9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

Line Features (cont'd)

Listen on Hold

Allows a user to place a called party on hold and listen through the speaker on a properly equipped set.

Make Busy Access Code

This feature may be assigned to any hunt line, directory number, multi-line hunt line, or distributed hunt line. This feature is activated by the customer dialing an access code.

Make Set Busy

Allows a designation of a CPE station button to busy out all lines terminating on the telephone set.

Make Set Busy except on Group Intercom

Allows an Electronic Key Line station to continue to receive group intercom calls when the set is put into a make busy condition.

Message Retrieval Display

Provides the capability of a station to directly retrieve messages from their display via button activation and cancel the message waiting indication. (Requires Message System Service CPE)

Message Waiting Activation Control

Provides the capability of a predesignated station to activate audible or visual message waiting indications at other stations. The sending station controls both the activation and deactivation of the message waiting indication.

Enhancement allows inter-working with 3 Way Calling, ACD, UCD, Call Request and Call Forwarding.

Message Waiting Indicator - Audible

This feature provides an audible tone signal, e.g. stutter dial tone, on a Centrex line to indicate a message waiting condition.

Message Waiting Indication - Visual

This feature provides the capability of a visual message waiting indication.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

Line Features (cont'd)

Multiple Appearance Directory Numbers - Multiple Call Arrangement (MCA)

Provides capability to terminate duplicate telephone numbers on Electronic Key Line type Sets or Single Line Sets.

Multiple Call Arrangement (MCA) allows more than one set in the MADN group to be active on the MADN simultaneously. The number of simultaneous calls is restricted only by the number of members in the MADN group.

Multiple Appearance Directory Numbers - Single Call Arrangement (SCA)

Provides capability to terminate duplicate telephone numbers on Electronic Key Line type Sets or Single Line Sets. These numbers are configured in a Single Call Arrangement (SCA).

Multiple Appearance Directory Numbers - Single Call Arrangement (SCA)

Provides capability to terminate duplicate telephone numbers on Electronic Key Line type Sets or Single Line Sets. These numbers are configured in a Single Call Arrangement (SCA).

Single Call Arrangement (SCA) allows only one set to be active (either originating or terminating) on the MADN at any given time.

Includes incoming call disconnect to automatically release the bridge for other MADN Directory Numbers.

Bridging

Allows more than one set in a MADN group to be active on a line simultaneously.

Conference Interaction allows a conference call to be either answered or established by one party, placed on hold, or picked up by another party.

Conference w/3-Way Calling enables a MADN Single Call Arrangement (SCA) with bridging options to establish a three-way call during the bridge state.

Privacy allows a user to exclude another user with the appearance of the same line from entering an existing conversation.

Ring Again Idle Set prevents a busy set from receiving call back (ring again) while active on another call.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

Line Features (cont'd)

Night Answer

Allows an incoming night call to be indicated by the ringing of a customer-provided night bell or a predesignated Centrex line. Calls may be answered at any station other than fully restricted stations by dialing a special code.

Trunk Answer From Any Station allows any station in the customer group to answer an incoming call by dialing a code. The code is dialed when the Trunk Answer From Any Station alert sounds.

On Hook Dialing

An intrinsic feature of the set, which allows the user to originate calls without lifting the handset.

Privacy Release Conference Control

This arrangement provides additional flexibility for conferencing for Electronic Key Lines (EKL) Service by segregating conferencing circuits for exclusive use of Multiple Appearance Directory Number (MADN) groups.

Query Busy Station

Allows up to 128 Electronic Key stations to query the busy/idle status of one designated station either Electronic Key line or Centrex within the group. The feature supports up to eight simultaneous requests to monitor the station for idle status display.

Repeat Alert

A station can be designated to receive additional alert tones when a call terminates on a Directory Number (DN), MADN, or Group Intercom Key and while the station is active on another call.

Ringling Options for MADN

Provides additional ringing options to a Multiple Appearance Directory Number (MADN) group.

Secondary Directory Telephone Numbers

Provides an additional directory number which is not physically terminated, but exists in the programming of Electronic Key Line Service. The additional directory number, while not terminated on a dedicated facility, may be accessed from the network and may originate unique outgoing dial tone from an instrument that has another directory number as its primary number.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003,
Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

Line Features (cont'd)

Secondary MADN Call Forwarding

Allows secondary Multiple Appearance Directory Number (MADN) members to activate or deactivate call forwarding from their sets.

Set Inspect

Allows a user either display features assigned to buttons on the phone or display calling or called number of an active call or call on hold via operation of a predesignated button.

Enhancement allows this feature to also be enabled on an automatic basis displaying call information as soon as a call is presented.

Short Hunt

Permits incoming calls to hunt over a set of directory number appearances in search of an idle directory number on which to terminate.

Speed Calling - Expanded Number Group

Allows stations to place calls to a list of numbers by dialing a code. The size of the list depends on the serving technology type.

Speed Calling - Long

Allows a station line to place calls to a list of 30 numbers by dialing a code.

Speed Calling - Short

Allows a station user having access to place calls to a list of 6 or 10 numbers (dependent upon central office switch) by dialing a code.

Stop Hunt Key

This feature may be assigned to any hunt line, directory number, multi-line hunt line, or distributed hunt line. This feature is controlled by a customer provided external key. This feature requires private line facilities and customer provided equipment.

Time and Date Display

Allows time and date to be displayed. Time and date are provided by the Central Office.

Touch Tone

Provides for dialing a telephone number using Dual Tone Multi-Frequency (DTMF) signaling.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

Line Features (cont'd)

Transfer Calls to Restricted Station

Allows incoming calls, initiated from outside the Centrex system to be transferred by a designated station user to a Centrex line that is restricted from receiving incoming calls.

Usage Billing by Line Number

Calls outside of the business system which incur message units or toll charges are billed by individual telephone number when the company is the billing entity.

System Features

Area Wide Networking

Allows subscribers to originate calls within geographically different locations using abbreviated dialing. The called party and the calling party may be in locations served by different Central Office switches and different telecommunications systems.

AWN operates across the public network or private facilities and can be provided to subscribers with PBX, ISDN-Direct, or other basic exchange services.

AWN is compatible with Centrex Mate.

AWN may include In Network Numbers and Out of Network Numbers. In Network numbers are all the telephone numbers that participate in the Awn dialing plan. Out of Network numbers are locations that may be dialed on an abbreviated basis but cannot dial back on the abbreviated dialing plan. Out of Network numbers may include telephone numbers that are not part of the subscribers telecommunications system or that are served from areas where the service is not available.

Two dialing plan formats are available: Extension Dialing and Custom Dialing. A combination of both dialing plans may be provided. Extension Dialing utilizes sequential digits from the North American Numbering Plan (the seven digit telephone number) to originate a call, typically the last four digits of the telephone number. Custom Dialing utilizes a number pattern designed by the customer and may be unrelated to the actual telephone number. If the Custom Dialing format is used it is the option of the customer to define the dialing format and input all Custom Dialing numbers associated with their dialing plan.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Area Wide Networking (cont'd)

Additional business or residence telephone numbers may be added to the abbreviated dialing plan as Out of Network Numbers designated for terminating calls only.

Out of Network numbers may be administered by the subscriber via Centrex Mate or a customer provided VT 100 compatible terminal by accessing the Service Management System (SMS). The subscriber is responsible for any usage charges incurred when accessing the SMS system.

AWN provides subscribers with call management reports. These reports will generate daily, weekly, or monthly information for the dialing plan based on originating, terminating or total dialing plan utilization. Customers may access the report feature via the SMS with Centrex Mate or a customer provided VT 100 compatible terminal.

Appropriate usage charges will apply to AWN calls routed over the public network.

Some central office features will require the dialing of the complete telephone number when the AWN feature is utilized. AWN dialing will also impact some line restrictions provided by certain central office features.

Centrex Mate

The Centrex Mate feature allows a Centrex customer to make changes in the station line and/or feature configuration of their Centrex System as an alternative to the standard Company service order process. Centrex Mate allows the customer to manage feature assignments per line, exchange station numbers between like station lines, verify the assignment of features on an individual station line or bulk basis, sort for stations that have particular features, and to obtain internal directory information for stations in the Centrex Mate database. Centrex Mate is offered subject to availability of facilities and compatibility of the serving central office.

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Centrex Mate (cont'd)

Access is provided by dial up modems via Customer Provided Equipment. The customer is responsible for any charges incurred to access the Centrex Mate system.

Centrex Mate customers may elect to continue to use standard service order procedures at any time and the service will be implemented by the Company at the prevailing charges and service intervals as specified elsewhere.

Customers may elect to have a third party other than the customer implement and manage their system for them. If this option is elected, the customer assumes responsibility for all changes executed by their authorized agent.

The Company reserves the right to withhold the service if it is determined to be incompatible with existing Switching Systems. Also, some functions of the central office switching system will have priority over execution of customer change requests. The Company assumes no responsibility for change requests delayed by priority central office functions.

Not all features and capabilities are included in Centrex Mate. A service order will be required to rearrange some items. These include but are not limited to:

- swaps of off-premises lines in different wire centers;
- lines not included in Centrex Mate such as attendant lines,
- multi-line hunt lines, and lines with special equipment.

Responsibility of the Company

The Company will provide training to these customers who elect to utilize Centrex Mate themselves and decline to elect an authorized agent. Training will be provided by the Company at the time Centrex Mate is activated without charge. Subsequent training can be provided for the customer at an additional charge as specified elsewhere in this offering.

The Company will provide the customer or the designated authorized agent with the security password access codes for the customer's Centrex Mate System.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Responsibility of the Customer

The customer is responsible for the administration and protection of the Centrex Mate password and access code and will be responsible for any charges arising out of unauthorized use of the password. Customers electing an authorized agent to administer and manage their Centrex System shall be responsible for that agent's use and protection of the password and access codes.

The customer will designate at the time of installation whether they will manage their Centrex Mate system themselves or through an authorized agent. If the authorized agent is selected, the customer will provide the Company with a signed and dated letter authorizing the agent to manage the Centrex Mate system on their behalf. The customer accepts responsibility for all changes made on their behalf by their agent.

Centrex Message Signal Interface (CMSI)

Provides for the transmission of certain called number and other identification information via a data link connecting the CMSI input/output port located in the Company central office to customer provided equipment.

CMSI service consists of three features: Call History Package Delivery, Remote Activation of Message Waiting Indicator and Message Waiting Indication.

Call History Package Delivery provides detailed information of calls forwarded from Centrex lines via a Centrex multi-line hunt group and associated data link from the Company's central office to the customer provided Message System Interface.

Remote Activation of Message Waiting Indicator allows the Centrex customer to activate/deactivate an audible message waiting tone on Centrex lines or a visual LED indication on electronic business sets.

Message Waiting Indication Audible provides an audible tone signal on a Centrex line or, where technology permits, a visual LED indication on an electronic business set.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Centrex Virtual Network (CVN)

Virtual Network (CVN) extends intercom calling geographically within a LATA, providing virtual connectivity among all types of Centrex lines using the public network.

All lines in the Centrex System and at each premises location must be included in a customer's CVN. Shared Centrex Common Blocks cannot be part of an CVN. A minimum of 500 lines is required to establish CVN. Systems exceeding 25,000 lines require Customer Specific Contract pricing.

All lines in the network must terminate at an authorized premises location of the Customer of Record. Authorized locations include branches, factories, plants, etc., of the Customer of Record, or a subsidiary of the Customer of Record. A network may not be shared among unaffiliated end users.

When CVN is provided through resale, all lines in each CVN network must terminate at an authorized premises location of the same end user customer. All other terms and conditions as stated above including the requirement of a minimum of 500 lines per end user customer apply.

Announcement Services

Announcements can be utilized with various Centrex services, such as UCD, ACD, Special Intercept, ARS, Queue Slots and Music on Hold. Two announcement arrangements are available:

Customer Premises Announcements provides an interface to the customer premises for recorded announcement or music.

Central Office Recorded Announcements may be provided in the following arrangements:

Standard announcements provides for Company announcements.

Customer specific announcements provides for announcements customized for an individual specific customer (maximum of 24 seconds).

Issued: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Assume Dial "9"

An arrangement that allows station users to originate network calls by dialing the appropriate seven or 10 digit network telephone number without first dialing "9" for access to the public network.

Authorization Codes

An arrangement used to identify callers for billing purposes to assign network class of service and to control network access. Available for both voice and data in initial 100 count. Additional codes are available in counts of 25.

Station Specific Codes is an arrangement that allows up to ten Authorization Codes to be assigned for use on a specific line.

Automatic Route Selection - Deluxe

Allows for the completion of calls to a public network telephone number by automatically scanning the digits and selecting a first choice completion route when available, or a subsequent route if the first choice route is not available. Automatic Alternate Routing for tie lines provides automatic routing of calls to alternate tie line routes when the primary tie line route is in use. Routes may include Foreign Central Office lines, Foreign Exchange lines, WATS lines, Carrier access lines, the DDD network, the IDDD network, or other compatible arrangements. The delivery of digit one to an interexchange carrier is available.

Facility Restriction Levels (FRL) are required with ARS-D and are required on each Centrex line and incoming tie line to determine both the type of call and type of facility within the privileges of the associated user.

Authorization codes allow a station user to dial a code to override the restriction level associated with the dialing Centrex line or tie line. The Centrex requests the Authorization code when the default FRL has insufficient privileges to complete the call. The Authorization code is also inspected for validity as a security check.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Automatic Route Selection - Deluxe (cont'd)

Time of Day routing permits the pre-programming selection of alternate routing pattern groups for off-network calls on a time of day and day of the week basis.

Automatic Alternate Routing provides automatic routing of on-network calls to alternate tie line routes when the primary tie line routes are busy.

Automatic Overflow to DDD provides completion of on-network calls via the toll network when all primary and alternate tie line routes are busy.

Deluxe queuing permits station users to be placed in a queue whenever all facilities in the first choice route in a pattern for completing a particular call are already in use.

