NOTICE OF PROPOSED MAJOR UTILITY FACILITY

Columbus Southern Power Company (CSP) proposes to construct an electric transmission line located in Pike County. This project is known as the Don Marquis Transmission Line Project. As required by the Ohio Revised Code Chapter 4906, AEP seeks a Certificate of Environmental Compatibility and Public Need from the State of Ohio's Power Siting Board.

Date, Time, and Locations of Public Hearing

The Ohio Power Siting Board will be holding hearings where the public is invited to provide written or oral comments regarding this proposed transmission line. A non-adjudicatory hearing will be held on **Tuesday, April 8, 2008, beginning at 6 p.m.** at Pike County YMCA, 400 Pride Drive, Waverly, Ohio.

An adjudicatory hearing will be held on **Tuesday, April 15, 2008 at 10:00 a.m.** at the offices of the Public Utilities Commission of Ohio, 180 East Broad Street, 11th floor, Hearing Room F, Columbus, Ohio. The hearing on April 15 at the offices of the PUCO is open to the public but participation is limited to the parties in the case as defined by ORC 4906.08.

The deadline for filing a petition to intervene as established by the administrative law judge is five days prior to the scheduled date for the non-adjudicatory hearing, or later if good cause is shown. However, the Board strongly encourages interested persons who wish to intervene in the adjudicatory hearing to file their petitions as early as possible. Petitions should be addressed to the Public Utilities Commission of Ohio, 180 East Broad Street, Columbus, Ohio 43215-3793.

This notice is the second notice published regarding this project and the project's respective hearing dates. The first notice was published on February 15, 2008 in the Chillicothe Gazette and on February 17, 2008 in the Pike County News Watchman newspapers.

This project includes installation of two new 345/138 kilovolt (KV) transformers and the construction of a new double circuit 138 KV transmission line from the company's Don Marquis station near Piketon, Ohio, to the existing Lick-Waverly 138 KV line that runs between Waverly

and Jackson, Ohio. The new line is designed to prevent the overloading of critical facilities and provide sufficient capacity for future growth and development in an area where electrical demand is growing at a rate of 1.4 percent annually. CSP is an operating subsidiary of American Electric Power.

The application for a Certificate of Environmental Compatibility and Public Need is now pending before the State of Ohio Power Siting Board. This application has been assigned Case Number 07-0715-EL-BTX. This number should be included in all communications with respect to this proceeding.

The accompanying map depicts the proposed and alternate routes. The project is located in Pike County, Ohio. It should be noted that due to the reduced scale and limited detail, this map should be used only as a general guide. Copies of the actual siting application, including specific details of location and construction are available for public inspection at the following locations:

The Ohio Power Siting Board has served the following State agencies with copies of the application:

- Public Utilities Commission of Ohio
- Ohio Department of Agriculture
- Ohio Department of Development
- Ohio Department of Health
- Ohio Department of Natural Resources
- Ohio Department of Transportation
- Ohio Environmental Protection Agency
- Ohio Historical Society

CRITERIA USED TO REVIEW THE APPLICATION

The following eight criteria are set forth in Section 4906.10 (A) of the Revised Code and will be used, along with additional information, by the Board in the reviewing of the application for a certificate to construct, operate and maintain the Don Marquis Transmission Line Project.

The basis of the need for the facility. In the case of a majority utility facility described in division (B)(1) of Section 4906.01 of the Revised Code, the Board shall presume the need for the facility as that need is stated in an application pursuant to division (A) (3) of Section 4906.06 of the Revised Code;

The nature of the probable environmental impact of the proposed facility;

Whether the facility represents the minimum adverse environmental impact, considering the state of available technology, the nature and economics of alternatives and other pertinent considerations;

In the case of electric transmission lines, that the facility is consistent with regional plans for expansion of the electric power grid of the electric systems serving Ohio and interconnected systems and that the facility will serve the interests of electric system economy and reliability;

The facility will comply with Chapters 3704, 3734 and 6111 of the Revised Code and all rules and standards adopted under Sections 1501.33, 1501.34, and 4561.32 of the Revised Code. In determining whether the facility will comply with all rules and standards adopted under Section 4561.34 of the Revised Code, the Board shall consult with the office of citation of the division of the multi-modal planning and programs of the Department of Transportation under Section 4361.341 of the Revised Code;

The facility will serve the public interest, convenience, and necessity;

The facility's impact on the viability as agricultural of any land of any land in an existing agricultural district established under Chapter 929 of the Revised Code that is located within the site of the proposed major utility facility and

The facility incorporates maximum feasible water conservation practices as deter-

mined by the Board considering available technology and the nature and economics of various alternatives.

Section 4906.07, Revised Code provides that:

Upon the receipt of an application, complying with section 4906.06 of the Revised Code, the power siting Board shall promptly fix a date for a public hearing thereon not less than sixty nor more than ninety days after such receipt and shall conclude the proceeding as expeditiously as practicable.

On an application for an amendment of a certificate, the board shall hold a hearing in the same manner as a hearing is held on an application for a certificate. If the proposed change in the facility would result in any material increase in any environmental impact of the facility or a substantial change in the location of all or a portion of such facility other than is provided in the alternatives set forth in the application.

The chairman of the power siting board shall cause each application filed with the board to be investigated and shall not less than fifteen days prior to the date any application is set for hearing submit a written report to the board and to the applicant. A copy of such report shall be made available to any person upon request. Such report shall set forth the nature of the investigation, and shall contain recommended findings with regard to division (A) of section 4906.10 of the Revised Code and shall become part of the record and served upon all parties to the proceeding.

An electronic version of the siting application can be found at the Ohio Power Siting Board's website at <http://opsh.ohio.gov>. Search under current cases for Case #07-0715-EL-BTX.

