CASE NUMBER: 08-358-TP-ATA

FILE DATE: 4/1/08

SECTION: 11 OF 14

NUMBER OF PAGES: 200

DESCRIPTION OF DOCUMENT:

APPLICATION

**2. NATIONAL INTEGRATED SERVICES DIGITAL NETWORK (ISDN) DIRECT (Cont'd)** (T)

D. Channel Services (Cont'd)

2. Circuit Switched Service (Data capabilities) (Cont'd)

b. The following data capabilities are standard: (Cont'd)

3. Denied Origination - Allows call terminations, but prevents the origination of a call.
4. Denied Termination - Allows call originations, but prevents the termination of a call.
5. Hunt Group for Shared Data Access - Provides for the automatic search of a group of shared ports to find an available port in response to a connection request. The types of hunting are limited to Series Completion, Multi-Line and Circular.

c. The following data capabilities are optional:

1. Additional Call Offering - Provides notification to an ISDN user that a call directed to that user is present at the service switch, even though no B-Channel can be allocated for the call. Once notified, the user may free up a B-Channel (by clearing another call or placing another call on hold) in order to accept the additional call. This feature provides similar functionality as that provided by Call Waiting for the analog telephone user.
2. Alternate Answering - Provides for the automatic transfer of all incoming calls to a fixed telephone number when the called telephone number is not answered by a specified number of rings (see Part 7, Section 3 of this Tariff).
3. Busy Line Transfer - Provides for the automatic transfer of all incoming calls to a fixed telephone number when the called telephone number is busy (see Part 7, Section 3 of this Tariff).
4. Call Forwarding - Permits customer to transfer incoming calls to another line (see Part 7, Section 1 of this Tariff).

PART 17 - ISDN Services  
SECTION 1 - ISDN Direct Services

2nd Revised Sheet 1  
Cancels 1st Revised Sheet 1  
and 1st Revised Sheet 1.1 (N)

**1. NATIONAL INTEGRATED SERVICES DIGITAL NETWORK (ISDN) DIRECT**

(T)/1/

**A. Description**

1. National Integrated Services Digital Network (ISDN) Direct is a telecommunications service that provides an integrated voice/data communications capability for the transmission of Circuit Switched Voice and data signals on an incoming and outgoing basis utilizing Integrated Services Digital Network architecture as recommended by the International Telephone and Telegraph Consultative Committee (CCITT) and the American National Standards Institute (ANSI), as defined by Telcordia Technical References, and consistent with the North American ISDN Users Forum (NIUF) Implementation Agreements (specifically, Implementation Agreements NIU.301 and NIU.302).
2. National ISDN Direct provides the customer with the ability to combine Circuit Switched Voice and Circuit Switched Data services over a single National ISDN Direct line.
3. The two 64 Kbps "B" channels are used to transmit any combination of Circuit Switched Voice or Circuit Switched Data services.
4. The "D" channel is used to carry network signaling only.
5. National ISDN Direct service is available as a residence service.
6. The service is available from specially equipped digital switching equipment located in the Company's central offices and is provided where facilities permit and where capacity is available.

**B. Regulations**

1. A variety of standard and optional features and capabilities are offered. The availability and functions of the features may vary by serving central office.
2. National ISDN Direct lines are also subject to End User Common Line (EUCL) charges as filed by the SBC Operating Companies in Tariff F.C.C. No. 2. The customer shall be liable for all adjustments to the EUCL charge per National ISDN Direct line, per month, as authorized or mandated by the Federal Communications Commission (or by any regulatory body or commission or court of competent jurisdiction).

**1. NATIONAL INTEGRATED SERVICES DIGITAL NETWORK (ISDN) DIRECT (cont'd)**

(T)/1/

**B. Regulations (cont'd)**

3. The rates shown for National ISDN Direct are exclusive of local and toll charges and associated customer premises equipment.
4. Distance Extension charges, as specified in Paragraph 1.E.2. preceding, will apply for customers served beyond the normal transmission range specified in the Company's ISDN Interface Specifications.
5. When the customer's premises and the central office providing National ISDN Direct service are located in different Service Areas, Base Rate Service, contained in Part 15, Section 1 of the AT&T Ohio Guidebook, rates and charges will apply. Customers provided this service arrangement will require three Interexchange Mileage component charges and six Channel Mileage Termination charges for each National ISDN Direct line they purchase. (C)  
(C)
6. In cases where the customer's premises are in Independent Telephone Company (ITC) serving areas, the Company will assess Base Rate Interexchange Mileage charges only to the point of meet with the ITC or intermediate ITC. Charges for ITC services will be assessed by the ITC.
7. Rates and charges for other services normally applied on a per line basis apply on a per channel basis for this service. /1/

**1. NATIONAL INTEGRATED SERVICES DIGITAL NETWORK (ISDN) DIRECT (cont'd)**

(T)/1/

**C. Channel Services**

**1. Circuit Switched Service (Voice capabilities)**

- a. Provides the ability to originate and receive Circuit Switched Voice calls, as well as an electronic key set capability over a 64 Kbps "B" channel. Voice calls are subject to local and toll usage charges based upon the type of service selected by the customer. Local usage charges are specified in Part 4, Section 2 of this Tariff. Toll usage charges are specified in Part 9, Section 1 of the AT&T Ohio Guidebook.

(T)

b. The following voice capabilities are standard:

1. Analog Line Appearance - Allows analog lines to have a line appearance on the ISDN CPE with Circuit Switched Voice service. This capability is limited to analog lines that exist in the same switching entity that provides the National ISDN Direct service. This capability may result in the loss of some features and/or functionality on the analog line.

(T)/1/

**C. Channel Services (cont'd)**

**1. Circuit Switched Service (Voice capabilities) (cont'd)**

**b. The following voice capabilities are standard: (cont'd)**

2. **Call Hold** - Allows the customer to place a call on hold at the central office, making the channel available for another call (either incoming or outgoing). This can be done through software in the customer's equipment or, often, by depressing a properly programmed button on the customer's telephone equipment.
3. **Call Transfer** - Incoming and outgoing calls may be transferred to other lines. The customer initiating the transfer is responsible for any local or toll charges on transferred calls.
4. **Called Number Display** - The called number is displayed on compatible customer premises equipment when an outgoing call is placed.
5. **Caller ID** - The caller's number, if not blocked, is displayed on compatible customer premises equipment when an incoming call is received. The Caller ID feature will forward the calling number from the appropriately equipped originating central office to the customer provided display device.
6. **Conference Calling-3 Way** - Allows a user to hold incoming or outgoing calls, initiate another call, then return to the original call, adding on the last party.
7. **Denied Origination** - Allows call terminations, but prevents the origination of a call.
8. **Denied Termination** - Allows call originations, but prevents the termination of a call.
9. **Hunting** - Incoming calls to a busy line appearance are redirected to a predetermined telephone number to search for a line on which to complete the call. This may be another Circuit Switched Voice channel, another ISDN station or an analog line. The types of hunting are limited to Series Completion, Multi-Line and Circular. This feature may impact the use of Shared Call Appearance and Multiple Call Appearance in certain serving central offices.

Cancels 3rd Revised Sheet 6

**1. NATIONAL INTEGRATED SERVICES DIGITAL NETWORK (ISDN) DIRECT (cont'd)**

(T)/1/

**C. Channel Services (cont'd)**

1. Circuit Switched Service (Voice capabilities) (cont'd)

b. The following voice capabilities are standard: (cont'd)

10. Multiple Call Appearance - Provides up to four appearances of the station's primary directory number or secondary telephone number on the same instrument. These appearances may provide additional access from the public network, and/or may originate unique dial tone for additional outgoing access (see Additional Multiple Call Appearance for applications that require more than four call appearances on the same device). This feature may impact the use of Shared Call Appearance in certain serving central offices.
11. Shared Call Appearance - Provides the capability to terminate telephone numbers from one ISDN station to another. These numbers are configured in a Single Call Arrangement (SCA). SCA allows only one set to be active (either originating or terminating) on the Shared Call Appearance at any given time. Manual Exclusion capabilities are available in this arrangement.

c. The following voice capabilities are optional:

1. Additional Call Offering - Provides notification to an ISDN user that a call directed to that user is present at the service switch, even though no B-Channel can be allocated for the call. Once notified, the user may free up a B-Channel (by clearing another call or placing another call on hold) in order to accept the additional call. This feature provides similar functionality as that provided by Call Waiting for the analog telephone user.
2. Additional Multiple Call Appearances - Provides additional call appearances, beyond the initial four appearances, of a station's primary directory number or secondary telephone number on the same instrument. These appearances may provide additional access from the public network, and/or may originate unique dial tone for additional outgoing access.
3. Alternate Answer - Provides for the automatic transfer of all incoming calls to a fixed telephone number when the called telephone number is not answered by a specified number of rings (see Part 7, Section 3 of this Tariff).

/1/

(T)/1/

**C. Channel Services (cont'd)**

1. Circuit Switched Service (Voice capabilities) (cont'd)

c. The following voice capabilities are optional: (cont'd)

4. Automatic Callback - By dialing a special code, the customer is able to return the last call received whether or not it was answered (see Part 7, Section 2 of this Tariff).
5. Busy Line Transfer - Provides for the automatic transfer of all incoming calls to a fixed telephone number when the called telephone number is busy (see Part 7, Section 3 of this Tariff).
6. Call Forwarding - Permits customer to transfer incoming calls to another line (see Part 7, Section 1 of this Tariff).
7. Call Screening - Allows customer to prevent repeated calls from an unwanted caller whose number may or may not be known (see Part 7, Section 2 of this Tariff).
8. Intercom Calling - This capability allows a voice user to be able to call another voice user within the Electronic Key Telephone Service (EKTS) intercom group without affecting the busy/idle status of any of the directory numbers (DNs) of the calling voice user. Intercom groups can consist of just one other voice user, requiring no intercom address, can consist of two to ten voice users, requiring a one-digit intercom address, or can consist of two to one hundred voice users, requiring a two-digit intercom address. This is a form of abbreviated dialing in that, one voice user can dial another by simply hitting the intercom button and then dialing no digits, one or two digits respectively.
9. Message Waiting Indicator - Provides the ability to indicate to the ISDN station user that they have a voice or electronic message waiting at their Message Storage and Retrieval (MSR) System. The Message Waiting Indicator may be used to present either a visual or audible signal to the user as determined by the customer's equipment.

/1/

/1/ Material formerly appeared on 3rd Revised Sheet 20 in this Section.

Cancels 1st Revised Sheet 8

**1. NATIONAL INTEGRATED SERVICES DIGITAL NETWORK (ISDN) DIRECT (cont'd)**

(T)/1/

**C. Channel Services (cont'd)**

**1. Circuit Switched Service (Voice capabilities) (cont'd)**

**c. The following voice capabilities are optional: (cont'd)**

10. Repeat Dialing - Enables a customer to reach a called party whose line is busy without having to continually redial the telephone number (see Part 7, Section 2 of this Tariff).
11. Secondary Telephone Number - Provides an additional telephone number and one call appearance which is not physically terminated, but exists in the programming of Circuit Switched Voice. The additional directory number, while not terminated on a dedicated facility, may be accessed from the network, and may originate unique outgoing dial tone from one instrument that has another directory number as its primary directory number.
12. Station-Controlled Conference (6 Port) - Allows a station user to establish a conference call consisting of a maximum of six conferees, including the originator of the call.
13. Speed Calling - Permits the customer to place calls to a preselected group of telephone numbers by dialing abbreviated codes. Speed Calling is provided in capacities of eight or thirty telephone numbers (see Part 7, Section 1 of this Tariff).

**2. Circuit Switched Service (Data capabilities)**

- a. Provides the ability to originate and receive Circuit Switched Data calls over the 64 Kbps "B" channel. Data line speeds up to 64 Kbps are permitted. Circuit Switched Data calls are subject to local usage charges based upon the type of service selected by the customer. Local usage charges are specified in Part 4, Section 2 of this Tariff.

**b. The following data capabilities are standard:**

1. Caller ID - The caller's number, if not blocked, is displayed on compatible customer premises equipment when an incoming call is received. The Caller ID feature will forward the calling number from the appropriately equipped originating central office to the customer-provided display device.
2. Clear Channel Capability - Clear channel capability is provided since all signaling and control functions are handled by the "D" channel. This allows all 64 Kbps on each "B" channel to be used for customer information over the National ISDN Direct line. Calls may be either 56 or 64 Kbps depending on the network capabilities in place between the National ISDN Direct line and the distant end of the call.

# PART 17 – SECTION 2

## EXHIBIT A

**PART 17 - ISDN Services**  
**SECTION 2 - ISDN Prime Services**

6th Revised Sheet 1  
Cancels 5th Revised Sheet 1

**1. ISDN PRIME SERVICE**

**A. Description**

ISDN (Integrated Services Digital Network) Prime is a digital business service that provides PBX equipment and host computer access to a wide variety of switched services. These switched services include Circuit Switched Voice (local calling, Message Toll Service, Wide Area Telephone Service (WATS), and Success 800) and Circuit Switched Data. Each ISDN Prime will allow connection of the aforementioned services via a single central office connection. This service allows PBX equipment and host computer type devices to connect to central office services in bulk quantity, rather than on a line by line or service by service basis.

Each ISDN Prime connection provides access from a customer premises to the Company's Circuit Switched Voice, and Circuit Switched Data services via a 1.544 Mbps central office termination and a 1.544 Mbps Local Distribution Channel to the customer's premises. The Local Distribution Channel must be an AT&T Ohio provided facility. It may be a DS1 Local Distribution Channel, ProtectPath 1.5 or part of a DS3, ProtectPath 45, OC-3, OC-12, or other suitable Company facility with Clear Channel Capability. The rates and charges for the channel are in addition to those for the ISDN Prime connection. The central office connection is provided in base capacities of twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D). The "D" channel is used for out-of-band signaling and control of the "B" channels. Where technology permits, "D" channels can be shared by multiple ISDN Primes for the same customer. "B" channels can be dedicated to each Circuit Switched Voice and Circuit Switched Data service by type or they can be shared among service types by using the call by call feature.

