RE: CP07-208-0000

Dear Ms. Bose,

I have three farms in Franklin County, Indiana that will be crossed by the REX East pipeline. The pipeline will cross the Whitewater River between location markers 393 and 394. I own the property on both sides of the Whitewater River crossing.

I have mentioned to the REX representative in this area, several times that the property on the east side of the river has 2 water wells within 350 feet of the centerline of the easement. These wells are the only source of drinking water to this property.

I would like to put FERC on notice that these wells have not been acknowledged in any way by REX. I would like to know what responsibilities REX has to well owners within the 350 foot marker of their pipeline.

Sincerely,

James A. Hyde