Conference Services

Six-Port Conference Service consists of a six-port conference circuit that provides for simultaneous connections up to six conferees. Six Port conference circuits can be utilized to provide the following:

Conference Linking w/4 Additional Ports allows multiple 6 port conferences to be linked together. One port on each 6 port conference circuit is used for linking. Consequently, only 4 ports per each additional conference circuit can be used for conferences when they are linked together.

Preset Conference allows a Centrex station line, trunk, or attendant console to establish a conference call with a maximum of 50 conferees by dialing a specific directory number. The dialing of the DN invokes a simultaneous ringing of the preselected conferees. The conferees are specified and notified in advance.

Enhanced Audio Conference

Allows users to hold a conference for 30 to 150 conferees by dialing a directory number to reach a specific conference bridge at a predetermined time.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Customized Call Diverting

Enables the customer to block or allow one or more NPA and/or NXX numbers when these numbers are dialed by selected stations within the customer group.

Do Not Disturb

An arrangement that intercepts incoming calls to a Centrex line(s) during specified periods of time when a station user(s) does not want to be disturbed. This arrangement can be provisioned for individual lines or groups of lines. This feature may be activated/deactivated via a key by the attendant or a designated station user.

High Speed Data Service

An arrangement that provides digital, full-duplex synchronous data transmission within a Centrex Service System, at speeds of 1.2 Kbps to 56 Kbps and asynchronous data transmission at speeds of 100 bps to 19.2 Kbps over a standard twisted pair loop. High Speed Data Service requires appropriately equipped customer provided equipment. This feature is available only in non ISDN equipped central offices.

Music On Hold Interface

An arrangement that allows access to Customer Provided Equipment that provides a continuous broadcast of music when a caller is placed on hold. Customer Premises Announcements are required per unique music source and are found elsewhere in this offering.

Network Speed Calling

Allows up to 1000 numbers per system to be accessed via individual lists of up to 100 numbers each.

Outgoing Deluxe Trunk Queuing

An arrangement that allows station users to have their outgoing call held in queue, by dialing a code, when the associated outgoing facilities are in use. This arrangement provides station users with "off-hook" or "on-hook" queuing for busy outgoing facilities. A queue slot is required for each call held in queue.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003,
Case No. 02-3069-TP-ALT.

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Outgoing Deluxe Trunk Queuing (cont'd)

The following options are available for calls that are held in "off-hook" queue:

Silence on Queue provides silence when calls are held in queue. This arrangement is standard unless the customer elects Music on Queue or Recorded Announcement.

Music on Queue is an interface that provides for the connection with customer provided music equipment.

Recorded Announcement provides for one continuous repeating type announcement.

Priority Queuing station lines, equipped with this option have originating priority and their calls are loaded into queue ahead of non-priority calls. When the queue is full, priority calls route to overflow tone or to the DDD network.

Personal Call Screening

Allows a station to whom another station's calls are being forwarded, to transfer the call back to the forwarding station, overriding the forwarding feature.

Private Facility Access Termination

Line Side Access Connections

Code Call Access permits station users and attendants to dial an access code and a called party code to activate customer provided audible and visible signaling devices.

Dial Dictation Access provides station users access to customer provided dictation recording equipment by dialing an access code.

Radio Paging Access allows stations and attendants to access customer provided and radio paging equipment located on the customer's premises by dialing a Centrex station number.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Private Facility Access Termination (cont'd)

Trunk Side Access Connections

The following trunk side access connections are available in either analog or digital format as outlined below.

Advanced Private Line Access connects tie lines, private line facilities and access lines from switched private line services to Centrex dial switching equipment. It may also be used when compatible with and required for termination of facilities by Other Common Carriers (OCC's)

Radio Paging Access provides station users and attendants the capability to access customer provided and radio paging equipment located on the customer's premises via an access code.

Tandem Tie Line Access allows tandem connection of special service circuits dedicated to a customer group.

Tie Line Access allows connection of special service circuits dedicated to a customer group.

DS1 Connection is a termination used to connect dial type tie lines or Other Common Carrier (OCC) private communication services to a Centrex System. The termination can accommodate twenty-four channels, each dedicated to a specific service.

Other Private Facility Access Connections

Foreign Exchange (FX) provides access to/from an FX line. Station users have the ability to transfer a foreign exchange call.

OUTWATS Access allows a station user access to OUTWATS services dedicated to a customer group by dialing an access code.

Queue Slots

Queue slots are dedicated time slots in the central office, used to hold calls in a delayed state until a call can be further processed. A queue slot is required for each call to be held in queue.

Calls in Queue may be provided a recorded announcement or music. These optional features are specified in the Optional Features section of this offering under Announcement Services.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

TFA No. OH-07-17691

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

D. Features (cont'd)

System Features (cont'd)

Remote Access Services

Allows users outside the Centrex to access the system by dialing predetermined Network Access Lines. Customers that have this optional system feature can dial into a Centrex system, without the assistance of an attendant and access the features and telecommunications facilities associated with the system.

Special Intercept Service

Allows the customer to provide an individual message when a station has been taken out of service. This feature provides access to the announcement and requires either a customer designated central office recorded announcement or an interface to customer premises recorded announcement facilities. Requires a Dedicated Communications Service channel.

Supplemental Three Digit Dialing

Available on a Centrex system arranged for 4 or 5 digit intercom dialing. Three digit dialing is provided as a means to reach an emergency station line on the same system, such as fire, police, etc.

Trunk Verification from Designated Station

An arrangement that provides audible transmission level testing for originating and terminating trunk groups or a trunk within a trunk group for trunks associated with a Centrex system by a designated station user(s).

This service arrangement is provided at the option of the Company and is furnished subject to the availability of central offices equipped and programmed to provide such service.

Uniform Call Distribution

Provides for the even distribution of incoming calls to all groups of lines arranged in a special hunting arrangement. Queuing may be provided with the addition of queue slots found elsewhere in this offering.

Virtual Routing

Provides routing and call completion over 24 software defined access paths (virtual/simulated facilities group) for Valuelink Premier intraLATA toll service.

PACKAGE PRICES (cont'd)

Centrex Virtual Network (CVN)

The following equation based on CCS and distance is used to determine the applicable monthly charge. The number of lines located 0 to 15 miles and 15 or more miles from the Hub location are used in the equation.

$$\begin{aligned} & (\text{Total lines within 0 to 15 miles})(\$CCS)/(\text{Total lines in Network}) + (\text{Total lines beyond 15} \\ & \text{miles})(\$CCS)/(\text{Total lines in Network}) + \$1.00 \\ & = \text{Price per line per month (Rounded to the nearest multiple of $.05)} \end{aligned}$$

CCS Values

CCS Values	0 - 15 Miles	15+ Miles
Max. 2.5	\$2.20	\$ 5.40
Max. 3.5	3.30	8.10
Max. 4.5	4.40	10.80
Max. 5.5	5.50	13.50
Max. 8.0	7.70	18.90

The Company reserves the right to reassess the pricing of the customer's network if the negotiated CCS is exceeded.

The following discount table is used for networks over 1,500 lines and is based on the contract length of the hub locations.

LINE SIZE	3-Year	5-Year	7-Year
1,500 - 3,999	10%	15%	20%
4,000 - 5,999	15%	20%	25%
6,000 - 7,999	20%	25%	30%
8,000 and above	25%	30%	35%

Apply Area Wide Networking Nonrecurring Per System charge found elsewhere in this pricing section.

For Optional Out of Network numbers apply the appropriate charges located under the Area Wide Networking feature found elsewhere in this pricing section.

9. BUSINESS SOLUTIONS CENTREX (cont'd)

(T)

E. Prices (cont'd)

Payment Plans

Month to Month

Business Solutions Centrex is offered under a Month to Month Payment Plan. The provision of (T)
Business Solutions Centrex under the Month to Month Payment Plan is dependent on the (T)
availability and capacity of central office facilities. Month to Month prices will be subject to
Company initiated price adjustments.

Term Payment Plans

Business Solutions Centrex is offered under contracted Term Payment Plans (TPP) which require (T)
customers to pay a fixed charge for equipment and service over selected payment periods. A
different monthly charge applies for the duration of each period. The same payment plan must
apply to all intercommunication lines and features.

The minimum period is one month, unless otherwise specified. Contract Plans are available for
12-, 36-, 60- or 84-month payment periods. During the effective term of a customer payment
period, the monthly price is not subject to Company initiated changes for payment periods longer
than one month.

Services covered by a Contract Plan include:

- Centrex lines and optional features
- System Features

Local Exchange Access is not covered by the Contract Plan.

Additions

Customers can add additional lines and/or features to the existing Centrex service anytime during
the contract period. All additions of Centrex lines will be added at the existing contracted prices.
All additions of system features will be added at the current price for the contract period. All
additions to the Centrex service will be co-terminous with the original contract.

Issued: December 17, 2007

Effective: December 17, 2007

(T)

E. Prices (cont'd)

Payment Plans (cont'd)

Additions (cont'd)

Upon growth to another Line Commitment, the customer may select a contract period that is equal to or greater than the remaining life of the existing contract. At that time, the customer will become liable for the then current monthly price for the new Line Commitment. These prices will not be subject to Company initiated increases for the duration of the new contract period. If the customer chooses not to select a new contract period for a larger Line Commitment, the monthly price for the additional lines will be the price appropriate to the existing Line Commitment contract plan. (T)

Contract Options

Prior to the completion of an Business Solutions Centrex contract plan, a customer may enter into a new Business Solutions Centrex contract plan for a period equal to, or greater than, the terms of the original contract plan at the prices currently in effect at the time. The customer will begin paying the new contract price on the day of signing the new contract plan. (T)

Single Payment Option (SPO)

Deferred Payment Option (DPO)

Termination Charges

No Termination Liability Conditions

A customer may move their location within the same Central Office serving area or to another Central Office serving area without Termination Liability if the conditions specified under 3. Termination Without Liability are met.

Termination Liability

Renewal

Upon expiration of the contracted payment period, service will be converted to the monthly prices for the then current Centrex service.

Issued: December 17, 2007

Termination Charges (cont'd)

Termination Liability (cont'd)

Under Utilization and Early Termination Charges:

Early Termination Charges apply in the event the customer cancels this agreement prior to expiration without satisfying the conditions for Termination without Liability.

1. Early Termination Charges for Termination's with Liability:

If a customer terminates service prior to the expiration of this agreement or prior to the expiration of any renewal period, the customer will be required to pay 50% of the Line Commitment revenue amount for each month remaining on the unexpired term agreement.

2. Under Utilization Charges:

Each month the Customer is responsible for the greater of:

- monthly line charges for the Line Commitment quantity under contract, or
- monthly line charges for actual number of lines in use.

3. Termination without Liability:

A customer may terminate this agreement without liability upon the expiration date by providing written notice to the Company, which must be received 30 days prior to the agreement expiration date at the address specified on the Business Solutions Agreement. A customer may discontinue this agreement without liability upon signing a new Business Solutions Agreement and meeting two conditions:

(T)
|
(T)

- customer commits to a new Business Solutions agreement with a Line Commitment equal to or greater than the existing agreement and;
- customer commits to a new term commitment equal to or greater than the term commitment of the existing agreement.

(T)

Payment Plans

Assumption of Existing Contract:

The customer shall not assign or otherwise transfer its rights or obligations under any Centrex arrangement provided under this tariff without prior written consent of Ameritech. Such consent will not be unreasonably withheld or delayed. Any provisions to the contrary found elsewhere in this Tariff are superseded.

(T)

Conversion from existing Term Agreement:

(T)

A new Business Solutions Agreement will cause an existing Centrex Agreement or Business Solutions Agreement to terminate automatically on the date of the new agreement without incurring Early Termination Charges as long as conditions in 3. above are met.

(T)

Limitation of Liability:

The liability, if any, of the Company for damages to the customer or to any third party, whether in negligence, tort, contract or otherwise, including but not limited to damages for non-performance or performance failure of the service provided under an Business Solutions Agreement, is limited to an amount equal to a prorata adjustment of applicable recurring charges for the service or any portion of the service.

1. DIGITAL TRUNK SERVICE

A. DESCRIPTION

Digital Trunk Service furnishes digital exchange access lines necessary for communicating within specified exchange areas via DS1 Service. A list of exchange areas appears in Part 4, Section 1 of this Tariff. (T)

Digital Trunk Service provides the equivalent of 24 exchange access lines between a customer's premises and the customer's normal serving central office. These 24 channels may be used as Trunk lines to PBX equipment, and may provide Direct Inward Dialing (DID) Service, Wide Area Telecommunications Service (WATS), or Success 800 Service. Touch-Tone Service is a standard feature of Digital Trunk Service.

B. TERMS AND CONDITIONS

1. Digital Trunk Service is offered only from central offices where the Company has arranged facilities for such service. (T)
2. DID Service must be provided on separate digital trunks that do not provide other trunk lines to PBX equipment.
3. DS1 Service central office multiplexing may be required in certain configurations of Digital Trunk Service. The Company will determine when central office multiplexing is required. (T) (T)

1. DIGITAL TRUNK SERVICE (cont'd)

C. Prices

1. General

- a. The rate structure for each Digital Trunk Service requires charges for a Digital Trunk (see 2. following), a DS1 Service local distribution channel, DS1 Service central office multiplexing (where required) and End User Common Line Charges (EUCL). These charges represent the physical components of the service.
- b. Central office features such as: Direct Inward Dialing (DID) Service, Wide Area Telecommunications Service (WATS), and Success 800 Service are available at their current rates.
- c. Calls will be subject to the usage charges for the services provisioned on the channels. Measured service local message charges for usage will apply to Local Service Area calls provisioned on the channels. Message Toll charges will apply to calls outside the Local Service Area.