Issued: November 16, 2007

Effective: November 16, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

2nd Revised Sheet No. 2

**1. ISDN PRIME SERVICE (cont'd)**

(T)

**B. DEFINITIONS**

**"B" Channel**

"B" Channel (Bearer Channel) is a 64 Kbps digital channel capable of transporting Circuit Switched Voice and Circuit Switched Data.

(T)

(D)

**"D" Channel**

"D" Channel (Delta Channel) is a 64 Kbps digital channel used to transport signaling and control information.

**Out of Band Signaling**

Out of Band Signaling is signaling that is separated from the channel carrying the Circuit Switched Voice and Data services.

(T)

**Unlimited Local Usage**

An optional plan that provides a flat monthly rate for unlimited local usage on Circuit Switched Voice and Circuit Switched Data traffic.

(T)

Issued: July 15, 2005

Effective: July 16, 2005

5th Revised Sheet No. 3  
Cancels  
4th Revised Sheet No. 3

**1. ISDN PRIME SERVICE (cont'd)**

(T)

**C. TERMS AND CONDITIONS**

1. ISDN Prime is offered only from central offices where the Company has arranged facilities for such service. ISDN Prime may be extended to central offices within the same Local Access Transport Area (LATA) through the application of DS1, DS3, OC-3, OC-12 Service or other suitable Company services. This arrangement is not available in Independent Telephone Company serving areas. (T)
2. The availability, functionality and capabilities of ISDN Prime service features may vary based on the serving central office. (T)
3. Customers may choose the Unlimited Local Usage option in lieu of paying Local Measured Rate Usage Charges. This option allows customers to pay a flat rated monthly charge for usage, rather than Local Measured Rate Usage Charges as described in Part 4 of this Tariff. This usage payment option applies only to Local Service Areas as defined in Part 4 Section 1 of this Tariff. It does not apply to Local Calling Plus exchanges. In addition, it may not be combined with ISDN Local Calling Value Plan, CompleteLink, EasyLink, ValueLink, or any other optional calling plans and/or packages. (T)
4. The entire ISDN Prime service for the same customer of record furnished at the same premises must be uniformly on the same usage rate basis. Combinations of usage rate methods are not allowed. (T)
5. When an ISDN Prime subscriber is also the customer of record for the Company's high speed transport services, the ISDN Prime customer may request provisioning of the ISDN Prime over their high speed transport service's vacant bandwidth.
6. The same customer of record is required for both ISDN Prime and the associated Company facility. Sharing of common transport or ISDN Prime arrangements between multiple customers is not permitted.

PART 17 - ISDN Services  
SECTION 2 - ISDN Prime Services

5th Revised Sheet 4  
Cancels 4th Revised Sheet 4

**1. ISDN PRIME SERVICE (cont'd)**

**D. Features**

**1. Standard Features**

**Alternate Routing**

Allows a customer's incoming ISDN Prime traffic to be directed to a predetermined alternate route when all B Channels in the ISDN Prime trunk group are busy. The incoming traffic will be route advanced to another ISDN Prime Trunk Group or to an analog DID trunk group as long as the alternate route is within the same switch, is billed to the same customer of record, and is billed usage on the same rate basis. Calls may not route between trunk-side services and line-side services. All incoming calls will automatically alternate route on both an out of service and overflow basis to the alternate ISDN Prime Trunk Group or an analog DID trunk group. Multiple Alternate Routes may be linked together although the total number of Alternate Routes may be limited due to technical restrictions.

**Call by Call for Trunk Groups**

Allows the Circuit Switched Voice and Data services enabled on the ISDN Prime to share "B" channels and arrange them as a single trunk group. This allows incoming and outgoing Circuit Switched Voice and Data calls to utilize "B" channels on a call by call basis. Without this capability, each service will have a dedicated "B" channel.

**Caller ID**

All calling numbers presented to the services working on ISDN Prime can be delivered to the customer's CPE, including calls made to Direct Inward Dialing Service telephone numbers. This feature is optioned on a per trunk group basis only and is offered in appropriately equipped central offices.

Blocked Caller ID will be delivered to certain qualifying customers as described in FCC Memorandum Opinion and Order, CC Docket No. 91-281, adopted January 4, 2002. Such customers must certify to AT&T Ohio compliance with the waiver order's eligibility requirements. (T)

**Clear Channel Capability**

The "B" channels on the ISDN Prime are clear, since all signaling and control functions are handled by the "D" channel. This allows all 64 kbps on each "B" channel to be used for customer information over the ISDN Prime connection. Calls over the network may either by 56 kbps or 64 kbps depending on the public network in place between the ISDN Prime and the distant end of the call.

Issued: November 16, 2007

Effective: November 16, 2007

4th Revised Sheet 5  
Cancels 3rd Revised Sheet 5

**1. ISDN PRIME SERVICE (cont'd)**

**D. Features (cont'd)**

**1. Standard Features (cont'd)**

"D" Channel Control of Multiple ISDN Primes

Provides capability for a single "D" channel to provide signaling and control for one or more ISDN Prime connections. The twenty-fourth channel on one or more ISDN Prime connections is then made available for incoming and outgoing calls.

Dedicated Trunk Groups

Allows all 23 channels (24 where technology permits), or a subset thereof, to be used as stand alone trunk groups. Each channel is capable of handling incoming or outgoing Circuit Switched Voice, or Circuit Switched Data.

Digital Voice Transmission

All voice calls are transmitted using digital signaling.

Direct Inward Dialing Signaling

Permits incoming dialed calls from the exchange network to reach a specific number served by customer premises equipment (CPE) without the assistance of an attendant. It also provides for the unique identification of the call based on digits sent to the CPE by the central office. The central office will outpulse digits to the CPE which can further process the calls as desired.

Equal Access for InterLATA Calling

Allows the customer to preselect an Interexchange Carrier for each Circuit Switched Voice or Circuit Switched Data trunk group. The carrier designation can be changed for charges shown in Ameritech Operating Companies Access Service Tariff, F.C.C. No. 2, Section 4.2(C). (T)

PBX Station ID Capability

Allows the station user's number (calling party) to be transmitted over the ISDN Prime "D" channel from Direct Inward Dialing equipped CPE PBXs that use ISDN Prime. This number is provided by the originating station and must have an associated Direct Inward Dialing telephone number working in the central office.

(T)

**D. FEATURES (cont'd)**

2. Optional Features

2 B Channel Transfer

Allows the ISDN Prime to connect two calls, transfer the call together and then release the parties from the ISDN Prime.

(D)

(D)

Backup "D" Channel Arrangement

Provides backup for primary "D" channel under those circumstances where multiple ISDN Primes share a single "D" channel. A predetermined channel on another ISDN Prime connection will automatically take over call signaling for Circuit Switched Voice and Data calls. The back up "D" channel arrangement is strongly recommended if three or more ISDN Primes are controlled by a single "D" channel.

(T)

(T)

(T)

Call By Call for FX

Allows Foreign Exchange calls to be directed to and originated from ISDN Prime "B" channels. This provides Call By Call Service selection for incoming and outgoing Circuit Switched and Private Facility services (National ISDN only).

Issued: July 15, 2005

Effective: July 16, 2005

(T)

**D. FEATURES (cont'd)**

**2. Optional Features (cont'd)**

**Call By Call for Tie Lines**

Allows Tie Line calls to be directed to and originated from the ISDN Prime "B" channels. This provides Call By Call Service selection for incoming and outgoing Circuit Switched and Private Facility services.

**Circular Hunt**

A switch feature that dynamically points each new call attempt to the next idle B Channel following the last channel either to have accepted a call or the last channel to have attempted to place a call. Circular Hunt serves to evenly distribute traffic through all the B Channels in the trunk groups within the route list in a forward (ascending) circular fashion. Available where technical capabilities exist.

**ISDN Calling Name ID**

Allows ISDN Calling Name Identification with call control to send calling party information to ISDN Class II equipment.

**Network Name Display**

Allows the name of a station user calling over an ISDN Prime to be forwarded for display on a properly equipped customer-provided set. The terminating system may be in the same or a different central office.

**Network Ring Again**

Enables station users whose Digital PBX is connected to a central office by ISDN Prime to complete calls to a busy station line in another system without redialing. The system may be in the same or a different central office.

**Redirected Number**

Provides the redirected number (i.e., the directory number to which the call was last presented) to the CPE, as well as the calling number in cases such as call forwarding. If during the call establishment phase, the call is redirected to another directory number by call forwarding, both the calling party number and the redirected number are delivered to the called party. If a call is redirected multiple times, only the first and the last redirecting numbers are delivered. Available where technical capabilities exist.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17783

**1. ISDN PRIME SERVICE (cont'd)**

(T)

**F. PRICES (cont'd)**

**3. Payment Plans**

• **Month to Month**

ISDN Prime is offered on a Month-to-Month basis. The provision of (T)  
ISDN Prime Service on a Month-to-Month basis is dependent on the (T)  
availability and capacity of Central Office facilities.  
Month-to-Month prices will be subject to Company-initiated price (T)  
adjustments.

• **Term Payment Plans**

ISDN Prime is offered under the Term Payment Plan (TPP) which allows (T)  
the customer to pay for the service over a customer selected term  
payment plan.

Customers may elect to subscribe to ISDN Prime service for an (T)  
extended period under a Term Payment Plan (TPP) option which allows  
the customer to select a 12-, 24-, 36- or 60-month payment plan.  
During the length of the selected TPP, monthly prices for service  
elements ordered under the plan will automatically change (increase  
or decrease) as Company-initiated price changes become effective.  
However, under no circumstances will any price change cause the  
monthly price for those service elements to exceed the price that was  
in effect at the beginning of the selected TPP term.

In addition to other regulations of this tariff, the following terms  
and conditions apply to Term Payment Plans:

**Changes**

With the written permission of the Company, the obligation to pay the  
TPP charges may be assumed by another customer if the service has not  
been terminated and if the other customer intends to continue using  
the service at the present location and actually continues such use.  
Such assumption of service does not relieve or discharge the original  
customer from remaining jointly or severally liable with the  
transferee for any and all obligations existing at the time of the  
transfer.

Issued: July 15, 2005

Effective: July 16, 2005

• **Term Payment Plans (cont'd)**

Changes (cont'd)

2. During a customer's TPP term, conversion may be made to a new TPP term of the same or different length, if the expiration date for the new TPP is beyond the end of the current TPP. The new TPP becomes effective upon execution. Customers may also change from a Month-to-Month Payment Plan to a TPP. No credit for months under the previous TPP or under the Month-to-Month plan may be transferred to the new TPP. The customer incurs no liability for the remaining months on the current TPP, since the change is not considered a termination of service. The prices applicable for the new term are those currently in effect for new customers.

(T)

**Moves**

1. Termination charges are not applicable to changes in the physical location of ISDN Prime service as long as the service originates in the same serving central office area, and the customer retains the current TPP term or converts to a new TPP term having an expiration date which is beyond that of the current TPP contract. Non-recurring charges for the redesign of the ISDN Prime service will apply. The customer will experience some down time on the ISDN Prime service during the physical move of the transport element.
2. Termination charges do apply to changes in the physical location of ISDN Prime services when the new ISDN Prime service originates in a different serving central office area. The current ISDN Prime contract will be terminated, and the ISDN Prime service at the new location will be treated as new. All applicable ISDN Prime non-recurring charges apply.

Issued: July 15, 2005

Effective: July 16, 2005

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

Moves (cont'd)

3. At the option of the Company, and where technology and regulations permit, customers may elect to change the physical location of their ISDN Prime service to a different serving central office area, yet retain the ISDN Prime service out of the existing location by converting to Foreign Exchange (FX) service. Termination charges are not applicable when the customer retains the current TPP term or converts to a new TPP term having an expiration date which is beyond that of the current. Non-recurring charges for the redesign of the ISDN Prime service will apply. The customer will experience some down time on the ISDN Prime service during the physical move of the transport element.

Conversions to and from Unlimited Local Usage option

1. Customers may convert existing ISDN Prime service from Measured Rate usage to the Unlimited Local Usage option; however the current ISDN Prime TPP contract will be terminated. Termination charges are not applicable when the customer converts to a new TPP term having an expiration date which is beyond that of the current. Otherwise, termination charges will apply.
2. Customers may convert existing ISDN Prime service from the Unlimited Local Usage option to Measured Rate usage. Customers doing so may elect to retain their current TPP, or sign a new TPP contract. Customers retaining their current TPP will pay Termination charges on the Unlimited Local Usage rate element only. Termination charges are not applicable when the customer converts to a new TPP term having an expiration date which is beyond that of the current. Otherwise, termination charges will apply.

Issued: July 15, 2005

Effective: July 16, 2005

**1. ISDN PRIME SERVICE (cont'd)**

(T)

**F. PRICES (cont'd)**

**3. Payment Plans (cont'd)**

Renewal Options

1. If the customer does not elect a new TPP and does not request discontinuance of service, service will be continued at the Month-to-Month price then currently in effect for the Month-to-Month Payment Plan. At a later date, the customer may elect any TPP option currently in effect for new customers. (T)
2. The monthly TPP prices applicable for the new term are those currently in effect for new customers.
3. There are no nonrecurring charges associated with renewing a TPP.

**4. Termination Charges**

In the event of termination of the service provided under the Term Payment Plan (TPP) during the TPP term, the customer will remain liable for payment of a percentage of the monthly TPP charges for the remainder of the term as indicated below, which shall upon any such termination immediately become due and payable in its entirety.

Customers requesting termination of service prior to the expiration date of the TPP term will be liable for a termination charge.

