1. FIBER DISTRIBUTED DATA INTERFACE (FDDI) SERVICE^{/1/} (T)

A. Description

FDDI Service is a high speed fiber optic data transmission service operating at a data rate of 100 megabits per second. The service will be provided to customers with two or more designated premises on an intra-or inter-wire center basis within a LATA. This service can be used to connect customer locations in a point-to-point or multi-point configuration. (T)

FDDI Service is designed to provide a high bandwidth, general purpose interconnection between computers and peripheral equipment, including the interconnection of Local Area Networks (LANs) and other networks. It also can be used to extend campus data networks to off-site locations. Typical applications are transferring large files between data bases and providing access to high speed printers and graphics/CAD/CAM programs. (T)

Customer interface to the FDDI Service network termination point is a single mode to multimode fiber interface, at the customer location. (T)

/1/ Effective February 16, 2001, Fiber Distributed Data Interface (FDDI) Service is limited to customers with existing service. No new customers will be able to order FDDI. Existing customers will be able to modify their existing service and will be able to add new FDDI circuits to their networks. New installations for existing customers will be able to utilize the Term Payment Plan (TPP), but no plan may be ordered with a termination date beyond February 15, 2008. Customer TPPs that expire prior to February 15, 2008 may extend their service until February 15, 2008 utilizing the Monthly Extension Rate provision of the TPP. Current customers will be permitted to keep their service until February 15, 2008, at which time the service will be discontinued. (T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

1. FIBER DISTRIBUTED DATA INTERFACE (FDDI) SERVICE^{/1/} (cont'd)

(T)

B. Definitions

Channel Mileage

Provides for the digital transmission facilities between serving wire centers within the network and their respective wire center node termination.

Premises Node Termination

Provides for the termination of digital transmission facilities on a customer's designated premises node. Included as part of the premises node termination is a standard channel interface arrangement which defines the technical characteristics associated with the service.

Central Office Regenerator

When a signal regenerator is required it must be provided at one of the Company's wire centers.

^{/1/} Effective February 16, 2001, Fiber Distributed Data Interface (FDDI) Service is limited to customers with existing service. No new customers will be able to order FDDI. Existing customers will be able to modify their existing service and will be able to add new FDDI circuits to their networks. New installations for existing customers will be able to utilize the Term Payment Plan (TPP), but no plan may be ordered with a termination date beyond February 15, 2008. Customer TPPs that expire prior to February 15, 2008 may extend their service until February 15, 2008 utilizing the Monthly Extension Rate provision of the TPP. Current customers will be permitted to keep their service until February 15, 2008, at which time the service will be discontinued. (T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio

TFA No. OH-07-17691

1. FIBER DISTRIBUTED DATA INTERFACE (FDDI) SERVICE^{/1/} (cont'd) (T)

C. Terms and Conditions

In addition to regulations set forth elsewhere in this Tariff, the following regulations apply to Fiber Distributed Data Interface (FDDI) Service: (T)

1. A customer-provided optical interface will not be allowed. All customer-provided equipment must deliver the data signal for FDDI Service within industry specifications for the subscribed data service. (T)
2. FDDI Service provides physical layer transport only. Error detection and correction of transported data is the customer's responsibility. The Company shall not be responsible for the through transmission of signals generated by CPE or for the quality of or defects in such transmission, the reception of signals by CPE, or address signaling to the extent addressing is performed by the CPE. (T)
3. FDDI Service is provided at the option of the Company where facilities permit. If appropriate facilities are not available, *Special Construction* charges may apply. (T)

^{/1/} Effective February 16, 2001, Fiber Distributed Data Interface (FDDI) Service is limited to customers with existing service. No new customers will be able to order FDDI. Existing customers will be able to modify their existing service and will be able to add new FDDI circuits to their networks. New installations for existing customers will be able to utilize the Term Payment Plan (TPP), but no plan may be ordered with a termination date beyond February 15, 2008. Customer TPPs that expire prior to February 15, 2008 may extend their service until February 15, 2008 utilizing the Monthly Extension Rate provision of the TPP. Current customers will be permitted to keep their service until February 15, 2008, at which time the service will be discontinued. (T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

By Connie Browning, President, Cleveland, Ohio.