2. DIGITAL TRANSPORT SERVICE (DTS)

A. Description

Digital Transport Service (DTS) provides a cost effective method of delivering voice grade service from the serving Central Office to a customer's premises. DTS is provided exclusively with DS1 Service (1.544 Mbps) and the 24 channels may be used for the transport of certain access lines for termination on customer-provided equipment. DTS supports Direct Inward Dialing (DID) Service, ValueLink Premier Service, Dedicated 800 Service, and PBX Trunks. Touch-Tone is a standard feature of DTS. DTS is an exchange service. (T)

B. Terms and Conditions

1. DTS is offered in two serving arrangements, Integrated and Non-Integrated, from Central Offices where the Company has arranged facilities for such service.
 - a. Integrated Service is an arrangement that allows for the direct termination of digital trunks from a digital Central Office to customer-provided equipment. This arrangement supports Trunk side features only. The Integrated Arrangement is comprised of three elements:
 - (1) Trunk Terminations
 - (2) DS1 Distribution Channel and
 - (3) Digital Interface Termination.
 - b. Non-Integrated Service is an arrangement that allows for the termination of PBX trunks from an Analog or Digital Central Office to customer-provided equipment. This arrangement supports Trunk side and Line side features on those trunks. This arrangement is comprised of three elements:
 - (1) Trunk Terminations
 - (2) DS1 Digital Distribution Channel and
 - (3) Central Office Multiplexing.
2. Serving arrangements that require a mixture of Integrated and Non-Integrated terminations are provided as Non-Integrated Service.

2. DIGITAL TRANSPORT SERVICE (DTS) (cont'd)

B. Terms and Conditions

3. The rate structure for DTS requires charges for Trunk Terminations, a DS1 local distribution channel, DS1 central office multiplexing or Digital Interface Termination (as required) and End User Common Line Charges (EUCL).
4. Additional charges for Central Office services and features such as Direct Inward Dialing (DID) Service, ValueLink Premier Service and Dedicated 800 Service are applicable when (T)
appropriate.
5. All signals generated by Network Channel Terminating Equipment (NCTE) must comply with the signal and format constraints contained in Telcordia Publication TR-NPL-000054. Performance parameters for DTS can be found in Technical Reference manual AM-TR-TMO-000101. (T)
6. Availability and functionality of DTS may vary by serving Central Office and switch type. The Company will determine when Integrated or Non-Integrated terminations are required and whether DTS can be provisioned, or is compatible with, the customer's service and equipment.
7. If changes in Central Office technology permit the Company to convert a customer's Non-Integrated Termination to an Integrated Termination, the customer's rate will be adjusted to reflect the Integrated Termination rates. Nonrecurring charges are not applicable for Company initiated changes.
8. Clear Channel Capability as specified in Ameritech Operating Companies Access Tariff, F.C.C. No. 2, Section 6.1.3.A.3.d, is an optional feature of DTS, allowing the customer to transport maximum through put with no constraint on quantity or bit sequence.

2. PRIMENUMBER SERVICE

(T)

Effective April 30, 2001, new installations of Prime Number Service will no longer be made. Existing customers may retain this service until they change or disconnect their service. (T)

A. Description

PrimeNumber Service is an optional intraLATA service that provides business customers with multiple locations, a single telephone number per LATA to terminate incoming calls. Calls to the single number are routed to the location nearest the calling party or as specified by the customer. (T)

B. Definitions

Record - A record is an entry in the routing table or database which is necessary to route the incoming calls.

C. Terms and Conditions

The General Regulations of this Tariff apply to PrimeNumber Service. (T)

The General Regulations specify the Company's liability associated with interruptions to service and damages associated with the provision, maintenance, or restoration of PrimeNumber Service. (T)

The following regulations apply to PrimeNumber Service in addition to those referenced above. (T)

1. A prospective PrimeNumber Service subscriber must make separate arrangements for business Local Exchange Access Service prior to establishment of PrimeNumber Service. (T)
2. PrimeNumber Service is available where facilities or arrangements permit.
3. PrimeNumber Service is only available on a twelve (12) month term basis. The twelve (12) month period will begin on the completion date of the Service Order. (T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

2. PRIMENUMBER SERVICE (cont'd)

(T)

C. Terms and Conditions (cont'd)

4. Applicable charges for local, toll, public or semi-public calls placed to an PrimeNumber will be billed to the originating party. (T)
5. Additional Directory listings are available at rates provided elsewhere in this tariff.
6. A unique telephone number may be assigned to only one PrimeNumber Service subscriber within a LATA. (T)
7. PrimeNumber Service is compatible with Caller ID Service network functionality. Caller ID Service is available to PrimeNumber Service subscribers where facilities permit at the applicable tariff rates. (T)
(T)
8. With establishment of PrimeNumber Service, the subscriber will be provided with a SecureID access card. Additional or replacement SecureID cards will be available for a separate fee to be agreed upon by the Company and the subscriber. (T)
(T)
SecureID cards provide the subscriber with access to the PrimeNumber Service network system in order to maintain or modify the subscriber Routing Table or Database, and to access standard PrimeNumber Service reports. (T)
(T)

Upon receipt of the SecureID card(s), the subscriber assumes responsibility for safeguarding the use of their assigned card(s) and for any breaches to security resulting from the loss or misuse of the SecureID card(s).

2. PRIMENUMBER SERVICE (cont'd) (T)

D. Features

1. Standard Feature(s)

Where facilities permit, Standard Feature(s) will be provided as integral component(s) of PrimeNumber Service. (T)

Basic Announcement

The Basic Announcement is activated when the network is unable to automatically identify and route the telephone number of the calling party. The Basic Announcement will prompt the calling party to enter the appropriate telephone number and then forward the call to an PrimeNumber Service subscriber location. (T)

2. Optional Feature(s)

Where facilities and number availability permit, Optional Feature(s) will be made available to PrimeNumber Service subscribers at applicable rates. (T)

Seven (7) Digit Option

Allows a PrimeNumber Service subscriber to serve customers in a LATA with multiple NPAs with a single seven (7) digit telephone number.

Day of Year and Time of Day Routing

Allows a PrimeNumber Service subscriber to select the location to which calls will be routed based upon the time of day and day of year (specific date) that calls originate.

Day of Week and Time of Day Routing

Allows a PrimeNumber Service subscriber to select the location to which calls will be routed based upon the time of day and day of week that calls originate.

2. PRIMENUMBER SERVICE (cont'd)

(T)

E. Prices (cont'd)

2. Termination Charges

PrimeNumber Service is only available on a twelve (12) month term basis.

(T)

In the event that a subscriber initiates a Service Order request for PrimeNumber Service, and subsequently cancels the Service Order prior to full operational establishment of service, the subscriber remains liable for all nonrecurring service establishment charges specified in this Tariff.

(T)

Subscribers that cancel their PrimeNumber Service before the term expiration date will be billed a termination liability which consists of a lump sum equal to the non-usage sensitive monthly recurring charges specified in this tariff times the number of months remaining on the term period, rounded up to the nearest whole month.

(T)

Any cancellation or termination liability lump sum payment will become due and payable in its entirety immediately upon calculation and presentation of the lump sum bill statement.

At the expiration of the twelve (12) month term period, subsequent monthly billing will revert to the PrimeNumber Service monthly rates in effect at that time, as specified in this Tariff. Termination liability charges are no longer applicable once the term period has expired and billing reverts to a month-to-month basis.

3. PACKET SWITCHED NETWORK SERVICE

Effective April 5, 2002, no further installations, moves, rearrangements, or changes of any type will be made to Dial-up Packet Service or to X.25 Dedicated Packet Service. Customers of record on April 5, 2002 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished.

Effective July 16, 2005, no further installations, moves, rearrangements, or changes of any type will be made to ISDN X.25 and Dedicated X.75 Packet Service. Customers of record on July 16, 2005 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished.

The preceding supersedes all of the rules and regulations that follow.

|
(D)

A. General Description

The Packet Switched Network (PSN) combines packet switching technology and digital transmission facilities to provide a switched data carriage service. The PSN is designed to provide economical usage-sensitive data transmission for a variety of interactive (or bursty) data applications. The PSN provides for simultaneous two-way transmission of data at speeds up to 64 kilobits per second (Kbps). Customers can choose between the Data Transport access arrangement, which permits PSN switching to any PSN switch in the LATA and the X.75 ISDN Interface Dedicated Access arrangement whose PSN switching is limited to a single ISDN switch in a LATA.

With packet switching technology, data streams are packetized and then moved through the network to their destinations. The packet network examines, routes, and transports packets individually without maintaining a physical path between bursts of data. In this way, greater volumes can be transported through shared network transmission facilities and individual data packets can be sent on alternate routes as the need arises, resulting in better system performance and higher network availability. The reduction in network facilities results in a more economical form of data transmission for interactive applications.

3. PACKET SWITCHED NETWORK SERVICE (cont'd)

(C)

A. General Description (cont'd)

/1/

The PSN will support communications between data terminal equipment (DTE) with like protocols. In addition, the PSN may be used to provide protocol conversion between equipment using the asynchronous protocol and equipment using X.25 or X.75 protocol subject to a non-tariffed protocol conversion charge.

/1/

B. Regulations

1. Network User Identification (NUI) codes are assigned by the Company. One NUI is provided per Network Terminal Number (NTN) or dial access account when available upon request. Charges apply for each additional NUI code. (T)
2. Idle time in excess of 20 minutes may generate a disconnect on all switched calls except Permanent Virtual Circuit calls.
3. Public Dial, Private Dial or ISDN access users may require conditioning of their exchange service facility. /2/
4. Protocol Conversion Charge applies to all protocol converted kilosegments or minutes of use.
5. All charges for customer traffic originating or terminating on an X.75 port will be billed to that port. The X.75 customer will be responsible for billing the appropriate user. /2/
6. If it becomes necessary to disrupt service for scheduled maintenance reasons, the disruption will occur between the hours of 2:00 a.m. to 6:00 a.m., on Sunday. The disruption period will be only for the amount of time necessary to complete the maintenance and in all cases will be held to a minimum. Except for this scheduled service interruption, a credit allowance for interruptions to service will be given in accordance with Part 2, Section 2 of this Tariff. (T)

3. PACKET SWITCHED NETWORK SERVICE (cont'd)

B. Regulations (cont'd)

7. The PSN requires the use of Customer Provided Equipment (CPE). This equipment, used in conjunction with the PSN port terminations, is subject to the limitations specified in the following Technical References:

<u>Protocol</u>	<u>Technical Reference</u>	(D)
X.25	AM-TR-NPL-000002	(D)
Asynchronous	AM-TR-NPL-000003	
X.75	AM-TR-NPL-000016	
ISDN	AM-TR-OAT-000068	(D)

CPE used in association with the PSN is, in addition, subject to the limitations of the Technical References for Exchange Terminations. The following is a list of the Exchange Terminations available and their corresponding Technical References:

Type Termination	Transmission Capability	Technical Reference	(D)
Analog	300 bps to 9600 bps	AM-TR-NPL-000001	(D)
Digital	2400 bps to 64 Kbps	AM-TR-NPL-000007	
ISDN	Up to 64 Kbps	AM-TR-NPL-000068	(D)

The Technical References may be obtained from:

APEX Support Team
(734) 523-7348 (T)
(T)

8. The 50% Evening, Weekend and Holiday discount is available in all compatibly equipped central offices.
9. Verification of customer provided PADs and computer equipment may be required by the Company for PSN compatibility.

The applicable PSN usage charges are:

- Premium Packet Access (if appropriate)
- Holding Time
- Data Transport Minutes of Use
- Data Transport Kilosegments
- Fast Select (if appropriate)
- Protocol Conversion (if appropriate)

Issued: December 17, 2007

Effective: December 17, 2007

(C)

C. PSN Access Arrangements

Customers may gain access to the PSN by using the following options:

- Public Dial
- Private Dial
- X.25 Dedicated
- ISDN X.25
- Dedicated X.75

/1/
/1/

1. Public Dial

Public Dial provides users shared access to the PSN via the exchange or message toll telephone network. All applicable local or toll charges are billed to the originator's exchange service. Collect calls are not accepted by the PSN. Public Dial users access shared PSN exchange and port terminations.

Public Dial provides originating only access to the PSN using the following communication protocols:

- Asynchronous

The applicable PSN rate elements are:

- Optional Features

2. Private Dial

/2/

Private Dial provides user exclusive access to the PSN via the exchange or message toll telephone network. All applicable local or toll charges are billed to the originator's or customer's exchange service. Private Dial customers subscribe to private PSN exchange and port terminations for their exclusive use. Collect calls are not accepted by the PSN.

Private Dial provides the ability to transmit data using the following communication protocol:

- Asynchronous

/2/

/1/ Material formerly appeared on Original Sheet 18 in Part 6, Section 2 of this Tariff.

/2/ Material formerly appeared on Original Sheet 20 in this Section.

Issued: July 15, 2005

2. Private Dial (cont'd)

(T)
/1/

Private Dial provides user exclusive access to the PSN via the exchange or message toll telephone network. All applicable local or toll charges are billed to the originator's or customer's exchange service. Private Dial customers subscribe to private PSN exchange and port terminations for their exclusive use. Collect calls are not accepted by the PSN.

Private Dial provides the ability to transmit data using the following communication protocol:

- Asynchronous

The applicable PSN elements are:

- Exchange Termination
- Port Termination
- Optional Features

The applicable PSN usage charges are:

- Data Transport Minutes of Use
- Data Transport Kilosegments
- Fast Select (if appropriate)
- Protocol Conversion (if appropriate)

3. X.25 Dedicated

/2/

X.25 Dedicated Access provides a permanent connection to the PSN via a dedicated private line channel as found in Part 15 of this Tariff.

The following private line facilities are supported for X.25 Dedicated Access:

Analog - Requires a type 3002 Channel used for Analog transmission as defined in Part 15, Section 2 of this Tariff.

Digital - Requires a Base Rate or Direct Digital Service (DDS) Channel used for digital transmission as defined in the Part 15, Section 3 of this Tariff.

/2/

/1/ Material now appears on 1st Revised Sheet 19 in this Section.

/2/ Material formerly appeared on Original Sheet 21 in this Section.