Issued: July 15, 2005

Effective: July 16, 2005

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

PART 17 - ISDN Services  
SECTION 2 - ISDN Prime Services

3rd Revised Sheet No. 15  
Cancels  
2nd Revised Sheet No. 15

**1. ISDN PRIME SERVICE (cont'd)**

(T)

**F. PRICES (cont'd)**

**4. Termination Charges (cont'd)**

1. The termination charge for all TPP terms will be calculated as follows:

For service term agreements which become effective on or after July 1, 2003:

- in addition to any unpaid Special Construction or Nonrecurring Charges (excluding waived charges), customer termination liability for cancellation of ISDN Prime Service shall be equal to fifty percent (50%) of all recurring charges for the remaining months of the customer's TPP term

For service term agreements in effect prior to July 1, 2003.

- The dollar difference between the current monthly TPP price for the TPP term that could have been completed during the time the service was actually in service and the customer's current TPP price for each month the service was provided.

**EXAMPLE:**

A customer subscribed to a 60-month TPP term and disconnected service during the 37th month. This customer's termination charge would be:

- (36-month TPP price - 60-month TPP price) x 37 = Termination Charge

The 36-month TPP term could have been completed during the months the service was actually in service.

All termination charges will be based on the TPP prices in effect at the time of termination.

Issued: July 15, 2005

Effective: July 16, 2005

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

## **EXHIBIT A**

PART 17 - ISDN Services  
SECTION 3 - ISDN BRI Single B Channel Packet  
Service

Original Sheet No. 1

**1. ISDN BASIC RATE INTERFACE (BRI) SINGLE B CHANNEL PACKET SERVICE**

**A. DESCRIPTION**

ISDN Basic Rate Interface (BRI) Single B Channel Packet Service provides data communications capability for the transmission of Packet Switched Data signals utilizing Integrated Services Digital Network architecture as recommended by the International Telecommunications Union (ITU) and the American National Standards Institute (ANSI), as defined by Telcordia Technical References, and consistent with the North American ISDN Users Forum (NIUF) Implementation Agreements. Packet switching is designed to provide economical, usage-sensitive data transport for interactive (or bursty) data.

(N)

(N) /1/  
|  
/1/

ISDN BRI Single B Channel Packet Service only provides high speed Packet Switched Data service that does not connect to the Digital Packet Network (DPN) switch. This service is provided over one 64 Kbps "B" Channel of a single ISDN BRI service Line. No other Packet Network services are provided.

(N)

(N)

**B. DEFINITIONS**

**ISDN CO Termination**

Terminates the ISDN BRI Line in the serving central office.

/2/

**ISDN Direct Line**

The physical connection between and including the customer Network Interface and the ISDN CO Termination.

(N) /2/

**Kilosegment**

One thousand (1,000) segments.

/3/  
/3/

**Packet**

Continuous sequence of binary digits of information which is switched through the network as an integral unit. Consists of customer data, facilities and addressing/signaling information.

PART 17 - ISDN Services  
SECTION 3 - ISDN BRI Single B Channel Packet  
Service

Original Sheet No. 2

**1. ISDN BASIC RATE INTERFACE (BRI) SINGLE B CHANNEL PACKET SERVICE (cont'd) (N)**

**B. DEFINITIONS (cont'd)**

**Packet Switched Data - "B" Channel**

Provides the ability to originate and receive X.25 Packet Switched Data calls over a single 64 Kbps "B" channel.

/1/

Provides up to three (3) logical channels and throughput of up to 9.6 Kbps per individual logical channel.

/1/

**Permanent Virtual Circuit (PVC)**

A Virtual Circuit that is established and available on a permanent basis. No call establishment or call termination is associated with a Permanent Virtual Circuit.

/2/

/2/

**Segment**

A portion of a packet, defined by the Company as a sixteen (16) byte portion.

(N)

**Single "B" Channel**

A 64 Kbps portion of an ISDN BRI Service Line used for transmission of Packet Switched Data.

**Virtual Circuit**

A communications connection that allows transmission of sequenced data packets through the network. Transmission bandwidth is only allocated when packets are actually being transmitted.

**C. TERMS AND CONDITIONS**

1. A single device or terminal may be connected directly to an ISDN BRI Single B Channel Packet Service Line. This device will have a unique identifier, known as a Service Profile Identifier (SPID), and a unique primary directory number.
2. An ISDN CO Termination and an ISDN Direct Line is required for each ISDN BRI Single B Channel Packet Service Line.

(N)

/3/  
/3/

PART 17 - ISDN Services  
SECTION 3 - ISDN BRI Single B Channel Packet  
Service

Original Sheet No. 3

**1. ISDN BASIC RATE INTERFACE (BRI) SINGLE B CHANNEL PACKET SERVICE (cont'd) (N)**

**C. TERMS AND CONDITIONS (cont'd)**

3. Packet Switching Usage charges apply. Applicable charges are: /1/  
- Data Transport Minutes of Use, or /1/  
- Kilosegments

4. Customers who transmit an average of 2.0 kilosegments or less of /2/  
data per logical session per minute can choose between Minutes Of  
use (MOU) and Kilosegment billing. Customers who transmit greater  
than an average of 2.0 kilosegments per minute per logical session  
per minute will be billed for kilosegments transmitted. The average  
kilosegments per minute will be calculated for the billing period  
for rating purposes.

The measurement of a MOU session begins upon receipt of the call  
acceptance packet and ends upon receipt of the call clear packet.  
The minimum initial MOU session is 7 tenths of a minute and  
additional usage is measured in tenths of minutes. MOU's will be  
accumulated for the billing period for rating purposes.

Kilosegment measurement counts the number of segments transmitted.  
A kilosegment is 1000 segments. A segment has a billable length of  
64 octets of customer information. The minimum initial session is  
40 segments and additional usage is measured in segments. Segments  
are totaled at the end of the billing period and rounded to the next  
whole kilosegment for rating purposes. /2/

5. An evening, weekend and holiday fifty percent (50%) discount in /3/  
rates will apply to the ISDN Interface charge

The evening discount will apply for any portion of a call occurring  
Monday through Friday during the period from 4:00 P.M. to but not  
including 7:00 A.M.

The Weekend and Holiday fifty percent (50%) discount will apply for  
any portion of a call through the entire day. The Holidays are New  
Year's Day, Independence Day, Labor Day, Thanksgiving Day, and /3/  
Christmas Day.

PART 17 - ISDN Services  
SECTION 3 - ISDN BRI Single B Channel Packet  
Service

Original Sheet No. 5

**1. ISDN BASIC RATE INTERFACE (BRI) SINGLE B CHANNEL PACKET SERVICE (cont'd) (N)**

**F. PRICES**

The prices shown for ISDN BRI Single B Channel Packet Service are exclusive of local and toll charges and associated customer premises equipment.

(N) /1/  
/1/

ISDN BRI Single B Channel Packet Service Lines are also subject to End User Common Line (EUCL) charges. (See Other Applicable Charges and Payments.) The customer shall be liable for all adjustments to the EUCL charge per ISDN BRI Single B Channel Packet Service Line, per month, as authorized or mandated by the Federal Communications Commission (or by any regulatory body or commission or court of competent jurisdiction).

(N) /2/  
/2/

Charges for the loop, EUCL, and usage are based upon the customer's class of service.

/3/  
/3/

When the customer's premises and the central office providing ISDN BRI Single B Channel Packet Service Line are located in different Service Areas, Base Rate charges will apply. (See Other Applicable Charges and Payments.) Customers provided this service arrangement will require three Interexchange Mileage component charges and six Channel Mileage Termination charges for each ISDN BRI Single B Channel Packet Service Line they purchase.

(N) /4/  
(N)  
(C)  
(C)

In cases where the customer's premises are in Independent Telephone Company (ITC) serving areas, the Company will assess Base Rate Interexchange Mileage charges only to the point of meet with the ITC or intermediate ITC. Charges for ITC services will be assessed by the ITC.

**1. ADVANCED VIDEO SERVICE**

(T)

**A. Description**

Advanced Video Service provides for the intrastate, intraLATA transmission of a National Television System Committee - USA (NTSC) color video and stereo audio signal from a customer location to a video switch port where it can be connected to other customer-specified locations. (T)

It is capable of operating in the following modes:

- Point-to-point broadcast (one-way)
- Point-to-point interactive (two-way)
- Multipoint broadcast (one-to-many)
- Interactive mode with continuous viewing capability for up to four participants

This service gives a customer-designated system administrator remote access ability to initiate and terminate switched transmission via a Company-provided scheduling and reservation system. The multipoint interactive mode allows participating locations to operate in the following modes of operation:

- Conference Control (Conference leader determines who everyone will see)
- Continuous presence at all locations (up to four sites)

**B. Terms and Conditions**

**1. Commercial Customers**

The monthly price consists of two elements: a monthly fixed price which includes eighty hours of usage and a variable price for usage above eighty hours. The monthly variable price components are computed by adding all usage occurrences in fifteen-minute increments and rounding the total up to the next hour, then applying the variable hours sum (over eighty hours) to the price per hour-of-use matrix.

**Educational Institutions**

Educational institutions may subscribe to AVS upon the terms and conditions following. (T)  
Educational institutions as used herein is limited to those institutions which are chartered by the *State Board of Education* pursuant to Section 3301.16, Revised Code, as well as, two-year and four-year colleges and universities accredited by the State Board of Regents.

The billing customer of record determines eligibility for the educational institution price, not the physical location of the AVS line termination. (T)

Educational institutions can choose either one of two optional price plans as described below. The billing customer of record cannot mix Option A and Option B.

- 2. Hourly usage charges apply to each port participating on a call and are billed to the customer of record for that port. Other billing arrangements may be available where facilities permit.** (T)

Issued: December 7, 2007

Effective: December 7, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

(T)

**D. Prices**

**Educational Institutions**

**Option A**

The monthly price consists of **two elements**: a monthly fixed price which includes eighty hours of usage and a variable price for usage above eighty hours. The monthly variable price component is computed by adding all usage occurrences in fifteen-minute increments over eighty hours and rounding the total up to the next hour, then applying the variable hours sum (over eighty hours) to the price per hour-of-use matrix.

**Option B**

- The monthly price consists of **two elements**: a monthly fixed price and a variable price for all hourly usage. The monthly usage bill will be computed by adding all usage occurrences in fifteen-minute increments and rounding the total up to the next hour, then applying the total hours to the price per hour-of-use matrix.
- Billing from fixed and hourly usage must total a minimum amount that is determined by the contract length. If the billing does not meet \$23,760 for a twelve month contract, or an average of \$19,680 per year for a sixty or thirty-six month contract, the differential amount will be billed at the end of the contract period.
- Customers may move from Option B to Option A at any point once the customer has met the minimum revenue commitment described above.

4th Revised Sheet 7  
Cancels 3rd Revised Sheet 7 (T)

**1. ADVANCED VIDEO SERVICE (cont'd)**

(T)

**D. Prices (cont'd)**

**2. Payment Plans**

- **Term Payment Plans**

The minimum service period is twelve months. Optional contract periods of thirty-six months and sixty months are available.

- **Single Payment Option (SPO)**

The monthly recurring fixed price per port may be prepaid for periods of twelve, thirty-six or sixty months. The prepayment charges in no way constitute a purchase and the Company retains ownership of all equipment covered by prepayment. The following conditions apply:

- Customers who prepay will have an allowance applied. The prepayment will be calculated using the loan amortization method at the annual rate specified in Part 2, Section 3 of this tariff. The allowance will be based on the number of months of the prepayment period. The prepayment amount (principle) is the total outstanding recurring charges less the payment allowance.
- Monthly recurring prices per hour of use (if applicable) will continue to apply per the contract option chosen.
- Customers who change the length of a payment period will be credited any unused portion of the prepayment amount.
- Customers who prematurely disconnect the service will have termination charges deducted from the prepayment amount and any balances credited to their bill.

**3. Termination Charges**

(T)

Termination liability will apply to AVS ports that are disconnected prior to the expiration of the contracted service period. The charge is fifty percent of the remaining fixed monthly recurring charges or any minimum billing guarantees that would have been incurred by the customer if the service had been in service for the contract period. If a video port has been in service for more than the contract period, no termination charges apply.

**2. VALUELINK EXTRA**

(T)

Note: Effective November 1, 1999, no further installations of, or changes to ValueLink Extra service will be made. ValueLink Extra service in service on November 1, 1999 will be continued in service only for as long as such service remains at the location at which service is being furnished on the aforementioned date. ValueLink Extra service will be withdrawn on November 1, 2002, or earlier in the event that the in-service count declines to zero. (T)

**A. Description**

(T)

ValueLink Extra provides two optional volume discount plans for business exchange customers: ValueLink Extra with Toll and ValueLink Extra Local. Customers subscribing to ValueLink Extra receive monthly discounts on selected services based on the customer's selected Minimum Annual Revenue Commitment (MARC), Minimum Annual Toll Usage Commitment (MATUC), and term length. Customers may also be eligible for an annual Growth Bonus discount. (T)

**B. Terms and Conditions**

Minimum Annual Revenue Commitment

The MARC is the minimum annual revenue commitment a customer must commit to per year in order to receive a volume discount. The MARC revenue is the sum total of the customer's contributory services annually billed recurring revenue. Services contributing to the satisfaction of the ValueLink Extra with Toll MARC include the following: Business Basic Exchange Service; Business Trunk Service; Digital Transport Service port, digital interface, and multiplexer charges; ISDN Direct and ISDN Prime Service and Features; exchange, intrastate, intraLATA DS0, DS1 and DS3 Service including intraLATA interstate; Centrex Service and Features, including Centrex Single Payment Option; Business Local Usage charges including Centrex and ISDN usage, ISDN Local Calling Value Plan, Local Calling Plus, Community Calling, and Econo Call Service; Calling Card usage and surcharges; ValueLink Extra intraLATA, intrastate toll charges; ValueLink Extra intraLATA, intrastate 800/888 usage charges; Base Rate local distribution channels, channel mileage terminations, channel mileage, and multipoint bridging; and Digital Transport Service - Enhanced Service and usage, Custom and Advanced Custom Calling Features, and Telework. (T)

Issued: January 4, 2008

Effective: January 4, 2008

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-08-17951

**2. VALUELINK EXTRA (cont'd)**

(T)

**B. Terms and Conditions (cont'd)**

Minimum Annual Revenue Commitment (cont'd)

Services contributing to satisfaction of the ValueLink Extra Local MARC include all of the preceding services excluding intraLATA, intrastate message toll charges, 800/888 usage, and/or any toll charges billed to a Company Calling Card.