TFA No. OH-07-17691

1. FIBER DISTRIBUTED DATA INTERFACE (FDDI) SERVICE^{/1/} (cont'd)

(T)

D. Features

1. Optional Features

Uninterruptible Power Supply (UPS)

Provides for a battery backup power source, per node termination equipped, in the event that normally provided utility power is lost.

Second Power Supply

Provides for a second power supply to be installed, per node termination. This power supply insures that if the primary power supply fails, the node termination will continue to operate. If requested, a second power supply must be applied to every node termination on the network.

/1/ Effective February 16, 2001, Fiber Distributed Data Interface (FDDI) Service is limited to customers with existing service. No new customers will be able to order FDDI. Existing customers will be able to modify their existing service and will be able to add new FDDI circuits to their networks. New installations for existing customers will be able to utilize the Term Payment Plan (TPP), but no plan may be ordered with a termination date beyond February 15, 2008. Customer TPPs that expire prior to February 15, 2008 may extend their service until February 15, 2008 utilizing the Monthly Extension Rate provision of the TPP. Current customers will be permitted to keep their service until February 15, 2008, at which time the service will be discontinued.

(T)

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

E. Technical References

Technical specifications for FDDI Service are found in: (T)

<u>Subject</u>	<u>Technical Reference</u>
----------------	----------------------------

Ameritech OPTINET 100 Mbps (FDDI) Interface Specifications	AM TR-NIS-000077
--	------------------

The Technical Reference can be obtained from:

APEX Support Team	(T)
(734) 523-7348	(T)

For technical information pertaining to the customer interface, see American National Standards Institute (ANSI) document X3.166 (1990).

All signals generated by customer terminal equipment must meet the ANSI FDDI X3T9.5 interface specifications.

^{/1/} Effective February 16, 2001, Fiber Distributed Data Interface (FDDI) Service is limited to customers with existing service. No new customers will be able to order FDDI. Existing customers will be able to modify their existing service and will be able to add new FDDI circuits to their networks. New installations for existing customers will be able to utilize the Term Payment Plan (TPP), but no plan may be ordered with a termination date beyond February 15, 2008. Customer TPPs that expire prior to February 15, 2008 may extend their service until February 15, 2008 utilizing the Monthly Extension Rate provision of the TPP. Current customers will be permitted to keep their service until February 15, 2008, at which time the service will be discontinued. (T)

1. FIBER DISTRIBUTED DATA INTERFACE (FDDI) SERVICE^{/1/} (cont'd) (T)

F. Prices (cont'd)

2. Payment Plans

- **Term Payment Plans**
Fiber Distributed Data Interface (FDDI) Service is only available under the Term Payment Plan (TPP) whereby customers must select either a 36, 60 or 84 month period. After the selected Term Payment Plan period is satisfied: (T)

For service ordered prior to October 4, 1999 the prevailing prices of the current plan will continue until the customer cancels or renews the service.

For service ordered after October 4, 1999 the Monthly Extension rate will apply unless a new TPP is selected.

Refer to Term Payment Plans in Part 15, Section 1.

- **Single Payment Option (SPO)**
A single payment option is available for this service. Refer to *Term Payment Plans* in Part 15, Section 1 for calculating Single Payment Options.

^{/1/} Effective February 16, 2001, Fiber Distributed Data Interface (FDDI) Service is limited to customers with existing service. No new customers will be able to order FDDI. Existing customers will be able to modify their existing service and will be able to add new FDDI circuits to their networks. New installations for existing customers will be able to utilize the Term Payment Plan (TPP), but no plan may be ordered with a termination date beyond February 15, 2008. Customer TPPs that expire prior to February 15, 2008 may extend their service until February 15, 2008 utilizing the Monthly Extension Rate provision of the TPP. Current customers will be permitted to keep their service until February 15, 2008, at which time the service will be discontinued. (T)