Issued: July 15, 2005

Effective: July 16, 2005

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

3. PACKET SWITCHED NETWORK SERVICE (cont'd)

(C)

C. PSN Access Arrangements (cont'd)

3. X.25 Dedicated (cont'd)

(T)
/1/

When an X.25 Dedicated Access PSN service supports communications between DTE using like protocols, no local distribution channel (LDC) charge applies at the packet assembler/disassembler (PAD) or PSN switch office. When protocol conversion is provided on an X.25 Dedicated Access PSN service, an LDC charge applies at the PAD or PSN switch office to provide price parity for that enhanced service.

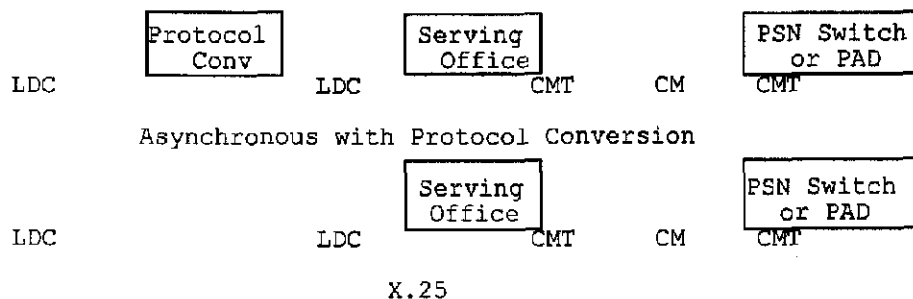

X.25 Dedicated Access provides call origination and termination capabilities at speeds up to 64 Kbps.

Dedicated Access provides the capability of transmitting data using the following communication protocols:

- Asynchronous
- X.25

Below are diagrams of the applicable private line rate elements for Dedicated PSN service:

/2/

The applicable PSN elements are:

- Exchange Termination
- Port Termination
- Optional Features
- Fast Select (if appropriate)

3. X.25 Dedicated (cont'd)

/1/

The applicable PSN usage charges are:

- Data Transport Minutes of Use
- Data Transport Kilosegments
- Fast Select (if appropriate)
- Protocol Conversion (if appropriate)

4. ISDN

/2/

ISDN provides access to the PSN via the customer's 16 Kbps D channel or 64 Kbps B channel. All applicable ISDN exchange charges are billed to the ISDN customer's exchange service. Collect calls are not accepted by the PSN.

ISDN uses the following protocol:

- X.25

The applicable PSN elements are:

- Optional Features

The applicable PSN usage charges are:

- Data Transport Minutes of Use
- Data Transport Kilosegments
- Fast Select (if appropriate)

/2/

C. PSN Access Arrangements (cont'd)

5. Dedicated X.75

Dedicated X.75 Access provides a permanent connection to the PSN via a dedicated private line channel as found in Part 15 of this Tariff.

The following private line facilities are supported for Dedicated X.75 Access:

Digital - Requires a Base Rate or Direct Digital Service (DDS)
Channel used for digital transmission as defined in the
Part 15, Section 3 of this Tariff.

Dedicated X.75 Access provides call origination and termination capabilities at speeds up to 56 Kbps.

Dedicated X.75 Access provides the capability of transmitting data using the following communication protocol:

- X.75

The applicable PSN elements are:

- Exchange Termination
- Port Termination
- Fast Select (if appropriate)

The applicable PSN usage charges are:

- ISDN Interface Minutes of Use
- ISDN Interface Kilosegments
- Fast Select (if appropriate)

3. PACKET SWITCHED NETWORK SERVICE (cont'd)

(C)

D. PSN Elements

1. Exchange Terminations

/1/

Exchange Terminations are determined by the type of facility used to access the PSN. The exchange termination provides a central office end modem function for analog lines and a Data Service Unit/Channel Service Unit function for digital access lines.

2. Port Terminations

Port Terminations provide the communications interface for users accessing the PSN. They are protocol and speed specific. A NTN is provided at no charge with each Port Termination. The NTN assignment is independent of the customer's voice telephone number.

/1/

3. Optional Features

/2/

Certain optional features and functions are available depending on the serving packet switch.

Call Redirection - Automatically redirects calls addressed to a primary DTE, to a secondary DTE when the primary DTE is not in service, busy or designated for call redirection due to network operator request. Call redirecting ends automatically when access to the primary DTE is again possible.

Closed User Group (CUG) - A private group of users that limits communications to members within the group. The CUG allows its members to transmit and receive calls, service type permitting, to and from other members within the CUG.

Direct Call - Enables a user to automatically establish a virtual call to a predetermined NTN.

Fast Select Acceptance - Allows the customer to terminate fast select calls that originated from an end user's DTE. The fast select data is delivered to the terminating customer in the user data field of an incoming call packet. The terminating DTE then responds with either a call accepted packet or a call clear indication.

/2/

/1/ Material formerly appeared on Original Sheet 19 in Part 6, Section 2 of this Tariff.

/2/ Material formerly appeared on Original Sheet 20 in Part 6, Section 2 of this Tariff.

3. PACKET SWITCHED NETWORK SERVICE (cont'd)

(C)

D. PSN Elements (cont'd)

3. Optional Features (cont'd)

Hunt Group - An association of ports with a single or multiple NTN's. Two features are available. The homing feature allows terminating calls to be distributed sequentially over the ports. Non-homing allows terminating calls to be distributed equally over the ports. /1/

Multiple Network Terminal Numbers - Permits the user to have additional DTE addresses per port, thereby, permitting incoming logical transmissions to be routed by the PSN to the appropriate DTE. The available quantity of this feature may be limited by the Company.

Network User Identification (NUI) - A numeric character string, defined by the Company, used as a log-on ID. In the case of the dedicated access, the NUI may correspond to the network address.

Permanent Virtual Circuit - Establishes a logical channel between two NTN's and remains indefinitely in the data transfer mode. /1/

Reverse Charging - Allows the originating NTN's PSN usage and holding time charges to be billed to the terminating NTN on a per session basis. The call will be set up only if the terminating NTN is configured to accept charges. /2/

Reverse Charging Acceptance - Authorizes the terminating NTN to accept PSN usage and holding time charges from an originating NTN. /2/

E. Usage Charges

1. Premium Packet Access

(T)

Premium Packet Access provides a usage sensitive, LATA wide rate for access to the PSN. (T)

Premium Packet Access usage measurement begins upon receipt of the call acceptance packet and ends upon receipt of the call clear packet. The minimum initial Premium Packet Access period is 3 tenths of a minute and additional usage is measured in tenths of minutes. (T)

Premium Packet Access usage will be accumulated for the billing period for rating purposes. (T)

/1/ Material formerly appeared on Original Sheet 20 in Part 6, Section 2 of this Tariff.

/2/ Material formerly appeared on Original Sheet 21 in Part 6, Section 2 of this Tariff.

3. PACKET SWITCHED NETWORK SERVICE (cont'd)

(C)

E. Usage Charges (cont'd)

2. Holding Time

Holding Time is the elapsed time of a Public Dial PSN call. Holding Time charges apply to Public Dial PSN Access Arrangements for the use of a PSN dial port.

A Holding Time session begins upon receipt of the call acceptance packet and ends upon receipt of the call clear packet. The minimum initial Holding Time session is 1 tenth of a minute and additional usage is measured in tenths of minutes. Holding Time will be accumulated for the billing period for rating purposes.

3. Fast Select

Allows for a call request, the transmission of data and call clearing in a single exchange of packets. These packets may contain up to 128 data octets in addition to the call request information.

4. Data Transport

Charges apply for Public Dial, Private Dial, ISDN or Dedicated Access Arrangements whose PSN switch can connect to any PSN switch in a LATA. ISDN Interface usage charges apply for X.75 Dedicated Access Arrangements whose PSN switching is limited to a single ISDN switch in a LATA. /1/

Customers who access the network via dial ports or ISDN Packet Lines and transmit an average of 2.0 kilosegments or less of data per logical session per minute can choose between minutes of use (MOU) and kilosegment billing. Customers who transmit greater than an average of 2.0 kilosegments per logical session per minute will be billed for kilosegments transmitted. The average kilosegments per minute will be calculated for the billing period for rating purposes. /1/

The measurement of a MOU session begins upon receipt of the call acceptance packet and ends upon receipt of the call clear packet. The minimum initial MOU session is 7 tenths of a minute and additional usage is measured in tenths of minutes. MOUs will be accumulated for the billing period for rating purposes.

/2/

/1/ Material formerly appeared on Original Sheet 21 in Part 6, Section 2 of this Tariff.

/2/ Material now appears on 1st Revised Sheet 26 in this Section.

Issued: July 15, 2005

Effective: July 16, 2005

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

3. PACKET SWITCHED NETWORK SERVICE (cont'd)

E. Usage Charges (cont'd)

4. Data Transport (cont'd)

Kilosegment measurement counts the number of segments transmitted. A kilosegment is 1000 segments. A segment has a billable length of 64 octets of customer information. The minimum initial session is 40 segments and additional usage is measured in segments. Segments are totaled at the end of the billing period and rounded to the next whole kilosegment for rating purposes.

5. ISDN Interface

The ISDN Interface is for the purpose of allowing other networks to terminate directly onto an ISDN Integrated Packet Handler (IPH). This will give the other network access to the ISDN lines served by that IPH and only that IPH. They must connect on an X.75 port connection in addition to the digital private line.

6. AT&T Ohio Transaction Charge

(T)

AT&T Ohio Transaction Charge provides dial up service using a single telephone number anywhere in the Company serving area and other Independent Telephone Company areas where interconnection agreements are in place. This service is rated in seconds of call use.

(T)

7. Evening, Weekend and Holiday Discounts

An evening, weekend and holiday 50% discount in rates will apply on the following:

- Holding time
- Data transport charge
- Protocol conversion charge
- Fast select (if appropriate)

The evening discount will apply for any portion of a call occurring Monday through Friday during the period from 4:00 P.M. up to but not including 7:00 A.M.

The weekend and Holiday* 50% discount will apply for any portion of a call through the entire day.

- * The observed holidays are New Year's Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

4. DIGITAL SWITCHED NETWORK SERVICES

Effective July 16, 2005, no further installations, moves, rearrangements, or changes of any type will be made to Packet Switched Network Services, including Digital Switched Network Service. Customers of record on July 16, 2005 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished.

The preceding supersedes all of the rules and regulations that follow.

B. General Regulations

1. Definitions

Octet

Eight binary digits.

Call Initiation

The point where common control network facilities are initially allocated to the establishment of a specific switched virtual circuit.

Call Termination

The point where common control network facilities allocated to a specific switched virtual circuit are released for reuse by the network.

Consultative Committee International Telephone and Telegraph (CCITT)

A United Nations International Communications standards body.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

B. General Regulations (cont'd)

1. Definitions (cont'd)

Exchange Termination

A PSN Network component linking the access line and the Port Termination.

Kilosegment

One thousand segments.

Local Access and Transport Area (LATA)

The term "Local Access and Transport Area" (LATA) denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges, which are grouped to serve common social, economic and other purposes.

Logical Channel

A transmission path within the PSN access line.

Network Terminal Number (NTN)

Numeric character sequence used to identify the originating and terminating locations of each virtual circuit made within the network.

Network User Identification (NUI) Code

A numeric character string, defined by the company, used as a log-on ID. In the case of dedicated access, the NUI may correspond to the network address.

Packet Assembler/Disassembler (PAD)

The PSN network component which supports the customer interface functions, such as, but not limited to, call initiation and transmission interface functions.

Packet Network

Supports data transmission via ISDN X.25 and Dedicated X.75 Access.

Packet Switch

That part of the network which performs switching functions. For PSN service this is considered to be the Company central office.

/1/

B. General Regulations (cont'd)

1. Definitions (cont'd)

Packet Switched Network (PSN) Access

A communication interface either on a PAD or a packet switch through which a customer obtains access to the PSN network. Includes all company plant facilities.

/2/

Permanent Virtual Circuit

A logical channel between two stations on the network. No call establishment, call termination, or network address are associated with a permanent virtual circuit.

Port Termination

A PSN Network component connecting the Exchange Termination to the PAD.

/2/

Protocol

A set of procedures for establishing and controlling transmission between two or more terminals. It involves a time sequence of events that must be followed for proper communication to take place.

/3/

The PSN Network supports the following protocols:

- X.25 Protocol

A form of protocol that allows for the establishment of many concurrent virtual calls over the same Network Access lines as outlined in the 1980 version of the CCITT Recommendation X.25.

- X.75 Protocol

A form of protocol that allows for the establishment of many concurrent virtual calls between packet networks as outlined in the 1980 version of the CCITT Recommendation.

Segment

Continuous sequence of binary digits of information which is switched through the network as an integral unit with additional transmission and error control. A segment is equal to 64 octets.

4. DIGITAL SWITCHED NETWORK SERVICES (cont'd)

B. General Regulations (cont'd)

1. Definitions (cont'd)

/1/

Switched Virtual Connection

A logical channel established as a result of call establishment procedure to a network address that exists until either end of the channel initiates the call termination procedure.

2. Application For Service

The Company will generally accept applications for service verbally during usual working hours on normal working days, however the Company reserves the right to require applications for service in writing on forms supplied by the Company.

(T)

(T)

/1/(T)

a. Refusal to Provide Service

/2/

Service may be refused under the following conditions:

- Where an applicant has an outstanding account with the Company, the Company may reject an application for service until the amount due has been paid in full.
- In the event an applicant refuses to pay an advance payment or deposit requested by the Company.
- Upon objection to the furnishing of service to the applicant made by or on behalf of any governmental authority.

(T)

(T)

(T)

b. Cancellation of Applications for Service

When an application for new service or a request for additions, rearrangements, relocations, or modifications of service is cancelled before service is established or before the work involved has been completed, the applicant or customer may be required to reimburse the Company for all expense incurred in connection with the handling of the application or request before notice of cancellation is received. However, such charge shall not exceed all charges which would apply if the work involved with the application or the request had been completed, i.e., all applicable service connection charges, nonrecurring, and termination charges.