(T)

ValueLink Extra MARCs are available with two or three year term plans.

ValueLink Extra with Toll provides volume discounts to the monthly recurring rates for the following services: Business Basic Exchange Service and Business Trunk Service; Digital Transport Service port, digital interface, multiplexer charges; DS1 Service associated with the use of Digital Transport Service; Calling Card usage charges excluding surcharges; Business Local Usage charges including Centrex and ISDN usage, ISDN Local Calling Value Plan, Local Calling Plus, Community Calling, and Econo Call Service; ValueLink Extra intraLATA, intrastate message toll charges; and ValueLink Extra intraLATA, intrastate 800/888 usage charges.

(T)

(T)

(T)

ValueLink Extra Local provides volume discounts to all of the preceding services excluding intraLATA, intrastate message toll charges, 800/888 usage charges and/or any toll billed to a Company Calling Card.

(T)

ValueLink Extra Local provides volume discounts to all of the preceding services excluding intraLATA, intrastate message toll charges, 800/888 usage charges and/or any toll billed to a Company Calling Card.

(T)

ValueLink Extra customers who fail to meet their selected Minimum Annual Revenue Commitment will be billed the difference between the selected MARC and the actual annual revenue billed.

Local and state additional charges, taxes and the End User Common Line Charge are not volume discount eligible.

Except as provided elsewhere in this tariff, ValueLink Extra customers are not required to purchase all of the MARC contributory services. Normal tariffed recurring and nonrecurring charges apply for the installation and use of these services.

(T)

Issued: January 4, 2008

Effective: January 4, 2008

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

**2. VALUELINK EXTRA (cont'd)**

(T)

**B. Terms and Conditions (cont'd)**

Minimum Annual Revenue Commitment (cont'd)

A customer's Volume Discount may not exceed the following maximums per plan:

<u>MARC</u>	<u>Maximum Annual MARC Discount</u>
\$ 25,000 to 299,999	\$ 50,000
300,000 to 499,000	75,000
500,000 plus	100,000

An eligible Business customer may include up to, but may not exceed, 150 of its locations under one ValueLink Extra Plan. All locations must be within Company serving territory. A customer may subscribe to only one ValueLink Extra Plan at a time. (T)

The ValueLink Extra Plan is not transferable to, or may not be assumed by a customer or customers other than the customer of record without prior written consent of the Company. (T)

Minimum Annual Toll Usage Commitment (MATUC)

The MATUC is the total minimum annual toll usage commitment for all customer service locations covered by the ValueLink Extra with Toll Plan for the following Company services: (T)  
intraLATA, intrastate toll; Calling Card charges, excluding surcharges; and intraLATA, intrastate 800 and 888 services. (T)

The ValueLink Extra with Toll Minimum Annual Toll Usage Commitment (MATUC) term length and the Minimum Annual Revenue Commitment (MARC) term length must be identical.

Issued: January 4, 2008

Effective: January 4, 2008

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

TFA No. OH-08-17951

**2. VALUELINK EXTRA (cont'd)**

(T)

**B. Terms and Conditions (cont'd)**

Minimum Annual Toll Usage Commitment (MATUC) (cont'd)

MATUC usage prices as specified in Prices below apply to customer-dialed, station-to-station calling card calls; intraLATA, intrastate toll calls, and toll-free inbound intraLATA, intrastate calls.

The ValueLink Extra with Toll MATUC may not be combined with any other optional calling plan or discounts.

Customers subscribing to ValueLink Extra with Toll and who currently subscribe to other Company optional calling plans for one or more of their locations must commit to a MATUC equal to or greater than the sum of the revenue remaining on the existing optional calling plan commitment. (T)  
(T)

ValueLink Extra with Toll MATUC usage is billed per minute with initial increments of eighteen (18) seconds and additional increments of six (6) seconds or fraction thereof.

ValueLink Extra with Toll customers who fail to meet their selected Minimum Annual Toll Usage Commitment will be billed the difference between the selected MATUC and the actual annual intraLATA, intrastate, message toll and 800/888 usage charges billed.

Issued: January 4, 2008

(T)

**B. Terms and Conditions (cont'd)**

Growth Bonus

ValueLink Extra customers exceeding their annual baseline revenue are eligible for an annual 10% Growth Bonus Discount. In Year 1 the annual baseline revenue is the sum of the revenue billed prior to subscribing to ValueLink Extra for services noted below. The Year 1 incremental revenue amount is equal to the actual revenue billed in Year 1 minus the annual baseline revenue. If the incremental revenue is greater than zero, a Growth Bonus Discount equal to 10% of the incremental revenue is awarded to the customer in the form of an annual sum bonus at the end of year 1. (T)

In subsequent term years, the previous year's annual revenue is subtracted from the current year's revenue to obtain the incremental revenue amount. If incremental revenue is greater than zero, a Growth Bonus Discount equal to 10% of the incremental revenue is awarded in a lump sum bonus after the end of that year.

Growth Bonus baseline and Year 2 and 3 ValueLink Extra with Toll annual revenue is the sum total monthly recurring revenue billed for the following services: Business Local Usage Charges including Centrex and ISDN switched usage charges, Local Calling Plus, Community Calling, Econo Call Service, and Optional Local Area Service usage; intrastate, intraLATA toll charges; 800 and 888 usage charges including Success 800 and 800 Calling Plan usage; Business Exchange Access Service and Business Trunk Service; Digital Transport Service port, digital interface, and multiplexer charges; DS1 Services associated with the use of Digital Transport Service. **2. VALUELINK EXTRA (cont'd)**

(T)

**C. Prices (cont'd)**

There is no Service Connection Charge to enroll in ValueLink Extra.

**2. Termination Liability**

Customers terminating a ValueLink Extra Plan prior to the selected term period are subject to termination charges.

Termination charges are equal to 50% of the MARC multiplied by the number of years remaining in the customer's term period. For a partial year, if the partial year billed revenue is less than the MARC, the customer is liable for the difference between 50% of the MARC and the actual billed revenue.

Termination liability charges are not applicable if during the ValueLink Extra term period the customer converts to another Company access or usage plan with a term equal to or greater than the existing ValueLink Extra Plan, and a revenue commitment equal to or greater than the ValueLink Extra MARC. (T)

Commission approval of the above termination liability language is not intended to indicate that the Commission has sanctioned any particular legal result should a dispute arise between the parties. In the event of dispute signatories to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

**3. VALUELINK EXTRA - SELECT**

(T)

Note: Effective November 1, 1999, no further installations of, or changes to ValueLink Extra - Select service will be made. ValueLink Extra - Select service in service on November 1, 1999 will be continued in service only for as long as such service remains at the location at which service is being furnished on the aforementioned date. ValueLink Extra - Select service will be withdrawn on November 1, 2002, or earlier in the event that the in-service count declines to zero. (T)

**A. Description**

ValueLink Extra - Select is an optional volume discount plan for business exchange customers. Customers subscribing to ValueLink Extra - Select receive monthly discounts on selected services based on the customer's selected Minimum Annual Revenue Commitment (MARC). (T)

**B. Terms and Conditions**

**1. Minimum Annual Revenue Commitment**

The MARC is the minimum annual revenue commitment a customer must commit to per year in order to receive a volume discount. The MARC revenue is the sum total of the customer's annual billed recurring revenue after application of Select volume discounts for the following contributory services: Business Basic Exchange; Business Trunk Service; Business Local Usage charges including Centrex and ISDN usage, Local Calling Plus, Community Calling, and Econo Call Service; Centrex Service and Features, including Centrex Single Payment Option; Calling Card surcharges; ValueLink Extra - Select intraLATA, intrastate toll and 800/888 charges; ISDN Direct and ISDN Prime Service and Features, Digital Transport Service - Enhanced and usage, IntraLATA DSO, DS1, and DS3 including intraLATA interstate, Custom and Advanced Custom Calling Features and Telework. (T)

MARC volume discounts apply to the monthly recurring rates for the following services: Business Basic Exchange Service; Business Trunk Service; Calling Card usage charges excluding surcharges; Business Local Usage charges including Centrex usage; Local Calling Plus, Community Calling, and Econo Call Service; ValueLink Extra - Select intraLATA, intrastate toll and 800/888 charges. (T)

**B. Terms and Conditions (cont'd)**

**1. Minimum Annual Revenue Commitment (cont'd)**

ValueLink Extra - Select customers who fail to meet their selected Minimum Annual Revenue Commitment will be billed the difference between the selected MARC and the actual revenue billed.

Local and state additional charges, taxes and the End User Common Line Charge are not volume discount eligible.

Except as provided elsewhere in this tariff, ValueLink Extra - Select customers are not required to purchase all of the MARC contributory services. Normal tariffed recurring and nonrecurring charges apply for the installation and use of these services.

(T)

A customer's total annual MARC volume discount may not exceed the following maximums per plan, per year:

<u>MARC</u>	<u>Maximum Annual Volume Discount</u>
\$ 700 to 2,999	\$ 350
3,000 to 5,999	1,500
6,000 to 11,999	2,000
12,000 plus	2,500

An eligible Business customer may include up to, but may not exceed, 150 of its account numbers under one ValueLink Extra - Select Plan. All accounts must be within Company serving territory. A customer may subscribe to only one ValueLink Extra - Select plan at a time.

(T)

The ValueLink Extra - Select plan is not transferable to, or may not be assumed by a customer or customers other than the customer of record without prior written consent of the Company.

**COMPLETELINK**

**Note:** Effective October 24, 2003 the following elements of CompleteLink service are no longer available to Business customers. Business customers who had these elements under a signed agreement prior to October 24, 2003 may retain them until their current agreement expires.

**A. Description**

CompleteLink is an optional access and usage volume discount plan for Company business customers. Customers subscribing to CompleteLink receive monthly discounts on selected services based on the customer's Minimum Annual Revenue Commitment (MARC). (T)  
CompleteLink requires Company local access, local usage and local toll. (T)

**B. Definitions**

Minimum Annual Toll Usage Commitment (MATUC)

The total minimum annual toll usage commitment for all customer locations covered by the CompleteLink plan.

**C. Terms and Conditions**

MARC volume discounts apply to the following eligible services:

ADTS-E  
ADTS-E Usage

Issued: January 4, 2008

Effective: January 4, 2008

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-08-17951

**COMPLETELINK (cont'd)**

**C. Terms and Conditions (cont'd)**

1. Minimum Annual Toll Usage Commitment (MATUC) (T)

The MATUC is the total minimum annual toll usage revenue commitment for all customer service locations covered by the CompleteLink plan for the following Company services: (T)  
IntraLATA, interstate and intraLATA intrastate, message toll service; Calling Card charges excluding surcharges; intraLATA intrastate and intraLATA interstate 800/888 toll-free services.

A CompleteLink MARC that has less than a 10% MATUC will receive a lesser discount than MARCs that have a 10% or more MATUC. CompleteLink requires a Minimum Annual Toll Usage Commitment. See PRICES following.

MATUC usage prices as specified in PRICES, following, apply to customer-dialed, station-to-station calling card and IntraLATA, intrastate toll calls.

CompleteLink MATUC may not be combined with any other optional calling plan.

CompleteLink MATUC charges are billed per minute with initial increments of eighteen (18) seconds and additional increments of six (6) seconds or fraction thereof.

CompleteLink customers who fail to meet their selected MATUC will be billed the difference between the selected MATUC and the Annual Toll revenue billed.

**5. EASYLINK (Save/Winback)**

(T)

**A. Description**

Note: Effective April 30, 2004, no further installation of, or changes to EasyLink (Save/Winback) service will be made. Customers of record on April 30, 2004 may continue their service as long as their present term agreement remains in effect. In the event that these services are discontinued at their present location for any reason, they will not be re-established.

(T)

EasyLink is an optional access and usage volume discount plan for Company business customers who have received a competitive proposal and are considering switching their business network access lines or intraLATA toll service to a competitor. EasyLink is also available to customers who have left the Company for another carrier and now want to return their business network access lines or intraLATA toll to the Company.

(T)

(T)

(T)

(T)

Customers subscribing to EasyLink receive monthly discounts on total billed revenue based on the customer's Minimum Annual Revenue Commitment (MARC).

**B. Definitions**

Minimum Annual Revenue Commitment (MARC)

The minimum annual revenue commitment that the customer must commit to, per year, in order to receive the volume discount.

Total Billed Revenue

Total Billed Revenue included all Company regulated services, with the exception of products mentioned in C. Terms and Conditions.

(T)

**C. Terms and Conditions**

**1. Minimum Annual Revenue Commitment**

The MARC is the minimum annual revenue commitment that the customer must commit to, per year, in order to receive the volume discount.

MARC revenue is the sum total of the customer's annual total billed revenue, for all eligible business accounts, before discounts are applied.

Issued: January 4, 2008

**5. EASYLINK (Save/Winback) (cont'd)**

(T)

**C. Terms and Conditions (cont'd)**

The EasyLink plan is available with one year, two year, three year or five year term plans.

(T)

Easylink customers who fail to meet their selected MARC will be billed the difference between the selected MARC and the Annual revenue billed.

Accounts with existing term agreements, including, but not limited to Centrex, ISDN Direct, ISDN Prime, ADTS-E, FeatureLink DS0, DS1, are not eligible for EasyLink.

Local and state additional charges, taxes and the End User Common Line Charge are not volume discount eligible.

EasyLink Save/Winback is limited to 10 accounts.