By Connie Browning, President, Cleveland, Ohio

3. DATAPHONE ® SELECT-A-STATION SERVICE ^{/1/}

/2/

A. Regulations

1. DATAPHONE Select-a-Station Service is a multistation, voice grade; private line data system designed to establish point-to-point connections rapidly between a master station and a number of remote stations, one at a time. Direct transmission between remote stations is not possible, nor is simultaneous communications from the master to more than one remote station possible.
2. A Primary Data Station Selector (PDSS) provides the connection between the master station and any one of up to 128 half or full duplex voice grade data channels. Where more than one Data Station Selector (DSS) is required, additional DSS's, designated Secondary Data Station Selectors (SDSS) connected to the PDSS, may be provided.
3. A Selector Control Unit (SCU) is required at the master station location. The SCU must be provided by the customer to transmit control signals to the DSS's and to receive supervisory signals from DSS's.

/2/

®Registered Trademark of American Telephone and Telegraph Company.

/1/ Effective July 19, 2002, DSAS will no longer be available to new customers. Existing customers may retain service at existing locations until December 1, 2002, when the service will be completely discontinued.

/2/ Material formerly appeared in Tariff 20, Part 15, Section 5, Sheets 10-12.

Issued: July 18, 2002

Effective: July 19, 2002

In accordance with Case No. 02-1805-TP-ATA, issued July 18, 2002.

PART 20 - Grandfathered Services
SECTION 15 - Dedicated Communications Services

Original Sheet No. 52

3. DATAPHONE ® SELECT-A-STATION SERVICE (cont'd) ^{/1/}

/2/

A. Regulations (cont'd)

4. DATAPHONE Select-A-Station Service may be arranged for the sequential mode of operation. The customer must specify one of the following three DSS options which establishes the order of connections from the DSS to the remote stations and provides the appropriate circuit structure.
 - a. Automatic Step* - The duration and order of connection are fixed.
 - b. Automatic Step with Reset* - The duration and order of connection are fixed, but the DSS will reset to the beginning of the connection cycle upon command from the master station.
 - c. Controlled Step - Allows the customer to have in-service control over the duration of the connection. However, the order of the connection is fixed.
- * Cannot be connected to a SDSS.
5. DATAPHONE Select-A-Station may also be arranged for addressable operation. This operation provides a DSS arrangement in which the customer controls the duration and order of connections.
6. Type 3040 and 3041 channels, furnished under the provisions of this tariff are used to provide access:
 - a. From the PDSS to the SCU.
 - b. From the DSS to each remote station.
 - c. From the PDSS to each SDSS.

Note: (a) and (c) above must be four-wire channels

7. The access channels in 6.a., b., and c. preceding will be priced as individual two point channels, based on locations connected.

/2/

/1/ Effective July 19, 2002, DSAS will no longer be available to new customers. Existing customers may retain service at existing locations until December 1, 2002, when the service will be completely discontinued.

4. BASIC DIGITAL SERVICE (BDS)

Effective March 16, 1992, no further requests for, or rearrangements of, Basic Digital Service will be accepted by the Company. Existing customers who will not experience any increase in rate will be converted to Base Rate Service at no charge. For those customers, Base Rate Service rates will apply. Customers who would experience a rate increase will continue to subscribe to Basic Digital Service. (T) (T)

A. Types and Description

Basic Digital Service (BDS) provides for the four-wire simultaneous two-way transmission of digital signals at synchronous speeds of 2.4, 4.8, 9.6 or 56 Kilobits per second (Kbps).

BDS is used to connect two customer premises for digital communication between such premises, or a customer premise and central office.

B. Regulations

In addition to the regulations set forth in Part 15, Sections 1 and 3 of this Tariff, the following regulations apply to BDS.