3. Description of Service (cont'd)

a. General (cont'd)

Digital Switched Network (DSN) Service may be used for the transmission of communications subject to the terms and conditions of this Tariff. DSN Service will be provided subject to the availability of facilities within a LATA.

/1/

/1/

4. Denial or Termination of Service

/2/

a. In the event of abandonment of the service, the non-payment of any sum due, abuse or fraudulent use of the service as set forth in C. following, any other violation of the regulations of the Company or upon objection to the continuance of service made by or on behalf of any governmental authority, the Company may either temporarily deny service or terminate the service. Subsequent to the completion of an order to discontinue service, such service will be reestablished only upon the basis of a new service application.

(T)

(T)

b. When service is restored after temporary denial, the Company will make a pro rata allowance at the rates for the specific service denied for the entire period of denial, except that in cases where service is restored on or before the day following denial, no allowance will be made.

(T)

c. Abuse or fraudulent use includes, but is not limited to:

- The use of the service in such a manner as to interfere with the service of others or to prevent others from making or receiving calls over their telephone service;
- The use of the service for any purpose other than as a means of communication;
- Any attempt or assisting another to attempt, to obtain service through any fraudulent means or device whatsoever with intent to avoid the payment, in whole or part of the regular charge for such service;
- The service furnished under this Tariff shall not be used for any purpose or in any manner directly or indirectly in violation of the law or in aid of any unlawful act or undertaking.

5. Special Services

a. Special Service Arrangements

- The rates and charges quoted in this Tariff contemplate the use of equipment and apparatus of a type and arrangement, which are considered standard by the Company. (T)
- Special equipment is:
 - Equipment of a type not considered standard by the Company; (T)
 - An arrangement of standard equipment not considered standard by the Company; (T)
 - An assemblage of standard equipment not considered standard by the Company; (T)
 - Any combination thereof;
 - A modification of standard equipment, either by way of an additional or supplemental item, device, or feature, or by way of an omission of an item, device, or feature, or by way of a modification which does not involve either an addition, a supplement or an omission; or
 - The use of equipment, otherwise standard, for a purpose for which such equipment is not considered standard by the Company; and for which specific rates or charges are not set forth in the Tariffs of the Company, furnished in connection with communication service or equipment supplied to a customer under the provisions set forth in Company Tariffs, because of the peculiar circumstances of the operations, location, or desires of such customer. (T)

For the purposes of this definition, "equipment" includes circuits, channels and other facilities. (T)

/1/

Original Sheet No. 36

4. DIGITAL SWITCHED NETWORK SERVICES (cont'd)

/1/

B. General Regulations (cont'd)

5. Special Services (cont'd)

a. Special Service Arrangements (cont'd)

- Special equipment or service arrangements requested by a customer will be furnished wherever possible, if the furnishing of such special equipment or service arrangements is not detrimental to any of the services or equipment of the Company and is not in conflict with prohibitions, limitations or restrictions set forth in Company Tariffs. Such special equipment or service arrangements will be furnished by the Company at rates or charges based upon costs incurred.

(T)

(T)

(T)

- Where such special equipment or service arrangement consists of a modification of standard equipment or the use of equipment, otherwise standard, for a purpose for which such equipment is not considered standard by the Company, rates or charges based upon costs incurred may be determined by adding to the rates or charges applicable to said standard equipment the costs incurred in modifying, or adapting for special use, said standard equipment.

(T)

b. Overtime

The service connection, installation and nonrecurring charges specified in this Tariff contemplate work being performed by the Company during the usual working hours on normal working days. When, at the specific request of a customer or applicant for service, work is performed at other times, either for the convenience of the customer or applicant for service or for other reasons not under the control of the Company, the expense incurred by the Company in excess of the normal expense of such work, when performed during usual working hours on normal working days, shall be billed to the customer or applicant for service, in addition to the charges otherwise applicable.

4. DIGITAL SWITCHED NETWORK SERVICES (cont'd)

/1/

B. General Regulations (cont'd)

6. Payment For Service

a. Customer Responsibility

The customer is required to pay all charges for service and facilities in accordance with the Company's billing and collection practices. The customer will be held responsible for all charges for DSN Services and for all charges for telephone service rendered in connection with local or toll messages placed from his station.

(T)

b. Thirty Day Month

For the purpose of computing charges for facilities and service, and allowances for interruptions in service, every month shall be considered to have thirty days.

c. Advance Payments and Deposits

(1) Advance Payments

The Company reserves the right to require applicants to make such advance payments as may be necessary for the protection of the Company's exchange and toll service revenues. The amount of the advance payment is credited to the customer's account as applying to any indebtedness under the contract.

(T)

(T)

(2) Deposits

The Company may, in order to safeguard its interests, require an applicant or a customer to make suitable deposits to be held by the Company as a guarantee of the payment of telephone service charges. Deposits for residential service shall be in accordance with Rule 4901:1-17 of the Code of Rules and Regulations of the Public Utilities Commission of Ohio. A copy of said Rule will be made available for inspection upon request.

(T)

c. Advance Payments and Deposits (cont'd)

(2) Deposits (cont'd)

The fact that a deposit has been made in no way relieves the applicant or customer from complying with the Company's regulations as to advance payments and the prompt payment of bills. At such time as the service is terminated, such amount of the deposit as is necessary will be applied to any indebtedness to the Company for telephone service charges. At the option of the Company, such a deposit may be refunded or credited to the customer's account at any time prior to termination of the contract. In case of a cash deposit, simple interest at the rate of six percent per annum will be paid for the period during which the deposit is held by the Company.

(T)

(T)

(T)

(T)

7. Responsibility of the Customer

a. The customer shall be responsible for:

- Damages to facilities of the Company caused by the negligence or willful act of the customer or authorized user;
- Reimbursing the Company for any loss through theft of the equipment or apparatus on the customer's or authorized user's premises;
- The provision of the power required to operate Company facilities installed on the premises of the customer or authorized user;
- The provision, installation and maintenance of sealed conduit with explosive-proof fittings between equipment furnished by the Company in explosive atmospheres and points outside the hazardous area where connection may be made with regular facilities of the Company, and may be required to install and maintain Company equipment within the hazardous area if, in the opinion of the Company, injury or damage to Company employees or property might result from installation or maintenance by the Company;

7. Responsibility of the Customer (cont'd)

a. The customer shall be responsible for: (cont'd)

- Obtaining permission for Company agents or employees to enter the premises of the customer or authorized user at any reasonable hour for the purpose of installing, inspecting, repairing or, upon termination of the service, removing the facilities of the Company, and for;
- Making Company facilities available periodically for maintenance purposes at a time agreeable to both the Company and the customer. No allowance will be made for the period during which the service is interrupted for such purposes.

- b. Where DSN Service is available under this Tariff for use in connection with customer-provided equipment or authorized user equipment, the operating characteristics of such equipment or systems shall be such as not to interfere with any of the services offered by the Company. Such use is subject to Part 68 of the Federal Communications Commission's Rules and Regulations and Part 2, Section 9 of this Tariff and the further provisions that the equipment provided by a customer or authorized user does not endanger the safety of Company employees or the public; damage, require change in or alteration of the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of the Company's facilities or otherwise injure the public in its use of the Company services. Upon notice from the Company that the equipment provided by a customer or authorized user is causing or is likely to cause such hazard or interference, the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.** (T)

Where a customer connects a customer-provided communications system to a DSN Service the customer shall be responsible for:

- Compatibility of the connected communications system; and the
- Testing and sectionalization and clearance of trouble conditions or service difficulties on any communications system which is connected to a DSN Service.

7. Responsibility of the Customer (cont'd)

- c. The service or any rights associated therewith may not be assigned or in any manner transferred, except as specified in the regulations for Assignment or Transfer of Services in Part 15, Section 1 of this Tariff.

8. Responsibility of the Company

(T)

- a. The Company shall not be responsible for installation, operation or maintenance of any customer-provided equipment or communications systems provided by a customer or authorized user. DSN Service is not represented as adapted to the use of such equipment or system and where such equipment or system is connected to Company facilities, the responsibility of the Company shall be limited to the furnishing of facilities suitable for DSN Service and to the maintenance and operation of such facilities in a manner proper for such digital service. Subject to this responsibility the Company shall not be responsible for (1) the through transmission of signals generated by such equipment or system, or for the quality of, or defects in, such transmission or (2) the reception of signals by such equipment or systems. (T)
- b. The Company shall not be responsible to the customer or authorized user, if changes in any of the facilities, operations or procedures of the Company utilized in the provision of DSN Service render any facilities provided by a customer or authorized user obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance. (T)
- c. The Company undertakes to maintain and repair the facilities which it furnishes on the network side of the network interface. The customer or authorized user may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company on the network side of the network interface without prior written consent of the Company. B. General Regulations (cont'd)

9. Violation of Regulations

Where any customer-provided equipment or communications system provided by a customer or authorized user is used with services furnished by the Company and any rules and regulations as set forth in this Tariff are violated, the Company will take such immediate action as necessary for the protection of its facilities, and will promptly notify the customer of the violation. The customer shall take such steps as are necessary to discontinue such use of the equipment or system or correct the violation and shall confirm in writing to the Company within 10 days, following the receipt of written notice from the Company, that such use has ceased or that the violation has been corrected. Failure to discontinue such use or to correct the violation and to give the required written confirmation to the Company within the time stated above shall result in suspension of the customer's service until such time as there is compliance with the provisions of this Tariff.

(T)

(T)

(T)

10. Undertaking of the Company

(T)

a. Limitations

The restoration of service shall be in accordance with Part 64, Subpart D, Appendix A of the Federal Communications Commission's Rules and Regulations, which specifies the priority system for such activities. Subject to compliance with such Rules and Regulations, in case a shortage of facilities exists, either for temporary or protracted periods, the provision of exchange and message toll telephone services shall take precedence over all other services.

b. Liability

- The Company's liability, if any, for its willful misconduct is not limited by this Tariff. With respect to any other claim or suit, by a customer, or by any others, for damages associated with the installation, provision, termination, maintenance, repair or restoration of service, and subject to the provisions of (2) through (4) following, the Company's liability, if any, shall not exceed an amount equal to the proportionate charge for the service for the period during which the service was affected. This liability for damages shall be in addition to any amounts that may otherwise be due the customer under this Tariff as a Credit Allowance for a Service Interruption.

B. General Regulations (cont'd)

10. Undertaking of the Company (cont'd)

(T)

b. Liability (cont'd)

Approval of the above tariff language by the PUCO does not constitute a determination by the Commission that the limitation of liability made a condition of service by the Company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate damage claims, it is also the court's responsibility to determine the validity of the limitation clause.

- The Company shall be indemnified and saved harmless by the customer or authorized user against:

(T)

- claims for libel, slander and infringement or copyright arising from the material transmitted over the facilities;

- Claims for infringement of patents arising from combining with, or using in connection with, facilities furnished by the Company, apparatus and systems of the customer or authorized user; and

(T)

- All other claims arising out of any act or omission of the customer or authorized user in connection with the facilities provided by the Company.

(T)

- The Company does not guarantee nor make any warranty with respect to equipment provided by it for use in an explosive atmosphere. The customer or authorized user indemnifies and holds the Company harmless from any and all loss, claims, demands, suits, or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or authorized user or by any other party or persons, for any personal injury to or death of any person or persons, and for any loss, damage or destruction of any property, whether owned by the customer or others, caused or claimed to have been caused directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence condition, location or use of said equipment so provided.

(T)

(T)

The Company may require each customer or authorized user to sign an agreement for the furnishing of such equipment as a condition precedent to the furnishing of such equipment.

(T)

b. Liability (cont'd)

- The Company is not liable for any defacement of or damage to the premises of a customer or authorized user resulting from the furnishing of channel facilities or the attachment of the instruments, apparatus and associated wiring furnished by the Company on such premises or by the installation or removal thereof, when such defacement or damage is not the result of negligence of the agents or employees of the Company.

(T)

(T)

(T)

c. Application of Construction Charges

All rates and charges set forth in this Tariff provide for the furnishing of service where suitable facilities are available. Where construction is required in connection with services to be furnished by the Company, the regulations and charges set forth in Part 2, Section 5 of this Tariff will apply, except as specifically provided for in this Tariff.

(T)

11. Initial Contract Periods

a. The initial contract period applicable to each DSN Service is one month.

- b. When facilities are terminated by the customer, or by the Company for any reason for which it may terminate such items under the provisions of this Tariff, prior to the expiration of the initial contract period, the termination charges will be the charges due for the unexpired portion of such initial contract period.

(T)

12. Application of Service and Equipment (S&E) Charges to Establish and to Change Service

a. S&E charge is a nonrecurring charge that applies to service and equipment provided by the Company.

(T)

- b. The application of S&E charges to establish or change Digital Switched Network Services is covered in 12. following.

PART 20 - Grandfathered Services
SECTION 6 - Central Office Services

Original Sheet No. 45

5. PREMIERE 2/6 COMMUNICATIONS SYSTEM^{/1/}

/2/ (T)

A. DESCRIPTION

PREMIERE 2/6 COMMUNICATIONS SYSTEM is an optional service arrangement of Electronic Switching System (ESS) and Data Management System (DMS) central office features which enables an individual exchange access customer served by the same central office to combine up to six exchange access lines into a group.

B. REGULATIONS

1. PREMIERE 2/6 comes equipped with Touch-Tone Service, however, one twelve button tone-type telephone set, equipped with* and # is required for each access line to access the features.
2. PREMIERE 2/6 will be offered only to those customers served by an ESS or DMS central office arranged to provide such service. All exchange access lines must be served by the same switching equipment in the serving central office.
3. PREMIERE 2/6 is not available on FX Service, Remote Switching Service, WATS access lines, PBX, Centrex or Party Line Service.
4. Exchange access lines in a PREMIERE 2/6 System may be terminated at different customer locations.
5. Custom Calling Services as covered in Part 7, Section 1, of this Tariff will not be provided with PREMIERE 2/6.
6. Residence and non-residence exchange access, with the same grade of service, may be combined in the PREMIERE 2/6 System.

