Trunk Rotation Service is an arrangement whereby two or more lines of the same class and grade or trunks of the same class furnished to a subscriber on continuous property are grouped so that calls to the first number of the grouped lines are automatically routed to the first non-busy line of the group, and a busy signal or busy report is not given unless all the grouped lines are busy.

The number of Trunk Rotation Services required depends upon the number of lines in a group. One Trunk Rotation Service is required for the second line and each succeeding line.

The charge for Trunk Rotation Service is \$2.00 per line per month.
