE SERVICE

A. Regulations

1. General
 - a. Message Toll Mobile Telephone Service is a communication service through a base station between a mobile unit and a wire telephone located outside the mobile service area associated with such base station, or between two mobile units served through base stations having different rate centers.
 - b. Message Toll Mobile Telephone Service also includes service through a base station between a wire telephone or a mobile unit, and another unit which is authorized by the Federal Communications Commission to communicate with the base station, or between two such other units.
 - c. In the application of regulations and rates, units other than mobile units which are authorized by the Federal Communications Commission to communicate with a base station are considered as mobile units.
 - d. Message Toll Mobile Telephone Service is available to mobile units when within range of a base station through which such service is furnished, and subject to transmission, atmospheric and like limitations.
 - e. Calls may be filed either to a specified person or to a specified telephone.
2. Message toll mobile telephone is available through the base stations of the mobile service areas where the Company has arranged its facilities for such service. (T)

Other carriers which concur in this tariff are:

Ashtabula	Elyria	Mansfield
Bellefontaine	Geneva	Marion
Chillicothe	Hudson	Medina
Cincinnati	Lima	Orwell
East Claridon	Lorain

3. MOBILE TELEPHONE SERVICE

(N)

B. Rates

/1/

1. The method of determining mileage and message toll rates between the rate centers for the exchanges serving: (a) a base station and a wire telephone located outside the mobile service area, or (b) two base stations in different mobile service areas, is the same as that used in connection with message toll telephone service as set forth in Sections 1 and 3 of this Part 9.
2. The message toll rate applicable to a toll call to or from a mobile unit and a wire telephone, or another mobile unit, is determined as in B-1 preceding.

/1/

4. TRANSFER OF TOLL CHARGE SERVICE

(T) /2/

A. Regulations

1. Transfer of toll charge service provides an arrangement in connection with message toll telephone service whereby a customer's patrons have the privilege of calling him without the payment of a charge for a message toll call and without having to request specific reversal of this charge.
2. This service is available only to customers having PBX service, Centrex service, or non-residence or residence individual line service.
3. A customer selects the exchanges in which he desires such service to be furnished, subject to the approval of the Company. Each exchange selected includes all of the other Company exchanges within its local service area. The Company assigns and lists in the alphabetical directory serving the local service area of each of the selected exchanges, a special telephone number designation for the use of patrons.
4. Calls for the special number are accepted only when originating at telephones located in the exchanges with which the special telephone number is associated, and only those toll calls placed by calling this special number are considered as coming within the scope of the service.
5. The customer assumes the message toll charges for all calls made to such special number.

4. TRANSFER OF TOLL CHARGE SERVICE (cont'd)

(T) /1/

B. Rates and Charges

1. The customer to this service is charged the sent-paid operator handled station rate for each completed call.
2. In addition to such charges, the monthly rates included in a. and b. following apply for such service:
 - a. The following monthly rate applies for each telephone number designated by the customer to receive transfer to toll charge service calls

	Monthly Rate	USOC
Each selected exchange and all Company exchanges within its local service area	\$18.45	ENT

(T)

- b. A primary listing for identification of transfer of toll charge service is provided in each alphabetical directory in which listings for the selected exchange and the exchanges in its local service area appear. Additional directory listings will be provided at the non-residence additional listing rate included in Part 12, Section 1 of this tariff.

3. Service in Exchanges of Other Telephone Companies

When transfer of toll charge service is requested in an exchange of another telephone company, the regulations, rates and charges applicable for such service under the tariff of the other telephone company apply.

TFA No. OH-08-18005

PART 9 – SECTION 2

EXHIBIT A

1. DETERMINATION OF TOLL RATE DISTANCES BETWEEN POINTS WITHIN THE STATE OF OHIO

(T)

(T)

To determine the rate distance between any two rate centers proceed as follows:

Step 1. Obtain the "V" and "H" coordinates for each rate center.

Step 2. Obtain the difference between the "V" coordinates of the two rate centers. Obtain the difference between the "H" coordinates.

Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

Step 3. Divide each of the differences obtained in Step 2 by three, rounding each quotient to the nearer integer.

Step 4. Square these two integers and add the two squares.

If the sum of the squares is greater than 1777, divide the integers obtained in Step 3 by three and repeat Step 4. Repeat this process until the sum of the squares obtained in Step 4 is less than 1778.

Step 5. The number of successive divisions by three in Steps 3 and 4 determines the value of "N". Multiply the final sum of the two squares obtained in Step 4 by the multiplier specified in the following table for this value of "N" preceding.