C. DEFINITIONS

1. Standard Features

Touch-Tone Calling Service

The PREMIERE 2/6 System is arranged for tone-type operation.

/1/ Effective January 23, 2005, new installations of PREMIERE 2/6 will no longer be made. Existing customers may retain this service until they disconnect their service for any reason at their current location.

/2/ Material formerly appeared on Original Sheet 29 in this Section.

SECTION 6 - Central Office Services

Original Sheet No. 46

5. PREMIERE 2/6 COMMUNICATIONS SYSTEM^B (cont'd)

/1/(T)

C. DEFINITIONS (cont'd)

1. Standard Features (cont'd)

Call Hold

Exchange access or intercom calls can be placed on hold by flashing the switchhook and dialing a code. This frees the line allowing the station user to originate another call or use the call pickup feature.

Call Pickup

Allows a station user to answer any call directed to another station line in the system by dialing a special access code.

Conferencing

Allows a station user to add a third line to an existing call. By flashing the switchhook, the station user places the first call in consultation hold. The third party can then be dialed and added to the call by a subsequent switchhook flash from the conference originator.

Intercom

The PREMIERE 2/6 intercom provides up to six single digit codes. Each intercom code is associated with one of the exchange access lines on a fixed basis. To access the intercom, the user dials an access code followed by the intercom code. Multiple stations (i.e., extensions) on the same PREMIERE exchange access line must share the same intercom access code.

Transfer

An established call can be transferred to another line within or outside the PREMIERE System, provided that one line on the final connection is within the PREMIERE System.

2. Optional Features

Line Optional features can be selected on an individual or feature package basis, i.e., individual feature per line or, packaged individual features per line:

Line Features

Call Waiting - An audible tone alerts the station user on an existing call that another call is waiting. When used with multiline hunt group or alternate answering, only the last line in the call routing sequence will be so equipped.

/1/

5. PREMIERE 2/6 COMMUNICATIONS SYSTEM® (cont'd)

C. Definitions (cont'd)

2. Optional Features (cont'd)

Line Features (cont'd)

Call Forwarding - Incoming calls to an exchange access line can be automatically forwarded to another line within or outside the Premiere 2/6 System. Call forwarding is activated and deactivated via an access code.

Alternate Answering - This feature automatically transfers calls to an exchange access line to another pre-designated line. The alternate line may be within or outside of the Premiere System. If the alternate line is outside the system, it must be served by the same central office as the entire PREMIERE 2/6 System. When this feature is selected, calls will be transferred to the alternate line whenever a busy condition is encountered and/or after a preselected number of rings on an incoming call to the equipped line. Changes to this feature must be requested from the Company. This optional feature is not compatible with multiline hunt service. (T)

Convenience Dialing - By dialing an access code followed by two digits, station users can access up to 30 frequently called or emergency numbers. Multiple lines can share the same convenience dialing list. One customer specified exchange access line controls the programming of the 30 number convenience list.

800 Bridge - allows an 800 number to terminate on a Premiere line.

System Features

Deluxe Call Transfer - allows the station user to transfer any established call to another line, within or outside the system.

Distinctive Ringing - provides a unique ringing pattern giving a station user the ability to distinguish between an incoming call from outside the Premiere System and an intercom call within the system.

2. INTERCOM CALLING

A. Description

Intercom Calling is an intercommunication service that provides an exchange service with multiple station sets, associated with the same directory telephone number, with the ability to function as an intercommunication system and provides Three-way Calling as defined in Part 7, Section 1 of this tariff.

B. Regulations

1. Intercom Calling service will be provided in connection with non-complex residence and non-residence exchange service, excluding semi-public telephone service.
2. Intercom Calling service is offered from central offices arranged for Intercom Calling service and is furnished subject to the availability of facilities.
3. Customers who subscribe to Intercom Calling service and currently have Three-way Calling will be billed the Intercom Calling rate in lieu of the Three-way Calling rate.

C. Feature Capabilities

1. Intercom Code Dialing - Permits the customer to depress the switch hook, dial an access code (* plus two digits), go on hook, and then have all of the telephones ring with a distinctive ring.
2. Selective Intercom Dialing - Provides access codes for up to three different ringing patterns. With this feature, the customer may depress the switch hook, dial a particular access code that has been identified with a particular location, go on hook, and all extensions would ring with that particular distinctive ring.

2. INTERCOM CALLING^{/1/} (cont'd)

(T)

C. Feature Capabilities (cont'd)

3. Selective Call Transfer - Permits the transfer of calls between extensions. The customer can answer an incoming call on one extension, depress the switch hook, dial an access code for one of the three different patterns, and go on hook. All extensions on the exchange service would then ring with the appropriate ringing pattern corresponding to the dialed code. Anyone going off hook from those extensions would be connected to the call automatically.
4. Dialable Call Hold - Permits the customer to place a non-intercom call (i.e., incoming call) on hold by depressing the switch hook, dialing an access code and going on hook. The call will then remain on hold until any telephone is taken off hook or the calling party goes on hook. During this hold, any telephone going off hook is connected to the call.

D. Rates and Charges

The following rates and charges are in addition to all other applicable rates and charges for the facilities and service furnished:

Description	Monthly Price	(T)
1. Intercom Calling feature, per line	\$5.00	(R)

/1/ Effective April 16, 1993, no further installations of, or changes to Intercom Calling will be made. Intercom Calling in service on April 16, 1993 will be continued in service only for as long as such service remains at the location at which it is being furnished on the aforementioned date, and so long as the facilities are available.

C. Terms and Conditions

1. In order to receive the 2-Line uSelect3 price, a customer must have two or more access lines. Only one 2-Line uSelect3 discount is allowed on a customer's account. If the customer disconnects their additional access lines, the customer will be charged the uSelect3 price.
2. uSelect3 can be ordered on either the customer's main/primary or an additional access line. The customer will be charged the 2-Line uSelect3 price if they purchase uSelect3 on the main line and purchase one or more additional lines.
3. Existing residence customers who currently subscribe to all component services in uSelect3 may request billing at the package price.
4. The component services of uSelect3 and 2-Line uSelect3 are provided on a per line basis.
5. uSelect3 subscribers will benefit from the uSelect3 or 2-Line uSelect3 price until they disconnect their service. When the customer disconnects any component services of uSelect3, the remaining services will be billed at their individual standard tariff rates.
6. Discounted monthly rates for any other combinations of the services provided in these packages on the same line, as specified elsewhere in this tariff, do not apply to uSelect3 or 2-Line uSelect3.
7. A nonrecurring charge will apply to the installation of the uSelect3 or 2-Line uSelect3 package the first time a new or existing customer subscribes to the package. The nonrecurring charge will not apply if the customer subsequently changes or adds features within the selection list as long as the customer maintains the uSelect3 or 2-Line uSelect3 package on the same line. Nonrecurring installation charges will apply to the installation of the Access Lines.
8. uSelect3 and 2-Line uSelect3 are available to any residence customer where Caller ID with Name and at least two Selection List services are available. The component services may also be purchased individually at their standard tariff rates.
9. These packages may be included in other packages or bundles that are marketed under other names.

2. AUTOMATIC METER READING (AMR) SERVICE

Effective January 15, 1998, new installations of Automatic Meter Reading (AMR) service will no longer be made. Existing systems may be retained under contract terms and conditions through their expiration.

A. General

1. Automatic Meter Reading (AMR) Service provides for the remote reading of metering equipment located on a patron's premises by a Utility Company (customer) or other entity providing gas, water or electric utility services.
2. AMR service consists of Company central office equipment and facilities which provide a transmission path via the patron's exchange service between the customer's computer terminal, which contains a data base to track and store the meter readings, and a meter interface unit located on its patron's premises. (T)
3. AMR service provides the customer access to a patron's exchange service without ringing or interfering with the patron's use of the exchange service.
4. The AMR central office common equipment consists of a Controller, which directs the AMR intra-office connecting facility to provide access to the patron's exchange service; an intra-office connecting facility, which allows use of the patron's exchange service for the transport of meter reading data between the customer's data collection device and the AMR central office common equipment.

A Meter Interface Unit (MIU), which is provided by the customer in accordance with Part 68 of the Federal Communications Commission rules and regulations and which is technically compatible with the Company provided Central Office Controller and facilities, is located on the patron's premises. The MIU connects the patron's basic exchange service to the Utility meter. (T)

5. AMR service is activated by the customer's call to the Controller telephone number. After an exchange of security checks between the Controller and the customer's data collection device, a transmission path is established and the meter reading process may begin.

B. Regulations

1. AMR is available where facilities and conditions permit.
2. AMR may be provided in connection with all classes and grades of basic exchange service. Utility patrons must have basic exchange service.
3. AMR central office common equipment is required in each Company central office for each customer requesting AMR service. (T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

2. AUTOMATIC METER READING (AMR) SERVICE (cont'd)

B. Regulations (cont'd)

4. The Company shall not be liable for any errors or omissions, whether arising through negligence or otherwise, in the meter reading data furnished; and the customer and its patrons shall indemnify, defend and save the Company harmless against all claims, including costs and reasonable attorney's fees, that may arise from the use of such meter reading equipment or data. (T)

Approval of the above tariff language by the PUCO does not constitute a determination by the Commission that the limitation of liability made a condition of service by the Company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate damage claims, it is also the court's responsibility to determine the validity of the limitation clause.

5. The Company shall have no liability to the customer for its patron's exchange access line outages. (T)
6. It is the responsibility of the customer to obtain its patron's telephone numbers and consent of the patron for the use of their exchange access lines. Furthermore, the customer has the sole responsibility to install and maintain any required terminal equipment on their premises and their patron's premises.
7. Nothing contained in this tariff shall be construed as establishing any agency agreement or partnership between the Company and the customer. The customer shall be responsible for obtaining all licenses, permits and authorizations required by an authority and will comply with all codes, equipment or services employed by it in providing AMR. (T)
8. Calls completed between the customer and the AMR central office common equipment via the customer's basic exchange line will be billed at the appropriate local or toll rates specified in Part 4, Section 2 and Part 9, Section 1 of this tariff.
9. A Maintenance of Service Charge will be billed to the customer for each repair visit to the patron's premises in connection with a service difficulty when it is determined that the difficulty is due to the meter reading terminal equipment. In those cases where the meter reading terminal equipment is utilized by multiple customers, one of the customers will be designated as responsible for such equipment.
10. The customer must obtain written consent from its patrons to permit each AMR connection; and at the discretion of the Company the customer must provide proof of such written consent. (T)

Original Sheet 10

1. NETWORK SWITCH ALTERNATE ROUTING (NSAR)

/1/(T)

A. Description

Network Switch Alternate Routing (NSAR) is an Advanced Intelligent Network (AIN) based service that allows the customer to safeguard against the loss of incoming calls resulting from the complete failure of the customer's serving central office switch.

(T)

NSAR allows the customer to develop and maintain a contingency plan that can be activated at their command to reroute incoming calls around their failed central office switch and back to their location or an alternate location.

(T)

NSAR allows the customer the ability to develop and test solutions to potential problems before they occur.

(T)

NSAR supports up to ten alternate routing plans with a maximum of 10,000 telephone numbers.

(T)

NSAR operates across the public network or private facilities.

(T)

The customer may activate NSAR 24 hours a day, seven days a week in coordination with the Company.

(T)

Upon local central office recovery, conditions permitting, the Company will deactivate network controls in coordination with the customer.

(T)

An NSAR plan is subject to review by the Company in order to determine effects on network capability, capacity and control.

(T)

All telecommunications service required for rerouting must be in place or subscribed to at the same time as NSAR and will be reviewed by the Company.

(T)

NSAR allows the customer to exercise their back-up facilities during normal conditions.

Original Sheet 11

1. NETWORK SWITCH ALTERNATE ROUTING (NSAR) (cont'd)

/1/(T)

B. Terms and Conditions

1. NSAR service is available where central office facilities and equipment permit. (T)
2. The NSAR customer is responsible for the payment of any applicable station-to-station charges for each call between the central office where the NSAR protected numbers reside and the telephone to which the call is being rerouted. (T)
3. Upon request of the customer, the Company will coordinate an out-of-hours test of the customer's alternate routing plan which will be subject to a charge as found in the Price List. (T)
4. NSAR is available to Centrex, ISDN, PBX and basic exchange business line customers where facilities permit. (T)
5. Due to network capacity and capability limitations during a long central office outage, some blocking of calls in the network may occur, and therefore, all incoming calls may not be rerouted and terminated to the alternate site. In all cases, the first priority will be to stabilize the public network, to provide telephone service to emergency service providers; e.g., Telephone Service Priority (TSP), 911, hospitals, police and fire agencies, etc.
6. Customer requested changes to an existing NSAR plan are subject to a charge as found in the Price List. (T)
7. The services and facilities furnished by the Company are subject to the terms, conditions and limitations specified herein. With respect to a claim or suit by a customer or by any others, for damages associated with the installation, provision, termination, maintenance, repair or restoration of service, the Company's liability, if any, shall not exceed an amount equal to the proportionate charge for the service for the period during which the service was affected. C. Features

1. Standard Features

Customer Access

NSAR provides two customer interface options: Internet Access and Touch Tone Access.

(T)

NSAR with Internet Access provides direct access to the Service Management System. Under this method, the customer's service administrator may define an entire contingency plan, change the "forward-to" destination for protected telephone numbers, activate or deactivate a contingency plan, modify an existing plan and retrieve information about existing plans.

(T)

NSAR with Touch Tone Access provides the customer's service administrator the ability to activate or deactivate a contingency plan.

PART 20 – SECTION 9

EXHIBIT A

1. OPTIONAL OFF-PEAK TOLL SERVICE

Note: Effective March 11, 1993, no further installation of, or changes to Optional Off-Peak Toll service will be made. Optional Off-Peak Toll service in service on March 11, 1993, will be continued in service only for as long as such service remains at the location at which service was being furnished on the aforementioned date. Optional Off-Peak Toll service will be withdrawn on November 1, 1998, or earlier in the event that the in-service count declines to zero.

