A. DESCRIPTION

Enhanced ValueLink Plus is an optional calling plan service that combines outbound, toll free inbound, and calling card types of intraLATA long distance usage into a single simplified calling plan. Enhanced ValueLink Plus is available for calls originating from the exchange areas designated below:

(T)

(T)

All SBC-Ohio exchange areas as set forth in Part 4, Section 1 of this tariff.

(C)

B. DEFINITIONS

In addition to the regulations set forth in other portions of this tariff, the following terms and conditions apply to this service.

1. Enhanced ValueLink Plus rates apply to customer-dialed station-to-station, calling card, and toll free inbound intraLATA long distance calls. Toll free inbound allows an Enhanced ValueLink Plus subscriber to receive long distance calls that are placed, within the subscriber's home LATA, without charge to the originating party. The service may be provided on the customer's main telephone account and on any other accounts billed under the main account.

(T)

- a. Enhanced ValueLink Plus prices are not applicable to IntraLATA long distance usage that is originated (outbound) or terminated (toll free inbound) on a FlexLine basic exchange access line.

(T)

2. Enhanced ValueLink Plus is available to any class of business customer (excluding COCOT).

(T)

(C)

3. Enhanced ValueLink Plus cannot be combined with any other optional calling plan.

(T)

4. Enhanced ValueLink Plus is available on a month-to-month, 12, 24, or 36 month term plan.

These usage package options represent different levels of Minimum Monthly Usage Commitment (MMUC) or Minimum Annual Usage Commitment (MAUC), per account, among which customers may choose. The monthly usage package option selected by the customer will be the minimum monthly usage charge for the service at the payment plan selected by the customer. IntraLATA long distance usage as described in B.(1) above will be used to determine whether the total commitment level has been met. (T)

B. LIMITATIONS

1. When it is necessary to use interexchange private lines of another telephone company in order to furnish a private line service, such private line service will be furnished only if satisfactory arrangements can be made with such other telephone company.
2. All prices listed in this tariff provide for the furnishing of the specified service subject to the availability of suitable facilities and equipment or where the construction of such facilities or placement of equipment does not involve unusual costs. When the revenue to be derived from the service does not warrant the Company assuming the unusual costs, the customer may be required to pay all or a portion of such costs and/or to contract for the service for a sufficient period of time to warrant the construction, depending on the circumstances in each case.
3. Any equipment offered herein which has grandfathered status under the FCC's Registration Program is offered and provided only to the extent of available stock, unless otherwise specified elsewhere in this tariff. The Company will maintain the item of equipment only as long as it is repairable. When the Company determines the equipment is no longer repairable, the customer must forego further use of the equipment which will be removed by the Company.
4. For items of equipment, other than those with grandfathered status, which are no longer offered to new customers but which are continued in service for existing customers at the location or locations specified in the regulations for these items, the Company cannot assure that it will continue to maintain these items for more than one year beyond the date when the equipment can no longer be provided to new customers. After one year, the Company will maintain the item of equipment only as long as it is repairable. When the Company determines the equipment is no longer repairable, the customer must forego further use of the equipment which will be removed by the Company.
5. Customers may use customer provided equipment to derive additional channels from a channel furnished by the Company as long as the channel so used remains within the specifications of the channel type provided to the customer. However, the Company does not guarantee the suitability of the channel provided by it for such subdivision into additional channels by the customer.

C. PROVISION OF SERVICE

1. All of the facilities used in providing a private line service shall be provided by the Company or by the Company and connecting telephone companies, except as stated elsewhere in this tariff. Such facilities will be provided up to the point of minimum penetration at the customer's premises. Premises wiring beyond the point of minimum penetration will be provided by the customer in accordance with FCC regulations. Terminal equipment or communications systems for use with private line services will be customer provided.
2. All use of Company provided facilities not otherwise defined in this tariff or FCC regulations remain for the exclusive use of the Company in the provision of its service.
3. Transmission parameters for private line services will be measured at the network interface. Transmission parameters for sub-voice and voice grade channels are defined for a single point of termination on the customers premises. While multiple terminations of a channel beyond the network interface (utilizing inside wire) are permitted, transmission parameters for a channel so terminated cannot be assured. Equipment that regenerates circuit transmission for multiple terminations and/or longer than inside wiring design standards will be provided by the customer in accordance with FCC regulations.
4. If the Company provided interface must, for regulatory or other Company reasons, be located closer to the customer's equipment than the point of minimum penetration, inside wire between the point of minimum penetration and the interface must meet appropriate Company standards, otherwise, transmission parameters will not be supported beyond the point of minimum penetration.

E. LIABILITIES OF THE COMPANY (cont'd)

6. Approval of the above tariff language by the PUCO does not constitute a determination by the Commission that the limitation of liability made a condition of service by the Company should be upheld by a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate damage claims, it is also the court's responsibility to determine the validity of the limitation clause.