<u>N</u>	<u>Multiplier</u>	<u>Minimum Rate Mileage</u>
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361

/1/

/1/ Material now appears on Original Sheet No. 1.1 in this Section.

Issued: April 16, 1998

Effective: April 16, 1998

In accordance with Case No. 98-435-TP-ATA, issued March 16, 1998.

By J. F. Woods, President, Cleveland, Ohio

1. DETERMINATION OF TOLL RATE DISTANCES BETWEEN POINTS WITHIN THE STATE OF OHIO

/1/

Step 6. Obtain square root of product in Step 5 and, with any resulting fraction, round up to next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in Step 5 preceding, the minimum rate mileage corresponding to the "N" value is applicable.

Example:

The message rate distance is required between Toledo and Marietta.

	V	H
a. Toledo	5704	2820
Marietta	5938	2270
b. difference	234	550
c. (1) dividing each difference by three and rounding to nearer integer = 78 and 183.		
d. (1) squaring integers and adding.	78 x 78 = 6,084	
	183 x 183 = 33,489	
sum of squared integers		39,573

/1/

/2/

sum of squared integers is greater than 1777, so divide integers in c.(1) by three and repeat d.(1).

/2/

/1/ Material formerly appeared on Original Sheet No. 1 in this Section.

/2/ Material formerly appeared on Original Sheet No. 2 in this Section.

Issued: April 16, 1998

Effective: April 16, 1998

In accordance with Case No. 98-435-TP-ATA, issued March 16, 1998.

By J. F. Woods, President, Cleveland, Ohio

PART 9 - Message Toll Services
SECTION 2 - V and H Coordinates

1st Revised Sheet No. 2
Cancels
Original Sheet No. 2

(T)

1. DETERMINATION OF TOLL RATE DISTANCES BETWEEN POINTS WITHIN THE STATE OF OHIO

(T)

(T)

Step 6. (cont'd)

(T)

Example: (cont'd)

(T)

/1/

c. (2) dividing integers in c.(1) by three and rounding = 26 and 61.

d. (2) squaring integers and adding, $26 \times 26 = 676$
 $61 \times 61 = 3,721$
sum of squared integers $4,397$

sum of squared integers is greater than 1777, so divide integers in c.(2) by three and repeat d.(2).

c. (3) dividing integers in c.(2) by three and rounding = 9 and 20

d. (3) squaring integers and adding, $9 \times 9 = 81$
 $20 \times 20 = 400$
sum of squared integers 481

This sum of squared integers is less than 1778 and was obtained after three successive divisions by three, therefore "N" = 3.

e. Multiply final sum of squared integers by factor 72.9 (corresponding to "N" = 3).

481
 $\times 72.9$
 $= 35,064.9$

f. Square root of 35,064.9 = 187 and a fraction, which is rounded up to 188 miles (fractional miles being considered full miles). The 188 miles is larger than the minimum 121 rate miles applicable when "N" = 3, so the message rate mileage is 188 miles.

/1/ Material now appears on Original Sheet No. 1.1 in this Section.

Original Sheet A

Material now located in the AT&T Ohio Guidebook, Part 9, Section 2.

(N)

Issued: April 1, 2008

Effective: April 1, 2008

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated June 6, 2007,
Case No. 06-1345-TP-ORD.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-08-18005

PART 9 – SECTION 3

EXHIBIT A

1. VALUELINK (T)

A. General

ValueLink is an optional service which provides a per minute rate in lieu of the rates which are (T)
normally applicable to Message Toll Telephone Service. ValueLink is available for calls (T)
originating from the exchange areas designated below:

AT&T Ohio (T)

- All exchange areas as set forth in Part 4, Section 1 of this tariff.

The Champaign Telephone Company

- Urbana
- Terry Haute

Issued: November 9, 2007

Effective: November 9, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003,
Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17745

1. VALUELINK (cont'd)

(T)

B. Regulations

In addition to the regulations set forth in other sections of this tariff, the following regulations apply to this service.

