LONG-DISTANCE RESALE TARIFF

TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PUCO. For example, the 4th revised Sheet 14 would cancel the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. that the PUCO follows in its tariff approval process, the most current sheet number on file with the PUCO is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).

TARIFF FORMAT

(Continued)

- D. Check Sheets - When a tariff filing is made with the PUCO, an updated check sheet accompanies the tariff filing. The check sheet lists the sheet contained in the tariff and gives the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated on the check sheet with an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages.) The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the PUCO.

SECTION 3 - DESCRIPTION OF SERVICE

3.1. Timing of Calls

3.1.1. When Billing Charges Begin and Terminate for Phone Calls

The chargeable time for a long distance call is determined by the duration of the call. Chargeable time begins when connection is established between the calling station and the called station. When the called party picks up is determined by hardware answer supervision, in which the local telephone company sends a signal to the switch or the software utilizing digital format or audio tone detection. In any case, an unanswered call will not be billed. Chargeable time ends when the calling station hangs up or otherwise terminates the call. If the called station hangs up or otherwise terminates the call but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Underlying Carrier=s operator.

3.1.2. Billing Increments

- A. Unless otherwise specified in this tariff, the minimum call duration for billing purposes is 1 minute for a connected call. Customers will not be billed for calls of 6 seconds less. After the first 6 seconds of a call, the Customer will be billed for 1 minute. Calls beyond 1 minute are billed in 1 minute increments.

3.4.2.C. Description of Services

Americatel Prepaid Phone Cards are available in various denominations ranging from \$5 to \$20, or as otherwise specified by Americatel. The rates and charges applicable to Americatel Prepaid Phone Card Service are contained in Section 4.4 below.

All calls must be charged against an Americatel Prepaid Phone Card that has sufficient available balance.

Unless the call is terminated due to depletion of the Card balance, chargeable time ends when the calling party or called station hangs up or otherwise terminates the call.

When the value remaining on the Card is less than the lowest price per first minute, the Card will be retired and the unused balance forfeited.

All promotional offerings of the Company will be filed with and approved by the FPSC with specific starting and ending dates. All such promotions will be offered on a completely non-discriminatory basis with respect to each subscriber in the classification of service and area for which the promotion is offered and will allow each subscriber an equal opportunity for participation.

TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PUCO. For example, the 4th revised Sheet 14 would cancel the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. that the PUCO follows in its tariff approval process, the most current sheet number on file with the PUCO is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets - When a tariff filing is made with the PUCO, an updated check sheet accompanies the tariff filing. The check sheet lists the sheet contained in the tariff and gives the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated on the check sheet with an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages.) The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the PUCO.

- 2.6.6** If the Company initiates legal proceedings to collect any amount due hereunder and the Company substantially prevails in such proceedings, then the Customer shall pay the reasonable attorneys fees and costs of the Company in prosecuting such proceedings and appeals therefrom. In the event that the Company suspends the provision of Services to the Customer pursuant to the provisions of this tariff, the Company will re-connect the Customer to such Services only when all debts of the Customer to the Company, including accrued interest and other expenses and costs of collection, have been fully discharged to the satisfaction of the Company.

When billing functions on behalf of the Company are performed by local exchange telephone companies, or others, the payment conditions and regulations of such companies apply, including any applicable interest and/or late payment charge conditions.

2.8 Liability of the Customer

The Customer, and not the Company, shall be liable for damage to the Underlying Carrier's facilities utilized to provide Services under this tariff that are caused by the negligence or willful act of the Customer or its agent(s), or that result from the improper use of the Underlying Carrier's facilities by the Customer or its agent(s). Nothing in the foregoing sentence shall be interpreted to hold one Customer liable for another Customer's actions.

2.10 Interruption of Service

- 2.10.1** Without incurring liability, the Company may interrupt the provision of services at any time in order to perform tests and inspections to assure compliance with tariff regulations and applicable law, and may continue such interruption until any items of non-compliance so identified are rectified.
- 2.10.2** The Company will consider customer requests for credit for faulty or incorrect connections and for other problems experienced by customers in the use of the Company's services on a case-by-case basis, and will provide reasonable credit in those cases in which it determines that the request is justified and the Company was at fault. All credit allowances shall be subject to the provisions of Section 2.4. above. It shall be the obligation of the customer to notify the Company immediately of any service problems for which a credit allowance is desired. 2.11 Restoration of Service

The use and restoration of Service shall be in accordance with the priority system specified in Part 64, Subpart D of the Rules of the Federal Communications Commission.

2.12 Billing Arrangements

The Customer will either be billed directly by the Company or its intermediary, or charges will be included in the Customer's regular telephone bill pursuant to billing and collection agreements established by the Company or its intermediary with the applicable telephone company. Company may refuse to complete calls made by persons who receive regular telephone bills from a telephone company where for economic, technical and/or operational reasons the Company or its intermediary does not have an effective billing and collection agreement. Employees of the Company do not receive any discount for any of the Company's services.

2.15 Failure to Notify or Enforce

Each of the provisions of this tariff shall remain at all times in full force and effect unless and until modified in writing.

SECTION 3 - DESCRIPTION OF SERVICE

3.1 Timing of Calls

3.1.1 When Billing Charges Begin and Terminate for Phone Calls

The chargeable time for a long distance call is determined by the duration of the call. Chargeable time begins when connection is established between the calling station and the called station. When the called party picks up is determined by hardware answer supervision, in which the local telephone company sends a signal to the switch or the software utilizing digital format or audio tone detection. In any case, an unanswered call will not be billed. Chargeable time ends when the calling station hangs up or otherwise terminates the call. If the called station hangs up or otherwise terminates the call but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Underlying Carrier's operator.

3.1.2 Billing Increments

- A. Unless otherwise specified in this tariff, the minimum call duration for billing purposes is 1 minute for a connected call. Customers will not be billed for calls of 6 seconds less. After the first 6 seconds of a call, the Customer will be billed for 1 minute. Calls beyond 1 minute are billed in 1 minute increments.