1. The regulations specified herein are in addition to the applicable regulations specified in this Tariff and in tariffs of this Company, except as modified in the following paragraphs:
 - a. Termination Charges
 - (1) When service is terminated by the customer, or by the Company for any reason for which it may terminate such service under the provisions of this Tariff, prior to the expiration of the initial contract period, the following termination charges apply in addition to all charges due for the service which has been furnished: (T)
 - (a) Contract Period of One Month

In the case of services for which the initial contract period is one month, the termination charge will be charges due for the unexpired portion of the one month period.
 - (b) Change Speed of Service

In the case of a change of speed from or to 2.4, 4.8, and 9.6 Kbps, termination charges do not apply. A change from 56 Kbps to 2.4, 4.8, 9.6 or vice versa constitutes a termination of contract and termination charges as specified in (a) preceding will apply.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

4. BASIC DIGITAL SERVICE (BDS) (cont'd)

(N)

B. Regulations (cont'd)

1. (cont'd)

a. (cont'd)

(1) (cont'd)

(c) The total amount of the nonrecurring charges may be deferred. The minimum amount that may be deferred is \$1200.00. The deferred payment period must be equal to the customer's VTPP payment period.

(d) Termination charges apply to all changes in the serving address of the service.

2. Availability of Service

a. BDS is available on a 24 hour per day, seven days a week basis.

b. BDS can only be provided from central offices equipped with suitable digital facilities and equipment. Where special construction of facilities is necessary, such construction will be provided at the charges specified in Part 2, Section 5 of this Tariff.

c. All signals generated by customer terminating equipment must meet signal and format constraints contained in Ameritech Technical Reference AN-TR-NPL-000007.

d. Suspension of service is not provided on BDS.

3. Minimum Service Period

The minimum service period is one month.

4. Channel Interface (CIs)

CIs are required for customer-provided premises equipment. The following CIs define the bit rates that are available for BDS.

<u>CI</u>	<u>Bit Rate</u>
DU-24	2.4 Kbps
DU-48	4.8 Kbps
DU-96	9.6 Kbps
DU-56	56.0 Kbps

SECTION 15 - Dedicated Communications Services

Original Sheet No. 56

4. BASIC DIGITAL SERVICE (BDS) (cont'd)

C. Rates

The following rates and charges apply for BDS service in addition to the rates and charges for the associated service.

1. One channel termination is applicable to each station connected.
2. Channel mileage is portrayed in mileage bands. There are two rates that apply for each band, i.e., a flat rate per band and a rate per mile.
3. Channel Termination

Description /Billing Code	Nonrecurring Charge	Monthly Rate
2.4 Kbps /1DCPX/	\$299.11	\$59.00
4.8 Kbps /1DCPX/	299.11	59.00
9.6 Kbps /1DCPX/	299.11	59.00
56 Kbps /1DCPX/	398.81	59.00

4. Channel Mileage

Description /Billing Code/	Monthly Rates

5. HIGH CAPACITY TRANSPORT SERVICE

Effective March 16, 1992, no further requests for Direct High Capacity Service will be accepted by the Company. Existing customers who will not experience any increase in rate will be converted to DS1 Service at no charge. For those customers DS1 Service rates will apply. Customers who would experience a rate increase will continue to subscribe to Direct High Capacity Service. (T)
(T)

A. General

1. High Capacity Transport Service consists of two-point digital channels and equipment which provides for simultaneous two-way isochronous transmission at a speed of 1.544 Megabits per second (Mbps). High Capacity Transport Service may be used to connect:
 - a. two customer premises
 - b. a customer premises and the central office
 - c. between central offices for access between Centrex Services.

B. Regulations

1. The regulations specified herein are in addition to the applicable regulations specified in this tariff and in tariffs of this Company.
2. High Capacity Transport Service is offered under the Variable Term Payment Plan (VTPP) as specified in Part 2, Section 3 of this Tariff. All conditions and regulations pertaining to the VTPP are included in Part 2, Section 3 of this Tariff, except as modified in the following paragraphs:
 - a. Termination Charges
 - (1) When service is terminated by the customer, or by the Company for any reason for which it may terminate such service under the provisions of this tariff, prior to the expiration of the initial contract period, the following termination charges apply in addition to all charges due for the service which has been furnished: (T)

(a) Contract Period of One Month

In the case of services for which the initial contract period is one month, the termination charges will be charges due for the unexpired portion of a twelve month period.