1. ValueLink rates apply to customer-dialed station-to-station intraLATA long distance calls. ValueLink cannot be combined with any other Message Toll usage calling plan. ValueLink is available on all classes of non-residence services. (T)
(T)
(C)
2. ValueLink provides the following features: (T)
 - a. 90 day customer satisfaction guarantee that allows new ValueLink customers to cancel their contract without incurring termination liability charges. This satisfaction guarantee does not apply to customers that terminate an contract or convert from another Toll term product to subscribe to ValueLink. (T)
(T)
 - b. Price protection which guarantees no price increases for the duration of the contract.
3. At the expiration of the selected ValueLink term, if a customer does not expressly indicate election of a new term, the rates will revert to the applicable basic Message Telecommunications Services rates schedule(s). (T)
4. Customers who terminate their 18 or 36 month contract before the expiration date of the contract will be billed termination liability of a lump sum equal to 50% of the full monthly fixed rate times the number of months remaining on the contract.

Commission approval of the above termination liability language is not intended to indicate that the Commission has sanctioned any particular legal result should a dispute arise between the parties. In the event of dispute signators to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

Issued: August 11, 2004

Effective: September 10, 2004

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

2. VALUELINK PLUS (T)

A. General

ValueLink Plus is an optional service which provides a per minute rate in lieu of the rates which (T)
are normally applicable to Message Toll Telephone Service. ValueLink Plus is available for calls (T)
originating from the exchange areas designated below:

AT&T Ohio (T)

- All exchange areas as set forth in Part 4, Section 1 of this tariff.

The Champaign Telephone Company

- Urbana
- Terry Haute

Issued: November 9, 2007

Effective: November 9, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003,
Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17745

2. VALUELINK PLUS (cont'd)

(T)

B. Regulations

In addition to the regulations set forth in other sections of this tariff, the following regulations apply to this service.

1. ValueLink Plus rates apply to customer-dialed station-to-station intraLATA long distance calls. ValueLink Plus cannot be combined with any other Message Toll usage calling plan. ValueLink Plus is available on all classes of non-residence services. (T)
(C)
2. ValueLink Plus is offered on an 18 and 36 month payment plan. (T)
3. ValueLink Plus offers six different monthly usage package options, (A, B, C, D, E and F). These usage package options represent different levels of Minimum Monthly Usage Commitments (MMUC), per account, among which customers may choose. The monthly usage package option selected by the customer will be the minimum monthly usage charge for the service at the payment plan selected by the customer. (T)
4. ValueLink Plus provides the following features: (T)
 - a. 90 day customer satisfaction guarantee that allows new ValueLink Plus customers to cancel their contract without incurring termination liability charges. This satisfaction guarantee does not apply to customers that terminate an contract or convert from another Toll term product to subscribe to ValueLink Plus. (T)
(T)
 - b. Price Protection which guarantees no price increases for the duration of the contract.

Issued: August 11, 2004

Effective: September 10, 2004

SECTION 3 - Optional Calling Plans**

3rd Revised Sheet 4
Cancels 2nd Revised Sheet 4

2. VALUELINK PLUS (cont'd)

(T)

B. Regulations (cont'd)

5. ValueLink Plus provides the customer with the option of a Mobility Feature Package which includes: (T)
 - a. Calling Card Usage Option which allows for Calling Card calls to be billed at selected plan price for an additional MMUC (T)
 - b. Contract Upgrade which allows the customer to upgrade to longer terms and/or larger volumes at lower prices.
 - c. Minimum Monthly Usage Commitment calculated as a Minimum Annual Usage Commitment for customers who elect the 36-month contract.
6. At the expiration of the selected ValueLink Plus term, if a customer does not expressly indicate election of a new term, the rates will revert to the applicable basic Message Telecommunications services rates schedule(s). (T)
7. If the customer terminates the plan before the expiration of the contract term, the customer will be billed termination liability of a lump sum equal to the Minimum Monthly Usage Commitment Rate times the number of months remaining on the contract.

Commission approval of the above termination liability language is not intended to indicate that the Commission has sanctioned any particular legal result should a dispute arise between the parties. In the event of dispute signatories to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

Issued: November 9, 2007

Effective: November 9, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17745

2. VALUELINK PLUS (cont'd) (T)

C. Rates and Charges

1. The ValueLink Plus Minimum Monthly Usage Commitment (MMUC), per account, per usage package option and per minute rates are those set forth in 5. following (T)
2. The Mobility Feature provides for Calling Card usage to be billed at selected plan price for an additional MMUC. The MMUC is as set forth in 5. following. (T)
3. The MMUC is a minimum usage level that a customer must commit to per month, per account in order to receive the discounted per minute rate. If the total ValueLink Plus charges are below the MMUC in any given month, the full amount of the applicable MMUC will apply. (T)
4. ValueLink Plus usage is billed in six (6) second increments. (T)