NOTICE OF PROPOSED MAJOR UTILITY FACILITY

Columbus Southern Power Company (CSP) proposes to construct an electric transmission line located in Pike County. This project is known as the Don Marquis Transmission Line Project. As required by the Ohio Revised Code Chapter 4906, AEP seeks a Certificate of Environmental Compatibility and Public Need from the State of Ohio's Power Siting Board.

Date, Time, and Locations of Public Hearing

The Ohio Power Siting Board will be holding hearings where the public is invited to provide written or oral comments regarding this proposed transmission line. A non-adjudicatory hearing will be held on **Tuesday, April 8, 2008, beginning at 6 p.m.** at Pike County YMCA, 400 Pride Drive, Waverly, Ohio.

An adjudicatory hearing will be held on **Tuesday, April 15, 2008 at 10:00 a.m.** at the offices of the Public Utilities Commission of Ohio, 180 East Broad Street, 11th floor, Hearing Room F, Columbus, Ohio. The hearing on April 15 at the offices of the PUOC is open to the public, but participation is limited to the parties in the case as defined by ORC 4906.08.

The deadline for filing a petition to intervene as established by the administrative law judge is five days prior to the schedule date for the non-adjudicatory hearing, or later if good cause is shown. However, the Board strongly encourages interested persons who wish to intervene in the adjudicatory hearing to file their petitions as early as possible. Petitions should be addressed to the Public Utilities Commission of Ohio, 180 East Broad Street, Columbus, Ohio 43215-3793.

This notice is the first notice published regarding this project and the project's respective hearing dates.

This project includes installation of two new 345/138 kVolt (kV) transformers and the construction of a new double circuit 138 kV transmission line from the company's Don Marquis station near Piketon, Ohio, to the existing Lick-Waverly 138 kV line that runs between Waverly and Jackson, Ohio. The new line is designed to prevent the overloading of critical facilities and provide sufficient capacity

for future growth and development in an area where electrical demand is growing at a rate of 1.4 percent annually. CSP is an operating subsidiary of American Electric Power.

The application for a Certificate of Environmental Compatibility and Public Need is now pending before the State of Ohio Power Siting Board. This application has been assigned Case Number 07-0715-EL-BTX. This number should be included in all communications with respect to this proceeding.

The accompanying map depicts the proposed and alternate routes. The project is located in Pike County, Ohio. It should be noted that due to the reduced scale and limited detail, this map should be used only as a general guide. Copies of the actual siting application, including specific details of location and construction are available for public inspection at the following locations:

The Ohio Power Siting Board has served the following State agencies with copies of the application:

- Public Utilities Commission of Ohio
- Ohio Department of Agriculture
- Ohio Department of Development
- Ohio Department of Health
- Ohio Department of Natural Resources
- Ohio Department of Transportation
- Ohio Environmental Protection Agency
- Ohio Historical Society

CRITERIA USED TO REVIEW THE APPLICATION.

The following eight criteria are set forth in Section 4906.10 (A) of the Revised Code and will be used, along with additional information, by the Board in the reviewing of the application for a certificate to construct, operate and maintain the Don Marquis Transmission Line Project.

The basis of the need for the facility. In the case of a majority utility facility described in division (B) (1) of Section 4906.01 of the Revised Code, the Board shall presume the need for the facility as that need is stated in an application pursuant to division (A) (3) of Section 4906.06 of the Revised Code;

The nature of the probable environmental impact of the proposed facility;

Whether the facility represents the minimum adverse environmental impact, considering the state of available technology, the nature and economics of alternatives and other pertinent considerations;

In the case of electric transmission lines, that the facility is consistent with regional plans for expansion of the electric power grid of the electric systems serving Ohio and interconnected systems and that the facility will serve the interests of electric system economy and reliability;

The facility will comply with Chapters 3704, 3734 and 6111 of the Revised Code and all rules and standards adopted under Sections 1501.33, 1501.34, and 4561.32 of the Revised Code. In determining whether the facility will comply with all rules and standards adopted under Section 4561.34 of the Revised Code, the Board shall consult with the office of aviation of the division of the multi-modal planning and programs of the Department of Transportation under Section 4361.341 of the Revised Code;

The facility will serve the public interest, convenience, and necessity;

The facility's impact on the viability as agricultural of any land or any land in an existing agricultural district established under Chapter 929 of the Revised Code that is located within the site of the proposed major utility facility and

The facility incorporates maximum feasible water conservation practices as deter-

mined by the Board considering available technology and the nature and economics of various alternatives.

Section 4906.07, Revised Code provides that:

Upon the receipt of an application, complying with section 4906.06 of the Revised Code, the power siting Board shall promptly fix a date for a public hearing thereon not less than sixty nor more than ninety days after such receipt and shall conclude the proceeding as expeditiously as practicable.

On an application for an amendment of a certificate, the board shall hold a hearing in the same manner as a hearing is held on an application for a certificate. If the proposed change in the facility would result in any material increase in any environmental impact of the facility or a substantial change in the location of all or a portion of such facility other than as provided in the alternatives set forth in the application.

The chairman of the power siting board shall cause each application filed with the board to be investigated and shall not less than fifteen days prior to the date any application is set for hearing submit a written report to the board and to the applicant. A copy of such report shall be made available to any person upon request. Such report shall set forth the nature of the investigation, and shall contain recommended findings with regard to division (A) of section 4906.10 of the Revised Code and shall become part of the record and served upon all parties to the proceeding.

An electronic version of the siting application can be found at the Ohio Power Siting Board's website at <http://opsh.ohio.gov>. Search under current cases for Case #07-0715-EL-BTX.