An Easylink plan is not transferable to, or may not be assumed by, a customer or customers other than the customer of record without prior written consent of the Company.

(T)

The EasyLink plan applies to all of the intraLATA services of the subscribing customer, including all business usage and message toll service.

(T)

**5. EASYLINK (Save/Winback) (cont'd) (T)**

**D. Prices (cont'd) (T)**

**2. Revenue Growth Incentive**

At end of the 2nd year of the term agreement, and going forward, customers will receive an annual credit equal to 10% of the increase over the highest spending in any previous year of the contract.

**3. Other Applicable Charges and Payments**

Service Connection Charges are not applicable when establishing or changing to EasyLink. (T)

**4. Termination Charges**

Customers terminating an EasyLink plan prior to the expiration of the selected term period are subject to termination charges.

Termination charges are equal to 50% of the MARC multiplied by the number of years remaining in the customer's term period. For a partial year, if the partial year revenue is less than the MARC, the customer is liable for 50% of the difference between the MARC and the actual billed revenue.

Termination liability charges are not applicable if during the EasyLink term period the customer converts to another Company access or usage plan with a term equal to or greater than the existing EasyLink plan, and a revenue commitment equal to or greater than the EasyLink MARC. (T)

Commission approval of the above termination liability language is not intended to indicate that the Commission has sanctioned any particular legal result should a dispute arise between the parties. In the event of dispute signatures to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

**5. Service Guarantee**

Within 90 days of subscribing to EasyLink 3-year and 5-year term plans, customers may cancel this service without incurring the termination liability charges specified in this tariff. This guarantee does not apply to customers who terminate or convert to another Company toll, access and/or usage commitment product for the purpose of subscribing to EasyLink. (T) (T)

**1. OTHER EXCHANGE ACCESS SERVICES<sup>/1/</sup>**

**A. Local Service Options**

**1. General**

- a. The Company provides optional local exchange services that combine exchange service within a basic local service area plus customer-dialed (outgoing) calling beyond that basic local service area without the application of message toll charges. These optional local exchange services are available only in those exchange areas designated in this Paragraph A. (T)
- b. Optional local exchange services are provided subject to the availability of message toll telephone service facilities. In case a shortage of facilities exists, the provision of message toll telephone service shall take precedence over these services.
- c. Only one type of optional local exchange service may be furnished on an individual exchange service. Optional Off-Peak Toll Service may not be furnished on the same individual exchange service as an optional local exchange service.
- d. The optional local exchange services offered under the provisions of this Paragraph A. are available on message and flat rate residence individual and PBX trunks, on message rate non-residence individual and PBX trunks and on Centrex message stations.

**2. Community Calling Service**

**a. Regulations**

- (1) Community Calling Service provides customer-dialed (outgoing) calling to exchange areas within the State of Ohio that are outside the basic local service area, but within the same LATA and are not over 22 airline miles, determined in the same manner as message toll rate distances, from the exchange area in which the customer is located.
- (2) Community Calling Service will not be furnished with foreign central office or foreign exchange services.

<sup>/1/</sup> Effective August 1, 2004, no further installation of, or changes to Community Calling Service will be made. Community Calling Service in service on August 1, 2004 will be continued in service only for as long as such service remains at the location at which service is being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be re-established.

Original Sheet 47

**COMPLETELINK**

(T)/1/

**A. Description**

/1/

Note: Effective June 29, 2007, no further installation of, or changes to CompleteLink service will be made. Customers of record on June 29, 2007 may continue their service as long as their present term agreement remains in effect. In the event that these services are discontinued at their present location for any reason, they will not be re-established.

(N)

(N)

CompleteLink is an optional access and usage volume discount plan for AT&T Ohio business customers. Customers subscribing to CompleteLink receive monthly discounts on selected services based on the customer's Minimum Annual Revenue Commitment (MARC). For plan agreements entered into on or after October 24, 2003, CompleteLink requires AT&T Ohio local access and local usage.

(T)/1/

(T)

**B. Definitions**

Minimum Annual Revenue Commitment (MARC)

The minimum annual revenue commitment that the customer must commit to, per year, in order to receive the volume discount.

Contributory Services

Those services whose revenue is counted towards achievement of the customers selected MARC.

Eligible Services

Those services that are eligible for discounts based on achievement of a specified MARC.

PART 20 - Grandfathered Services  
SECTION 4 - Exchange Access Services

Original Sheet 48

**COMPLETELINK (cont'd)**

(T)/1/

**C. Terms and Conditions**

**1. Minimum Annual Revenue Commitment**

The MARC is the minimum annual revenue commitment that the customer must commit to, per year, in order to receive the volume discount.

MARC revenue is the sum total of the customer's annual billed revenue, for services specified in the Company's CompleteLink tariffs, for all customer's eligible business accounts located in the AT&T Midwest region, before discounts are applied.

(T)

Services contributing towards the MARC include, except as noted below, all AT&T Midwest regulated services (monthly recurring revenue, usage revenue, and Other Charges & Credits (OC&C), including fractionalized recurring and non-recurring charges), excluding the following if applicable:

(T)

End User common Line (EUCL) surcharges, EUCL offset charges, Enhanced 9-1-1 (E911) surcharges, Handicap surcharges, Primary Interexchange Carrier (PIC) charges, Local Number Portability (LNP) charges, Infrastructure Maintenance Fees (IMF), Universal Service Fund (USF) surcharges, Federal & State Line Port charges.

Additionally any service provided by the Company's affiliates (other than an AT&T Midwest Incumbent Local Exchange Carrier), charges for services provided by any other service provider and billed on behalf of that other service provider, and any other tax or charge imposed by local, state, or federal government entity are also excluded.

(T)

The CompleteLink plan is available with one year, two year, three year or five year term plans.

SECTION 4 - Exchange Access Services

1st Revised Sheet 49  
Cancels Original Sheet 49

**COMPLETELINK (cont'd)**

**C. Terms and Conditions (cont'd)**

1. Minimum Annual Revenue Commitment (cont'd)

CompleteLink customers who fail to meet their selected MARC will be billed the difference between the selected MARC and the Annual revenue billed.

MARC volume discounts apply to the following eligible services:

- Business Exchange Access Service
- Business Trunks

All Company Local Usage Services (Local Calling Plus, Community Calling, Econo Calling Service, except local usage from 'AILCVP' calling plan) (T)

- Centrex usage
- ISDN usage
- AT&T Ohio IntraLATA Toll usage
- AT&T Ohio Toll-free 800/888 usage
- Calling Card surcharges and usage
- Custom and Advanced Custom Calling Features, excluding Pay Per Use
- Remote Call Forwarding
- Multi-Ring Service
- Busy Line Transfer
- Alternate Answering
- Message Waiting Indication
- FeatureLink Service

Local and state additional charges, taxes and the End User Common Line Charge are not volume discount eligible.

Effective with agreements signed on or after October 24, 2003, with the exception of local access and usage, CompleteLink customers are not required to purchase any of the MARC contributory services. Tariffed recurring and nonrecurring charges apply to the installation and use of these services.

Issued: January 4, 2008

SECTION 4 - Exchange Access Services

Original Sheet 51

**COMPLETELINK (cont'd)**

(T)/1/

**C. Terms and Conditions (cont'd)**

1. Minimum Annual Revenue Commitment (cont'd)

An eligible CompleteLink customer may include up to, but not exceed 250 of its locations per state, under one CompleteLink Plan. A customer may subscribe to only one CompleteLink Plan at a time.

Except as required by law, a CompleteLink plan is not transferable to, or may not be assumed by, a customer or customers other than the customer of record without prior written consent of the Company.

The CompleteLink plan applies to all AT&T Ohio intraLATA services of the subscribing customer, including all business usage and message toll service for all business locations covered by the plan. The jurisdiction of the main billing telephone number selected by the customer will dictate the jurisdiction of the governing tariff for the CompleteLink contract. (T)

MARC discounts will not accumulate or be effective until August 14, 1999.

SECTION 4 - Exchange Access Services

Original Sheet 53

**COMPLETELINK (cont'd)**

(T)/1/

**D. Prices (cont'd)**

2. Other Applicable Charges and Payments

Service Connection Charges are not applicable when establishing or changing to CompleteLink.

3. Termination Charges

Customers terminating a CompleteLink plan prior to the expiration of the selected term period are subject to termination charges.

Termination charges are equal to 50% of the MARC multiplied by the number of years remaining in the customer's term period. For a partial year, if the partial year revenue is less than the MARC, the customer is liable for 50% of the difference between the MARC and the actual billed revenue.

Termination liability charges are not applicable if during the CompleteLink term period the customer converts to another Company access or usage plan with a term equal to or greater than the existing CompleteLink plan, and a revenue commitment equal to or greater than the CompleteLink MARC.

Commission approval of the above termination liability language is not intended to indicate that the Commission has sanctioned any particular legal result should a dispute arise between the parties. In the event of dispute signators to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

4. Service Guarantee

Within 90 days of subscribing to CompleteLink 2-year, 3-year and 5-year term plans, customers may cancel this service without incurring the termination liability charges specified in this tariff. This avoidance of termination liability does not apply to customers who terminate or convert to another Company toll, access and/or usage commitment product for the purpose of subscribing to CompleteLink.

PART 20 - Grandfathered Services  
SECTION 4 - Exchange Access Services

Original Sheet 54

**COMPLETELINK (cont'd)**

(T)/3/

**D. Prices (cont'd)**

5. MARC Downgrade Allowance for MATUC Removal<sup>/1/</sup>

Customers with existing CompleteLink agreements signed prior to October 24, 2003 will be allowed to downgrade their MARC commitment without termination liability for the purpose of removing their intraLATA toll service and MATUC commitment provided: a) the Customer enters into a new CompleteLink service agreement for the shortest length term period which is equal to or greater than the time remaining on their current agreement, and b) the MARC on the new agreement is the next lower MARC. This waiver of charges will be allowed only once per Customer, per Agreement term. CompleteLink \$700 MARC service agreements are specifically not eligible.

6. MARC Downgrade Allowance for Technology Upgrade<sup>/2/</sup>

Termination liability charges will not apply if during the term of the CompleteLink agreement the Customer disconnects one or more of the services which are specified under Column A below, and those services are contributory to their CompleteLink MARC, and replaces the service(s) with the AT&T service specified on the same line in Column B, and as a direct result of that replacement the Customer's annual spending on those services is reduced (comparing customer's current spending on the removed services and the anticipated customer spending for the replacement services), and that reduction results in a 50% or greater difference between the customer's current MARC and the next lower MARC, at the Customer's option and request, the Customer may terminate the existing CompleteLink agreement without termination liability provided: a) the Customer enters into a new CompleteLink service agreement for a term period which is equal to or greater than the time remaining on their current agreement, and b) the MARC on the new agreement is the next lower MARC. This waiver of charges as a result of replacing Column A contributory services with the associated Column B contributory service will be allowed only once per Customer, per agreement term. CompleteLink \$700 MARC service agreements are specifically not eligible.

(T)

/1/ Applicable for agreements signed prior to October 24, 2003 only.

/2/ Applicable for agreements signed on or after October 24, 2003 only.

/3/ Material formerly appeared on Original Sheet 35.1 in Part 4, Section 2 of this Tariff.

/3/

PART 20 - Grandfathered Services  
SECTION 4 - Exchange Access Services

Original Sheet 55

**COMPLETELINK (cont'd)**

(T)/2/

**D. Prices (cont'd)**

6. MARC Downgrade Allowance for Technology Upgrade<sup>/1/</sup> (cont'd)

For purposes of the waiver, "as a direct result" means that the newly installed product(s) must be installed at the same customer service location(s) and in the same relative quantity(ies) as those being displaced. It is at AT&T's sole determination whether a product change satisfies the requirements for waiver of the termination liability under this provision.

(T)

<u>A</u>		<u>B</u>
Analog Trunks	to	ISDN Prime, DS1, DS3, SONET, or GigaMAN
ADTS-E	to	ISDN Prime
Centrex Service (CS) Basic Lines	to	Centrex Service Electronic Key, ISDN Direct, or Internet Protocol Lines
FeatureLink	to	Centrex Service
Grandfathered Centrex	to	Centrex Service
Measured or Flat Business Lines	to	Centrex Service, ISDN Prime, DS1, DS3, SONET, GigaMAN, or FeatureLink
DS0 or ISDN Direct	to	DS1, DS3, SONET, or GigaMAN
DS1	to	DS3, SONET, GigaMAN
DS3	to	SONET or GigaMAN

The following is stated as a matter of convenience and not intended to imply that the list above is not inclusive. In no event will the following product changes satisfy the conditions required for termination without liability under this provision.

Centrex (any type)	to	PBX
Centrex (any type)	to	ISDN Prime

Example: Customer has a CompleteLink \$25,000 MARC, 3-year agreement, with 18 months remaining. MARC attainment in current year is 60%. A customer replaces its Analog Trunks to ISDN Prime, which would result in an annual spending reduction of \$4,000 from what was spent for the Analog Trunks. At the time of the new contract, the CompleteLink tariff reflects the next lower MARC to be \$18,000, so the customer may terminate its \$25,000 MARC agreement without liability if it enters into a new 2-year (24-month) CompleteLink agreement at the \$18,000 MARC. The applicable discount will be that available with the \$18,000 commitment level.

/1/ Applicable for agreements signed on or after October 24, 2003 only.

/2/ Material formerly appeared on 1st Revised Sheet 35.2 in Part 4, Section 2 of this Tariff.

Original Sheet 56

**COMPLETELINK (cont'd)**

(T)/2/

**D. Prices (cont'd)**

6. MARC Downgrade Allowance for Technology Upgrade<sup>/1/</sup> (cont'd)

NOTE: Both the MARC Downgrade waivers named in D.5 and D.6 above only apply to the termination charges applicable to the CompleteLink agreement. Termination charges may apply on those services being disconnected, and the application of those termination charges are not affected by this waiver. All applicable recurring and non-recurring charges apply to the installation and removal of services. Products and services are subscribed to separately and not as a part of the CompleteLink subscription. As a result of selecting a reduced MARC level, discounts provided under the new CompleteLink agreement may be less than those received under the higher MARC agreement (discounts for the new agreement will be those applicable to the new MARC level under the CompleteLink tariff in effect at the time the new contract is executed.) 90 day service guarantee does not apply to the new agreement.