Issued: December 17, 2007

Effective: December 17, 2007

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

2. (cont'd)

a. Termination Charges (cont'd)

(1) (cont'd)

(b) Contract Periods of Three or Five Years

In the case of services for which the initial contract period is three or five years, the termination charges will be an amount equal to fifty per cent of the charges for the unexpired portion of such initial contract period, at the rate in effect at the time the service is discontinued.

3. Availability of Service

- a. High Capacity Transport Service can only be provided from central offices equipped for appropriate digital transmission.
- b. High Capacity Transport Service is available on channels confined to the name building or continuous property on a cost incurred basis.

4. Provision of Service

- a. High Capacity Transport Service is available only on a two-point basis.
- b. Performance Criteria

High Capacity Transport Service is designed to provide an average performance of at least 95% error-free seconds of transmission measured over a continuous 24 hour period.

5. Customer Signal Parameters

All signals generated by customer terminal equipment must meet the signal and format constraints described in Bell System Technical Reference Publication 43801 dated November, 1982, Bell System Technical Reference Publication 41451 dated January, 1983 and in Bell System Technical Reference Publication 62411 dated September, 1993.

B. Regulations (cont'd)

6. Service Functions/Channelization

- a. Channelization equipment will be provided by the Company at the central office. If the customer wants the channelization equipment located on his premises, the equipment must be provided by the customer. (T)
- b. The Company will provide channelization equipment at the central office when the customer desires two-point, premises to central office or central office to central office services. (T)
- c. Company provided central office channelization equipment provides service for up to 24 voice grade channels. (T)

7. Channel Plug-Ins

One channel plug-in is required for each channel termination in the channelization equipment.

6. DS3 SERVICE PACKAGES^{/1/}

A. TERM PAYMENT PLANS

(T) /2/

Renewal Options

Term Payment Plan Renewal Program Option

Customers may upgrade to a larger DS3 Service Package at the same time as the service is renewed under the TPP Renewal Program. However, the customer will be provided a renewal credit based on the Service Package that was in place prior to the upgrade. If the customer subsequently terminates the larger DS3 Service Package prior to the expiration of the renewed TPP term, or downgrades to a Service Package that is smaller than the Service in place prior to the upgrade, the customer will be liable for a TPP renewal termination charge equal to the original TPP renewal credit.

The following renewal credits will apply to existing 36-month TPP service components renewed under the TPP Renewal Program.

Service Component	TPP Renewal Credit	
	36 Months	60 Months
DS3 Service Package with Electrical Interface		
DS3 (1 package)	\$ 580.00	\$ 1,160.00
DS3B (2 package)	1,120.00	2,240.00
DS3C (3 package)	1,580.00	3,180.00
DS3F (6 package)	2,840.00	5,670.00
DS3L (12 package)	4,210.00	8,420.00
DS3X (24 package)	6,450.00	12,890.00

/2/

/1/ DS3 Service Packages will not be available to new customers after April 10, 2000. Customers with existing DS3 Service Packages may maintain their service as currently configured, or may add/reduce the number of active Service Channels within their existing Service Package configuration subject to the terms and conditions of this tariff. However, existing customers may not; order new DS3 Service Packages, renew their DS3 Service Package TPP, or upgrade their DS3 Service Packages after April 10, 2000. Customers may convert their existing DS3 Service Package(s) to DS3 Service as offered after April 10, 2000 at no charge as long as the new TPP is of equal or longer term as their previous Service Package TPP and there is no decrease in the quantity of DS3 channels. DS3 Service Packages will no be available after April 9, 2005.