A. Regulations

1. Off-peak toll service is an optional offering involving one-way customer-dialed only calling to exchange areas within the State of Ohio that are not over 22 airline miles (defined in Part 9, Section 1 of this tariff) from the exchange area in which the customer is located.
2. Off-peak toll service is provided subject to the availability of message toll telephone service facilities. In case a shortage of facilities exists, the provision of message toll telephone service shall take precedence over this service.
3. Off-peak toll service is provided for all residence customers and on all lines and trunks for non-residence customers.
4. Off-Peak toll service will be offered in an exchange area at the option of the serving Company, or upon application to such company of 5% or 100 customers in that exchange area, in any of the following mileage bands to be designated by the serving Company: 10, 16 or 22 airline miles. (T)

The Company will only offer a single service covering 0-22 miles but other concurring telephone companies may elect shorter distances. (T)
5. Off-peak toll service is available from 3:00 PM on any week day to 9:00 AM the following week day, from 3:00 PM on Friday to 9:00 AM the following Monday and on Holidays as defined in Part 9, Section 1 of this tariff.
6. Off-peak toll service will not be furnished with foreign central office or foreign exchange services set forth in Part 4, Section 3 of this tariff.

SECTION 9 - Message Toll Services

2nd Revised Sheet 7
Cancels 1st Revised Sheet 7

1. OPTIONAL OFF-PEAK TOLL SERVICE (cont'd)

B. Rates

1. Monthly rates for off-peak toll service are based on distance and are determined on a per line basis for the first hour and each additional fifteen minutes of use. Unless otherwise requested by the customer, where off-peak toll is furnished on two or more services of the same class, grade and type on a given premises, the initial time period will be the product of one hour multiplied by the number of services; the additional period will be the sum of the accumulated measured times of such services in excess of that product.
2. Each message will be counted as at least one minute in duration.
3. Rates for off-peak toll service are as follows:

Option	Miles	First Hour	Each Additional 15 Minutes
		or Fraction Thereof	or Fraction Thereof
1	0 - 10	\$3.15	\$.75 (C)
2	0 - 16	3.75	.90
3	0 - 22	4.15	1.05 (C)

Note: The Company will only offer a single service covering 0-22 miles but other concurring telephone companies may elect shorter distances in various exchange areas.

(T)

4. When off-peak is ordered on an existing service, the change charge set forth in Part 3, Section 1 of this tariff or the appropriate concurring telephone company's tariff will apply.
5. A minimum service period of one month is applicable and applies only to toll messages after the service is instituted. In no case will it apply to toll messages made before ordering the service.
 - a. The minimum service period of one month begins the day following completion of establishment of the service.
 - b. The minimum charge applicable in event a customer terminates off-peak toll service prior to one month is the charge for the first hour.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

2. AMERITECH VALUE CALLING PLAN

Note: Effective April 1, 1995, no further installation of, or changes to Ameritech Value Calling Plan (AVCP) will be made. Ameritech Value Calling Plan in service on April 1, 1995, will be continued in service until contract expiration date.

A. General

Ameritech Value Calling Plan (AVCP) is an optional service which provides a per minute rate in lieu of the rates which are normally applicable to Message Toll Telephone Service. AVCP is available for calls originating from the exchange areas designated below:

(T) /2/

The Ohio Bell Telephone Company

- All exchange areas as set forth in Part 4, Section 1 of this tariff.

Other Telephone Companies

- The Western Reserve Telephone Company
- The Vanlue Telephone Company

(T) /2/

B. Regulations

In addition to the regulations set forth in other sections of this tariff, the following regulations apply to this service.

1. AVCP rates apply only to customer-dialed station-to-station calls.
2. The AVCP rate is available 24 hours a day, seven days a week.
3. AVCP is offered on a 12 and 36 month payment plan.

/3/

/1/ Also cancels Original Pricing List Sheet No. 8 in this Section.

/2/ Material formerly appeared on Original Pricing List Sheet No. 8 in this Section.

/3/ Material now appears on Original Sheet No. 8.1 in this Section.

By J. F. Woods, President, Cleveland, Ohio

2. AMERITECH VALUE CALLING PLAN (cont'd)

/1/

B. Regulations (cont'd)

4. A fixed monthly usage package rate as set forth in C. following applies to AVCP in addition to the per minute rate. Four different monthly usage package plans are available. The monthly usage package plans are different levels of minimum monthly usage among which customers may choose. This monthly usage package rate is in addition to the rates and charges for the associated local exchange service. The monthly usage package rate selected by the customer will be the minimum monthly usage charge for the service at the payment plan selected by the customer. The monthly usage package rate will be applied as a credit to the total customer-dialed station-to-station charges per month. (T)
5. Customers who terminate their 12 and 36 month payment plan prior to the expiration of the term of the plan selected will be required to pay the monthly usage package rate for the number of months remaining in the term of the plan selected.
6. At the completion of the 12 and 36 month payment plan, the rates for Schedule A or B will apply, as applicable.
7. Customers may upgrade to a higher usage package as long as the term of the new usage package is equal to or longer than the current plan.
8. Customers may downgrade to a lower usage package as long as the term of the new usage package is equal to or longer than the current plan. /1/

2. AMERITECH VALUE CALLING PLAN (cont'd)

C. Rates and Charges

1. The AVCP monthly rate, per account, per usage package and per minute rates are those set forth in paragraph 6. below. (T)
2. The monthly usage package rate is a minimum usage requirement per month, per account. When the minimum monthly usage requirement is met, it will be applied as a credit to the total AVCP usage charges.
3. If the total AVCP usage charges are below the monthly usage package rate in any given month, the full amount of the applicable monthly usage package rate will apply.
4. An S&E charge as set forth in Part 3, Section 1 of this tariff applies to change to or from AVCP.
5. AVCP contract rates will not increase if an increase in message toll service rates occur during the contract period.
6. Ameritech Value Calling Plan (C)

Usage Package Plans	Monthly Rate	Contract Period Per Minute Rate	
		12 Month	36 Month
Plan 1	\$ 50.00	\$.14	\$.13
Plan 2	135.00	.13	.12
Plan 3	250.00	.12	.11

3. VALUELINK PREMIER

(T)

Effective December 19, 1997, no further installations of, or changes to ValueLink Premier will be made. Customers on a Term Payment Plan longer than month-to-month on December 19, 1997, may continue their service until the contract expiration date, as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that ValueLink Premier is discontinued at its present location for any reason, it will not be reestablished.

(T)

(T)

A. Description

ValueLink Premier is a discounted outbound intraLATA Toll usage plan. The ValueLink Premier usage and term commitment structure allows customers to receive reduced per minute rates. ValueLink Premier is available for calls originating from the exchange areas designated below:

(T)

(T)

All AT&T-Ohio exchange areas as set forth Part 4, Section 1 of this tariff.

(T)

B. Terms and Conditions

In addition to the regulations set forth in other portions of this tariff, the following terms and conditions apply to this service.

1. ValueLink Premier rates apply to customer-dialed station-to-station intraLATA long distance calls. ValueLink Premier cannot be combined with any other message telecommunications usage calling plan. ValueLink Premier is available on Centrex switching systems.
2. Centrex switching systems require Virtual Routing for the provisioning of ValueLink Premier.
3. ValueLink Premier is available on a month-month, 12-, 24- or 36-month term plan.

(T)

(T)

(T)

(T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

3. VALUELINK PREMIER (cont'd) (T)

B. Terms and Conditions (cont'd)

4. ValueLink Premier provides the following features: (T)
- a. Price Protection which guarantees no price increases for the duration of the 12-, 24-, or 36-month term plan. Price Protection is not provided for the month-month plan
 - b. Contract Upgrade which allows the customer to upgrade to longer term and/or larger volumes at lower prices.
5. ValueLink Premier offers a variety of monthly usage package options. These usage package options represent different levels of Minimum Monthly Usage Commitment (MMUC) or Minimum Annual Usage Commitment (MAUC), per account, among which customers may choose. The monthly usage package option selected by the customer will be the minimum monthly usage charge for the service at the payment plan selected by the customer. (T)
6. The ValueLink Premier MMUC and MAUC, per account, per usage package option, and per minute rates are those set forth in C. following. (T)
7. ValueLink Premier usage is billed in initial 18 second or fraction thereof and each additional 6 second or fraction thereof increments. (T)

3. VALUELINK PREMIER (cont'd) (T)

C. Prices (cont'd)

2. Payment Plans:

ValueLink Premier is available on a month-month, 12-, 24- or 36-month term plan. (T)

a. Month-to-Month:

The month-month term plan requires a Minimum Monthly Usage Commitment (MMUC). The MMUC is a minimum usage level that a customer must commit to per month, per account, in order to receive the discounted per minute rate. If the total ValueLink Premier usage charges are below the MMUC in any given month, the full amount of the applicable MMUC will apply in lieu of the actual usage charges. (T)

b. Term Payment Plans:

The 12-, 24- and 36-month term plans require Minimum Annual Usage Commitments (MAUC).

The MAUC is a minimum usage level that a customer must commit to per year, per account, in order to receive the discounted per minute rate. If the total ValueLink Premier usage charges are below the MAUC in any given year, then the remaining balance of the MAUC will apply. (T)

c. Termination Charges:

Customers who terminate their 12-, 24- or 36-month plans before the expiration date of the contract will be billed a termination liability which consists of a lump sum equal to the MAUC rate times the number of years or fraction thereof, remaining on the contract. Commission approval of the above termination liability language is not intended to indicate that the Commission has sanctioned any particular legal result should a dispute arise between the parties. In the event of dispute signatories to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

d. At the expiration of the selected ValueLink Premier term, if the customer does not expressly indicate election of a new term, rates will revert to the highest Month-Month per minute rate. (T)

4. AREA WIDE CALLING (cont'd) (T)

B. Terms and Conditions

8. Area Wide Calling is time-of-day insensitive. (T)
9. A monthly rate is applicable to provide Area Wide Calling per line, includes thirty (30) minutes, or fraction thereof, of usage and is in addition to all other rates and charges; except that when a residence customer has more than one residence line and such lines are billed as one account (consolidated billing), only one monthly rate and allowance are applicable. (T)
10. The thirty minute usage allowance provided under the Area Wide Calling monthly rate must be used in the current month. Any unused portion of the allowance will not be credited to the customer's account and may not be carried over. (T)
11. Usage in excess of the thirty (30) minute allowance will be billed at Schedule B Residence rates as set forth in Section 1 of this Part less a 30% discount.

C. Prices

The Area Wide Calling monthly rate includes thirty (30) minutes (or fraction thereof) of Area Wide Calling usage. (T)

6. PEAK/OFF-PEAK PLAN^{/1/}

A. Description

The Peak/Off-Peak Plan is an optional calling plan that provides residence customers with a simplified intraLATA message toll pricing option. The Peak/Off-Peak Plan consists of a fixed rate per minute with Peak and Off-Peak discount periods. The fixed per minute rate is not distance sensitive.

B. Terms and Conditions

The terms and conditions contained herein are specific to the service and are in addition to the regulations set forth in other portions of this tariff.

1. The Peak/Off-Peak Plan is available to residence customers.
2. The Peak/Off-Peak Plan is not available on ISDN lines.
3. The Peak/Off-Peak Plan is applicable to customer dialed station-to-station calls only. Operator handled and customer dialed credit card calls are not included.
4. The Peak/Off-Peak Plan is available statewide, however it is applicable only to intraLATA toll calls within the customer's home LATA.
5. The Peak/Off-Peak Plan cannot be combined with any other optional calling plan on the same line.
6. The Peak/Off-Peak Plan is only available to customers of AT&T Ohio's residence local exchange service. (T)
7. No Service Charges are applicable to establish or change to the Peak/Off-Peak Plan.

^{/1/} Effective August 1, 2004, no further installation of, or changes to the Peak/Off-Peak Plan will be made. Peak/Off-Peak service in service on August 1, 2004 will be continued in service only for as long as such service remains at the location at which service is being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be re-established.

PART 20 – SECTION 10

EXHIBIT A

1. WIDE AREA TELECOMMUNICATIONS SERVICE

Effective November 11, 1996, no further installations, moves, rearrangements, or changes of any type to Wide Area Telecommunications Service (WATS) will be made. Customers of record on November 11, 1996 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished. The preceding supersedes all of the rules and regulations that follow. Effective January 31, 2007, Wide Area Telecommunications Service will be withdrawn in its entirety.

A. Regulations

1. The following general regulations are applicable to Wide Area Telecommunications Service (WATS). In addition, where reference is made in this tariff to regulations, rates and charges specified in Tariffs of the Company, such Tariffs as they now exist, or as they may be revised, added to or supplemented, are hereby adopted and made a part of this Tariff. (T)

2. Definition

- a. WATS includes two types of service as set forth below: (All 800 Service can be provisioned with an 800 or 888 service number.)
 - (1) Outward WATS is the furnishing of facilities required for dial type telecommunications from a telephone over a WATS access line to telephones within the State of Ohio, in accordance with the regulations, rates and charges specified herein.
 - (2) 800 Service (Inward WATS) is the furnishing of facilities required for dial type telecommunications from telephones within the State of Ohio over a WATS access line to a telephone, in accordance with the regulations, rates and charges specified herein.

The WATS rates and charges set forth in this Tariff are in payment for the service furnished between the calling and called stations.

- b. Dial type telecommunications, as specified in a. above, are calls dialed from or to a telephone connected to a WATS access line or, if facilities are not available for dial completion, a call placed with an operator from or to such telephone. The call may also be placed with an operator in the same manner if for any reason a called dial station cannot be reached.

1. WIDE AREA TELECOMMUNICATIONS SERVICE (cont'd)

A. Regulations (cont'd)

2. Definition

- c. A WATS access line is a line connected to a Company central office and is provided as follows: (T)

(1) For the purpose of originating calls (Outward WATS) or receiving calls (800 Service), but not for both.