/2/

/1/ Applicable for agreements signed on or after October 24, 2003 only.

**COMPLETELINK SELECT III SAVE/WIN PLAN**

/2/

Note: Effective June 29, 2007, no further installation of, or changes to the CompleteLink Select III Save/Win Plan will be made. Customers of record on June 29, 2007 may continue their service as long as their present term agreement remains in effect. In the event that these services are discontinued at their present location for any reason, they will not be re-established.

(N)

(N)

Eligible business customers subscribing to a CompleteLink 1-year, 2-year, 3-year or 5-year term plan will be eligible for the following intraLATA toll and 800/888 rates per minute, as well as the following increased Maximum Annual Discount, one-time signing bonus, and a 10% discount on local usage message service charges. The signing bonus is a percentage of the customer's selected Minimum Annual Revenue Commitment and may vary by term-plan period. Additionally, a MARC Volume Discount<sup>1/1</sup> overlay of 13.5% will apply to all MARC levels (except the \$700 level) and all terms selected in addition to the "% Discount On Eligible Services" displayed under CompleteLink found in Part 4, Section 2 of this Tariff. Customers electing a \$700 MARC level are not eligible for this offer.

/2/

	<u>1-year</u>	<u>2-year</u>	<u>3-year</u>	<u>5-year</u>
IntraLATA Toll and 800/888 Rates Per Minute	\$0.054	\$0.049	\$0.048	\$0.047

**COMPLETELINK WINBACK RELOADED**

/1/

Note: Effective June 29, 2007, no further installation of, or changes to CompleteLink Winback Reloaded service will be made. Customers of record on June 29, 2007 may continue their service as long as their present term agreement remains in effect. In the event that these services are discontinued at their present location for any reason, they will not be re-established. (N)

Eligible business customers subscribing to a CompleteLink 1-year, 2-year, 3-year, or 5-year term plan will be eligible for additional credits on their bills. These credits are a percentage of the customer's selected Minimum Annual Revenue Commitment (MARC) and will vary depending upon the term plan selected, in accordance with the following payment schedule. Credits will be applied within 2 bill periods following the time period cited below: /1/

	<u>1-year plan</u>	<u>2-year plan</u>	<u>3-year plan</u>	<u>5-year plan</u>
Upon Signing	5% of MARC	20% of MARC	25% of MARC	30% of MARC
1-Year Anniversary		5% of MARC	5% of MARC	5% of MARC
2-Year Anniversary			5% of MARC	5% of MARC
3-Year Anniversary				5% of MARC
4-Year Anniversary				5% of MARC

Eligible customers are those business customers who have their local network access line(s) with another competitive carrier within the AT&T Illinois, AT&T Indiana, AT&T Michigan, AT&T Ohio, or AT&T Wisconsin service area, and who now wish to establish their local network access line service with the Company, and who have previously refused a CompleteLink Select III Save/Win offer from the Company.

Eligible customers will also receive IntraLATA toll and 800/888 rates, as well as MARC volume discounts and Maximum Annual Discount levels as applicable in the previously refused CompleteLink Select III Save/Win offer as found in Part 4, Section 2 of this Tariff. All other terms and conditions applicable to CompleteLink found in Part 4, Section 2 of this Tariff will apply.

Customers terminating their plan prior to the expiration of their selected term plan are subject to termination charges as specified under CompleteLink found on Sheet 35 in Part 4, Section 2 of this Tariff. /1/

**3. OTHER EXCHANGE ACCESS SERVICES<sup>/1/</sup>**

/2/ (C)

**A. Local Service Options**

**1. General**

- a. The Company provides optional local exchange services that combine exchange service within a basic local service area plus customer-dialed (outgoing) calling beyond that basic local service area without the application of message toll charges. These optional local exchange services are available only in those exchange areas designated in this Paragraph A.
- b. Optional local exchange services are provided subject to the availability of message toll telephone service facilities. In case a shortage of facilities exists, the provision of message toll telephone service shall take precedence over these services.
- c. Only one type of optional local exchange service may be furnished on an individual exchange service. Optional Off-Peak Toll Service may not be furnished on the same individual exchange service as an optional local exchange service.
- d. The optional local exchange services offered under the provisions of this Paragraph A. are available on message and flat rate residence individual and PBX trunks.

(C)

**2. Community Calling Service**

**a. Regulations**

- (1) Community Calling Service provides customer-dialed (outgoing) calling to exchange areas within the State of Ohio that are outside the basic local service area, but within the same LATA and are not over 22 airline miles, determined in the same manner as message toll rate distances, from the exchange area in which the customer is located.
- (2) Community Calling Service will not be furnished with foreign central office or foreign exchange services.

/1/ Effective August 1, 2004, no further installation of, or changes to Community Calling Service will be made. Community Calling Service in service on August 1, 2004 will be continued in service only for as long as such service remains at the location at which service is being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be re-established.

# **PART 20 – SECTION 5**

## **EXHIBIT A**

## **1. CENTREX SERVICE**

### **A. Stations of Centrex Systems**

#### **1. Monthly Rates**

##### **a. Regulations Governing Application of Monthly Rates**

- (1) End User common Line (EUCL) Parity Provisions are applicable only to Centrex CO 100 Service and Centrex CO Zone-Type I and II Service.

Note: The provisions in this paragraph describe the process by which the interstate End User charge is adjusted via a PBX Trunk Equivalency process. The resulting amount is then applied as an offset against the Centrex CO 100 and Centrex CO Zone-Type I and II Service intercommunication station rate.

- (a) EUCL access charges for Centrex CO 100 Service and Centrex CO Zone-Type I and II Service main station lines are based on PBX trunk equivalents, i.e., by relating the number of main stations used by a Centrex CO 100 Service and Centrex CO Zone-Type I and II Service customer to the number of PBX trunks that would be required to serve that Centrex CO 100 Service and Centrex CO Zone-Type I and II Service customer's main station lines if he subscribed to a customer premises based switching system.

- (b) The Company uses the same PBX trunk to station ratio to determine the appropriate EUCL access charge per Centrex CO 100 Service and Centrex CO Zone-Type I and II Service main station as is used to compute the exchange access portion of the Centrex CO 100 Service and Centrex CO Zone I and II Service main station line rates.

(T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

**1. CENTREX SERVICE (Cont'd)**

**A. Stations of Centrex Systems (Cont'd)**

1. Monthly Rates (Cont'd)

a. Regulations Governing Application of Monthly Rates (Cont'd)

(1) (Cont'd)

- (c) The Company will adjust its intercommunication station rates in the following manner:

(T)

Interstate EUCL Rate

Interstate EUCL Rate = Adjustment\*\*  
PBX Trunk Equivalent\* to Centrex CO 100  
Service and Centrex  
CO Zone-Type I & II  
Service Inter-  
communication Rate

Note: Effective January 9, 1995, the End User Common Line (EUCL) Parity Provision will no longer be applicable. The Parity Provision will continue to be used for those customers who are on a Centrex Variable Term Payment Plan (VTPP) contract, longer than month to month, on the aforementioned date, until the expiration of the VTPP contract. All Centrex customers whether or not under VTPP contract may retain or expand their Centrex systems until December 31, 1996.

\* PBX Trunk Equivalency Ratio: greater than 900 stations 10.3, less than 900 stations 7.8.

\*\* At no time will the adjustment to the Intercommunication Station Rate cause the rate to be below the intrastate cost of a Centrex CO 100 Service and Centrex CO Zone-Type I and II Service station. The adjustment will not exceed the Interstate EUCL rates of \$5.09.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

3. AIRPORT SERVICE

A. Regulations

1. Description of Offering

a. Airport Service is an arrangement of switching equipment and other facilities which provides a group of airport customers, each of whom individually subscribes to telephone service with the following common service features, in addition to those features provided with each individual service:

- (1) Four digit dial intercommunication between the individual services of all the Airport Service customers without the application of local message charges.
- (2) Dial access to common interexchange private line services furnished between the airport and the appropriate Federal Aviation Agency location.
- (3) Optional dial access to a customer-provided common loudspeaker paging system.

Material formerly appeared in Exchange and Network Services Tariff,

3. AIRPORT SERVICE (Cont'd)

A. Regulations (Cont'd)

2. Types of Service Available to Airport Service Customers

a. Airport PBX Trunks

Airport PBX Trunks, arranged to provide the features specified in A-1-a preceding in addition to the features and services regularly provided with such trunks, may be associated with Airport Service customers' manual or dial PBX systems, subject to the provisions of this section.

(1) A combination of airport PBX trunks at the rates specified in this section and regular PBX trunks at the rates specified in Part 4, Section 2 of this tariff may be associated with such a PBX system.

(2) Airport PBX trunks will not be furnished to transient hotels and motels or apartment houses and apartment hotels.

b. Airport Individual Non-Residence Stations

Individual non-residence stations, arranged to provide the features specified in A-1-a preceding and terminating in telephones or in any other station equipment may be furnished to Airport Service customers as set forth in this section.

**4. CENTREX LSI SERVICE**

Effective January 9, 1995, no new installations of Centrex LSI Service will be made. Customers who are on a Centrex LSI contract on the aforementioned date, will be permitted to expand their system under the terms of their contract until the expiration of the LSI contract. All Centrex customers, whether or not under the LSI contract, may retain or expand their Centrex systems until December 31, 1996.

**A. Centrex LSI Service**

**1. General**

- a. Centrex LSI Service, a local exchange telecommunication service, provides a voice and data communication capability offered from switching equipment located in Company central offices. The service provides for the transmission and switching of signals on an incoming, outgoing and intercommunicating basis. (T)

Centrex LSI Service is offered as Centrex 100 LSI for customers requiring a total of 100 or less lines and Centrex II LSI for customers who require 100 or more lines.

Centrex LSI Service offerings are available only to those customers subscribing to Centrex LSI Service.

Centrex LSI Service requires Exchange Access arrangements as provided for in Part 20, Section 5 of this Tariff. (T)

- b. Centrex LSI Service requires Local Service Increments (LSI) as provided for in Paragraph B. following. LSI used for Centrex LSI Service intercommunication purposes is an integral part of the Centrex LSI Service offering and is a local exchange telecommunication service.

- c. Centrex LSI Service provides the following capabilities as standard:<sup>/1/</sup>

Add-on Conferencing of All Calls (three way conferencing)

Centrex LSI Service line users may initiate or receive a call, initiate a second call and then bridge both calls together.

/1/ The availability and function of these capabilities may vary by serving central office.

**4. CENTREX LSI SERVICE (cont'd)**

(N)

A. Centrex LSI Service (cont'd)

1. General (cont'd)

- c. Centrex LSI Service provides the following capabilities as standard:  
(cont'd)

Add-on Conferencing of All Calls (three way conferencing)

Centrex LSI Service line users may initiate or receive a call, initiate a second call and then bridge both calls together.

Automatic Callback Calling

Automatic callback calling permits a Centrex LSI Service line user who places an intercommunication call to a busy Centrex LSI Service line to be automatically connected to that line when both the called and calling lines are subsequently available.

Call Diverting

Outgoing local message and toll network calls may be screened by line class code assigned to the originating line so that completion of calls to preselected areas is denied.

Call Forwarding-Busy and Call Forwarding-Don't Answer

Incoming calls to a Centrex LSI Service line that does not answer or is busy will be forwarded to a different Centrex LSI Service line(s).

Call Forwarding Variable inside/outside the system

Centrex LSI Service line users may selectively choose a telephone number either within or outside of the Centrex LSI Service system to which incoming calls will be forwarded.

Call Hold

Call hold allows a Centrex LSI Service line user to place a call on hold by flashing the switchhook and then dialing a code.

Call Park

Provides the Centrex LSI Service line user with the capability to park a call against a line's directory number. The parked call maybe retrieved by any Centrex LSI Service line by first requesting park retrieve and then dialing that directory number.

**4. CENTREX LSI SERVICE (cont'd)**

**A. Centrex LSI Service (cont'd)**

1. General (cont'd)

c. Centrex LSI Service provides the following capabilities as standard: (cont'd)

Call Pickup

Call pickup allows a Centrex LSI Service line to dial a code to answer another line within a preset pick up group.

Call Waiting and Distinctive Call Waiting

Call waiting provides a tone signal to indicate to a busy Centrex LSI Service line that another call is trying to reach that line. Distinctive call waiting provides distinctive tones indicating the source of the calls. Call waiting may be provided as dial, originating and/or terminating. Call waiting terminating can be for incoming and/or intragroup calls.

Cancel Call Waiting

Allows the Centrex LSI Service line user to inhibit receipt of the call waiting or camp-on tone for the duration of a single call.

Consultation Hold of all calls

Centrex LSI Service line users may hold incoming or outgoing calls, initiate another call then return to the original call.

Denied Originating Line

Prohibits call originations from designated Centrex LSI Service lines.

Denied Terminating Line

Prohibits call completions to designated Centrex LSI Service lines.

Dial Access to Private Facilities and Dedicated Interexchange Carrier Trunks

The Centrex LSI Service system permits dial access to such facilities as tie lines, telecommunication channel services, private switched network lines, and dedicated Interexchange Carrier (IXC) access lines. A private facility terminating arrangement is required at the rates specified in Part 20, Section 5 of this Tariff.

**4. CENTREX LSI SERVICE (cont'd)**

(N)

A. Centrex LSI Service (cont'd)

1. General (cont'd)

- c. Centrex LSI Service provides the following capabilities as standard:  
(cont'd)

Direct Connect Originating and Terminating

Provides for the automatic dialing of a fixed telephone number from a Centrex LSI Service line or terminating arrangement.