Original Sheet No. 66

6. DS3 SERVICE PACKAGES^{/1/} (cont'd)

A. TERM PAYMENT PLANS (cont'd)

(T) /2/

Termination Charges

3. DS3 Service Packages

- Service discontinued in the first through 11th month

$$((.85 \times 12\text{-month TPP price}) \times (12 - \text{number of months in service})) + ((12\text{-month TPP price} - \text{subscribed to TPP price}) \times \text{number of months in service}) = \text{Termination Charge}$$

Example:

A customer subscribed to a 36-month TPP term and disconnected service at the end of the fifth month. This customer's termination charge would be:

$$((.85 \times 12\text{-month TPP price}) \times (12 - 5 \text{ months})) + ((12\text{-month TPP price} - 36\text{-month TPP price}) \times 5 \text{ months}) = \text{Termination Charge}$$

All recurring price termination charges will be based on the TPP prices in effect at the time of termination.

/2/

/1/ DS3 Service Packages will not be available to new customers after April 10, 2000. Customers with existing DS3 Service Packages may maintain their service as currently configured, or may add/reduce the number of active Service Channels within their existing Service Package configuration subject to the terms and conditions of this tariff. However, existing customers may not; order new DS3 Service Packages, renew their DS3 Service Package TPP, or upgrade their DS3 Service Packages after April 10, 2000. Customers may convert their existing DS3 Service Package(s) to DS3 Service as offered after April 10, 2000 at no charge as long as the new TPP is of equal or longer term as their previous Service Package TPP and there is no decrease in the quantity of DS3 channels. DS3 Service Packages will no be available after April 9, 2005.

Original Sheet No. 67

6. DS3 SERVICE PACKAGES^{/1/} (cont'd)

A. TERM PAYMENT PLANS (cont'd)

(T) /2/

Termination Charges

3. DS3 Service Packages

- Service discontinued in the 12th through 60th month

The dollar difference between the current TPP price for the TPP term that could have been completed during the time the service was actually in service and the customer's current TPP price for each month the service was provided.

Example:

A customer subscribed to a 60-month TPP term and disconnected service during the 37th month. This customer's termination charge would be:

$$(36\text{-month TPP price} - 60\text{-month TPP price}) \times 37 = \text{Termination Charge}$$

The 36-month TPP term could have been completed during the months the service was actually in service.

All recurring price termination charges will be based on the TPP prices in effect at the time of termination.

/2/

/1/ DS3 Service Packages will not be available to new customers after April 10, 2000. Customers with existing DS3 Service Packages may maintain their service as currently configured, or may add/reduce the number of active Service Channels within their existing Service Package configuration subject to the terms and conditions of this tariff. However, existing customers may not; order new DS3 Service Packages, renew their DS3 Service Package TPP, or upgrade their DS3 Service Packages after April 10, 2000. Customers may convert their existing DS3 Service Package(s) to DS3 Service as offered after April 10, 2000 at no charge as long as the new TPP is of equal or longer term as their previous Service Package TPP and there is no decrease in the quantity of DS3 channels. DS3 Service Packages will no be available after April 9, 2005.

B. DEFINITIONS

DS3 Service Channel

The individually activated DS3 channel(s) within a DS3 Service Package.

DS3 Service Package

Provides the capability to provision a maximum number of DS3 channels.

Local Distribution Channel

Provides interconnection between the Company Serving Wire Center (SWC) and the customer premises. Consists of two rates elements: DS3 Service Packages and DS3 Service Channels.

/2/

/2/

/1/ DS3 Service Packages will not be available to new customers after April 10, 2000. Customers with existing DS3 Service Packages may maintain their service as currently configured, or may add/reduce the number of active Service Channels within their existing Service Package configuration subject to the terms and conditions of this tariff. However, existing customers may not; order new DS3 Service Packages, renew their DS3 Service Package TPP, or upgrade their DS3 Service Packages after April 10, 2000. Customers may convert their existing DS3 Service Package(s) to DS3 Service as offered after April 10, 2000 at no charge as long as the new TPP is of equal or longer term as their previous Service Package TPP and there is no decrease in the quantity of DS3 channels. C. Terms and Conditions

In addition to the Terms and Conditions set forth in Part 15, Section 1, the following applies to DS3 Service. (T)