3. Undertaking of the Company (T)

The Company does not undertake to transmit messages but furnishes the use of its facilities to its customers for communications. (T)

4. Availability of Service

The furnishing of service under this tariff will require certain physical arrangements of the facilities of the Company and is therefore subject to the availability of such facilities. (T)

5. Liability of the Company (T)

- a. In view of the fact that the customer has exclusive control of his communications over the facilities furnished him by the Company, and of the uses for which facilities may be furnished him by the Company, and because of unavailability of errors incident to the furnishing of the services and to the use of such facilities of the Company, the services and facilities furnished by the Company are subject to the terms, conditions and limitations herein specified. (T)

The Company's liability, if any, for its willful misconduct is not limited by this Tariff. With respect to any other claim or suit, by a customer, or by any others, for damages associated with the installation, provision, termination, maintenance, repair or restoration of service, and subject to the provisions of c. through e. following, the Company's liability, if any, shall not exceed an amount equal to the proportionate charge for the service for the period during which the service was affected. (T)

1st Revised Sheet 2
Cancels Original Sheet 2

1. WIDE AREA TELECOMMUNICATIONS SERVICE (cont'd)

A. Regulations (cont'd)

5. Liability of the Company (cont'd) (T)
- c. The Company shall be indemnified and saved harmless by the customer or customers against claims for libel, slander or the infringement of copyright arising directly or indirectly from the material transmitted over the facilities or the use thereof; against claims for infringement of patents arising from combining with, or using in connection with, facilities furnished by the Company, apparatus and systems of the customer; against all other claims arising out of any act or omission of the customer in connection with the facilities provided by the Company; and against any and all losses from damage to the customer's facilities or equipment attached or connected to facilities furnished by the Company. (T)
- d. When the lines of another telephone company are used in establishing connections to points not reached by the Company's lines, the Company shall not be held liable for any act or omission of the other company. (T)
- e. The Company does not guarantee nor make any warranty with respect to equipment provided by it for use in an explosive atmosphere. The customer or customers indemnifies and holds the Company harmless from any and all loss, claims, demands, suits, or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or customers or by any other person or persons, for any personal injury to or death of any person or persons, and for any loss, damage or destruction of any property, whether owned by customer or others, caused or claimed to have been caused directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence, condition, location or use of said equipment so provided. (T)
- The Company may require each customer to sign an agreement for the furnishing of such equipment as a condition precedent to the furnishing of such equipment. (T)

1. WIDE AREA TELECOMMUNICATIONS SERVICE (cont'd)

A. Regulations (cont'd)

5. Liability of the Company (cont'd) (T)

The customer shall furnish, install and maintain sealed conduit with explosion-proof fittings between the equipment provided by the Company and points outside the hazardous areas (T)
where connection may be made with regular facilities of the Company. The customer may also (T)
be required to install and maintain the equipment within the hazardous area if, in the opinion of (T)
the Company, injury or damage to Company employees or property might result from the (T)
installation or maintenance of such equipment by the Company. (T)

6. Limitations of Service

- a. WATS does not include person-to-person, collect, or conference calls, or other calls requiring operator handling except as provided in B.2.b. preceding.
- b. WATS is not represented as adapted for connection to other services of the Company or to customer-provided facilities. It is contemplated that the service will have satisfactory transmission only between the telephone connected to the access line and the calling or called station. (T)

7. Advance Payments

The Company reserves the right to require applicants to make such advance payments as may be necessary to the protection of the Company's Wide Area Telecommunications Service revenues. The amount of the advance payment is credited to the customer's account as applying to any indebtedness under the contract. (T)

8. Construction Charges

The charges as set forth in Part 2, Section 5 of this Tariff are applicable to WATS.

See Part 2, Section 9 of this Tariff.

13. Broadcast of Recordings of Telephone Conversations

See Part 2, Section 9 of this Tariff.

14. Use of the Service

- a. The Company will permit the resale or sharing of WATS under the terms and regulations in Part 2, Section 2 of this Tariff and subject the provisions of this Tariff. (T)
- b. WATS is furnished subject to the condition that there will be no abuse or fraudulent use of the service, as defined in Part 2, Section 2 of this Tariff.
- c. A written notice will be sent to any customer following oral notification when their service unreasonably interferes with or impairs other services rendered to the public by the Company. (T)
If, after notification, the customer makes no modification in method of operation or in the service arrangements that are deemed service-protective by the Company, or if the customer is unwilling to accept the modifications, or if the customer continues to cause service impairment, the Company reserves the right, at any time without further notice, to institute protective measures, up to and including termination of service. In an emergency situation as defined by the Company, the Company reserves the right to suspend service without advance notice. (T)

23. Allowance for Interruptions

a. Allowance for interruptions apply to each Inward and Outward WATS access line as follows:

- (1) When the WATS access line is interrupted for a period of less than 2 hours, no credit applies.
 - (2) When the WATS access line is interrupted for a period of 2 hours to 24 hours, a credit of \$23.00 applies.
 - (3) When the WATS access line is interrupted for a period of more than 24 hours, a credit of \$23.00 applies for each 24 hour period or any fraction thereof.
 - (4) The credit in (2) and (3) above includes all credit to be applied for an interruption.
 - (5) None of the above credit allowances will be made for:
 - (a) non-completion of WATS messages due to busy network conditions;
 - (b) interruption of service due to customer-provided equipment or systems;
 - (c) interruption of service due to the negligence of the customer;
 - (d) interruption of service during any period in which the Company is not afforded access to (T) the premises at which the WATS access line is terminated; or
 - (e) interruption of service during any period when the customer has released the WATS access line to the Company for maintenance purposes, or implementation of a customer (T) order for a change in service arrangement.
- b. Message toll telephone service furnished to a customer when his WATS access line is interrupted is charged for at the message toll telephone service rates specified in Part 9, Section 1 of this Tariff.**

TFA No. OH-07-17691

PART 20 - Grandfathered Services
SECTION 10 - Wide Area Telecommunications
Services (WATS)

Original Sheet No. 7

1. WIDE AREA TELECOMMUNICATIONS SERVICE (cont'd)

(N)

A. REGULATIONS (cont'd)

24. Continuity of Service

Whenever a WATS access line is established for a customer at a location where WATS service was discontinued by such customer less than two weeks previous, the charges for the service so established will begin one day following the disconnect date of the prior service.

25. Restrictions

Although WATS is generally provided as unrestricted service, the following three optional restrictions are available where facility conditions permit:

- a. Restricted from local service area
- b. Restricted from directory assistance (within the same local service area and the same numbering plan area)
- c. Restricted from local service area and directory assistance (within the same local service area and the same numbering plan area)

One type of restriction may be provided per WATS access line, or when WATS is terminated in PBX or Centrex systems, one type of restriction may be provided per group of WATS access lines separately accessed.

26. Timing of Calls

- a. Chargeable time begins when connection is established between a station associated with the WATS access line and the calling or called station, and ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released by automatic timing equipment in the telephone network.
- b. When the connection is established through customer-provided equipment, it is the responsibility of the customer to provide answer supervision in order to begin chargeable timing.

(N)

By Connie Browning, President, Cleveland, Ohio

PART 20 - Grandfathered Services
SECTION 10 - Wide Area Telecommunications Services (WATS)

1st Revised Sheet 8
Cancels Original Sheet 8

1. WIDE AREA TELECOMMUNICATIONS SERVICE (cont'd)

B. WATS Service (Inward WATS and Outward WATS)

1. Rates and Charges

- a. WATS service includes a WATS access line component. The WATS access line consists of all facilities, including outside plant facilities and premises wiring, from the Company serving central office equipment to the first Company-provided jack or outlet on the customer's premises as covered in C.6. following. (T)

- b. The monthly rates for WATS access lines are as follows: (T)

Description /Billing Code	Monthly Rate
(1) Outward WATS /WFCOS/	\$27.50
(2) 800 Service (Inward WATS) /WFC1S/	32.00

2. Message Usage Charging

The furnishing of WATS is based upon message usage determined separately for outward WATS and 800 Service as follows:

- Determine the total number of calls.
- Determine the equivalent hours used by applying the minimum average time requirement of 60 seconds, i.e., 1 call = 1 minute.
- Determine the total actual hours used.
- Determine the chargeable hours which is the greater of b. or c. preceding, rounded to the nearest tenth (one decimal place).
- Determine the total number of access lines in service during the month. Access lines in service for a fraction of a month are based on the number of days in service divided by 30 days. The result is rounded to the nearest hundredth (two decimal places).
- Determine the average use per line by dividing the chargeable hours in d. preceding by the number of access lines in e. preceding.
- Determine the usage charge per line by multiplying the hourly rate in each appropriate hourly group (see i. following) by the number of hours used in each such group and totaling these charges.
- Determine the total usage charge by multiplying the usage charge per access line in g. preceding by the total number of access lines in e. preceding.

1. RESTORATION PRIORITY CHARGE

Upon receipt of certification in conformance with Part 64, Subpart D, Appendix A of the Federal Communications Commission's Rules and Regulations which specifies the priority system for restoration of private line service, the Company will change the priority designation of a private line service. A restoration priority change charge in an amount equal to the charge specified in Part 15, Section 1, applies when the customer requests a change in the restoration priority after the service has been established or after the service has been ordered but prior to start of service. No charge applies when the restoration priority certification is provided with the order to establish the service.

(T)

Effective September 10, 1990 no further requests for Restoration Priority (RP) Service will be accepted by the Company. Existing RP customers will be converted to the Telecommunications Service Priority (TSP) System subject to the provisions set forth in 2.6.11 preceding.

(T)

RP service will expire on March 10, 1993, or when all services are converted to TSP, whichever is sooner.

2. CHANNELS

2.1 Classification and Rates

2.1.1 Basic Digital Service (BDS)

Effective March 16, 1992, no further requests for, or rearrangements of Basic Digital Service will be accepted by the Company. Existing customers who will not experience any increase in rate will be converted to Base Rate Service at no charge. For those customers Base Rate Service rates will apply. Customers who would experience a rate increase will continue to subscribe to Basic Digital Service.

(T)
|
(T)

A. Types and Description

Basic Digital Service (BDS) provides for the four-wire simultaneous two way transmission of digital signals at synchronous speeds of 2.4, 4.8, 9.6 or 56 Kilobits per second (Kbps).

BDS is used to connect two customer premises for digital communication between such premises, or a customer premise and central office.

B. Regulations

In addition to the regulations set forth in Part 15, Section 2 of this tariff, the following regulations apply to BDS.

1. The regulations specified herein are in addition to the applicable regulations specified in this and other tariffs of this Company, except as modified in the following paragraphs:

a. Termination Charges

(T)

- (1) When service is terminated by the customer, or by the Company for any reason for which it may terminate such service under the provisions of this tariff, prior to the expiration of the initial contract period, the following termination charges apply in addition to all charges due for the service which has been furnished:

(a) Contract Period of One Month

In the case of services for which the initial contract period is one month, the termination charge will be charges due for the unexpired portion of the one month period.

Issued: December 17, 2007

2.2 High Capacity Transport Service

Effective March 16, 1992, no further requests for Direct High Capacity Service will be accepted by the Company. Existing customers who will not experience any increase in rate will be converted to DS1 Service at no charge. For those customers DS1 Service rates will apply. Customers who would experience a rate increase will continue to subscribe to Direct High Capacity Service.

(T)
(T)

A. General

1. High Capacity Transport Service consists of two-point digital channels and equipment which provides for simultaneous two-way isochronous transmission at a speed of 1.544 Megabits per second (Mbps). High Capacity Transport Service may be used to connect:
 - a. two customer premises
 - b. a customer premises and the central office
 - c. between central offices for access between Centrex Services.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

2. CHANNELS (Cont'd)

2.2 High Capacity Transport Service (Cont'd)

B. Regulations

1. The regulations specified herein are in addition to the applicable regulations specified in this and other tariffs of this Company.
2. High Capacity Transport Service is offered under the Variable Term Payment Plan (VTPP) as specified in Part 2, Section 3 of this tariff. All conditions and regulations pertaining to the VTPP are included in Part 2, Section 3 of this tariff, except as modified in the following paragraphs:
 - a. Termination Charges
 - (1) When service is terminated by the customer, or by the Company for any reason for which it may terminate such service under the provisions of this tariff, prior to the expiration of the initial contract period, the following termination charges apply in addition to all charges due for the service which has been furnished: (T)
 - (a) Contract Period of One Month

In the case of services for which the initial contract period is one month, the termination charges will be charges due for the unexpired portion of a twelve month period.
 - (b) Contract Periods of Three or Five Years

In the case of services for which the initial contract period is three or five years, the termination charges will be an amount equal to fifty per cent of the charges for the unexpired portion of such initial contract period, at the rate in effect at the time the service is discontinued.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

2. CHANNELS (Cont'd)

2.2 High Capacity Transport Service (Cont'd)

B. Regulations (Cont'd)

3. Availability of Service

- a. High Capacity Transport Service can only be provided from central offices equipped for appropriate digital transmission.
- b. High Capacity Transport Service is available on channels confined to the same building or continuous property on a cost incurred basis.

4. Provision of Service

- a. High Capacity Transport Service is available only on a two-point basis.
- b. Performance Criteria
 - (1) High Capacity Transport Service is designed to provide an average performance of at least 95% error-free seconds of transmission measured over a continuous 24 hour period.

5. Customer Signal Parameters

All signals generated by customer terminal equipment must meet the signal and format constraints described in Bell System Technical Reference Publication 43801 dated November, 1982, Bell System Technical Reference Publication 41451 dated January, 1983 and in Bell System Technical Reference Publication 62411 dated September, 1983.

C. Service Functions

1. Channelization

- a. Channelization equipment will be provided by the Company at the central office. If the customer wants the channelization equipment located on his premises, the equipment must be provided by the customer. (T)
- b. The Company will provide channelization equipment at the central office when the customer desires two-point, premises to central office or central office to central office services. (T)
- c. Company provided central office channelization equipment provides service for up to 24 voice grade channels. (T)

2. Channel Plug-Ins

One channel plug-in is required for each channel termination in the channelization equipment.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691