Direct Inward Dialing to lines

Incoming local message unit and toll calls may be placed directly to Centrex LSI Service lines.

Direct Outward Dialing by lines

Centrex LSI Service line users may place outgoing local message unit and toll calls without the aid of the system attendant.

Directed Call Pickup

Directed call pickup allows a Centrex LSI Service line user to answer calls directed at another line without regard to pick up groups. This feature may be provided with barge-in at the customer's option.

Barge-in

If the call has already been answered, the station initiating the directed call pick-up will barge in on the call and be connected into a three way call.

Non-Barge-in

If the call has already been answered, the station initiating the directed call pickup will not be able to barge-in, but will receive a busy tone.

Distinctive Ringing

Distinctive ringing indicates the source, e.g., intercommunication or network, of calls to idle Centrex LSI Service lines.

Hunting

Routes a call to an idle Centrex LSI Service line in a prearranged group when the called line is busy.

**4. CENTREX LSI SERVICE (cont'd)**

(N)

**A. Centrex LSI Service (cont'd)**

**1. General (cont'd)**

- c. Centrex LSI Service provides the following capabilities as standard:  
(cont'd)

Identification of Ohio Bell billed outgoing local message unit and toll charges when directly dialed.

Message or measured units are summarized by Centrex LSI Service line number.

Toll charges are itemized by Centrex LSI Service line number.

Intercommunication between lines and trunks associated with the Centrex LSI Service system

Centrex LSI Service system line users may dial each other on a 4 or 5 digit basis without the aid of the system attendant.

Last Number Redial

A Centrex LSI Service line user may redial the last called number by dialing a code.

Line Transfer of all calls

Users of Centrex LSI Service lines may transfer incoming or outgoing calls to other lines within or outside the system.

Multiple Appearance Directory Number

Allows single line number to have multiple appearances on compatible customer-provided telephone sets.

Night Answer

Incoming calls to the listed directory number may be answered by selected Centrex LSI Service lines (Fixed or Flexible) or, by any Centrex LSI Service line (Trunk answer any Station) which is optional.

Fixed - allows calls that are normally routed to the attendant during the day, to be routed to predesignated locations at night. The predesignated route can be an individual directory number or a hunt group.

Flexible - allows the attendant to program the night Service routes.

Trunk Answer From Any Station - allows any station in the customer group to answer an incoming call by dialing a code.

**4. CENTREX LSI SERVICE (cont'd)**

**A. Centrex LSI Service (cont'd)**

**1. General (cont'd)**

**c. Centrex LSI Service provides the following capabilities as standard: (cont'd)**

One listing in the Alphabetical Directory of the name, address and main telephone number of the customer.

Speed Calling

Provides abbreviated dialing of local exchange and toll calls. available, a Centrex LSI Service line user may have up to seventy (70) numbers in a speed calling list.

Touch-tone Equipped Telephone Lines

All Centrex LSI Service lines are equipped to provide push button dialing.

Uniform Call Distribution Without Queuing

UCD is a service which evenly distributes incoming calls to a group of Centrex LSI lines. Provisions of the service is subject to the availability of the necessary central office equipment. The customer shall subscribe to a sufficient number of lines equipped with UCD so that no more than 10% of the calls attempting to terminate shall fail to complete in any customer busy hour during 25 days out of a 30 consecutive day study period. Call volume studies will be conducted by the Company as it deems necessary. Queuing and Delay Announcement are provided as optional features in 8. following. (T)

**d. The following capabilities are provided with attendant lines:<sup>/1/</sup>**

Attendant Call Park

Allows the attendant to park calls against any directory number in the attendant customer group. The parked call may be retrieved from any station by dialing the feature access code for retrieval plus the directory number. The attendant may also retrieve calls parked by stations and by the attendants.

/1/ The availability and function of these capabilities may vary by serving central office.

**4. CENTREX LSI SERVICE (cont'd)**

(N)

A. Centrex LSI Service (cont'd)

1. General (cont'd)

- d. The following capabilities are provided with attendant lines:  
(cont'd)

Attendant Camp-on

Allows an incoming call, which an attendant attempts to complete to a busy line, to be held until the called line becomes idle. The called line is then automatically signaled and connected to the waiting call.

Attendant Console Screen Management

Provides management services for the attendant console.

Attendant Position Busy

Allows an attendant to make a position unavailable to additional queued calls. The attendant can still originate calls and use or program the features available while the console is in the Attendant Position Busy state.

Attendant Recall from Satellite

Line users located at remote Centrex LSI Service locations without attendants may generate a recall of an incoming call back to the main location attendant.

Attendant Recorded Announcement

Provides callers a recorded announcement when they are held in queue longer than the selected delay threshold.

Attendant Speed Calling

Allows an attendant to dial frequently dialed numbers by depressing a speed calling key and dialing one or two digits. The frequently dialed number may be a directory number, authorization code, account code or access code.

Attendant Transfer

Calls that are transferred from a Centrex LSI Service line back to the attendant are queued on a first in, first out basis.

(N)

A. Centrex LSI Service (cont'd)

1. General (cont'd)

- d. The following capabilities are provided with attendant lines:  
(cont'd)

Call Park Recall Timer

Provides a timer for calls parked by the attendant. If a call is not retrieved or abandoned within the time limit, the attendant is recalled.

Call Selection

Allows an attendant to answer calls as queued or manually select specific call types.

Call Splitting

Allows the attendant to talk privately to the calling or the called party.

Console Test

Allows the attendant to test a console's operation.

Direct Trunk Group Selection

Allows the attendant to select an idle trunk for an outgoing call by pressing a single button on the console.

Flexible Console Alerting

Alerts the attendant to a call requiring attention by an alert tone thru the headset instead of the console speaker.

Interposition Calling

Allows communication and transfer of calls between attendants.

Power Failure Transfer

Routes calls destined for an attendant to a preassigned directory number during a communications failure or loss of power to the attendant console.

Switched Loop Operation

Trunks and lines do not have direct termination on the console(s). Each console may be assigned one through six loops to provide the attendant with voice-access to all calls routed to the console. However, only one call is connected to a console at any one time.

(N)

(N)

**A. Centrex LSI Service (cont'd)**

**1. General (cont'd)**

- d. The following capabilities are provided with attendant lines:  
(cont'd)

Through Dialing

Allows the attendant to select a facility for a Centrex LSI Service line and send dial tone to that line. The line user may then dial the call.

Time of Day and Date

Provides a display of the day and date.

Timed Reminder

Provides a timer that is started when a call is camped-on, when the called party has not answered after a transfer, or when a call is on hold. When the timer expires the attendant is alerted and can pick up the call to talk to the calling party. The length of the timer is specified by the customer.

Trunk Group Identification

Provides a display of the trunk group and member number of the incoming or outgoing trunk in use at the request of the attendant, or automatically on incoming trunk calls.

Uniform Call Distribution from queue

Provides for a uniform distribution of calls from the attendant queue to a group of attendant positions.

Wild Card Key

The attendant may use the wild card key to invoke special features not directly available through a feature key on the console.

**e. Electronic Key Line**

Electronic key lines are designed specifically for access by pre-programmed push-button features on a compatible customer-provided electronic business telephone set. Technical specifications and imitations for compatible telephone sets can be found in the various Technical References referred to in Paragraph A.3.d. following.

- A feature of the electronic key line allows a single line number to have multiple appearances on compatible customer-provided telephone sets.

**f. High Speed Data Lines**

High speed data lines are designed for direct switched digital data capabilities over a 2- or 4-wire facility within the same customer group. High speed data lines will offer full duplex asynchronous transmission at rates from 300 bps through 19.2 kbps and full duplex synchronous transmission at rates from 1200 bps through 19.2 kbps or 48, 56 and 64 kbps.

High speed data lines support coax elimination on 3270 type terminals and cluster control units. High speed data lines may be interworked with Public Switched Digital Service (PSDS).

High speed data lines may be provided access to a 1.544 mbps trunk module interface for High Capacity, point-to-point communication with host computers. See Part 20, Section 5 of this Tariff. (T)  
(T)

High speed data lines can be used to communicate over analog facilities through modem pools. Pools for inbound and outbound calling can be established.

h. Programming Charges

The Company will install new Centrex LSI Service systems without activating those capabilities, which can be activated by the Centrex-Mate feature. Customers who are converting from Centrex CO, Centrex 100 LSI or Centrex Zone Service to Centrex LSI Service will have all line features associated with their Centrex lines automatically programmed to their respective Centrex LSI Service lines. Additional feature implementation will be the customer's responsibility. However, at the customer's option, the Company will program Centrex-Mate features according to the following schedule of charges: (T)

Description /Billing Code/	Nonrecurring Charge
Program Change Charge, per Centrex LSI Service line programmed /C3CSC/	\$42.00

The customer is responsible for providing all of the necessary line information required by the Company to program each Centrex LSI Service line with the requested capabilities. In the event that the customer requests the Company to determine individual line information, the Company will do so at the following rate: (T)

Description /Billing Code/	Nonrecurring Charge
Station Review Charge, per Centrex LSI Service Line /CGY/	5.00

- i. Descriptions, rates and charges for optional features and capabilities are found in 8. following.

Issued: December 17, 2007

Effective: December 17, 2007

**4. CENTREX LSI SERVICE (cont'd)**

**A. Centrex LSI Service (cont'd)**

**3. Regulations (cont'd)**

- e. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of Centrex LSI Service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or systems or otherwise affect its use or performance. (T)
- f. Centrex LSI Service may be resold or shared under the provisions in Part 2, Section 2 of this Tariff. Measured service rates apply. The customer of record shall be responsible for all recurring and nonrecurring rates and charges as well as local and toll usage billed by the Company to any Centrex LSI Service line in the system. (T)

**4. Service Establishment Charge**

- a. A Service Establishment Charge is applicable to the establishment of any new Centrex LSI Service, except for customers converting from Centrex Services. A service establishment charge(s) applies to any relocation of an entire Centrex LSI Service unless the customer's relocation is within the serving central office boundary. The service establishment charge does not apply to additions (within station capacities of a system as previously defined in A.1.a.) to an existing Centrex LSI Service System.
- b. The Nonrecurring Charges (NRCs) associated with Centrex LSI Service may be paid in full with the first bill after cutover of the system or may be financed under the provisions of the Deferred Payment of Variable Term Payment Plan as specified in Part 2, Section 3 of this Tariff. (T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

PART 20 - Grandfathered Services  
SECTION 5 - Centrex Services

1st Revised Sheet 26  
Cancels Original Sheet 28

**4. CENTREX LSI SERVICE (cont'd)**

**A. Centrex LSI Service (cont'd)**

**5. Variable Term Payment Plan**

- a. The Variable Term Payment Plan regulations provided in Part 2, Section 3 of this Tariff apply (T) except as noted below.
- b. The contract period for Centrex LSI Service voice lines, electronic key lines and high speed data lines furnished under this plan is the service period for which the customer contracts to pay the monthly rates for such lines. Subject to the provisions of Paragraphs (1) and (2) following, for the duration of the contract period, customers will assume the obligation for a minimum of 70 percent of the total number of all lines in service at the time such customer enters the contract. A customer who reduces such lines below the 70 percent commitment has the following options for the duration of the contract period:
  - Continue to pay an amount equal to the monthly rates for 70 percent of the lines in service at the time such customer entered into the contract; or
  - Pay termination charges as covered in Paragraph A.5.e. following on the number of station lines below the 70 percent commitment which are disconnected and continue to pay only for the actual number of station lines in service.

**c. Upgrades from Centrex Service**

Customers with Centrex CO, Centrex 100 or Centrex Zone Service, hereinafter collectively referred to as Centrex Service, may upgrade their service to Centrex LSI Service subject to the availability of switching equipment.

- Centrex customers who convert to Centrex LSI Service will be liable for Centrex termination charges only in the event that they disconnect or decrease the number of lines in the Centrex LSI Service below the limit associated with the Centrex contract prior to the expiration date of the original contract.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

**d. Conversions from Centrex 100 LSI Service to Centrex II LSI Service**

- Customers with Centrex 100 LSI Service may convert to Centrex II LSI Service, subject to the availability of switching equipment.
- Installation, service establishment, service ordering and other nonrecurring charges will apply for newly installed items of service.
  - If the Centrex 100 LSI Service service establishment charge has been satisfied, the service establishment charge for the conversion to the Centrex II LSI Service will be the difference between the current Centrex II LSI Service and the current Centrex 100 LSI Service service establishment charges.

**e. Termination Charges**

If the contract is canceled in whole or part by the customer or is terminated for cause by the Company prior to expiration of the 36-, 60-, 84- or 120-month payment period, the customer shall be required to pay to the Company a sum determined by the application of the following formula for voice lines, electronic key lines and high speed data lines, hereinafter referred to as line(s), in this paragraph:

(T)

**A. Centrex LSI Service (cont'd)**

**8. Centrex LSI Service Optional Features and Capabilities**

In addition to those features, described in 1.c. and 7.b. preceding, provided as standard with Centrex LSI Service, additional features may be added individually or in groups.

There is no minimum number of individual features or groupings that must be obtained, unless specified by the feature.

**a. Uniform Call Distribution With Queue**

**(1) General**

- (a) Lines equipped with UCD may also be equipped with queuing. Queuing provides for incoming calls in excess of available lines to be held at the central office awaiting completion to the first available line. Each call that is held requires a queue slot.
- (b) Incoming facilities may include the message network, dial type private line terminations, foreign exchange lines, foreign central office lines and Inward WATS lines. Each call that is held requires a queue slot. Appropriate terminating arrangement charges apply for incoming facilities terminated. Specific types of terminating arrangements are covered in this Part 20, Section 5 of this Tariff

(T)

Queuing is provided equal to one queue slot for each incoming facility. The number of message network facilities is established by Network Call Limiters.