1. DS3 Service Package

Each DS3 Service Package must have a minimum number of service channels activated at all times. A new DS3 Service Package must be installed with at least the minimum required Service Channels. A customer may not disconnect Service Channels from an existing DS3 Service Package below the minimum required in that package without downgrading the Service Package size or terminating the DS3 LDC Service. (T)

DS3 Service Package (with Electrical Interface)	Minimum Required SCs	Maximum Available SCs
DS3	1	1
DS3B	1	2
DS3C	1	3
DS3F	3	6
DS3L	7	12
DS3X	13	24

- /1/ DS3 Service Packages will not be available to new customers after April 10, 2000. Customers with existing DS3 Service Packages may maintain their service as currently configured, or may add/reduce the number of active Service Channels within their existing Service Package configuration subject to the terms and conditions of this tariff. However, existing customers may not; order new DS3 Service Packages, renew their DS3 Service Package TPP, or upgrade their DS3 Service Packages after April 10, 2000. Customers may convert their existing DS3 Service Package(s) to DS3 Service as offered after April 10, 2000 at no charge as long as the new TPP is of equal or longer term as their previous Service Package TPP and there is no decrease in the quantity of DS3 channels. DS3 Service Packages will no be available after April 9, 2005.

6. DS3 SERVICE PACKAGES^{/1/} (cont'd)

C. Terms and Conditions (cont'd)

1. DS3 Service Package (cont'd)

DS3 Service Packages are available with an optical channel interface. These DS3 Service Packages provide a single optical interface for multiple DS3 Service Channels (SCs) and are available as follows:

(T)

DS3 Service Package (with Optional Interface)	Minimum Required SCs in Package	Maximum Number of DS3 Equivalent SCs
DS3012	1	12
DS3024	13	24

All DS3 service channels within the package must be ordered for termination at the same customer designated premises, billed to the same customer and in the same Serving Wire Center (SWC). All service channels in a package are required to be connected to other service components (i.e., channel mileage, multiplexing, or another service channel) at the time the service channel is installed, except at the fiber hub.

The interconnection of individual service channels with other components, such as channel mileage and multiplexing, may be different. For example, one service channel within the package may have multiplexing, while another service channel may have channel mileage associated with it. Components connected to each service channel in the service package may have different Term Payment Plans periods from the service package in which the service channels reside.

- ^{/1/} DS3 Service Packages will not be available to new customers after April 10, 2000. Customers with existing DS3 Service Packages may maintain their service as currently configured, or may add/reduce the number of active Service Channels within their existing Service Package configuration subject to the terms and conditions of this tariff. However, existing customers may not; order new DS3 Service Packages, renew their DS3 Service Package TPP, or upgrade their DS3 Service Packages after April 10, 2000. Customers may convert their existing DS3 Service Package(s) to DS3 Service as offered after April 10, 2000 at no charge as long as the new TPP is of equal or longer term as their previous Service Package TPP and there is no decrease in the quantity of DS3 channels. DS3 Service Packages will no be available after April 9, 2005.

PART 20 – SECTION 17

EXHIBIT A

PART 20 - Grandfathered Services
SECTION 17 - ISDN Services

4th Revised Sheet No. 1
Cancels
3rd Revised Sheet No. 1

1. ISDN DIRECT

Effective June 21, 2002, 84-Month Term Payment Plans will no longer be available for ISDN Direct Service. Current ISDN Direct 84-month customers may continue to retain their existing service as is at their current address until the 84-month contract term expires. Any customer requested changes to the existing Service will require the customer to select a new contract term payment plan or the month-to-month option at the then current tariff rates. The Company will not impose termination liability to those customers required to make a contract term change.

Upon completion of the 84 month TPP term, customers may continue receiving the service at the then-current rates under any available payment plan. If the customer does not select a new payment plan and does not request discontinuance of the Service, the Month-to-Month tariff rates in effect at such time will automatically apply.

Effective July 16, 2005, no further installations, moves, rearrangements, or changes of any type will be made to ISDN Direct B-Channel or D-Channel Packet services. Customers of record on July 16, 2005 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished.