**(c) Rates and Charges**

Description /Billing Code/	Non- Recurring Charge <sup>/1/</sup>	Variable Term Option Monthly Rates			
		36 Month	60 Month	84 Month	120 Month

**4. CENTREX LSI SERVICE (cont'd)**

(N)

**A. Centrex LSI Service (cont'd)**

**8. Centrex LSI Service Optional Features and Capabilities (cont'd)**

**b. Automatic Route Selection - Deluxe**

- (1) Automatic Route Selection (ARS-D)/Expanded Automatic Route Selection-Deluxe (EARS-D) automatically routes outgoing seven-digit and ten-digit dialed calls to an idle facility selected from certain groups of dedicated customer facilities. The sequence of the search for an idle facility is preprogrammed by the customer's choice based on the first three or six digits dialed. If all facilities in the preprogrammed choices are busy, the call will either complete over the Message Toll Service (MTS) network or will be blocked with an overflow tone provided.

Available with ARS-D/EARS-D are the following features:

**Time of Day Routing** - enables cost effective use of facilities by permitting the selection of first choice and alternate routes for ARS-D routed calls to vary, depending on time of day.

**Expensive Route Warning Tone** - applies a warning tone to the line to indicate when a more expensive route is about to be used.

**Facility Restriction Level (FRL) / Network Class of Service (NCOS)**- defines the class of service associated with a line.

**Authorization Codes** - allows the station user to input an assigned code, after dialing a call, to change the restrictions associated with the originating station to those associated with the assigned authorization code.

(2) Definitions

Facility

A facility denotes a specific FX, CCSA, EPSCS, WATS, Tie Line, announcement trunk, or OCCSS circuit.

Route

A group of like facilities (physical or simulated) which are used to complete seven or ten-digit calls. Examples are: an FX trunk group; a group of Band 5 WATS lines.

**A. Centrex LSI Service (cont'd)**

**8. Centrex LSI Service Optional Features and Capabilities (cont'd)**

**b. Automatic Route Selection - Deluxe (cont'd)**

**(2) Definitions (cont'd)**

Code

Refers to either the Numbering Plan Area (NPA) code of the dialed telephone number or the Central Office code (NNX) within a NPA.

Pattern

A unique sequence of routes arranged in order of choice by the customer and used to reach a specific area code, i.e., NPA code(s) and/or area and office code(s). Note: separate pattern charges as defined in (4) following for each pattern in each NPA is also charged when six-digit routing is required.

**(3) Regulations**

- (a) All route and pattern assignments will be designated by the customer.
- (b) The customer is responsible for notifying the Company of any changes required in the customer's ARS-D/EARS-D feature configuration. (T)
- (c) All rates and charges for ARS-D/EARS-D are in addition to the rates and charges for the associated facilities and terminating arrangements.
- (d) All patterns must have either the MTS network, overflow tone or announcement as a final route. A combination of both within the same pattern group, that is, a group of patterns accessed by one code is not permitted.
- (e) The non-MTS network routes to be accessed via ARS-D/EARS-D may be selected from the following: FX lines, Outward WATS access lines, announcement trunks, CCSA off-net access lines, and the tie lines meeting the requirements of (f) following.

**b. Automatic Route Selection - Deluxe (cont'd)**

**(3) Regulations (cont'd)**

- (f) Tie Lines or tie line groups must utilize senderized operation and must have a dialing pattern consistent with that used on the MTS network.
- (g) Patterns may be arranged for a maximum of ten routes with final route being either to the MTS network, to overflow tone or to announcement channel. (Fixed WATS route advances from WATS facilities accessed via ARS-D/EARS-D do not count as additional routes.)
- (h) Call Diverting Service may be applied to lines having access to ARS-D/EARS-D patterns which have a final route to the MTS network.
- (i) Patterns without final route to the MTS network may be offered only if a customer subscribes to a sufficient number of facilities which, in the judgment of the Company, provide an adequate level of service so as to avoid interfering with the service of others or to prevent others from making or receiving calls over their telephone service. (T)
- (j) The same patterns may be duplicated to access various NPA codes and/or area(s) and office codes(s).

**A. Centrex LSI Service (cont'd)**

**8. Centrex LSI Service Optional Features and Capabilities (cont'd)**

**c. Station Message Detail Recording to Premises for Centrex LSI Service**

**(1) General**

- (a) Station Message Detail Recording to Premises (SMDR-P) transmits a record to a customer-provided applications processor or storage device located at the customer's premises of all calls originating from Centrex LSI Service lines to locations outside the same Centrex LSI Service system. Each record will consist of the calling number, the called number, date, time-of-day, duration of call and the type of facility used. Facility groups may also be designated as requiring originating and/or terminating records. Availability is subject to serving central office capability. Available with SMDR-P is the following option:

Account Codes - allow a station user to prefix a called number with an account number which is not used during call processing but is included in the message detail record of the call for later use by the customer.<sup>1/1</sup>

- (b) SMDR-P is not represented to be a provision of billing detail.
- (c) SMDR-P records are transmitted to terminal equipment located at the customer's premises at the rates and charges specified in (a) following.
- (d) SMDR-P is furnished only on Centrex LSI Systems equipped with ARS-D/EARS-D.
- (e) Processing of SMDR-P records by the Company accounting center is not provided with this arrangement. (T)
- (f) The customer must designate all lines and/or selected facility groups on which SMDR-P originating and terminating records are to be provided.

<sup>1/1</sup> Customers having EARS-D will be required to use # or \* as the lead account code digit. Otherwise the account code would be treated as the called number.

(1) Features

Attendant Conference

Permits the attendant to establish a six party conference call.

Control of Trunk Group Access

Allows the attendant to control access to trunk groups.

Busy verification

Busy verification permits an attendant to determine if a Centrex LSI Service line or trunk is busy or idle.

Attendant display of queued calls by ICI key

Allows a display of the number of calls queued by category on an attendant position.

Trunk group busy indication

Allows a display of trunk group status on an attendant position.

(2) Rates

Description /Billing Code/	Non- Recurring Charge	Variable Term Option Monthly Rates			
		36 Month	60 Month	84 Month	120 Month
Attendant conference /EQ9PC/	\$60.00	\$79.00	\$75.00	\$74.00	\$72.00

Issued: January 9, 2003

Effective: January 9, 2003

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

PART 20 - Grandfathered Services  
SECTION 5 - Centrex Services

1st Revised Sheet 41  
Cancels Original Sheet 41

**4. CENTREX LSI SERVICE (cont'd)**

**B. Local Serving Increments (LSI)**

1. Regulations

- a. Each customer's location is connected to the Company's central office by means of LSI. (T)

The use of these arrangements is limited to those services provided for in this Section whose regulations permit their use. As such, LSI are only offered in connection with those services.

LSI's are not taxable.

- b. LSI's are provided on a one facility pair-at-a-time basis, or in the following complements:

100 pair	900 pair
200 pair	1200 pair
300 pair	1500 pair
400 pair	1800 pair
600 pair	2100 pair

A given size complement will be provided only if the number of lines at a location is one more than the next smaller size complement.

- c. LSI's are available on a contract basis only. The contract periods are 3 years, 5 years, 7 years and 10 years.

LSI's leased on a pair-at-a-time basis, subject to the provisions of Paragraph e. following, require the assumption of an obligation to pay the monthly rates for a minimum of 70 percent of the pair-at-a-time LSI in service at the time a customer enters into a contract. A customer who reduces the pair-at-a-time LSI below the 70 percent commitment has the following options for the duration of the contract period:

- Continue to pay an amount equal to the monthly rates for 70 percent of the pair-at-a-time LSI in service at the time such customer entered into the contract, or
- Pay termination charges as covered in Paragraph e. following on the number of pair-at-a-time LSI below the 70 percent commitment which are disconnected and continue to pay only for the actual number of pair-at-a-time LSI in service.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

TFA No. OH-07-17691

PART 20 - Grandfathered Services  
SECTION 5 - Centrex Services

1st Revised Sheet 42  
Cancels Original Sheet 42

**4. CENTREX LSI SERVICE (cont'd)**

**B. Local Serving Increments (LSI) (cont'd)**

**1. Regulations (cont'd)**

**c. (cont'd)**

The monthly rate under the 3-, 5-, 7- or 10-year contract for LSI will not be subject to Company initiated increases. (T)

The Company will provide notice of termination to the customer in writing at least 60 days before the expiration of the existing contract. At this time, the customer will have the opportunity to extend the existing contract for one additional period not to exceed the original contract life at a rate not to exceed a 15% monthly rate increase for a 3-year contract; 20% monthly rate increase for a 5-year contract or enter into a new contract or automatically revert, upon expiration of the existing contract, to the then current monthly rate of the appropriate Centrex service in Part 5 of this Tariff. (T)

d. If during a contract period additional LSI are required, they may be obtained either on a pair-at-a-time basis, by upgrading to a larger sized complement or by adding an additional complement. Termination charges are not applicable to upgrades.

e. If the customer elects to terminate the contract or it is terminated for cause by the Company prior to the expiration of the 36-, 60-, 84- or 120-month payment period, the customer shall be required to pay a sum determined by the application of the following formulas: (T)

**Pair-At-A-Time LSI**

# of pair-at-a-time LSI )		# of Months )
Below the 70% level of )		Remaining in)
Commitment Disconnected)	X Monthly) X	Contract )
	Rate )	

**LSI Complements**

Cancels Original Sheet 43

**4. CENTREX LSI SERVICE (cont'd)**

**B. Local Serving Increments (LSI) (cont'd)**

**1. Regulations (cont'd)**

- f. If the customer downgrades or reduces from a larger to a smaller complement size, termination charges are calculated as follows:
- Subtract the monthly rate for the smaller pair complement from the monthly rate for the larger.
  - If the remainder is a positive number, multiply by 70% and the number of months remaining in the contract.
  - If the remainder is zero or a negative number, the termination charge is zero.
- g. When the number of lines at a location drops below the next smaller complement plus one and there is no termination charge, the customer must downgrade to the smaller complement.
- h. Resale and Sharing of LSI.

LSI may be resold or shared.

The customer of record shall be responsible for recurring and nonrecurring charges associated with the provision of this service and, in the event of termination of service, the appropriate termination charge.

- i. The provisions of Part 2, Section 2 of this Tariff regarding Cancellation of Application for Service Prior to Establishment of Service are applicable. (T)
- j. Changes in responsibility for payment for service, i.e., change of lessee, as provided in Part 2, Section 2 of this Tariff, is permissible. (T)

**4. CENTREX LSI SERVICE (cont'd)**

**B. Local Serving Increments (LSI) (cont'd)**

**2. Rates (cont'd)**

**c. Contract Change Charge/Complement Conversion**

If customer wishes to convert from the pair-at-a-time to a facility complement or wishes to increase complement size during an existing contract period, the following one-time charge is applicable.

Description	Nonrecurring Charge
Contract Charge/Complement Conversion Charge, per occasion	\$550.00

**5. CENTREX SERVICE**

Effective January 9, 1995, no new installations of Centrex Service will be made. Customers who are on a Centrex Variable Term Payment Plan (VTPP) contract, longer than month to month, on the aforementioned date, will be permitted to expand their system until the expiration of the VTPP contract. All Centrex customers whether or not under the VTPP contract may retain or expand their Centrex systems until December 31, 1996.

**A. General Regulations**

**1. Description of Service**

- a. Centrex service is an arrangement of switching equipment located on Company premises (hereinafter referred to as Centrex CO). The switching equipment is combined with other facilities to offer the features and services in b. following. (T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

**5. CENTREX SERVICE**

(N)

A. General Regulations (cont'd)

1. Description of Service (cont'd)

b. Features and Services

(1) Centrex CO - Type II

- (a) Inward dialing - incoming calls from outside the system may be made to non-restricted stations of the system, without the aid of the attendant, by dialing the number of the Centrex station.
- (b) Outward dialing - non-restricted stations of the system may dial outgoing local and MTS calls to dialable points.
- (c) Identification of individual non-restricted stations on outward MTS calls.
- (d) Dial intercommunication between all stations connected to the system, except as specified under "Restricted Stations" in this section.
- (e) Mechanical interception of calls to non-working stations of the system in lieu of attendant interception.
- (f) Attendant services include:
  - Completion of calls coming into the telephone number associated with the primary listing to non-restricted Centrex stations.
  - Transfer of incoming calls from outside the system from one non-restricted station to another by the attendant.
  - Arrangements whereby calls to the telephone number associated with the primary listing coming in at night when the attendant position is unattended, can be answered at designated Centrex stations.
  - Interception of calls to non-working stations of the system.

(N)

Issued: January 9, 2003

Effective: January 9, 2003

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

PART 20 - Grandfathered Services  
SECTION 5 - Centrex Services

Original Sheet No. 55

**5. CENTREX SERVICE (cont'd)**

(N)

A. General Regulations (cont'd)

1. Description of Service (cont'd)

b. Features and Services (cont'd)

(1) Centrex CO - Type II (T) (cont'd)

- (g) The following additional capabilities are provided with attendant services:<sup>/1/</sup>

Attendant Call Hold

Allows the attendant to hold a call in progress, to originate another call, answer a call, or pick up a call on hold. Timed Reminder is activated when the call is placed on hold by the attendant.

Attendant Call Park

Allows the attendant to park calls against any directory number in the attendant customer group. The parked call may be retrieved from any station by dialing the feature access code for retrieval plus the directory number. The attendant may also retrieve calls parked by stations and by the attendants.

Attendant Camp-on

Allows an incoming call, which an attendant attempts to complete to a busy line, to be held until the called line becomes idle. The called line is then automatically signaled and connected to the waiting call.

Attendant Console Screen Management

Provides management services for the attendant console.

Attendant Position Busy

Allows an attendant to make a position unavailable to additional queued calls. The attendant can still originate calls and use or program the features available while the console is in the Attendant Position Busy state.

Attendant Recall from Satellite

Line users located at remote Centrex Service locations without attendants may generate a recall of an incoming call back to the main location attendant.

/1/ The availability and function of these capabilities may vary by serving central office.