(D)
(D)

The preceding supersedes all of the rules and regulations that follow.

A. General

ISDN Direct is a local exchange telecommunications service that provides customer access to Packet Switched Data services.

A maximum of 8 services are permitted per ISDN Direct service, including a maximum of two B channel services.

B. Vacant

Issued: December 15, 2006

Effective: December 15, 2006

In accordance with an Order issued by the Public Utilities Commission of Ohio, dated January 6, 2003, Case No. 02-3069-TP-ALT.

Cancels 2nd Revised Sheet 2
and 1st Revised Sheet No. 2-P (N)

1. ISDN DIRECT (cont'd)

C. Regulations

1. Term Payment Plans

Customers may elect to subscribe to ISDN Direct Service for an extended period under a Term Payment Plan (TPP) option, which allows the customer to select an 84-month payment plan. During the length of the selected TPP, monthly prices for service ordered under the plan, will automatically change (increase or decrease) as Company initiated price changes become effective. However, under no circumstances will any price change cause the monthly price for the service to exceed the price that was in effect at the beginning of the selected TPP term.

D. Service Descriptions

1. Packet Switched Data Service - "B" Channel

- a. Provides the ability to originate and receive X.25 packet data calls over the 64 Kbps "B" channel. Standard capabilities and features for Packet Switched Network Service lines using X.25 are specified in Part 6, Section 2 of this Tariff. Optional capabilities and features for Packet Switched Network service lines using X.25 are available at rates and charges set forth in Part 6, Section 2 of this Tariff. Provides throughput of up to 19.2 Kbps per individual logical channel.

Issued: December 17, 2007

Effective: December 17, 2007

2. On-Demand Packet Switched Data - "B" Channel

- a. This capability allows a user to request that a connection be established to provide the ability to originate and receive X.25 Packet Switched Data calls over the 64 Kbps "B" channel.
- b. Standard capabilities and features for Packet Switched Network lines using X.25 access are included.
- c. Provides up to 128 logical channels and throughput of up to 19.2 Kbps per individual logical channel.
- d. Calls, optional capabilities and features for Packet Switched Network lines using X.25 are available at the rates shown in Part 20, Section 6 of this Tariff.

3. Packet Switched Data Service - "D" Channel

- a. Provides the ability to originate and receive X.25 packet data calls over the 16 Kbps "D" channel. Standard capabilities and features for Packet Switched Network Service lines using X.25 access are specified in Part 20, Section 6 of this Tariff. Optional capabilities and features for Packet Switched Network Service lines using X.25 are available at rates and charges set forth in Part 20, Section 6 of this Tariff. The "D" channel packet has a maximum throughput of 9.6 Kbps.

Issued: December 17, 2007

Cancels 2nd Revised Sheet 7
and 1st Revised Sheet No. 7-P (N)

2. ISDN PRIME SERVICE

Effective June 21, 2002, 84-Month Term Payment Plans will no longer be available for ISDN Prime Service. Current ISDN PRI 84-month customers may continue to retain their existing service as is at their current address until the 84-month contract term expires. Any customer requested changes to the existing Service will require the customer to select a new contract term payment plan or the month-to-month option at the then current tariff rates. The Company will not impose termination liability to those customers required to make a contract term change.

Upon completion of the 84-month TPP term, customers may continue receiving the Service at the then-current rates under any available payment plan. If the customer does not select a new payment plan and does not request discontinuance of the Service, the month-to-month tariff rates in effect at such time will automatically apply.

The preceding supersedes all of the rules and regulations that follow.

A. Prices

(T)

A. PRICES (cont'd)

2. Payment Plans

(T)

- **Term Payment Plans**

Customers may elect to subscribe to ISDN Prime Service for an extended period under a Term Payment Plan (TPP) option, which allows the customer to select an 84-month payment plan. During the length of the selected TPP, monthly prices for service ordered under the plan, will automatically change (increase or decrease) as Company initiated price changes become effective. However, under no circumstances will any price change cause the monthly price for the service to exceed the price that was in effect at the beginning of the selected TPP term.
